## Geo. L. Walker, in Boston Commercial, Predicts Higher Price Soon for Copper

The Boston Commercial says: "There are two or three factors in the situation to advance the price of copper. One of these is the rather scant supply of labor. No progress is being made in the effort to settle the strike in the Clifton Morenci district, where mines and plants with a productive capacity of 5,500,000 pounds of copper monthly are idle. It is now announced that the workmen at the Nichols electrolytic plant in New Jersey have struck. The company refines nearly 400,000,000 pounds of copper annually, or approximately 25 per cent of the American production and imports. Should this strike be of long duration it would lead to a severe scarcity of ready-to-use copper. It will be remembered also that the Greene Cananea mine, which produces about 40,000,000 pounds of copper annually, was recently obliged to suspend operations because of the war of Mexican troops in its vicinity. These restrictions of production must sooner or later be felt."

"According to the best information now obtainable all of the large producers are well sold out and nearly every one of them has made large sales for distant future delivery. Only a few American consumers have covered their requirements for as much as three months in advance. When they discover that the metal situation is very much stronger than the majority of

them now believe it to be, there may be another panic rush to buy, and if there is the price of the metal probably will advance sharply. I think copper will be selling, three to six months hence, considerably higher than it is now."

The boilers at the Gringo mine are being overhauled and other work necessary to open up the property is in progress.

James E. Cochran Jr. of Bradford, Pa., is registered at the Commercial. He is making an inspection of the mining properties owned by his father.

J. H. Campbell, who was out to Washington Camp this week with a party of gentlemen looking at mining property, left for Nogales Tuesday evening.

Development work at the Cajon mine is going ahead. Ten men are at work, the shaft has been unwatered to the 125 foot level, where a station is being cut. The shaft below this point is being unwatered and retimbered.

J. E. Hopkins came down from Duquesne yesterday and will have charge of the work of raising the old oil tank on West McGraw avenue and putting it in shape to store the oil needed for the Duquesne mill. A number of men will be employed for about ten days.

Mrs. George H. Francis will have an exhibit of art work before the holiday season.

Mr. and Mrs. McKee and little daughters, who have been guests of Mr. and Mrs. Harry B. Riggs, left Tuesday for Nogales and Tucson.

## LOCAL AND PERSONAL NOTES

E. B. Sorrells and family motored to Phoenix Sunday to be present at the state fair.

Wienerwurst by the pound—Sauerkraut in bulk at the Washington Trading Company.—adv

Mrs. W. T. Strickland and Miss Strickland were in from Harshaw Wednesday on a shopping trip.

Repair work is still in progress on Col. Richardson's West McEwen avenue house, which will present a fine appearance on completion.

The teachers of Santa Cruz county in attendance this week at the institute in Phoenix. T. H. Carr, principal of the Patagonia school, left last Saturday morning, and Mrs. Fortune and daughters, Miss Shaw. Mrs. H. M. Stark of the Mowry school and Mrs. R. S. Withrow of the San Rafael school departed Monday morning. Rev. R. S. Withrow was also a visitor to the capital city.

### A Proclamation of Thanksgiving EXECUTIVE DEPARTMENT State of Arizona

Regularly recurring in the cycle of human events comes the annual Day of Thanksgiving, when the people of the world's greatest Republic, with fond reminiscences to the earliest days of their national life, and sanguinely, but joyfully perpetuate the custom of holding special ceremonials and festivities commemorative of God's ubiquitous benevolence for which the sturdy settlers of New England's bleak and barren coast, first gave reverent thanks in unison nearly three hundred years ago.

Today, in Arizona, whether with phenomenal encirclement of distance, that lofty civilization inaugurated by our Puritan forefathers has advanced with irresistible tread in obedience to Destiny's decree, an intelligent, liberty-loving populace, mindful of the perpetual, omniscient guardianship of Divine Providence, adhere to a time-honored custom by greatly acknowledging the beneficence of an omnipotent Creator with appropriate manifestations of gratitude for blessings bountifully bestowed.

There is, in truth, a wealth of providential gifts calling forth from the sovereign people of Arizona such expressions of gratefulness as commonly characterize the observance of religious feastdays. For, during the past twelve months, the commerce of the Old World and the New has fostered in a way almost unprecedented the prosperity and development of the mines and ranches of the State, thereby giving greater incentive and wider scope to the endeavors of those who invest and those who toil. And, meanwhile, notwithstanding the great surge of human strife that has engaged the greater part of the civilized world in deadliest conflict, both our Nation and our State, through the graciousness of a kindly God, have successfully held aloof from the maelstrom of destructive warfare, thereby holding inviolate the tenets of true civilization.

Excelling, moreover, in the scale of human valuation, all material benefits, however essential they may be, are those incalculable blessings of a spiritual, intellectual and civic nature whereby life is rendered richer and more colorful, and wherein modern civilization in our own State, as elsewhere, finds at once its justification and its perpetuity.

NOW, THEREFORE, I, Geo. W. P. Hunt, Governor of Arizona, by virtue of the authority in me vested, do hereby designate and set apart, Thursday, November 25th, A. D. 1915, as a Day of Thanksgiving, on which, in churches and at firesides, reverent thanks may be rendered unto God in grateful recognition of countless blessings divinely conferred. And it is likewise earnestly urged that on the Day thus set apart, the thoughtful and ever considerate people of Arizona may be deeply mindful of the needy, the sick and the sorrowing, so that those who bear the "cross and bitterness of life" may also find reason for thanksgiving.

IN WITNESS WHEREOF,

I have hereunto set my hand (SEAL) and caused the Great Seal of the State of Arizona to be affixed.

Done at Phoenix, the Capital, this 6th day of November, A. D. 1915.

GEO. W. P. HUNT,  
Governor of Arizona.

Attest: SIDNEY P. OSBORN,  
Secretary of State.

Capt. Cady will give a turkey shoot on Sunday.

John McIntyre was in Tuesday from Parker Canyon.

George Curtis was in from the San Rafael Valley on a business trip Wednesday.

Mrs. J. M. Harris was the guest of Mrs. O. H. Weaver in Nogales for several days.

Bo J. Whiteside has accepted a position in the office of the state engineer and will leave for Phoenix tomorrow.

Arcus Reddoch has a large typewriter installed in the county recorder's office by means of which the pages of the record books will be typewritten in the future.

C. C. Chapman, Mrs. Chapman, Miss Willie Chapman, Joe and Lonnie Chapman and Robert Bergier motored to Phoenix this week to attend the state fair.

J. R. Sorrells was a business visitor in Nogales this week, where he purchased a fine touring car and motored to Phoenix with a party of friends to attend the state fair.

Ed Hainline has been making improvements this week at the office of the French Consolidated Mines Company. Mr. Hainline, who is an expert workman, has been busy all summer.

George W. and W. D. Parker, Lester Wood of the San Rafael Valley were state fair visitors this week, motoring to Nogales Saturday and leaving Sunday morning for Phoenix.

Miss Ida Virginia Taylor came down from Kingman this week to take charge of the office work for the French Consolidated Mines Company and act as secretary for Manager Hoy.

Mr. Dodson, who was in Mexico for some years, but left on account of the disturbed condition there, has rented part of Judge A. S. Henderson's Sonoita Valley Land and will farm it.

or in lots of 50 pounds at 5¢ per

pound, delivered at freight depot

or postoffice at Patagonia. Address orders to Brush's Orchard,

Patagonia, Arizona. —adv

Fresh Houma Oysters Tues-

day at the Cold Storage Market.

Fresh salt water fish each Fri-

day.

## Mining Short Courses Success

The first group of short courses for practical miners offered at the University of Arizona will be finished on November 27. They constitute what might be called the Prospector's Course, since the subjects taught are mineralogy, blowpipe analysis, mining geology, petrology, surveying and field geology. The enrollment exceeded expectations and all who took the course are enthusiastic in their statements of the benefits received.

The second group of three courses begins November 29 and runs until January 12. The subjects presented and the time when each will be given, are:

Course 5 Assaying, Nov. 29 to December 11, inclusive.

Course 6 Cyanidation and metallurgy of gold and silver, December 13 to 23, inclusive.

Course 7 Concentration and flotation, January 3 to 23, inclusive.

These courses are open to any one who can read and write and do simple problems in arithmetic, and the fee for each course is only \$1 for residents of Arizona. A man may enroll for any or all of the courses, as he desires.

All mining men realize the very great value of knowing how to assay their own ores, and a knowledge of practical cyanidation, flotation, or other forms of extraction or concentration may well prove the salvation of a property far from public smelters or mills. For these reasons, it is anticipated that the capacity of the College of Mines and Engineering will be taxed to accommodate all who desire instruction in these lines.

The idea of a two weeks' course in one subject, rather than a six or eight weeks' course covering a large number, is unique, and is proving highly successful. This plan makes it possible to impart a practical, working knowledge of the topic studied, rather than a mere superficial presentation of its principles.

A circular containing descrip-

## County Farm Advisor's Visits

A. L. Paschall attended the following meetings in Santa Cruz county this month:

Sonoita, Nov. 9, farm visits; Mark Manning, local leader.

Elgin, Nov. 10, farm visits; Isaac P. Fraizer, local leader.

Elgin, Nov. 11, group meeting on Fraizer farm; J. M. Fraizer, local leader.

Elgin, Nov. 12, farm visits en route to Benson.

Community work, fall and winter plowing, winter crops and livestock were the subjects discussed.

Miss Grace Van Osdale was shopping in town Wednesday, returning to her San Rafael ranch the same day.

Mrs. Ray Ferguson and little son came in Tuesday evening to join Dr. Ferguson, who has been here some time.

Miss Rosina Weiland and H. A. Corpe were married in Nogales last Saturday. Miss Weiland is a daughter of George Weiland of Jefferson Camp. Mr. Corpe was a recent editor and part owner of the Nogales Daily Herald, but sold his interest last week. The young couple have a large number of friends in the county, all of whom wish them prosperity and happiness.

Mr. and Mrs. Mark Manning of Sonoita were in Nogales several days, Mr. Manning receiving treatment for an injury to his leg, received early in October. He was unable to gather the county exhibits for the state fair, which was done by J. B. Bristol, and taken to Phoenix by A. H. DeReimer, who was appointed state fair commissioner for this county following the resignation of Mr. Manning. The Mannings are possessors of a beautiful new touring car.

tions of the various courses and other information may be obtained by applying to the Dean of the College of Mines and Engineering, University of Arizona, Tucson.

## Help Your Digestion--

Why Not?

It is one of the most important functions of the body and has a direct influence on your general health and strength.

A Reliable First Aid is

### HOSTETTER'S STOMACH BITTERS

# H

#### MOST REAL FRIEND OF MAN

Dog is a Comrade Whose Loyalty Never Wavers, Whose Devotion is Certain.

Your dog is ready to go with you anywhere, at any time, through anything, like Good Deeds in the old play. He is something more than a respectable family possession, a toy, a part of an exhibition; he is a comrade, whose loyalty never wavers, whose devotion never abandons itself; who responds to your mood without pluming himself upon his tact and who neither commiserates nor flatters.

After you have taken a few tramps together you understand each other perfectly, and there is no fear of either changing his mind unless you yourself prove fickle past belief.

And, when you are no longer friends with your dog, you are beyond saving—Countryside Magazine.

#### NEW MODERN DANCING

E. Fletcher Hallamore, the leading Dancing Expert and Instructor in New York City, writes: "I have used ALLEN'S FOOT-EASE, the antieptic powder to be shaken into the shoes, for ten years, and recommend it to all my pupils." It cures and prevents sore feet. Sold by all Drug and Department Stores, 25c. Sample FREE. Address, Allen S. Olmsted, Le Roy, N. Y. (Adv.)

#### Measure of the Dollar.

It may be useful to know that a silver quarter of a dollar measures three-fourths of an inch across its circumference; a half-dollar one inch and the "dollar of our daddies" one and a half inches.

#### Of the Same Opinion.

Mildred—"Don't you think Miss Helen looks much younger in her new hat?" Helen—"Indeed I do. Why, Mildred, it makes her look but very little older than she says she is."—Judge.

#### No Use to Him.

The prisoner threw the magazines across his cell in disgust, and cursed eloquently. "Nothin' but continued stories," he growled, "an' I'm to be hung next Tuesday."—Chicago Herald

#### Splash of Big Shell.

When a twelve-inch shell strikes the water it throws a "splash" higher than a battleship's mast. The "splash" weighs about 2,000 tons, enough to drown a small ship.

#### United States Army Rations.

The average daily field ration of the United States army is made up as follows: Bacon, 12 ounces, or fresh meat, 20 ounces; bread, 18 ounces; beans, 2.4 ounces; potatoes, 20 ounces; prunes or preserves, 1.28 ounces; coffee, 1.12 ounces; sugar, 3.2 ounces; evaporated milk, 5 ounces; vinegar, .16 gill; salt, .64 ounces; pepper (black), .04 ounce; lard, 6.4 ounces; butter, .5 ounce.

Of this ration, just a portion is carried individually by the soldier, the rest, such as butter, lard, pepper and syrup, are given in bulk to the companies and then distributed to the men at meal time. This ration is greater than necessary, and the men trade in the surplus for delicacies.

#### THE IDEAL EYE BATH

"My eyes smart and burn," or "How my eyes ache." You hear these remarks and others almost daily and how unnecessary it is to suffer from eyestrain or other forms of eye weakness. When your eyes pain and are inflamed or your sight is hazy, a few drops of "O'BEE EYERINE" will soothe the discomfort and clear the vision quickly. For those who wear glasses, "O'BEE EYERINE" is an ideal remedy. Your eyes should brighten and inflammation vanish almost from the beginning of treatment. Now do not neglect caring for your eyes but get a bottle of "O'BEE EYERINE" from your druggist or we will send postpaid either a 25c or 50c size, as you may order.

#### A Female Veteran.

He—Isn't that Gen. X. and his daughter over there? She—Yes. They say that she has been through more engagements than her old father.—Boston Evening Transcript.

#### DRIED FRUITS IN DESSERTS

Properly Used, It May Be Made to Serve to as Good Purpose as the Fresh.

Dried fruit is quite as nice as fresh, but it has been overworked in the alleged interest of economy. It will make a dessert second to none, if properly used.

The covered enameled ware casserole is the proper cooking utensil for dried fruit. Let it soak over night and cook very slowly, and it will regain its shape and also its finest flavor. In addition it should have some sort of accompanying flavor. Prunes soaked in just enough wine to cover them and then cooked in this way taste like something costly. Apricots cooked with raisins are good. So are dried apples cooked in the good, old-fashioned way, in cider. A mixture of two or three kinds of dried fruit, all cooked together, is good. Dried peaches—add a little vanilla to the syrup when they are done. Dried cherries are not used here to any extent, but in England, where the cherry is an old and famous fruit, they are used with currants in plum cake, and very nice they are. It is perfectly practical to use any sort of dried fruit, cooked slowly in this way, to add flavor to bread puddings or steamed puddings. The fruit can be either mixed with the bread pudding or put in the dish with the bread on top, or in layers; but when it is used the bread should not be soaked in milk; the fruit juice will make enough moisture, and the bread should merely be soaked enough in water to make it soft, and cooked with the fruit, covered.

#### FOR THE MORNING REPAST

Some Dishes That Are More Than Usually Acceptable in the Hot Weather.

In the summer this meal should be simple and of wholesome, easily digested food. Of course things must be tasty, and quite as much thought and pains should be expended on a light breakfast as on a heavy one. Foods should be selected in reference to their suitability to one another and the season. The Sunday morning breakfast should be different. Banish from the Sunday morning breakfast table anything that is served on week day mornings except coffee.

Here are a few simple menus which may serve as a guide:

Peaches or stewed pears, hominy, poached eggs on toast, cocoanut, coffee.

Raspberries or blackberries, fried eggplant, toast, coffee.

Blackberries, cream of wheat, molded eggs, toast, coffee.

Fruit, cereal, small broiled lamb chops, with cold asparagus; rolls, coffee.

Fruit, cereal, an omelet with peas, asparagus or tomatoes, biscuits, coffee.

Fruit, cereal, a well-soaked salt mackerel, boiled or broiled, with a cream parley sauce; rolls, cocoanut.

Fruit, cereal, creamed dried beef, muffins, coffee. Chop fine a cupful of dried beef. Put over the fire with one gill of cream or milk. Season with pepper and stir in four beaten eggs. When thick turn over squares of hot buttered toast.

Orange juice, cereal, broiled mackerel, baked potatoes, toast, coffee.

Carafe Frappe.

Frappé, as most persons know, is to freeze, and carafe in the glass decanter smart folk use at their functions for holding drinking water. Fill the bottles with distilled water to within an inch of the top and then sink them to two-thirds depth in a tub of ice, as for making ice cream; use less salt than for cream, and do not have the ice cover the decanters any higher than stated, as the glass may break. Stopper them with bits of absorbent cotton during the freezing. The ice forms at the bottom of the bottles and the displaced water rises, and as long as the ice remains the decanters can be refilled and used after a few minutes.

Bake Vegetables.

Do not boil vegetables in the old-fashioned way and throw away most of the substance in the water.

Cook them in the oven and preserve the flavor and prevent odors in the house.

This last is especially true of sauerkraut, cabbage and onions. If you have no casserole cook them in a granite pan, placed in a pan of water in the oven. If to be served with a cream sauce, pour a thin sauce over the raw vegetables and cook till tender, or cook with butter or meat flavoring or bacon.

Baked Sausages.

Place them in a dripping pan in single layer and bake in a moderate oven; turn them when half done, that they may be brown on both sides; serve with pieces of toast between them, having cut the toast about the size of the sausages and moistened with a little of the sausage fat.

Potato and Pea Salad.

Cook the peas in salted water; when done, put aside to cool; add to them cold boiled potatoes cut in small dice; also a hard boiled egg and a white, boiled onion, chopped fine; pour over them a dressing made of oil, lemon juice, salt and pepper to taste.

To Save the Fruit Jar.

Before pouring hot fruit into a glass dish or jar, place the receptacle on a cloth wet in cold water. This prevents the glass from breaking.—Good Housekeeping Magazine.

#### SEES MOTHER FIRST TIME

#### PREVENTION OF "SHEEP FLY"

Shearing Cuts Ought to Be Treated at Once—Machines Tend to Reduce Cause of Attack.

The sheep that is "struck by the fly" is at first restless and excitable, stamps its feet, runs about, and sometimes tries to bite the part. Later it becomes dull and dejected, loses its appetite, and stands listlessly about, with its head hanging down, apart from the flock. The wool at the seat of the injury is rough and raised, and as the maggots burrow their way into the skin and tissues, causing suppuration, close examination shows a moving mass of them. Unless these maggots are destroyed and the wound kept clean, the torture ends in death.

"Prevention is better than cure," and in the case of "fly" it saves the animal much pain and annoyance and considerable damage to the fleece. Prevention includes the prompt treatment of shearing cuts, fighting wounds or abrasions of the skin generally at the time of the infliction, and especially of shearing wounds, which are too often neglected. The increasing employment of machines in shearing will tend to the reduction of this cause of "fly" attack.

The removal of dirty locks of wool and the trimming of the soiled parts is imperative. These precautions, however, will not always suffice, for the yolk of the wool will prove sufficient attraction unless poisoned or rendered distasteful to the fly, and the pest will sometimes strike, especially on hot days, and when there is thunder in the air.

#### SOLVE FARM LABOR PROBLEM

Labor-Saving Machines Are Great Aid in Keeping Reliable Hired Men—Medicine Chest Is Handy.

Resinol ointment, with resinol soap, stops itching instantly, quickly and easily heals the most distressing cases of eczema, heat-rash, ringworm or similar tormenting skin or scalp eruptions, and clears away pimples, blackheads, redness, roughness, and dampness, when other treatments have proven a waste of time and money.

Physicians have prescribed this resinol treatment for twenty years, while thousands who have been cured say,

"What resinol did for us it will do for you!" Every druggist sells resinol ointment. (Advt.)

Dairy equipment is one of the greatest aids in solving the farm labor problem. Observation leads one to believe that the farmers who are trying to run a good dairy farm are having the least trouble in keeping reliable hired men. The man who is responsible for the condition of a respectable looking dairy barn equipped with modern labor-saving appliances feels that he owns a position and not a mere job. Unless he is the kind of employee who can succeed nowhere he will appreciate the efforts of the farmer to produce good milk in an economical manner. The hired man feels that it is worth while to co-operate.

A good medicine chest is a necessary feature of the dairy barn. The farmer cannot be his own veterinarian, but he can keep a supply of simple remedies for the bovine trouble which can be cured by the use of simple applications. This chest should not consist of a dirty cloth and a couple of empty bottles either, as "dirty diseases" cause a vast amount of trouble among all kinds of animals, and if wounds are not carefully treated and thoroughly protected from infection, the home treatment always leads to unfortunate developments.

#### BURIAL IS STOPPED BY LAW

Woman Gets Injunction to Prevent Interment of Her Uncle in Chelsea (Mass.) Cemetery.

Boston, Mass.—Injunction proceedings to prevent the burial of her uncle, Arthur G. Norse, at the naval cemetery in Chelsea, Mass., because it will cause her grief, humiliation and an irreparable loss if his interment takes place there, have been begun in the equity session of the superior court of Suffolk county by Helen V. Pearson of Philadelphia.

She asks possession of the body "for proper burial in a proper ground." Her action is aimed against George Lee of Boston and George Doherty of Somerville as defendants.

Lee, she says, engaged Doherty, an undertaker, to bury her uncle's body without consulting her. The grave has been prepared at the naval cemetery.

Judge McLaughlin ordered counsel to complete pleadings for a hearing.

#### WATCH, GONE YEARS, FOUND

Lost in 1911, Found in 1915 in Feed Yard With Case Only Slightly Dent.

Klamath Falls, Ore.—During the summer of 1911 Matchenbacher of this city, then a recent graduate from the high school here, lost his seventeen-jewel gold hunting case Illinois watch and fob while working in the hay field in the Ezell stock farm, south of this city.

The watch and fob were found the other day in the feed yard on the Ezell farm by one of the workmen. Matchenbacher's name was on the fob.

When found the case was slightly dent and three jewels broken.

#### LOG DRIVE HEADS FOR SEA

More Than 15,000,000 Feet of Timber Break Boom and Go Down Miramichi River, N. B.

Chatham, N. B.—Between 15,000,000 and 20,000,000 feet of logs were drifting down the Miramichi river and out into the Gulf of St. Lawrence as the result of the breaking of a big boom in the river. Every available craft was engaged in salvage work. The main boom, holding 90,000,000 feet, was in danger of giving way, and there was a slight break in a smaller boom, but the logs held by the latter were being caught.

#### POLE AND PEATON

PEATON'S POLE AND PEATON
