

PATAGONIA IS IN THE HEART OF THE WORLD'S RICHEST COPPER, SILVER, GOLD AND LEAD DISTRICTS

SANTA CRUZ PATAGONIAN

JOIN PATAGONIA'S CHAMBER OF COMMERCE & MINES AND BE A BOOSTER FOR THE TOWN AND DISTRICT.

VOL. XI

PATAGONIA, SANTA CRUZ COUNTY, ARIZONA, FRIDAY, MARCH 23, 1923

NO. 18

PERSONAL AND SOCIAL

Mr. and Mrs. A. H. Heck, Mr. Tuttle, and Miss Robinson of Bisbee called at the Patagonian office Sunday on their way to Nogales, where they took dinner, returning home in the evening.

Mr. and Mrs. J. O. Duffy of Tucson spent a week-end recently in Patagonia as the guests of Mr. and Mrs. Ed Henry and Mrs. Winifred Jolly of the Patagonia drug store.

Mr. and Mrs. C. L. Northern spent last Saturday in the county seat.

Mr. and Mrs. James F. Reilly spent last Saturday visiting in Nogales.

Ed Henry of the Patagonia Drug Store took B. Maier, Benson merchant, on his rounds last week to visit the rural trade.

Senator and Mrs. C. A. Pierce were Nogales visitors last Saturday.

Barnett & Barnett, City Market, meats.—Advertisement.

Stone Collie of Vaughn was a Patagonia visitor Tuesday. He was accompanied by County Agent Gould.

Mr. and Mrs. Duane Bird and children were business visitors to Patagonia and Sonoita Sunday.

Mr. and Mrs. Pete Bergier were in town Monday evening.

Mrs. Emily T. Deitmer, mother of ex-County Attorney A. H. DeRiemer, who has been visiting in Nogales left Wednesday for Washington, D. C., where she makes her home with her daughter.

Frank Edinborough of Nogales, state examiner, is in Nogales examining the county's records and books at the court house.

Nogales Rotarians left early Thursday on a motorcade to Tucson to attend the first eighth district Rotary International Convention in that city yesterday and today.

Army Shoes and Leather Puttees at the Army Store, Nogales.—Advertisement.

Oliver Rothrock and younger brother spent several days in town this week from their Elgin ranch.

Richard Kunde has taken charge of the A. S. Henderson ranch, north of Patagonia, and Mauro Soldate, formerly in charge, has taken a position with the Rupert mine.

Mr. and Mrs. Pete Etchells, Mrs. Babcock and P. O'Neill were in from the Mansfield Tuesday.

Mrs. Pete Perry and children were in Patagonia Monday and Tuesday from Perry ranch in Squaw Gulch.

Mr. and Mrs. Bob Bergier of Alto were in town Monday from their ranch visiting Mrs. Bergier's mother, Mrs. C. C. Chapman.

Breeches for ladies, men and boys at the Army Store, Nogales.—Advertisement.

Bud Baldwin of the San Rafael valley was a business visitor to Patagonia Wednesday.

Lou Koller of Harshaw was a business visitor in town Wednesday.

Ben and Lewis Curtis of the San Rafael valley left for California Monday to join the family, who have been on the coast for several months.

Dr. S. W. Chenoweth, county physician, of Nogales, is in Los Angeles on business. He is expected home this week.

MILK MAIZE—Good, clean milk maize, \$2.50 per hundred pounds. Apply to Howard Keener, Patagonia.

Neil McDonald was a Nogales visitor Monday.

L. H. Watkins, proprietor of the Watkins Overland Co. of Nogales, has been on the sick list for several days. Mrs. Watkins says he will be back at his office soon.

Mr. and Mrs. S. W. Kenward and W. P. Capehart, president of the First State Bank of Patagonia were business visitors to Tucson Monday and Tuesday.

Mr. and Mrs. R. R. Earhart of Nogales arrived home Sunday evening from Phoenix. They will remain at their ranch on the Patagonia-Nogales road for several days.

E. R. Cady, field superintendent for the Nogales Oil and Gas Co., spent the week-end in Nogales, returning Monday morning to the well at Elgin.

CORN FOR SALE—Several hundred pounds at \$2.50 per hundred. Howard Keener, Patagonia.

Mr. and Mrs. A. L. Kinsley and son, Otho, were Nogales business visitors Tuesday and Wednesday. They stopped at the Patagonian office for a brief visit on their way to their San Rafael valley ranch.

FOR SALE—Several head of purebred Hereford bulls. These animals are all eligible for registration in the Hereford breeders' books. Apply to C. L. Northern, Patagonia, Ariz.

Mrs. Frank Powers of the World's Fair mine spent Tuesday in Patagonia.

Mr. and Mrs. Rollin R. Bleakley returned today to Franklin, Pa., where they reside. Mr. Bleakley is a nephew of the late Col. R. R. Richardson.

The Elgin schoolhouse has a new hardwood floor. The work was done by Irm Johnson.

O. Duggar and Dr. Olsen of Nogales attended the Sonoita dance Saturday night.

Wesley Montgomery of the First State Bank of Patagonia spent Sunday in Tucson, and Buck Blabon says: "Woodie Gatlin 'made hay while the sun shone.'"

Mr. and Mrs. Babcock, Commercial hotel guests, went to Tucson Tuesday for a short visit.

Ed Pattee has leased his ranch at Elgin to Mr. Davis of Texas.

Mr. and Mrs. Chris Eck of Tucson attended the Sonoita dance Saturday night. Mrs. Eck was formerly Miss Stella Schultz of Patagonia.

FOR SALE—Several hundred pounds of good corn and milo maize for sale at \$2.50 per hundred. Howard Keener, Patagonia, Ariz.

Craig Pottinger, editor of the Nogales Democrat, and Mr. Thorp were Patagonia visitors Sunday.

T. P. Steins returned from a business trip to Tucson and Nogales Sunday.

R. L. Wood was a business visitor to the county seat several days, leaving Friday and returning Tuesday.

Mr. and Mrs. Otho Kinsley went to Nogales Tuesday, from which place Mrs. Kinsley departed for Ash Fork to attend the funeral of her sister, Mrs. W. E. Pitts, who died suddenly last Monday morning.

R. C. Blabon installed new hot water system at the Commercial hotel this week.

Frank Mitchell, who has been suffering for some time from tuberculosis, was taken to Tucson this week in a serious condition.

Miss Ethyl McCormick, daughter of Mrs. E. D. Farley, left Saturday for Los Angeles, where she will remain indefinitely.

Mrs. Nona Upright, a guest at the Commercial hotel, left Sunday for a visit to Tucson.

Mrs. Herman Bender, who had been in Los Angeles for some time, returned Saturday much improved in health.

Tom Wood, of Lown & Wood, contractors, was a business visitor to Nogales Tuesday. His firm is building the new bridge across Sonoita creek at Patagonia.

WILLIAM D. UPSHAW

Representative William D. Uphaw of Georgia.

MINES AND MINERS

The Black Eagle mine, at Harshaw, has just struck a fine body of high-grade silver ore in the bottom of the shaft. While no assay has been made of the new fine, samples brought to Patagonia this week are said to run very high in silver, the ore carrying some lead. The Black Eagle, we have repeatedly predicted, is to become one of the best-paying mines in this district. The lessees, Messrs. McCutchan, Hogan & Scheler, are practical miners and hard workers and deserve success. The extent of the new high-grade ore body cannot, at this time, be determined.

Three carloads of ore left Patagonia Tuesday consigned to Douglas and El Paso smelters. The Black Eagle shipped one car, the Morning Glory one, and a car of mixed ore from the Salero made up the other.

James Reagan and Mr. and Mrs. Earl Baker went to Tucson Sunday, where Mr. Reagan was called in connection with Rogan Brothers' suit against the owners of a lead mine at Winkelman on which they had a bond and lease.

Mr. P. S. Schilling of the Tres de Mayo and Milton Welber of Douglas, made an inspection trip to the World's Fair mine at Harshaw Wednesday morning.

J. J. Farley, who fell down a shaft at the Jefferson mine in the Santa Rita and sustained a badly sprained ankle, is hobbling around on crutches. It will be some time before he can resume work.

Bob Harrington, Mr. Gibbons and Bob Greenwood of Nogales went out to the Hermosa mine Wednesday with Neil McDonald to inspect the property.

John Hoy, formerly of Patagonia, a well-known mining man, who has been in the east for several months, has returned to Nogales, where his family has been living since Mr. Hoy severed his connection with the Trench mine at Harshaw.

Mr. P. S. Schilling of the Tres de Mayo, shipped between six and seven tons of high-grade vanadium-silver ore to the smelter via Patagonia this week. H. H. McCutchan did the hauling.

Mr. Welber and Mr. Shilling made an inspection of the World's Fair mine this week.

Fred Goldsmith was in town Tuesday from the 3-R mine.

Frank Reichert was in town from the Drago-Z mine this week.

CHURCH NOTICE

Earl Cropp, Pastor.

Sunday school—10 a. m. Preaching—11 a. m. Subject for the morning sermon will be "The Palm Tree Christian." Text, Psalms, 92:12, "The righteous shall flourish like the palm tree." Miss Grace Slater will favor us with a vocal solo. Dr. H. H. Sherman will render his interpretation of "El Trovador." He also will play the offertory. Services will be conducted in the schoolhouse. You are cordially invited to be present.

W. H. BARNETT SUDDENLY PASSES AWAY

Another pioneer of Patagonia passed to his last reward Thursday afternoon at 1:30 o'clock, when the Grim Reaper suddenly cut off the earthly existence of W. H. Barnett, of Barnett & Barnett; butchers, at his home here. Death resulted from a sudden attack of acute indigestion and hardening of the arteries, according to Dr. H. H. Sherman, who attended the patient.

Mr. Barnett was 64 years old at the time of his death, and had been a resident of Patagonia 43 years. He came here from Philadelphia, Pa., and was for many years engaged in the cattle business, being at one time a partner of the late Col. R. R. Richardson, and later became identified with mining, developing the Happy Jack mine.

Deceased is survived by three sons, Fred, Bertram and Harry, and three daughters, Mrs. Gertrude McCutchan of Tombstone, Mrs. Lavinia Steen of Boise, Idaho, and Miss Alice Barnett of El Paso.

Mr. Barnett was a member of the Masonic and Elks lodges.

The funeral services were held in the Opera House this afternoon at 4 o'clock. Interment was made in the Patagonia cemetery.

MRS. W. E. PITTS DIES AT ASH FORK, ARIZONA

Mr. George W. Parker Monday received the sad news of the sudden death at Ash Fork, Ariz., of Mrs. W. E. Pitts, formerly Bessie Gates of the San Rafael valley.

Mrs. Pitt's mother, who was a relative of Mrs. Parker, died when her children were very young and they were raised by Mr. and Mrs. Parker at their ranch in the San Rafael valley. Beside the foster parents of the deceased, she is survived by a sister, Mrs. C. V. Kinsley of San Rafael valley, and a brother, William Gates, who owns a ranch about 25 miles from Amado, and her widower, W. E. Pitts of Ash Fork, a nephew of Senator Henry F. Ashurst.

The cause of Mrs. Pitts' death was not known here Thursday, as no details were given to Mrs. Parker when she received the sad news of the young woman's death.

Mrs. O. V. Kinsley left Wednesday to attend the funeral, which was held at Ash Fork Thursday, where interment was made.

The surviving relatives have the heartfelt sympathy of their friends in their bereavement.

GIRL SERIOUSLY BURNED

Reynolda Duarte, a Mexican girl, was severely burned today the body, right leg and arm Monday morning about 2 o'clock at the Amado home, when her dress became ignited in some mysterious manner. When the girl noticed her dress was afire she started running, in stead of trying to extinguish the flame. She, perhaps, was frightened and lost her reasoning powers. At first it was thought she was burned so badly that recovery was impossible, but Wednesday Dr. Sherman, who is attending her, stated she would recover if no complications set in.

Mrs. Emston Knight of Elgin was a visitor to Patagonia Saturday.

MICKIE SAYS—

"SPEAKIN' OF ADS, JOHANN'S WHALE HAD A HUNK OF LUCK AND PULLED IN A CUSTOMER WITHOUT ANY PUBLICITY, BUT IT IS RECORDED THAT HE COULDN'T HOLD HIM!"

CHARLES SCHWAB

KERMIT ROOSEVELT

Recent photograph of Kermit Roosevelt, son of the colonel, who is now on a big game hunting expedition in Korea.

VAUGHN

James Ortega has finished ploughing the Jones place and expects to go to Elgin to work.

W. H. Collie has resumed his duties as maintenance superintendent on the Patagonia and Cochise highway. He has an efficient crew of assistants.

Mrs. W. Muir, who has been visiting in the Vaughn section, attended the dance at Sonoita last Saturday night, accompanied by Mr. Boyd of Fort Huachuca.

Clyde Shields visited "home folks" last week, taking a vacation from his duties as cowboy for the First National Bank of Nogales.

Judge John A. McCarty has been busy with the duties of his office as justice of the peace for the past week.

William Anderson is ploughing his ranch, preparatory to putting in a crop this spring.

Henry Belne of Tucson visited in this section last week and took down and stored some fencing he had erected on the national forest on land he had leased for grazing purposes.

Mrs. James Fraizer has ordered 200 baby chicks and expects to repeat the order soon and is building new chicken houses and runs. She expects to go into the chicken raising business on a large scale.

Mr. and Mrs. Frank Berry visited in the Vaughn district last week.

James Ortega had his best saddle horse stolen recently, supposedly by Mexicans, as there are numbers of them in this neighborhood who ought to be deported. There has been quite a bit of thievery here lately.

MRS. G. LOU STEVENS UNDERGOES SERIOUS OPERATION

Last Monday, Mrs. G. Lou Stevens was operated on for appendicitis and gall bladder trouble. Owing to the fact that Mrs. Stevens is possessed of a hardy constitution, she withstood the severe operations well, and is rapidly recovering. Her husband has been in Nogales since the operation and is relieved to know that Mrs. Stevens is out of danger.

Mrs. Stevens is a daughter of Mr. and Mrs. James Reagan of Patagonia, and her many friends and relatives will be glad to hear of her safety after the rather serious operations.

COUNTY INSTITUTE MARCH 26, 27

The regular County Institute for Teachers will be held in Nogales Monday and Tuesday, March 26 and 27.

The rural teachers will have Wednesday, the 28th, also. Superintendent O. C. Case, J. A. Riggins, A. M. Davis, of Phoenix; Miss Helen G. Roberts of Tempe, and Dr. Harvey L. Ely of the University of California, will be the speakers, and interesting meetings are assured.

Dr. Ely will speak upon "The Problem of Illiteracy" on Monday evening, after which an informal reception will be held.

The public is cordially invited to attend the sessions of the Institute.

Morning Glory Mine Showing Bright Prospects for Future

Company Developing Along Proper Lines Under Efficient Direction of Superintendent Wilson; Mine Shipping Ore Regularly and Has Immense Body of Milling One Blocked Out; Money Being Used Underground Where It Will Bring Quickest Returns

Last Monday we made a trip to the Morning Glory mine, near Mowry, and explored the workings in company with the superintendent, Mr. C. B. Wilson, to gather first-hand information concerning the property. We were very much surprised at what we saw, as this was our first visit to the property, and our idea of the mine was that it was just one of the many hundreds of mines in this neighborhood. But first, before telling our readers what the mine is doing today, we will quote from a report by Schrader, made for the United States geological survey department in 1915:

"Morning Glory Mine"

"The Morning Glory mine is 1 1/2 miles west of the Mowry mine and 1/2 of a mile northwest of the stage road, on the north side of a shallow gulch that drains northward into Alum Gulch, at an elevation of about 5600 feet. It is easy of access by a wagon road ascending the gulch. The deposit was discovered late in the 80's by David Neal, who, with A. S. Henderson, soon took out considerable silver ore, which he roasted at Mowry or leached. On reaching the sulphide zone, which then seemed to contain mostly pyrite, he abandoned the mine.

"About 1895 or 1896 the mine was relocated by Richard Farrell and wife, from whom it was acquired in 1905 by the present owner, C. B. Wilson of Helvetia. At the time of visit, Mr. Wilson was sinking on the property, which then had about 2900 tons of low-grade ore blocked out or in sight. Since then, the mine has been an almost steady producer on a moderate scale and has shipped during a considerable part of this period two carloads of ore a week. The production in 1907 is given as \$13,371 from copper-sulphide ore which yielded 54,186 pounds of copper and 3788 ounces of silver.

"Recently the mine is reported to have 50,000 tons of good copper-sulphide ore blocked out, which is said to average 75 per cent in iron and sulphur combined, and about 3.5 per cent each in copper and silver.

"The mine is opened mainly by a 200-foot shaft, inclined 45 degrees, and contains three levels, 50, 100, and 150 feet below the surface, on which it is developed by shafts and stopes for a horizontal distance of about 200 feet.

"The country rock is the Paleozoic limestone, which dips 40 degrees WNW. It is in part siliceous, cherty or flinty, and locally pyritic and seemingly contains some interbedded strata of quartzite. It is overlain in the surrounding hills by the Mesozoic sedimentary rocks. Oxidation extends to a depth of about 40 feet. The mine makes about 2600 gallons of water in 24 hours.

"The deposits occur principally in 5 so-called vein or ore bed, which dips 40 degrees WNW, conformably with the enclosing rocks. The footwall is greenish-gray siliceous and in part epidotized limestone or quartzite with very finely disseminated pyrite. The ore is from 4 to 10 feet in width and seems to represent a mineralized sheet or sill of intrusive rhyolite or "porphyry," which for the most part has been completely replaced. It contains mainly pyrite and chalcopyrite, with a little chlorite and in places sphalerite. Some hematite and specularite are present near the surface, where the deposit is readily leached. The gangue minerals besides the altered rocks are quartz and calcite in moderate amount, with a little barite.

"The ore in general is oxidized and principally free-milling down to the 50-foot level, but in the north end of the mine, which contains considerable zinc, oxidation extends much deeper. The ore is chiefly of low grade, but a considerable part of it is said to yield about 17 per cent in copper and 15 ounces to the ton in silver. Some of it carries principally zinc, but the sphalerite seems to be restricted to the upper levels, where in places it constitutes a relatively pure ore containing, it is said, 60 per cent or more in zinc. If smelting facilities were installed in the

district or freight rates were slightly lower this ore would be of commercial value for its zinc content.

"The ore of this mine is in demand by the smelters in Sonora, across the Mexican boundary, for its sulphur content, which is useful in smelting their more basic ores. During 1912 the ore was being mostly shipped to the Pioneer smelter, at Sahuarita, the owners of which are said to have recently taken a bond on the property.

"Besides the ore bed above described, which has been the source of the ore produced, there is also near the bottom of the shaft a younger undeveloped 4-foot vein which dips 45 degrees S, and cuts the ore bed diagonally. This vein contains ore similar to that of the ore bed except that it averages a little higher in copper and carries but little zinc.

"The ore was probably formed by hydrothermal solutions that accompanied or followed the intrusion of the rhyolite, which occurs near by in dikes and masses."

What the Mine Is Doing Today

So much for the old workings. There has been much development work done since Schrader made his report to the geological survey, and we will give you the information we gathered minus the technical terms used by a mining engineer or geologist. We have but a layman's knowledge of mining.

Tel buildings are all in fine condition. New ore bins have lately been built, also a fine concrete boarding house, which contains space for a commissary. There is a good fresh water system, water being pumped from a well into storage tanks, for domestic and other purposes.

There is a well-equipped blacksmith shop, a change room supplied with hot and cold water, shower bath, etc.; tunnels have tracks laid for ore cars; new timbers have been placed where old ones have decayed, and others will be renewed as soon as the work can be done. Mr. Wilson, the superintendent, is putting everything connected with the property in first-class condition.

A new compressor and engine have just been installed to operate air drills and handle water when tel permanent water level is reached in the winz now being sunk and are working constantly. Fifteen men compose the working force and their number will be increased as soon as made for them by the further opening up of the shipping ore now being taken out at the rate of approximately 300 tons a month. The ore now going to the smelter runs 5 1/2 per cent copper and 7 1/2 ounces in silver, ranging from a winz and upraise in the new workings. The ore is increasing in value as depth is reached.

Officers of the Company

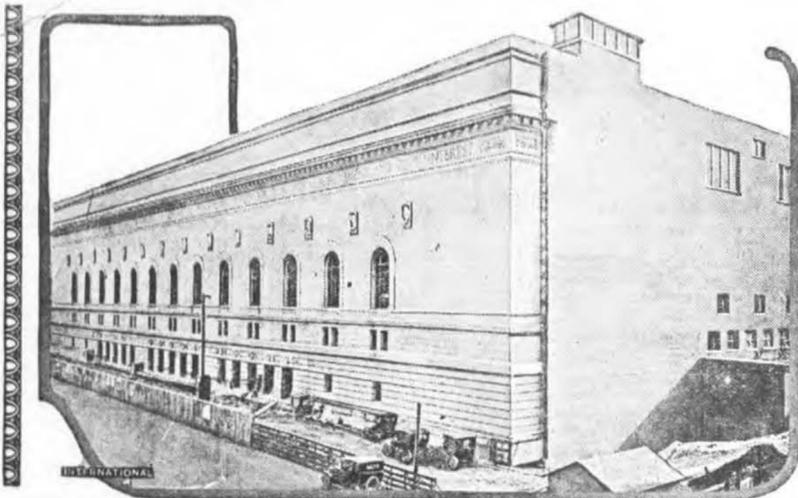

Officers of the company, now known as the Morning Glory Mining Company, are W. H. Reber, president; W. L. Houck, secretary-treasurer, and J. B. Scheler, general manager, of Serran, Pa., and C. B. Wilson, superintendent, of Patagonia.

The 1200 feet of work (shafts, drifts, winzes and upraises) in the old workings has been augmented by 2200 feet of work on the lower level of the new workings, and together they contain about 800 feet of shafts and drifts. The total amount of work done in the mine totals more than 4000 feet.

Ore has been out in several places in the tunnels, the Mineral Hill ore body being 220 feet wide and 600 feet long, which runs about 1 1/2 per cent copper and 2 ounces in silver and is increasing in value with depth. This ore body alone contains many thousands of tons of good milling grade ore and would warrant the installation of a mill and concentrator, as it is of too low a grade for profitable shipment, owing to the fact that there is no railroad to the property and no smelter nearer than Douglas, to which city the mine is now shipping its higher-grade product. The ore bodies in the Morning Glory mine are iron, sulphur, zinc, copper and silver, all of which are considered to be

(Continued on page 8)

Cleveland Ready for Big Conventions

Cleveland is now in the ring for the honor of being the city chosen for the next national conventions of the Democratic and Republican parties. The picture shows the new Cleveland Public hall, which has a seating capacity of 12,000. The building cost \$8,000,000 and has 15 front entrances.

Related to Three Presidents

Kin to three former presidents of the United States is the distinction claimed by William Symmes of Chicago. Symmes related his story to the Salvation Army, to which he and his wife appealed for aid. Andrew Jackson was his uncle. His aunt married William Henry Harrison, and Benjamin Harrison was his cousin.

Report of Death Awakens Love

James Jolly and Jeanette Sherwin have just been married in New York, and it's some romance. Jolly first saw Miss Sherwin when she was acting in a London theater. He joined the company to be near her. Then he went into the war and was reported dead. Too late Miss Sherwin realized she loved him. Jolly has spent much time trying to find her and now they are happy.

Vanderbilt and His Bride

Reginald C. Vanderbilt and his bride, Gloria Morgan, eighteen-year-old daughter of Harry Hays Morgan, consul general to Brussels. Miss Morgan for a time played minor parts in moving pictures.

CIVIL WAR VETS FEW IN CONGRESS

MEN WHO WERE IN WORLD WAR, HOWEVER, ARE BEING ELECTED IN INCREASING NUMBERS.

THREE ARE IN THE SENATE

Thirty-Three of Them Were Members of the Lower House During Session Just Closed—Some Notable Friendships Between Former Foes.

By EDWARD B. CLARK

Washington.—In the lower house of the Sixty-seventh congress which passed away on March 4 there were only two members who saw service in the Civil war—H. Z. Osborne of California, Union veteran, and C. M. Stedman of North Carolina, Confederate veteran. Representative Osborne died recently and at a memorial service in the house a eulogy of him was spoken by the one-time opponent in war, Mr. Stedman.

In the senate of the United States today there are two veterans of the war between the states, both of them having seen service in the Union army—Knute Nelson of Minnesota and Francis E. Warren of Wyoming. Veteran Warren wears a Medal of Honor for a gallant deed which was done under circumstances "over and above the call of duty."

It was not so many years ago that virtually half of the membership of each house of congress was composed of veterans of the Civil war. In the North and in the South both, there was a feeling apparently that those who had served well in war would serve well in peace; and then, of course, there was the added incentive of giving the reward of office to men who had been willing to risk their lives for a cause.

World War Veterans Coming In.

Session by session for a good many years the number of veterans of the Civil war in the two houses has been decreasing, until now it has almost reached the vanishing point. Veterans of the World war, however, are coming into congress, 36 of them being members of the congress which has just closed its last session. There are three World war veterans in the senate and 33 in the house. The three senators are David A. Reed of Pennsylvania, Davis Elkins of West Virginia, and Smith W. Brookhart of Iowa.

Some persons have asserted the American people are less likely now than in the years that are past to consider war service as a qualification or as a reason for posts in the civil service. It would seem, however, that the fact that within two years of the war's closing, 36 veterans were elected to congress would show that the belief soldiers will not be preferred, for civil service is not particularly well based. It is the feeling in Washington that as the years go on the number of veterans of the World war holding places in congress will increase until finally in the course of events they must begin to decline until the day of vanishing shall come because of the toll which must be paid to nature.

It is not long since the last Confederate veteran senator dropped from the service and dropped in fact from the scenes of earth. It seems only the other day that three Confederate veterans of both war and peace merit, Daniel of Virginia and Morgan and Pettus of Alabama, were holding their places in the upper house of congress and were doing daily battle for legislation in which they believed. Daniel had been badly wounded in action. Senators Pettus and Morgan went through the war unscathed, but they both saw gallant active service.

Friends of North and South.

Through the years there has been manifest in both house and senate the warmest friendships between northern veterans on the one hand and Confederate veterans on the other. The bond of service seemed to be strong even though the friends served on opposite sides of the conflict. Senator Nelson of Minnesota and Senator Daniel of Virginia, one a Union and the other a Confederate soldier, were the strongest personal friends, although it is doubtful if the two ever voted the same way in any political or legislative contest. Factional and political lines seemingly do not divide friendship's estates. One of the remarkable senate personal friendships was that existing between Senator Tillman of South Carolina and Senator Chandler of New Hampshire, one time secretary of the navy. Chandler was a typical Yankee and Tillman was of the South. These two men were utterly unlike in most of their ways, but they formed an attachment for each other almost as soon as Tillman arrived in Washington, and their close personal friendship lasted until Tillman died.

In the house of representatives Champ Clark, who was southern born and a Democrat of Democrats, and Gen. Charles Grosvenor of Ohio, a Union soldier, struck up a friendship which was remarkable for its tenacity. On the floor of the house Clark and Grosvenor used to hammer each other verbally in argument until all the spectators in the gallery who didn't know thought they would come to blows. A little later the two would be seen walking out of the house, each with an arm around the other's shoulder.

Cody Memorial Criticized.

Lieut. Gen. Nelson A. Miles, United States army, retired, who saw long years of Indian fighting, has just paid a tribute to the memory of Buffalo Bill, who through many campaigns in the West, was his scout.

General Miles, however, has declined to express any opinion as to the beauty and effectiveness of the memorial statue of Buffalo Bill, which will be erected near Cody, Wyo. There has been a good deal of rather sharp comment on the work of the sculptor, criticism being particularly directed at the horse upon which the scout is mounted. The critics say the animal is in an unnatural position.

Washington is rather content to wait until plainmen definitely have passed on the horse before accepting at their face value opinions which have been passed by eastern critics. Everybody in Washington remembers the row that was raised in the country over the eagle which appeared on one of the gold coins of the United States some years ago. The bird was declared to be unnatural and to be wearing "pantaloons." Ornithologists quickly came to the rescue of the eagle and its designer, saying that a full-fledged American eagle wears pantaloons of feathers, a fact which did not seem to be known to the critics. The position of the eagle generally was declared grotesque, yet ornithologists said it was perfect. So possibly it may be with Colonel Cody's horse.

Their Last Campaign Together.

The writer of this went through the last Indian campaign in which Buffalo Bill participated. It was the campaign against the Sioux in southwestern Dakota in December, 1890, and January, 1891, in course of which were fought the battles of Wounded Knee and the Mission and several skirmishes. General Miles was in command in the field, having left his headquarters in Chicago to take command of the troops. He wired Buffalo Bill, asking him to proceed to the front with him. They were together in that Indian campaign for something like five weeks. Then they parted, and their last plus adventure as companions was over.

Somewhere in the United States probably somebody can be found who still possesses one of the striking pictures which was used to advertise the Wild West show. This poster, or rather a picture intended for a shop window display, represented General Miles and Buffalo Bill on horseback, on a high point of land from which they could overlook the hostile Sioux camp. It was a most striking picture.

The experiences of the last session of congress have made leaders of both political parties in Washington wonder what is going to happen in the future if the present intentions of "government by blocs" shall reach lasting reality. Party lines frequently were wiped out in the house during the last session of the Sixty-seventh congress. The voting on many occasions was by groups which took no cognizance at all of party labels. Some of the leaders actually are apprehensive that anything like party lines in legislation will be impossible in future congresses unless there can be a return in some way to groups of two parties instead of to groups of a dozen blocs.

In the Sixty-seventh congress there was an ex-service men's bloc, a workman's bloc, a dry bloc, a wet bloc, a big business bloc, an agricultural bloc and a radical bloc, although the members of the last named bloc preferred the word progressive to radical as descriptive of their efforts.

There does not seem to be any thought in Washington that party designations will disappear, but the fear is strong that it will be almost impossible eventually to get anything resembling party legislation through congress unless so many compromises are made to suit this bloc and that bloc that the legislation as originally intended will have lost all semblance of itself.

Every Bloc Has Its Headquarters. Virtually every one of the blocs which have been named maintains some kind of headquarters in Washington. The men charged with the work of keeping track of legislation in which the various blocs are interested are on the ground all the time. They are called legislative agents, although in other and older name for them is lobbyists. Every one of the blocs carries on propaganda of some kind or other. It seeks to reach the press of the country with its views and it succeeds generally because the men charged with the propaganda work know the value of news and they succeed frequently in creating news which must be printed because it is news.

Before the fascist movement reached its climax of success in Italy the Italian legislative chamber was composed of blocs. There were as many groups as there have been this winter in the lower house of congress. Legislation in Italy was haphazard, and frequently the results were compromises which made the original measures look like patchwork quilts.

Decimal Clock. Recent discussions concerning the decimal system of weights and measures render more interesting a curious paragraph reprinted in the Journal des Debats from its issue of August 22, 1860, when Napoleon I was at the height of his power. It states that there were two dials on the principal building of the Tuilleries, one counting the hours by twelve and the other by ten. Taking advantage of the need for repairs, the dial divided into ten hours was destroyed, since, as the report goes on to say, "it had served for no purpose, except to show to what point the mania for innovation was capable of mounting in opposition to the settled habits of all times and all peoples."

PRINCIPAL MISSING

Photograph of Delafayette Flint, grammar school principal, who is said to have disappeared from New Haven leaving no trace. Friends received a telegram stating that Flint was dead. No record of his death can be found.

The missing man was trustee of a trust fund and head of a hunch fund for school children. \$800 collected from school children for Junior Red Cross work, and other money, amounting to more than \$15,000 was in Flint's charge.

"HUMAN FLY" KILLED

Harry C. Young, daredevil "Human Fly," fell to his death from the eighth story of the Hotel Marquette in New York, when he lost his balance while scaling the side of the building. Thousands were watching Young while he climbed and witnessed his fall to death. He is shown, above, in one photograph, making the ascent which ended in his death. The other photograph was made just before he started on his perilous climb.

ORGANIZES BOOTBLACKS

George Prasinus of Chicago has made a million dollars shing shoes. He has organized the Bootblacks Association of Chicago and is its first president. The association aims to make all bootblacks American citizens.

Museum Devoted to Indian Life. For the purpose of studying the progress of the American Indian, a new museum has been opened in New York City, where investigations of Indian life may be conducted. The institution, which already contains 150,000 specimens of aboriginal life on this continent, is the only one in the world devoted exclusively to the preservation of the remains of those early races, and one of its chief aims will be to discover the origin of the red man.

To Whom It May Concern

It will be the earnest endeavor of the Santa Cruz Patagonian never intentionally to wound the feelings of any one. Should an erroneous statement appear in the columns of this paper, call our attention to it, and if an error, due correction will be made and ample justice cheerfully accorded.

OUR GUARANTEE—We guarantee the reliability of every display advertiser in this paper, and agree to make good to every paid subscriber any loss that may occur through trusting a display advertiser who proves to be a deliberate swindler. Notice of the complaint must be sent within a month of the time of the transaction, and you must mention The Santa Cruz Patagonian when writing the advertiser.

"BOOSTING PATAGONIA"

Another paper in the county, in its efforts to boost Patagonia's mining possibilities, has overstepped itself in its optimistic enthusiasm.

In a recent article appearing in one of the Nogales dailies a statement was made that the American mine was making arrangements to tear down a hill with steam shovels to get the mineral content of the ground—and other extravagant statements along the same lines.

The author of that statement was misinformed, or drew on his imagination to an alarming degree. If he had stopped to use a little thought on the subject before putting that statement into print he would have seen the absurdity of the thing. The use of steam shovels involves the use of many things not present at Harshaw, where the mine is located. One of them is the necessity of a railroad to handle the steam shovel's tremendous capacity for handling material. There are not enough teams and trucks in Santa Cruz county, probably, to take away the material a steam shovel could handle, and if there were, no mining company would use teams to haul it to a railroad located many miles away owing to the enormous expense involved, and no sane mine manager would ship to a smelter the product of a steam shovel without having first ascertained whether the product contained enough mineral to warrant paying the freight charges.

Such stories do no good. We want the truth told about our mines and mining possibilities.

There are many mines near Patagonia that are worth boosting, and much truthful material can be obtained to make a good mining story. We have the most promising mining future of any locality in Arizona, as the district is highly mineralized in all directions. We want the world to know what we have, but we want it to know exactly what we have—and no more.

When a statement like the one mentioned above is circulated and an investigation is made, to discover that there is no truth whatever in it, the harm done is more far-reaching than disproving that statement to be untrue. It leads the reader to believe that all statements regarding mines here are based upon nonsense, if not actual untruth.

If you want to boost Patagonia and its mineral wealth, do it; but for the sake of our future get the FACTS.

DEMAND FOR SILVER GROWING

An advance in silver prices last week to the highest of the year is reflective of the larger demands. While China has been the largest buyer, India has been active, and even in this country the jewelry trade reports a sharp increase in consumption. In the last two weeks silver has advanced from 65 1/2 to 67 1/2 in New York, and to a level above 68 1/2 at San Francisco.

The efforts of the British-Indian banks to meet currency needs in China through larger gold supplies were shown in a striking manner at London last week. Against exports into that market of but 9169 pounds, gold engagements for India amounted to 428,911 pounds.

Silver stocks at Shanghai have decreased in February despite the exceptionally large movements in that direction. Toward the end of the month they were about 26,500,000 ounces in specie, \$27,500,000 and eighty bars. At

MEN IN CONFEDERATE ARMY

Destruction of Records Has Made It Impossible to Ascertain Definitely the Exact Number.

The estimate of 2,200,000 as the total of the Confederate army for the four years of the war does not seem excessive or unreasonable as representing the military strength of the 5,000,000 white population of the Confederate states, aided by the 2,000,000 population of the sympathizing border states, and with an industrial army of 5,000,000 slaves. A. B. Casselman writes in Current History Magazine, The Southern estimate, or "legend," as it has been aptly termed, of 600,000, has always seemed disproportionate. This estimate is of uncertain origin, and is not derived from any official source. It did not originate during the war, but after the war had ended, when the Confederates had lost their records and were without official data on which to support their assertions. No official summary purporting to show the total number can be found in the official records. The captured rolls are incomplete and fragmentary. As an illustration, it has been ascertained that approximately 1,000 names are missing from the captured rolls of a single regiment, the Sixth North Carolina. Rev. Dr. McKim, an ex-Confederate officer and a writer on this subject, quotes a letter received by him from Col. Walter G. Taylor, General Lee's adjutant general, saying:

"I regret to have to say that I know of no reliable data in support of any precise number, and have always realized that it must ever be largely a matter of conjecture on our side."

In the absence of complete official records, the question still remains largely a matter of conjecture. Neither the Confederate idea of 600,000 nor any later estimate can be accepted as final or as even approximately accurate.

APPARENTLY QUITE IN ORDER

English Actor's Witty Introduction of Two New Acquaintances Placed Correctly.

Every book of reminiscences published nowadays which contains anything about the theater has at least one anecdote about the late Sir Herbert Tree. The author of "The Nineteen Hundreds," who writes under the pseudonym Reginald Auberon, recalls one of Sir Herbert's spontaneous flashes to carry on the tradition. Accompanied by Lady Tree, he had gone down to the Palace theater to rehearse a sketch. "As he wandered about the unfamiliar stage, feeling very bored and looking like a fish out of water, a couple of 'knockabout' comedians who had just finished their 'turn' approached him. 'Well met, Sir 'Erb' exclaimed the first one, slapping him heartily on the back. 'Glad to welcome you 'ere!' 'Oh, delighted!' murmured Tree, vaguely. 'This is my mate, 'Arry,' continued the other, beckoning to his partner. 'Pleased to meet you,' declared the second comedian, delivering an equally vigorous slap on Tree's shoulder. 'Welcome to the 'lks. The missus showing with you? With a magnificent gesture, Tree signaled to his wife. 'Maud,' he said, 'allow me to introduce my new friends.' Lady Tree—the Two Snacks."

Get Your Share of Fruit.

A great many persons regard fruit as a superfluous or a luxury; but, according to the New York state health commissioner, fruit should be part of our daily diet for several very good reasons. Many fruits contain certain salts of organic acids which have a stimulating effect upon the kidneys, and some others are decidedly laxative. Owing to their large content of water they are always cooling, and any digestive difficulties which may be encountered are generally due to eating too much or too fast, or eating unripe or overripe fruit. Bananas have a high food content and a low cost. Fruit eating is good exercise for the jaws and puts the teeth in good condition.

The end of January there were about 28,400,000 ounces in specie, \$31,500,000 and 200 bars.

With the continual increasing demand for the white metal for both commercial and currency needs, the producer should be relieved of any fear of a downward trend in the market.

NEW USE FOR COPPER

The Copper and Brass Research Association says that the widening range of uses for copper in this country is illustrated in an interesting way by a newly discovered method of treating rope with a solution of copper, in order to protect it against mould, rotting and marine growth. Impregnating rope with tar does little good, for these marine pests literally "eat the tar out" of the rope and then devour the rope itself. Consequently, the 200,000 fishermen in this country, who use annually about 200,000,000 pounds of rope, have found rope renewal a costly item of expense.

Recent experiments by the United States bureau of fisheries having demonstrated the efficiency of the copper-treated rope, arrangements have been made to place it on the market in the near future. The copper is applied in a solution of oil. Bulking less, weighing less and costing less to apply than tar, copper looms large as the rope preservative of the future.

Expression is Dean Swift's.

In Swift's "Gulliver's Travels" (Voyage to Brobdingnag) is this sentence: "And he gave for his opinion that whoever could make two ears of corn or two blades of grass grow upon a spot of ground where only one grew before would deserve better of mankind and do more essential service to his country than the whole race of politicians put together."

SUBSCRIBE; SAVE MONEY

SUNSET is the only general magazine of national circulation published west of Chicago, and the only periodical of that nature which is steadily fighting for national recognition of the west and its possibilities, its rights and its claims. It has been doing this for 25 years.

We are offering this high-class magazine in combination with the Patagonian for \$3 a year. New or renewal subscribers may take advantage of this wonderful opportunity to secure Sunset and this newspaper—your home paper—for a very low figure. This offer may not last long. Hurry your order before it's too late.

THE THRICE-A-WEEK EDITION OF NEW YORK WORLD IN 1923 AND 1924

Practically a Daily at the Price of a Weekly; No Other Newspaper in the World Gives So Much at So Low a Price.

The wide, wide world has become so narrowed by science that news from all around the globe is printed in the current New York World, together with the views of nation builders, master men and leading women everywhere, and particularly in the United States. No other newspaper is better equipped to give the news of the world at the time it is news than the New York World.

The Thrice-a-Week edition of The World is the greatest example of comprehensive journalism in America. It will keep you as thoroughly informed as a daily, which would cost five or six times as much. It is a unique newspaper, published three times a week, for \$1 a year. This is the regular subscription price, and it pays for 156 newspapers.

We offer this unequalled newspaper and the SANTA CRUZ PATAGONIAN together for one year for \$2.25. The regular subscription price of the two papers is \$3. You save 75 cents by this clubbing offer, and receive four papers a week.

The above offer is good for renewal subscribers as well as new ones.

BRACEY CURTIS OPTIMISTIC OVER FUTURE OF SANTA CRUZ CO.

Bracey Curtis, president of the First National Bank of Nogales, who has been resting up in a California sanitarium for several weeks, returned to Nogales this week feeling much improved in health.

Mr. Curtis was at Burnett, Calif., which is near Signal Hill and the scene of an oil boom of wonderful magnitude. A 20,000-barrel well recently was brought in in that district, and Mr. Curtis said he was so close to it that oil was sprayed all over his bed and sleeping porch. In speaking of the oil boom, Mr. Curtis said:

"The oil development at Signal Hill, Long Beach, and Santa Fe Springs is of such great magnitude that it is almost unbelievable. New rigs are going up close to the sanitarium where I was stopping, and the more I saw of that oil boom the more I became enthused over the possibilities of striking oil in the Elgin field in Santa Cruz county."

"Every time I return to Nogales from a trip I am more impressed than ever over the possibilities of Santa Cruz county. But we don't seem to get together and boost as they do over there."

"A lot of enthusiasm is being manifested in California over the West Coast of Mexico. It's pretty well advertised as a mighty attractive field for investment. More interest is being taken in Mexico, and the belief prevails that conditions in general, and mining in particular, are getting better. West Coast tomatoes and agricultural products are very popular in the United States, and if the growers could have co-operated in the selling and marketing of their products, instead of cutting each other's throat, they could have maintained a much better and more even price, and one that would have been more satisfactory to purchasers in the States, and which would have brought more prosperity to the tomato and winter vegetable growing districts, which now suffer from the price cutting."

In speaking of the future, Mr. Curtis expressed himself in the following manner:

"I believe that the future of this district in general (Santa Cruz county and the West Coast of Mexico) is very wonderful. As a trading point it is a wonder. There is no reason on earth why we shouldn't go ahead here very satisfactorily, inasmuch as we have such a wonderful country in all directions—throughout the county and the West Coast of Mexico. If we bring in oil in the Elgin field, Nogales will shortly become a very large city. Nogales ought to become a big city as soon as we can get away from small-town stuff. This small-town stuff is our greatest handicap."

SOME GOOD HEALTH ADVICE

Just as Valuable Today as When Put Forward by Wise Old Benjamin Franklin.

Eat and drink such an exact quantity as the constitution of thy body allows of, in reference to the services of thy mind.

They that study much ought not to eat as much as those that work hard, their digestion being not so good.

The exact quantity and quality being found out, is to be kept to constantly. Excess in all other things whatever, as well as in meat and drink, is also to be avoided.

Youth, age and sex require a different quantity.

And so do those of contrary complexions; for that which is too much for a phlegmatic man, is not sufficient for a choleric.

The measure of food ought to be (as much as possibly may be) exactly proportionable to the quality and condition of the stomach, because the stomach digests it.

That quantity that is sufficient, the stomach can perfectly concoct and digest, and it sufficeth the due nourishment of the body.

A greater quantity of some things may be eaten than others, some being of lighter digestion than others.

The difficulty lies in finding out an exact measure; but eat for necessity, not pleasure; for lust knows not where necessity ends.—Benjamin Franklin, in "Poor Richard's Almanack" (1742).

First Naval Disarmament.
The first naval disarmament on record was that of King Canute in 1018. He dispensed with the English fleet, sending it to Denmark. He did not do this, however, until England had been thoroughly pacified.

By nature Canute was cruel and violent, but he displayed talent as a ruler. He knew how to subordinate his passions to the interests of government. Although practically a heathen at the time of his accession to the English throne he succeeded in winning the favor of the church.

Having achieved naval disarmament Canute may have thought that the sea would become peaceful, too. But he did not succeed in his fabled attempt to make the tides obey him.

Romans in England.
All of the medieval styles of English architecture are found in the Canterbury cathedral. It is said to have its origin in an edifice which was built by Roman Christians. But its authentic history begins with the Norman conquest.

It has been built and rebuilt many times and has housed many relics. There was brought the body of the martyr, Blustus, from Rome; there were the relics of St. Wilfred, St. Dunstan and St. Elfege.

The northeast transept where Thomas a Becket was murdered is called the Martyrdom.

The city about the base of the great cathedral carries on a considerable trade in hops.—Exchange.

Slight Misunderstanding.
A new millionaire made a contract to have a fine home erected. The builder wanted to make a showing. On a corner of the lot he put up the usual frame structure from which operations are directed. Only he made it a neat two-story affair, reserving the lower floor for time sheets and office data, and the upper floor for blue prints.

The outside was nicely painted and the millionaire, having appeared on the scene, the builder waited for congratulations. None being forthcoming, he asked: "Well, what do you think of it?"

"I'll accept it," said the millionaire, without enthusiasm, "but it isn't what I expected for \$90,000."

AUSTRALIAN HOME PICTURED

Really Fine Word Painting That Brings the Scene Perfectly Before the Reader's Eyes.

Through some paddocks and a belt of trees you come first to the wool shed, quiet now, for the time of shearing is past. You pass through a white gate and as you descend the steep drive you see the house at the bottom of the hill—a long low bungalow, gayly painted in two shades of apple green, with a dull red roof. By it runs a little creek, which widens into a dam at the foot of the garden.

The hill above the house is golden with wattle, the scent, too heavy indoors but delicious in the open, fills the air. In the garden beside a tall clump of bamboo, a black wattle with feathery leaves and pale yellow blossoms hangs over the water. There are great bunches of freesias, antirrhinums tall as bushes, double pink peach blossoms and scarlet carnations.

A black swan swims up and down the water; he stretches out his long neck and utters his queer guttural cry. From the veranda you can see from the skyline a long low hill, bare of trees, but green in the distance.

There are no mist; all the outlines are sharply defined against the blue sky. The frogs keep up a continuous drowsy murmur not much louder than a cricket, but with an occasional deep note as though a harp string had been struck.

Later the moon will rise and the nuptials delight your ear with their harmonious warble all the night long, and the trunks of the great gum trees stand out white in the moonlight, lending dignity to the scene. A calm is on the place, a deep quiet, broken only by the sounds of nature.—Christian Science Monitor.

REMARKS OF "SETTING" HEN

Some Pertinent Observations Proposed to Have Been Made by Some-what Disconsolate Biddy.

People say I'm independent. Well if I want to set, I'm going to and nobody can change my mind.

Men are so rough. They come and yank me off my nest like I was a necessary evil. I think I have a right to fly back at them sometimes.

I like women best. They come and pet me and lift me off my nest so gently that I wish I could think them for it.

I haven't much use for an old hen that wants to set all the time. Twice is enough. I know one hen in the flock that set all last summer and started out bright and early again this spring. If the boss was onto his job he'd make a chicken dinner out of her.

Wonder why all the hens peck at me when I ruffle up and go out into the yard to get a breath of fresh air.

I hate incubators. They are going to rob us of all our chicks and before long we won't have any excuse for setting. People must think we don't want to be mothers.

I'm getting awful thin. People think we don't need much when we are setting all the time, so they throw in only a little ear corn and the rats get the most of it.

I wish somebody would invent a real-for-sure lice killer. I don't want anything to do with any quack stuff.—Farm Life.

IS LARGEST BARREL VAULT

Structure Built Many Centuries Ago Proves Value of Bitumen Used to Cement Mortar.

Oil seeps, large and small, occur throughout Persia and Mesopotamia. Asphalt played an important part in the enduring character of the buildings of the ancient civilization in that part of the world. One of the most remarkable instances of the use of asphalt or bitumen is the Arch of Ctesiphon on the River Tigris, about thirty miles to the south of Bagdad. This arch was built by Chosroes, one of the Sassanid kings, about the year 530 A. D., and of this famous structure two wings are still standing. It is built of bricks laid in bitumen, and the original structure consisted of a large hall 153 feet long and 86 feet wide with a vaulted roof 95 feet high open at one end and closed at the other. The crown of the arch was 9 feet thick, and the wall supporting it 23 feet across at the base. The open end of the hall was flanked by two wing walls, rising to the height of the top of the arch and some 20 feet thick at the base.

The whole is built of large, flat, burnt bricks, some of them bearing a coneform stamp. The Ctesiphon arch has always remained the largest barrel vault in the world, and furnishes valuable evidence as to the value of bitumen used in cement mortar.

"The Bloody Run."

The stream now known as Bloody Run, whose gorge may be traced in Elmwood cemetery, was formerly Parent's creek. The name was changed after the defeat and slaughter of Captain Paitzel and his company by the Indians on July 31, 1763. Just before daybreak on that day, Paitzel marched out of the fort of Detroit with 250 men. They made their way along the ridge on the line of what is now Jefferson avenue. The Indians were ambushed on both sides of the Parent's creek and when the soldiers had crossed the bridge at this point they were attacked. Only 90 men under Major Rogers succeeded in escaping the massacre that ensued. This was an incident of the Indian war that resulted from the conspiracy of Pontiac.—Detroit News.

Thrifty.

At the Kingsway theater, owing to the absence of one of the company, a recent matinee performance had to be abandoned and the audience were informed that their money would be returned. To the amazement of the Hebe in the bar, one of her patrons appeared and calmly asked for the refund of ninepence which he had expended on a lemonade. "But," gasped the astonished girl, "you can't expect your money back—you've had the lemonade." "Ah," said the thrifty one, "but I shouldn't have spent the money if I hadn't come to this matinee!"—London Opinion.

History Continuous.

There are, of course, no beginnings or ends in history. We may walk for a few miles by the side of a river, noting its shallows and its rapids, the gorges which confine it and the plains through which it meanders; but we know that we have seen neither the beginning nor the end of its course, that the whole river has an unbroken continuity, and that sections, whether of space or time, are purely arbitrary. We are always sowing our future; we are always reaping our past.—Dean W. R. Inge, in "Outspoken Essays."

Censure for Land Abuse.

In Sweden a farmer can be reprimanded by the governor of a province for abusing "mother earth." More than 1,100 cases of abusing farm land have been dealt with. Corrective measures are considered necessary where land is found overgrown with weeds, where a field yielded notably less than the neighboring fields, where the annual production decreased, or where grain had been disposed of unthreshed.

OLD SONGS BRING MEMORIES

Forgotten Tunes Often Revive Thoughts of Yesterday That Are Reminiscent of Happiness.

Songs come and go—have their little moments of popularity and are then relegated to the dim recesses of memory. Occasionally one pops up its head, as it were from the grave, and today it is not unusual to hear a medley of old songs played or sung to much applause in some cabaret. They bring their memories, those old songs—moonlit nights and palm shaded corners in dance rooms, an old romance.

The other night the sentimental man was entertaining a friend. He put on a record, an old song from "Maritana."

"Ah," he said, "what memories that brings back to me! Old days, old friends—"

His companion granted: "All I associate with that song," he said practically, "is the bathroom and a dull razor. Always when I'm not getting a decent shave I somehow break into 'The Heart Bowed Down.' It's the best bathroom song I know."

The sentimental one grinned sheepishly. "Come to think of it," he agreed, "the first time I ever heard it was when I was a boy, and my father in the next room washed it, too. I—L—L—and here he blushed, "I never heard the opera in my life."—New York Sun.

LEAVES FICTION FAR BEHIND

Action of Vigo Authorities in Dealing With Treasure Ships is Almost Beyond Belief.

Perhaps the largest single treasure trove lies at the bottom of Vigo bay on the coast of Spain. Here 17 billion carriers were sunk by the British and Dutch navies in the latter part of the seventeenth century and scattered over the ocean's floor gold and silver estimated at \$100,000,000. So far it is all there.

The fleet of bullion carriers, conveyed by a slightly larger fleet of men of war, set out from the coast of Mexico to carry the treasure to the coffers of Spain and sought refuge in Vigo bay from the approach of the larger British and Dutch fleets. There they planned to unload the treasure.

But the customs officers had no instructions to receive it. They must communicate with their superiors. The admirals of the fleet agreed, but the port officials were adamant. And while they debated the enemy ships sailed into the bay and settled the matter for all time by sinking the fleet.

And what has fiction half so strange as that?

Mercury Cleans Rifle Barrels.

It has been found that mercury can be used very effectively to clean rifle barrels. The end of the barrel is tightly corked, and about one-half fluid ounce of mercury is poured in. Then, after the other end is corked, the barrel is slowly tipped from end to end a number of times. The mercury amalgamates with the lead adhering to the inside of the rifle barrel.—Popular Mechanics Magazine.

FOR OLD AND YOUNG
Tutt's Liver Pills are as kindly on the delicate female as Indian old age as upon the vigorous man.
Tutt's Pills
Tone and strengthen the weak stomach, bowels, kidneys, and bladder.

A Small Investment That Is Conservative, Safe and Profitable

A sales corporation functioning for one of America's oldest and best known manufacturers offers a legitimate, safe, and exceptionally profitable opportunity to a few small investors (\$400 to \$500) in this district.

A Guaranteed 35% Merchandise Premium AT ONCE!

This is in addition to the substantial dividends your investment calls for. Here is a real opportunity for the first few lucky folks that answer this offer! The 35 per cent merchandise premium is ready for immediate distribution. You make a profit at once!

THE WORLD IN PARAGRAPHS

A BRIEF RECORD OF PASSING EVENTS IN THIS AND FOREIGN COUNTRIES.

IN LATE DISPATCHES

DOINGS AND HAPPENINGS THAT MARK THE PROGRESS OF THE AGE.

WESTERN

Organization of the Brotherhood National Bank of Spokane is expected to be completed soon.

Damage resulting from a blaze in the business district of Ogden, Utah, is estimated at approximately \$200,000.

Two armed highwaymen bound the proprietor and two employees, one a young woman, in the G. Oringer Jewel store on an upper floor of a downtown office building in Portland, Ore., and escaped with several thousand dollars in jewelry and watches.

A charge of first degree murder has been filed in Vancouver, Wash., against George Edward Whitfield, in an attempt to establish his alleged connection with the murder of 11-year-old Anna Niska while the child was in her way home from school.

Three members of the California legislature and one former member were among those held up by five masked bandits and robbed of several thousand dollars in cash and jewelry in the Occidental Cafe, a rooming house, recently robbed near Sacramento.

The body of O. A. Jacobson, 34 years old, formerly of Brigham City, Utah, have been found in the ocean near the California Nevada Hotel, according to word received in Los Angeles from Tongah, Nev. Jacobson has been missing since he left Los Angeles in company with a man named Nelson, in an automobile last October for Salt Lake City.

To inconvenience the traveling public through negotiating to post in railway stations the exact time when passenger train is due to arrive or in violation of the Montana state law and punishable by a fine of \$50 to \$200, according to a communication which has been sent all Montana counties by Wellington B. Rankin, state attorney general.

Protest against the advancing price of sugar is voiced in a telegram sent to Herbert Hoover, secretary of commerce, by Dr. E. S. Barnes, president of the Northwest States Federated Cooperative Fruit Growers, as a result of a four-day conference of the growers recently held in Tacoma. Increased cost of sugar for raising, the telegram asserts, results seriously to the fruit growers' interests.

WASHINGTON

Charles F. Cramer of San Francisco, who retired last month as general counsel for the veterans' bureau at a time when the conduct of the bureau was under fire in Congress, committed suicide in Washington by shooting himself through the head.

Meetings now in progress among ship operators in the west coast conference, with the reported purpose of agreeing on rates on dried and canned fruits from Pacific ports to Europe hold only an "academic interest" for the shipping board, it was said officially at Washington. The emergency fleet corporation withdrew a year ago from the traffic which would be affected, it was explained, and will re-enter it so long as adequate American tonnage is assured to shippers.

A decline of 20 per cent in the average value of plover lands throughout the country is shown in a statistical survey made by the Department of Agriculture. The average value per acre on March 1 this year was \$86.53, the department reported, as compared with \$108.89 on the same date last year, \$83.78 in 1921, and \$90.01 in 1920.

The first operation under the Anglo-American debt funding agreement took place, when Great Britain made a payment of \$4,025,000 to the United States treasury through the federal reserve bank of New York. This first payment was made to reduce the total British debt to \$4,000,000,000, the amount upon which the funding agreement was predicated.

Modification of the national defense plans resulting from agreements reached by the arms conference are to receive their first practical test in the Panama area. Carefully analyzed in theory by the navy and army war colleges, the operations are expected to develop the operational importance of the canal as a prime link in the navy's defense system and the national industrial resources.

The names of twenty-one women have been approved by Acting secretary Hays of the war department and officially will be added to the army's roll of honor for distinguished and exceptionally meritorious service during the war. Approval of the new list brings the total number of names to thirty-three.

Claudius H. Huston, assistant secretary of commerce, has resigned to become president of the World Commerce Corporation, a new oil company in process of organization, which will operate in South and Central America.

FOREIGN

The British steamship Mervilla was sunk off Steenbank, on the coast of Holland, with the loss of twelve lives.

The French and Belgians by declaring that they are ready when Germany begins payment, to evacuate the Ruhr and the territory recently occupied on the right bank of the Rhine, believe they have dealt a big blow to German propaganda.

Three Germans were shot and killed by French sentries while trying to break into a machinery warehouse in Rockingham. According to the French announcement, the shooting took place after the Germans had disregarded the usual challenge.

Although offering no very definite evidence to support their statements, some of the British correspondents in the Ruhr assert that there is a tendency towards peace and that both sides would welcome a settlement ending the strain of the past few weeks.

Nearly 300 prisoners taken in the week-end raids in England and Scotland are understood to have been landed at Dublin from British warships 200 men from one, and the balance, including about thirty women, from another. All were conveyed under free armistice to jail.

Three Free State soldiers and one irregular were killed in fighting in Ireland. Two Free Staters were killed during a clash with rebels in Dublin and one Free Stater and one rebel were killed in a fight at Charlestown. The fighting at Charlestown followed a raid upon the town by irregulars.

It is estimated that 150 Greek naval officers and men were drowned when the Greek transport Alexander capsized and foundered during a fierce gale between Salamis and Piraeus. The transport had on board 250 officers and men, an out-rigger from the cruisers George, Savro, Kiklis and Lemnos.

China's recent note to Japan, requesting that a discussion be held with a view of returning Daini and Chai Arthur to China, was interpreted in Tokyo as no more than a communication declaring agreement of the Chinese-Japanese treaty of 1915, which embodied the "twenty-one demands."

The terms of the Chinese note came as a surprise to Japan.

The German population of the Irkutsk district has been warned by General Lagerstedt, commanding the district, that if any further French troops are assimilated or ambushed, the burgomaster of Dier, who is held as a hostage, together with four other town officials will be shot at once as a measure of retaliation.

The foreign office at Paris received a detailed synopsis of the Turkish government's reply to the Lausanne peace proposals. From the synopsis it appears that a large number of the provisions of the Lausanne treaty are recalled into question, and that acceptance of the Turkish contentions would involve drastic changes in the original draft of the treaty.

GENERAL

All creditors of the Lincoln Motor Car Company, purchased last year by Henry Ford at a receiver's sale, have been reimbursed in full by Mr. Ford.

All persons riding in government-owned aircraft are now required to wear a parachute on every flight, according to officers at Chanute field, Rantoul, Ill.

Omaha, Neb., has been slowly digging itself out of the snow that the worst storm in the city's history left behind. More than ninety inches of snow fell, shattering all records of the weather bureau.

An engineer was killed and a carload of livestock was burned to death when two freight trains of the Chicago, Milwaukee & St. Paul railroad crashed at Leaf River near Chicago, in a blinding snowfall. The dead man was J. Hogan of Savannah, Ill. His train struck the rear end of the other.

Death, injury and damage were the harvest of furious March storms which recently swept many sections of the region between the Rockies and the Appalachian mountains.

Luis Angel Firpo, South American pugilist, who knocked out Bill Brennan in the twelfth round at Madison Square Garden, New York City, is looking for more worlds to conquer.

The mystery of the missing silverware at the state hospital for epileptics at Parsons, Kan., was solved when twenty-seven teaspoons were found in the stomach of James A. Magreene, a patient, physicians declared.

An operation on Magreene's stomach also disclosed a handful of wooden sticks and a safety pin.

The story of how Miss Evelyn Lyons foiled the medical profession of Escanaba, Mich., newspaper man and syndicate neighbor for twenty-one days through her ingenious fever-raising tactics by a hot water bottle was unfolded by Dr. Harry J. Deiner, city health commissioner of Escanaba. The hot water bottle was used through the aid of a hot water bottle of the same color as the girl's night dress, Dr. Deiner said.

George Herman (Babe) Ruth has been made defendant in a suit for \$20,000 brought by attorneys for Miss Dolores Dixon, who charges that the baseball player assaulted her at various times last summer. Ruth's attorney disclosed in New York City. The attorney, Hyman Bushell, said Ruth declared he was being blackmailed.

Nine persons, seven of them women, lost their lives in an explosion and fire that swept through the Alhambra amusement at Angelica, near Buffalo, N. Y. The women were all aged and helplessly bedridden.

BRIEF ARIZONA ITEMS

F. C. Jacobs, an attorney of Globe, Ariz., has been nominated U. S. district judge for the District of Arizona.

The Dardanelles Amalgamated Mines Company is the name of the new company which has taken over the Dardanelles Mines Company at Chloride.

It has been officially announced that the rights and concessions of the Richardson Construction Company in the Yaqui River delta in Sonora, Mexico, has been reorganized by the Mexican government.

A fractured skull, internal injuries and a fractured right leg were incurred by Dewey Knowlin, a Bisbee brakeman, when thrown to the ground as a runaway car upon which he was riding collided with a dinky engine.

The contract for the construction of the new eleven-story Lathra building in Phoenix has been awarded to Jay J. Starfield, a Tucson contractor, it was announced by George Lathra, Jr. The bids were opened privately.

The knife alleged to have been used by Ysaiah Ochoa in killing Angel Parra was found by Tombstone officers near where Ochoa was captured by Fred Bennett directly after the killing. The knife had a long, three-inch blade, on which were found blood stains. It is a knife similar to that used by cattlemen.

Work on a dam on the Virginia river in northwestern Arizona is soon to be commenced that will provide water for the irrigation of 150,000 acres of Arizona land, 20,000 acres of Utah land and 100,000 acres of Nevada land, according to plans just made known. The dam will be constructed on the Virginia river at a point near Littlefield.

Sheriff Jim Cappell and United States Marshal Henry Levy recently returned to Yuma, after an unsuccessful day's search in Sonora, Mexico, for five men seen crossing the Sonora desert on foot and suspected of being the men wanted in Los Angeles for a recent bank robbery in which a bank messenger was killed and \$200,000 in securities stolen.

Appointed by the governor, Jos. F. Pomeroy, formerly first lieutenant of Battery E, 158th Field Artillery, Arizona National Guard, has succeeded Donald H. Miery, former captain of the organization. Mr. Miery's resignation took effect during this month and was due to strenuous business matters claiming his attention at the present time.

That Cochise county will assist the farmers of the county in the extensive sugar beet tests to be conducted by an expert who recently arrived from California, was the decision of the board of supervisors in session, when a delegation of farmers and business men from all parts of the county appeared before the board and asked that they send aid to the project.

"Unless you are compelled to travel, stay off the highways and roads of the county." That is the admonition given by the board of supervisors of Yavapai county, and Maj. W. W. Midgley, chairman, who is most emphatic on the subject. "By the right kind of co-operation on the part of the citizens of Yavapai county, our roads will not be torn up."

Maricopa county organizations, including the board of supervisors, the Phoenix Chamber of Commerce, the Merchants' and Manufacturers' Association, the Kiwanis Club and members of the State Legislature, are solidly back of the Buck Calfon Highway Association in its move to bring about completion of the Buck Calfon road between Prescott and Phoenix.

The house of the Arizona Legislature concurred in senate amendments to the bill designed to prevent depositions of masked bands and the measure was sent to Governor Hunt. Under the provisions of the bill, it is declared a misdemeanor for masked persons to assemble except in regular indoor lodges, rooms, and offices which ordinarily are classed as misdemeanors become felonies if committed by masked or disguised persons. A number of suits on organization is also guilty of violation.

The Colorado river compact failure of ratification after one of the most bitter and dramatic conflicts in the history of Arizona legislatures. The compact, allocating the waters of the river basin among the seven basin states, was signed at Santa Fe, N. M., Dec. 22. Opponents of ratification based their fight on the power phase of the river question, declaring that under the treaty as drawn other states would have the right to come into Arizona and build power dams for their own benefit. In the debates, which occupied many days of the session, the irrigation phases of the compact were rarely mentioned.

Pearl Borders, colored, known by the colored population of Phoenix as "Lightning," was shot and instantly killed in the home of Will "Shorty" Clay, colored barber of Phoenix, and Mrs. Lizzie Clay, his wife, is held in the city jail at Phoenix for investigation.

An unidentified man, believed to be J. B. Giles, address unknown, was found dead in Phoenix the other day. An ounce bottle, from which all but a few drops of carbolic acid had been drained, told a mute story of how the man had come to his death.

Mrs. Eva Tidmarsh

Health Brings Beauty

Girls, Read This!

Pueblo, Colo.—"When my daughter, now Mrs. Eva Tidmarsh, was sixteen she suffered terribly at times as many girls do, and did not feel real good at any time. She had pimples all over her body. A friend told me to get her a bottle of Dr. Pierce's Favorite Prescription, as her daughter had taken it and had derived wonderful relief from it. My daughter took three bottles and now she is perfectly well—never has a headache or backache. We both are glad to recommend Dr. Pierce's Favorite Prescription.—Mrs. Lulu Davis, 108 E. Evans Ave.

Your health is most important to you. It's easily improved. Obtain Dr. Pierce's Prescription now, in liquid or tablet form, from your druggist or send 10c for trial pkg. of tablets to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., or write for free medical advice.

You can tell when a woman is interested in what you are saying by the way she pretends she isn't.

He says he has smoked more Edgeworth than any other living man

Let Mr. Baldwin's letter give you the facts, and you will see he has some justification for his claims.

H. F. BALDWIN
Signs and Show Cards
Cigar Store
63 Clarke Street, Cor. Grant
Burlington, Vermont

Larus & Brother Company
Richmond, Va.

gentlemen:

I think that I am entitled to be called a charter member of the Edgeworth Smokers Club, as I have used the Edgeworth brand since its inception twenty and twenty-five years.

When I commenced using it I was selling hardware on the road. One of my customers who kept a general store told me that he had just received a new tobacco and wished that I would try it. He gave me a box for which he charged me 25c. He made a mistake, as it was sold at that time for 25c. I lived it so well that I made it a point to try it in every store in the different towns that I made, but I was told that I was not to get it in the store where I got around again. I still returned to ask for it in the different towns and tried to induce the dealers to stock it.

In 1867 or 1868 I went to St. Charles, Mo., and stayed there three years. I was surprised to find that I had a great many customers who kept a general store, and that since I was in Burlington, S. C., and made frequent trips to Savannah, Ga., and Charleston, S. C., and was unable to get it in either of those cities. Finally I ordered some direct from the factory and had a doctor in front of me to stock it.

I have used it always to the present time except occasionally when I could not get it. I figure that I have smoked over four hundred boxes, which would have cost for the last 15 years \$75. For at least five years I have not bought a cigar. I have had some given to me, but they do not take the place of the old pipe filled with Edgeworth.

I am a 67-year-old man of good health, and I think that it is the best pipe tobacco in the market. I don't think there is a man living who has smoked any more Edgeworth than I. What do you think?
H. F. Baldwin

It is always pleasing to hear from old Edgeworth smokers, and we would like to know if this brand is the best ever made.

But we are interested, too, in new Edgeworth smokers. We like to know that young men, men who are here & gone in their hot pipes, find Edgeworth before they get very far in their pipe-smoking careers.

So we have a standing invitation to send five samples of Edgeworth to all who ask for them. If you would like Edgeworth, we have a new package here containing 100 cigars and 100 ready-flashed Edgeworth cigars for your home and office.

Write us for it, address Larus & Brother Company, 75 South Main Street, Richmond, Va.

To avoid the headache that your pipes sometimes give you, get Edgeworth from Larus & Brother Company, and you will be prepared by parcel post to receive the package or any amount of Edgeworth Pipe Filler or Ready-Flashed for the same price you would pay for the tobacco.

NO DYE
The reason why our hair color is so popular is that it is a dyeless hair color. It is a hair color that does not stain the scalp or the hair. It is a hair color that is easy to apply and easy to wash out. It is a hair color that is safe for the hair and safe for the scalp. It is a hair color that is the best hair color ever made.

NEWS REVIEW OF CURRENT WEEK

Peace Looms in Franco-German Dispute as Result of Recent Events.

FRANCE DISAVOWS LAND GRAB

Joint Statement of French and Belgian Premiers and New German Movement Clarify Situation; British Hold Aloof; More Irish Executions; Lenin Reported Near Death.

Is the murder of two French officials by unknown persons in the invaded Ruhr district the precursor of Franco-tireur activities on the part of the civilian population in invaded Germany? Is history, as taken from the record of the days that followed the Franco-Prussian war of 1871, going to repeat itself?

HOPES FOR A PEACEFUL SETTLEMENT OF THE FRANCO-GERMAN DIFFICULTIES

Over the Ruhr occupation loom brighter as a result of three outstanding events of the past few days: the formal declaration of the French and Belgian premiers that imperialism had no part in their plans; the murder of two French officials by some unknown persons in the occupied district across the Rhine; and a new movement instigated by German capitalists expressing again the German government's desire to pay the reparations as fixed by the Versailles treaty "as far as Germany can go."

Taken chronologically the assassinations come first. Two French officers, M. Joly, a technician in charge of the railroad yards at Buer, and Lieutenant Collins, the army officer in charge of the station at that town, were done to death on March 10, their bodies being found in a road leading to Buer. They were thirty feet apart, when found, five bullet wounds being discovered in the head of each of the victims.

M. Magnin, minister of war in the French cabinet, addressing a group of French officers, gave France's first reaction when he said, "In our attitude towards the population our soldiers have animated sentiments of humanity, but such a crime cannot remain unpunished and it is only right to carry with it terrible reprisals."

The mayor of Buer, his assistant, the chief of police, and two prominent citizens have been arrested and are being held as hostages. The deaths follow that of one French soldier and two others wounded in the same district and this latest outbreak has put the troops in an unpleasant frame of mind. The deaths are laid at the door of the expelled German police by the French but no grounds that they may have for such a charge have been cited to this country. The underlying thought in the minds of those who are keeping track of events is to wonder if the Germans are starting in on the horrible Franco-tireur movement of fifty years ago that resulted in terrible reprisals by the German invaders.

STUDENTS OF CONTEMPORARY HISTORY

Immediately associated with the murders the joint statement of Premiers Poincare and Thiennes disavowing any thoughts of their two countries, France and Belgium respectively, being imperialistically inclined. Their statement was made less than two days after the double deaths near Buer and evidently was designed to offset the reaction expected from the world over the summary deaths. The statement says, categorically, that the invaders have no desire to retain permanently any additional territory over that granted them at Versailles and that the allied soldiery will retire from the occupied zone as fast as payments are made on the indemnity granted the allies by the treaty.

The statement of the premiers robbed the murders of much of their importance from an international standpoint. Had the double assassina-

tion been allowed to stand without anything else to occupy the public mind it would have removed the Ruhr controversy to the field of national prejudice, given the Germans a splendid chance to float more propaganda based on their inability to control the peoples of the occupied area, and given the French an equal opportunity to assail the Germans for injecting active armed force, coupled with murder, into a situation that is regarded by the allies as being more of a police measure than a military one.

The French have shown a desire to confine the issue entirely to a commercial plane. They assert plainly that all they want is their money and that they regret being forced to use their army as a force of bill collectors. Until the declaration by the two premiers that they would evacuate the invaded territory as fast as payment was made the world felt there was the possibility that the Ruhr would finally find itself in the same boat as Alsace-Lorraine, a part of France.

A remarkable feature of the statement is that it stands exactly upon the words and actions of that arch-enemy of France fifty-two years ago, Bismarck.

History records that Bismarck, in occupying France, asserted he would retire with his army as fast as payments on the indemnity were made. The French peasantry of those days, as will be remembered, emptied the hidden corners of their cupboards and inside of three years paid over to the Teutonic warlords the enormous sum, for that period of the world's history, of five billions of francs, roughly \$1,000,000,000, besides territory.

France went through the same strain that Germany now is undergoing. A vast portion of its people absolutely refused to aid in the payment of the indemnity and for two months the Commune, the Reds of that time, raged throughout Paris, attacking constituted authority while the German army sat idly by and watched the situation clarify itself.

History appears to have repeated itself, as it has a habit of doing, in the present Franco-German dispute. Close students are watching to see whether the Commune will arise among the Teutonic peoples; whether the German equivalent of the Franco-tireurs will arise, as was indicated by the murders of the two French officials; and whether the indemnity will be paid finally.

THE MOVEMENT PUT ON FOOT

By German capitalists is a variation from history and is therefore to be scrutinized with great care. In essence it is said to formulate plans whereby the entire structure of German industry will be placed in pawn to foreign nations as the basis of an international loan which is to be used to pay part of the country's indemnity.

Underground reports from Switzerland say that the German movement has proceeded to the extent that a tender of the equivalent of ten billions of dollars in gold was made to a French emissary. This offer is the largest that has ever been made and is considerably higher than Chancellor Cuno's tender at Paris, the rejection of which was signaled by the occupation of the Ruhr. Acceptance of the offer will unquestionably result in the immediate retirement of the French from the invaded district, as soon as satisfactory guarantees have been made.

As the French have taken one leaf out of Bismarck's book by occupying territory, they will not act hastily in consenting to a reduction of the occupying forces. In fact another 100,000 soldiers were reported either in the Ruhr or on the way, tightening their already powerful strangle-hold on the life-blood of industrial Germany.

WHAT PART THE BRITISH GOVERNMENT HAD IN THE

declaration of France and Belgium that they would retire as soon as their war debt had been paid, is not known and may never be disclosed. British diplomats are never far distant when an important matter of foreign policy comes up. It is a prime principle of the king's advisers that England shall side always with the weaker power, building it up until it overshadows its former opponent, when, in turn, the British change their sympathies. The British peoples have not forgotten the wounds inflicted by the German battle-hosts, but neither have they for-

gotten those decades around the opening of the Nineteenth century when Napoleon's name was used to frighten children to sleep, and when the menace of the Little Corporal, standing on French soil and gazing across at the cliffs of Dover while he assembled a host of fishing vessels to transport a great invading army, laid heavy on all England.

In spite of the terrible nature of the war waged by Germany since 1914 England can be relied upon to keep Germany in the concert of nations as an offset to the power of France. She has checkmated France already in several ways in the present imbroglio, chiefly by selling coal to the Berlin authorities to enable them to keep afloat in spite of the shutdown of all supplies from the invaded region. Keeping in mind the great principle of the British nation it is not difficult to forecast the fact that Germany will not be stripped of any of its Ruhr district, the life-blood of its manufacturing industry.

THE IRISH QUESTION WILL NOT

down and executions still are proceeding of the members of the "Irish public." Seven insurgents were shot to death in one day last week and the day following four more were executed by the same method, making a total of 64 in recent months. The firing squad is the answer of the constituted government to the assassinations of members of the Dull Eireann and their families, along with a huge destruction of property. Whichever side wins an enormous indemnity will have to be paid to victims of the civil strife. In this connection the refusal of the Canadian government to allow a representative of the Irish republic to enter the Dominion from New York state shows that the hand of the entire British empire is set against the revolutionists.

LENIN AND TROTZKY ARE REPORTED

near death by former Ambassador Charles R. Crane and the world is wondering what will happen to present Russian politics with the passing of either or both of these men, who are unquestionably great in their achievements, no matter how one views their activities. The death of Lenin would put the Soviet government to its greatest test and it alone will answer the question as to the depth to which his bolshevik teachings have penetrated to the mass of the people. Government is seized or perpetuated by three things: by heredity, by election or by a coup d'etat. Lenin will have no heirs, even if they would be recognized by the soviet peoples, an unthinkable thing; while the country has no election machinery and a seizure by the military is not considered likely.

It is understood that a small coterie of Lenin's advisers, some eighty men, have already apportioned their part in the events that will succeed the dictator's passing from power but the world will wonder whether the extremists or the visionaries will be in the majority when that event comes to pass. Trotzky's illness is said to be slight by others who have seen him this month.

THE PASSING OF DR. GEORGE

Francis Lydston, eminent Chicago physician and surgeon, at his home in California, has robbed the world of an outstanding figure. He was that admirable figure, a radical in thought who confined himself strictly to the orthodox practice of his profession. It was Doctor Lydston who first attracted attention by the transplantation of glands to a human body, his experiments being on himself first, showing his sincerity. He asserted, as a result of his researches, that gland transplantation afforded only temporary relief from the penalties of old age. It was a fostered assertion of his that the relief lasted only six months and had to be renewed to be effective. Doctor Lydston never asserted the glandular operation was a benefit, except in cases of dementia praecox among women or advanced age, on many of whom he successfully operated.

Another brilliant achievement of his was the sterilization of a criminal in Michigan, who was given his choice of a suspended sentence or the operation. His fame extended to the four corners of the globe and was added to by his writings, which he varied by incursions from strictly medical works to books of fiction.

American Farm Bureau

The prize-winning team of West Virginia girls who feel themselves so definitely a part of their farm bureau that they took an active part in their county membership drive last year and personally brought in a number of farm bureau memberships each. These girls are West Virginia's championship demonstration team in 4-H agricultural club work. The girls are Nell Dunn, Ocie Tune and Ina Spangler, all of Moore county, West Virginia.

TO GIVE ATTENTION TO MARKET PROBLEM

Head of New Department Created by Farm Bureau Federation Outlines His Policy.

In accordance with the pledge made the first of the year by the new executive committee that the American Farm Bureau federation would give "outstanding attention" to the marketing problem, a new department has been created in the national headquarters. Walton Petzet of Texas is director of this department of co-operative marketing.

This department is developing plans for unifying existing co-operative marketing organizations.

In beginning his new work Mr. Petzet makes it plain that he is to proceed in an orderly way and in the light of the best experience. He says: "The agricultural problem is not for farmers only, but for all classes. Agriculture is out of step with modern progress. During the last two generations there has been a revolution in industry—that is, all industry has changed from the individualistic basis to the group basis. Now we have group production and group distribution of all industrial products. On the other hand, agriculture has remained individualistic in production and individualistic in distribution.

"We hope that farming always will remain individualistic in production; this is necessary in order to preserve

tion to the national industry, by what the potato grower in Maine and Idaho is doing.

We are going to take one commodity after another until we have organized all of them. The grower of any commodity must relate himself to all the other growers of that commodity. The big idea of all is to merchandise our agricultural products instead of dumping a 12 months' supply on the market three months after harvest.

"The farmer intends to use for his own business the practice that business men now follow. The farmer is setting up his own sales department."

Commenting on Mr. Petzet's appointment, President Bradford says: "We sought out the best qualified man in America to head our new co-operative marketing department. We believe that we have found the right man for the job in Walton Petzet. His training and his type of mind fit admirably to lead the farm bureau's supreme effort to secure for the American farmer the free exercise of his undisputed right to have something to say about the price of his own product. The department of co-operative marketing will have the full financial and moral support of the American Farm Bureau federation, as well as the active aid and co-operation of every other department. The job is so tremendous that it cannot be done in a day, however, nor a year. There are already 15,000 local co-operative associations in America. Our farm people must exercise some degree of patience in their quest for market reforms, and they must help. But we are going to improve the distribution of farm products, or know the reason why. I bespeak for Mr. Petzet the active support of every farmer in America."

PROMISE INDIANS IN FARM ORGANIZATION

One of Most Picturesque Farmers' Clubs Formed in Dewey County, South Dakota.

One of the most picturesque farmers' organizations in the United States is the Promise Indian Farmers' Club in Dewey county, South Dakota. The club was organized a number of years ago and holds regular meetings at which are discussed all agricultural problems of vital importance to the group.

Since the organization of the farm bureau the Promise Indian Farmers' club has affiliated with that organization. The work is now carried on along the lines laid down by the county farm bureau, the work being handled as a separate department in the county organization.

The Indians of Dewey county are raising some corn and small grain. The output of small grain, however, is greatly limited because they have no thrashing or binding machines, with which to harvest. The nature of the land on which they are located is rough and hilly, and none of the machines from the prairie section of the country will venture into the rough land to do the thrashing.

The project on which the Promise Indian Farmers' club section of the county farm bureau is now working is that of securing a horse power thrashing machine which can be moved from place to place. The Indians have plenty of horses to carry on this work, and with such machines they can double their small grain acreage.

A great deal of interest is being shown by them in live stock and poultry. Several poultry demonstrations have been held before their groups.

Their meetings are planned along the lines suggested by the extension division of the state agricultural college. The business and technical discussions are interspersed with entertainment.

At one of the recent meetings a speaker from the state college particularly interested them in his description of the way corn was raised by the American Indians. The Dewey county Indians are now taking considerable pride in corn and planning to work out several production projects with it.

Walton Petzet, Director of Department of Co-Operative Marketing.

country life unimpaired, to keep up the fertility of our soil, to perpetuate the love of land which has always been the basis of American agricultural progress and which has made the American farmer the most efficient in the world.

"On the other hand, it is absolutely essential that farmers change their distributive system from the individualistic to the group basis. That is our task now, and that means co-operative marketing.

"It is the job of the American Farm Bureau, and particularly of the department of co-operative marketing, to develop the co-operative body of doctrine, to establish the accepted authority on collective distribution. We are going to do this out of the broad range of experiences and we are going to give it national publicity. There are two phases to the new movement: (1) To stimulate and promote co-operative marketing of all the products grown on our farms. (2) To unify and co-ordinate co-operative marketing agencies.

"For instance, all the potato districts will be co-ordinated, so as to market their crop collectively and efficiently. The income of the potato grower in Minnesota is determined by his rela-

NO OPERATION FOR HER

She Took Lydia E. Pinkham's Vegetable Compound and Escaped the Operation Doctor Advised

Louisville, Ky.—"I wish to thank you for what your medicine has done for me. I was in bed for eight or nine days every month and had a great deal of pain. The doctor said my only relief was an operation. I read of Lydia E. Pinkham's medicine and tried the Vegetable Compound and the Sensitive Wash, and they surely did wonders for me. I feel fine all the time now, also am picking up in weight. I will tell any one that your medicines are wonderful, and you may publish my letter if you wish."—Mrs. E. BOENLEN, 1180 Ash St., Louisville, Ky.

Backache, nervousness, painful times, irregularity, tired and run-down feelings, are symptoms of female troubles. Lydia E. Pinkham's Vegetable Compound should be taken whenever there is reason to fear such troubles. It contains nothing that can injure, and tends to tone up and strengthen the organs concerned, so that they may work in a healthy, normal manner. Let it help you as it has thousands of others. Lydia E. Pinkham's Vegetable Compound is now selling almost all over the world.

FRECKLES

March Brings Out Unightly Spots—How to Remove Easily.

The women with tender skin dread March because it is liable to streak her face with ugly freckles. No matter how thick her veil, the sun and winds have a strong tendency to make her freckles. Fortunately for her peace of mind, Othine—double strength—makes it possible for even those most susceptible to freckles to keep their skin clear and white. No matter how stubborn a case of freckles you have, the double strength Othine should remove them. Get an ounce from your druggist and banish the freckles. Money back if it fails.

Morning Glory Mine Showing Bright Prospects for Future

(Continued from page 1)

on the profit side of the ledger. Some zinc is found in the old work ngs.

Money Not Was.ed

The Morning Glory, unlike many other properties in this section, has put most of the money it has had for operating expenses into development work under ground, and not in mills, concentrators, buildings, etc., to make a showing in prospectuses. Upward of \$200,000 has been expended in development of this mine, and but \$15,000 has been spent in the erection of buildings, purchasing of machinery and other things that are of no use to a mine that has not enough ore to run a mill. It is not enough ore blocked out to run a mill after its installation. This speaks well for the management of the mine, and stockholders have had "a run for their money."

It requires an enormous sum of money to develop a copper mine to the point of profitable production. We believe that the Morning Glory's stockholders will realize substantial returns on their investment if a mill and concentrator are installed to treat the immense quantity of milling ore that is blocked out and in sight on their property. The mine has a splendid future.

To Install New Machinery

Plans are in the making to install two 75-hp. engines and two 300 cubic feet per minute air compressors to develop the Mineral Hill ore body and cut during development work, provide satisfactory arrangements cannot be made to secure electric power from Nogales.

The road leading to the mine from the main highway is in fairly good condition, and the ore is being hauled to Patagonia in auto trucks, which make two trips daily to the mine.

The present company took over the property in 1911 from its former owner Mr. C. R. Wilson of Patagonia, who is superintendent of the mine. Mr. Wilson retained a stock interest of considerable proportions, showing his faith in the future of the Morning Glory.

The present owners of the Morning Glory mine will continue the shipment of ore to the Douglas smelter as long as the shipping grade of ore, now being developed, holds up in value, which seems to be getting richer as work progresses and is holding its own in value.

SCHOOL NOTES.

The teachers will attend the institute at Nogales next Monday, Tuesday and Wednesday. Patagonia school has been invited to have part in the program.

Lee H. Gould, county agricultural agent, has obtained two trees from the nursery at the University of Arizona to be planted in the schoolhouse yard.

Lizzie Gardner has earned a penmanship certificate by using free-arm movement in all of her written school work.

A small size sand table has been given to the school for use in the primary rooms. Mrs. Fortune's room is working out a Dutch scene, and Mrs. Fisher's room will make a Japanese scene.

Carmela Azuna and Ernest Altomero of the first grade gave correct answers to 45 addition combinations in one minute and a half in a recent arithmetic class.

Pupils of the seventh grade geography class are giving class talks on chosen countries of Europe and using the Geographic Magazine and Burton Holmes' Travalogues to illustrate their talks.

The pupils of the fifth and sixth grades gave Miss Slater a shower of fruit and candy Friday afternoon.

The eighth grade is reviewing United States history this week for a final examination Friday.

Ralph Pattison and Raymond G. Quinn have passed arithmetic test number 13. Margaret Fortune has completed the series by passing test number 45.

First-grade pupils are making Easter cards of rabbits with real cotton tails.

A salesman for the Singer Sewing Machine Company has kindly lent a machine to the school for a short time for use by the girls of the sewing club.

Alex Fraser's map of Arizona is posted on the bulletin board in Miss Slater's room.

The Spirit of Easter

There is a joyousness about Easter that is like the budding forth of Spring itself. A spirit of eagerness and anticipation. An atmosphere of sunshine. Balmly breezes and flowers. All Nature clothes itself anew. Everywhere is the essence of new life and promise.

This awakening of Nature communicates itself to all mankind. The pulse beats a little faster. The eyes are brighter. The mind is clearer.

Being mentally clothed anew it is but natural that people should turn eagerly to new Spring apparel. This desire for "new Easter clothes" is as natural as the budding of new leaves on the trees.

J.C. Penney Co.

MARTINEZ TO BE RE-SENTENCED IN NOGALES

John W. Murphy, attorney general of Arizona, was instructed recently by Chief Justice McAllister of the state supreme court to take the necessary steps to bring Manuel Martinez before the superior court of Santa Cruz county for the setting of the date for his execution. Martinez was convicted and given the death penalty for the murder of Postmaster J. Frank Pearson of Ruby, Ariz., on August 26, 1921.

Last Friday the supreme court dismissed an appeal brought by Martinez on the grounds that it had been filed more than 60 days after judgment had been passed. The court did not fix the date for the execution at that time and a resumé of the criminal law this week by Chief Justice McAllister disclosed the fact that the supreme court had no jurisdiction in the matter because it had rendered no opinion in the case.

JOHNSON GETS AUTO CONTRACT

J. F. Johnson was awarded the contract Monday by the board of supervisors for furnishing the sheriff's office with two cars during the next fiscal year. Johnson made a flat rate bid of \$340 a month, one car to be a large one and one a small one, the board to make the selections.

Other bidders were G. F. Powell, Peck & Fenner, Auto Sales and Service Co., W. H. Davey Co., L. H. Watkins, and C. D. Rankin. A. J. O'Connor put in a bid, but later withdrew it.

There is much dissatisfaction among the losers over giving the contract to Johnson, as it is claimed his bid was not the lowest. On bare figures, it appears that the bid of Johnson is lower, but, it is claimed, the joker is his clause which reads "and other terms to be the same as last year," which means that the county will have to foot the bill for repair bills on the cars, that repair item will be worth watching. Look over your files of supervisors' reports for last year and notice what nice "repair" bills the county paid for cars furnished the sheriff's office. Considering them, there were several bids lower than Johnson's.

AT THE COMMERCIAL HOTEL

The Commercial Hotel register contains the following names of guests for the week: Jack O. Brien, San Francisco; H. Williamson, Fort Bliss; Fred Tyler, Fort Bliss; Mr. and Mrs. Clem Yore, Estes Park, Colo.; B. Maier, Bensan; William Crosby, Tucson; Charles N. Huff, H. L. Huff, W. J. Simpson, C. Bedford, Duncan, Okla.; C. A. McGamery, A. H. McGamery, Tucson; E. J. Schneider, Salt Lake City, Utah; Morton Webber, Douglas; P. S. Schilling, Tres de Mayo mine; Luciano Millanes, Salero.

GARDEN SEED FOR THE ASKING

The Patagonian office has a supply of Government garden seed for free distribution. Any one desiring to plant a garden may have what they require by calling at this office. Now is the time to prepare your ground and plant some of the hardier sorts of vegetables

IT PAYS TO ADVERTISE.

PROMINENT MINING ENGINEER SEES POSSIBILITIES HERE

Ira B. Joralemon, mining engineer of national reputation, and lately chief geologist for the Calumet & Arizona Copper Co., resigning from the position of assistant general manager of the same company to establish himself in private practice in San Francisco, expresses belief in this district's mining future in the following language, taken from the Pacific Mining News of the Engineering and Mining Journal-Press.

"Districts like the Patagonia, where there is wide-spread mineralization and comparatively insignificant ore-bodies, appear to offer opportunities for intensive underground exploration in the hope of finding vein deposits."

Leading up to the Patagonia district question, in speaking of vein mines, Mr. Joralemon said:

"Vein mines probably will become of increased importance. Arizona has three of the largest copper-bearing veins in the world—the Coronado at Morenci, the Old Dominion at Globe and the Magma at Superior. Hundreds of other veins which show a little copper in their outcroppings have been very slightly prospected. Less is known about vein outcrops than about outcrops disseminated or replacement deposits, and the development of veins in consequence carries with it a correspondingly greater risk. But many of the veins are well worth developing by companies that can afford to lose several hundred thousand dollars on the chance of finding a great mine."

SILVER PRICE MAY BE REDUCED

C. A. Pierce, mining engineer and assayer, of Patagonia recently received communications from the C. & A. and Copper Queen smelters of Douglas to the effect that after April 15 no more silver ore will be paid for at the rate of \$1 per ounce, guaranteed under the Pittman act. The reason given for setting the above date for a possible reduction in the price of silver is that it takes five or six months before they can realize on the output of their smelters.

Shippers are requested, however, to send affidavits with their shipments the same as usual, so the smelters can have records on which to make settlements in case the price of silver remains at \$1 longer than is now anticipated. The smelters are anticipating a decline after September 1, 1923.

The El Paso has not made a change in price up to date, but it is expected they will follow the lead of other smelters soon.

COUNTY AGENT GOULD ON THE JOB CONSTANTLY

County Agent Lee H. Gould spent several days last week at Tulac and Amado organizing community clubs and Monday went out to Canille and Elgin to give aid and advice to farmers in those districts. He was in Patagonia Tuesday and Thursday.

Gould's work carries him to every part of the county where farming is done, and his helpful suggestions and practical experience is of great value to the county.
