Quebec, April 25.-Floyd Bennett died in the Jeffrey Hale hospital toof pueumonia.

America lost one of her greatest frimen and the whole world mourned one of the pioneers who played a conspicuous part in the stirring aviation rats of the past year.

Bennett died at 10:45 a. m. He dled in the cause to which he had devoted his life.

Although ill in health, he sacrificed a self to fly with relief from Detroit o the trans-Atlantic plane Bremen on Greenly Island. Double eiponmulu Gronly Island. Double pneumonia developed. The man who piloted Commander Richard E. Byrd to the North Pole and risked his life in other daring feats was unable to combat it in 's weakened condition.

The entire world was concerned. Colonel Lindbergh, America's idol, made a magnificent effort to help by tlying here from New York with sorum, but it proved useless for the type of pneumonia with which Bennett was afflicted. His commander and friend, Byrd, came from Boston stand by him. Bennett amiled at

i:m and promised he would be well n time to go with Byrd on his greates texploit-the projected flight over th. South Pole this fall. The two men were like brothers. Bennett's wife is ill in the same hospital with

BREMEN TO REMAIN ON ISLAND

Murray Bay, Quebec, April 25 .-The crew of the Bremen has decided to abandon their trans-Atlantic plane and go to Quebec and the United States in the relief plane which flow from Detroit. Word reached Murray reports an important new strike of Bay this afternoon, apparently from lead-silver-copper ore, which was en- one of the crew, that difficulties of countered 60 feet from the bottom of getting off Greenly Island in the Bremen were too great and that the Mr. Kollberg started drifting toward fliers were impatient to reach civili-

LOCKHART KILLED IN FLORIDA

Daytonia Beach, Fla., April 25 .copper, of which there is a three-foot driver, was killed today in an attempt to set a new world's record for speed on the Daytonia Beach course. His ner of Mr. Kollberg and is expected Blackhawk racer left the course as it reared past the grandstand at 200 miles an hour. It somersaulted twice browing Lockhart clear the second time over. His timp form was picked up but the veteran American driver died before reachin gthe hospital. Physicians said his skull was fractured and' his chest crushed.

KEARNS LOSES DEMPSEY SUIT

New York, April 25.-Jack Kearns, formee manager of Jack Dempsey. lost his \$500,000 suit for breach of contract and damages from the former heavyweight champion in a deision rendered by a jury here tonight, Federal Judge John S. Knox ordered a verdict in favor of Dempsey on all counts in the suit.

NAVY APPROPRIATION BILL WINS

Washington, April 25.—Rejecting by decisive majorities all amendments good values and will be shipped to desgined to circumscribe the presithe smelter as fast as it can be taken dent' freedom of action in maintainout. The mine is well equipped, and ing marines in Nicaragua, the senate under J. A. Hamilton's management late oday passed the annual naval apis making fast progress in sinking to propriation bill, carrying a total of \$363,000,000.

HIGHWAYS DESTROY PREJUDICE

Discussing the advantages which

follow highway improvement in rural sections, Frank B. Curran of the Bureau of Foreign and Domestic Commerce, said:

"Recently I had the good fortune to accompany a party of highway offifals from Delaware who traveled to North Carolina to study the low-cost asphalt roads which have been so successfully developed there. Every one I questioned on the trip gave me specific example of increased prosperity of cotton and tobacco growers, banks, railroads, and business firms regulting directly from the improvement of roads in that state, and pointed out beautiful new rural schools

"But that was not the greatest impression received from the trip. That came from the realization that travelers from all over the United States were constantly passing over those roads and the roads of other states, learning to know their country better, making new friends, and losing old prejudices."

COPPER FORGING AHEAD

No industry can show a more enviable record of progress in the last few, years than can copper mining. It has gone steadly ahead, without the sensationalism often attributed to mining operations, and seems to have passed the crucisl point, with all signs laborable for th future.

This progress is the result of recent discoveries of improved methods of mining and refining that are more economical, efficient and rapid than those formerly in use. New deposits are being blocked out, and demand is repidly absorbing increasing supply.

Copper is a basic and necessary industrial metal, and we could not afford to be without an internal supply,

As usual during lead year, the Republicans are pointing with pride and the Democrats are viewing with

This is General Motors Proving Ground

A birdsaye view of the 1245-acre Proving Ground maintained by General Motors to assure the quality and value of its cars and trucks.

1. Entrance to the Proving Ground.
The group of buildings includes complete experimental and service shops, engineering offices and comfortable living quarters for resident and visiting engineers and for the driving crews. The Proving Ground personabers more than 200 men.

2. The 4-mile high-speed loop. The

largest in America, made of concrete, with turns banked to permit continuous high-speed operation. In addition, the Proving Ground has two concrete straight-aways 1% miles long, as level as a billiard table, and miles of brick, tar, gravel and dirt roads which reproduce every driving and weather

The hill-test road. Test hill grades at the Proving Ground range from 7.26 per cent to 24 per cent. The grades on public highways seldom exceed 7 per cent.

4. The "bath-tub." A depressed concrete roadway which is filled with water at varying depths to reproduce flooded roadway condi-

Here each General Motors car must prove its value

N a 1245-acre tract near Milford, Michigan, convenient to all its car and truck divisions, General Motors has the first and largest proving ground for automobiles.

Here tests are made and facts determined to a degree impossible when cars and trucks are tested on the public highways. Here each new model of General Motors must prove itself, point by point, before it is produced for sale to

the public. More than 135 different tests are applied to each car tested at the Proving Ground. vantages of a policy of continuous improvement.

They involve every phase of construction and performance: power, speed, endurance, acceleration, braking, steering, handling, riding comfort, fuel economy and so on. In three months a car or truck covers more miles than you would drive it in three years.

The Proving Ground is another example of how General Motors is serving the public. It is also your assurance that when you buy a General Motors product you are getting all possible quality and value at its price and the ad-

Look at these values—then clip the coupon

The current models of General Motors cars are briefly described below. Never before in the history of the automobile industry have such performance, such quality, such comfort and such beauty been offered in their respective price classes. They have been proved at the Proving Ground!

See which car or cars interest you most, then check and mail the coupon below. You will receive complete, illustrated information, together with two interesting little books telling all about General Motors Proving Ground and just what General Motors policies are.

(All prices F. O. B. at the factories)

CHEVROLET. 7 models, \$495 to \$715. Bigger and better than ever before, 4-wheel brakes, Longer wheel base, Still more power-ful engine, Luxurious Fisher Bodies, Shock absorber springs. New hood. New Duco colors. New instrument panel and other improvements. ALSO truck chassis: ½-ton, \$395, 1-ton, \$495.

PONTIAC. 8 models, \$745 to \$875. The lowest-priced quality "six." Improved from radiator to tail-light. For example: 4-wheel brakes, new GMR cylinder head, increased power, locking device, more luxurious Fisher Bodies. Finished in Duco in new colors.

OLDSMOBILE. 7 models, \$925 to \$1085. Entirely redesigned by General Motors, the new Oldsmobile has earned the title of "The Fine Car at Low Cost." Longer, roomier, more powerful—and the last word in styling. Fisher Bodies, 4-wheel brakes.

OAKLAND, 9 models, \$1045 to \$1375. The Ali-American Six. Advanced engineering and precision construction. Longer, lower and more beautiful. Bodies by Fisher. Every convenience, 4-wheel brakes. New Duco colors, Harmonic balancer.

BUICK. 16 models, \$1195 to \$1995. The largest value in Buick's famous history. Beautiful-tow bodies by Fisher, etaway like an arrow from a bow. Vibrationless beyond belief. Famous 6-cylinder "Valve-in-head" engine. Scaled-in chassis.

LASALLE, 16 models, \$2350 to \$2975. This beautiful car was designed as com-panion car to Cadillac, Has V-type 90 degree 8-cylinder engine which has made Cadillac the standard fine car of the world. Built in Cadillac factory. Continental in apCADILLAC, 26 models, \$3295 to \$5500, "What," General Motors asked last year, "can possibly be done to improve Cadillac?" The result is embodied in the new models now on display, representing the high-water mark of Cadillac's long history. Sumptuous bodies by Fisher and Flectwood. 500 color combinations to choose from.

FRIGIDAIRE-The Electric Refrigerator. General Motors has applied the processes which have made the automobile available to every family, to the production of electric refrigerators. Frigidaire is the refrigerator made by General Motors and it is now the world's largest selling product in its field.

DELCO-LIGHT Electric Plants. Provide the conveniences and labor-saving devices of the city for the farm. Electric light and power plants, water pumps, etc. Used in more than a quarter million homes.

For the convenient purchase of these products, General Motors offers the standard low-cost GMAC Plan.

NEWS REVIEW OF CURRENT EVENTS

Flood Control Bill Fought by Coolidge and Others as "Extortionate."

By EDWARD W. PICKARD

THAT the flood control bill passed by the senate and, with certain amendments, under debate in the house last week, is the most extortionate measure in the history of the government is the opinion of President Coolidge. His remarkably outspoken view of this bill created something of a sensation in Washington and it encouraged a group of representatives. led by Mr. Frear of Wisconsin, in a determined fight on the measure reported by the house committee. The main issue was the question of local contribution upon which the President had insisted.

"Contribution is a cardinal principle in federal, state, and municipal ald," said Mr. Frear. "This case presents no exception. Thousands of corporations and large individual owners under this bill will enjoy enormous financial benefits through flood protection. They should contribute toward the expense. If we pass this bill and adopt the plan of giving away the taxpayers' money without limit to rehabilitate or benefit great interests that can bring political pressure to bear on congress, a hundred other flood control projects now knocking at committee doors will all demand the same treatment without contribution."

Reid of Illinois, chairman of the flood control committee, said in reply: "There is in the bill no provision for local contribution. There can be none if congress intends to protect the lives and property of its citizens from these destructive floods. No levee system can be effective unless it is unified, co-ordinated, and complete, and should any levee district fail to pay a contribution necessary under the reclamation theory the whole plan would fall. Nearly every levee district is now or will soon be bankrupt. There is no possible way for them to get money, as they are unable to sell any bonds because of the default in the bonds already issued."

There were conferences of house and senate leaders for the purpose of modifying the measure so that the President would sign it. Senators Ransdell and Sackett talked with Mr. Coolidge and reported that he would approve a bill similar to the Jones bill originally reported from the senate committee. This draft, while it eliminated local contributions, contained various safeguards which were not in the measure as passed by the senate and approved by the house flood control committee.

BY HOLDING up action on the \$364, 000,000 naval appropriation bill the radical Republicans forced the senate to adopt the resolution of Blaine of Wisconsin demanding from Secretary Wilbur information as to the cost in lives and money of the operations of the marines in Nicaragua, Mr. Wilbur informed the senate that mainte nance of the marine expeditionary force in Nicaragua had resulted in the death of 21 marines and the wounding of 45 others. He set extra cost to the government of marine activities in Nicaragua at \$1,530,170. The total cost of maintaining the expeditionary force, Mr. Wilbur fixed at \$3,536,000. It was explained, however, that more than \$2,000,000 of the total cost would have been expended on the marines even if they had remained in their home stations. The secretary said it was known that 202 Nicaraguans had been killed in fights with the marines.

WASHINGTON, New York and Chicago were making plans to give rousing welcomes to the German-Irish transatiantic aviators, and were assured that the flyers would visit those cities after getting away from desolute Greenly Island in Belle Isle straits. The stories of their flight show that they lost their way because their compass failed in the dark and the snowstorm, and they wandered far to the north of their route. Relief and aid reached them by plane and otherwise

and they were busy repairing the | Bremen so they could continue their flight to New York. James Fitzmaurice, promoted to major by the Free State government, was taken to Lake Ste. Agnes, Quebec, by Duke Schiller, Canadian aviator, to get a new propeller with which he'intended by fly back to Greenly Island.

Baron von Huenefeld, Koehl and Fitzmaurice will be entertained in New York for five days, and then, proceeding to Washington, will be the guests of President Coolidge, the Irish minister and the German ambassador. The wives of Koehl and Fitzmaurice will soon join them in this country.

GEN. UMBERTO NOBILE and a crew of fifteen left Milan, Italy, in the dirigible Italia on the way to the North pole, and on the first lap of the journey ran into a fierce storm over Germany. Finally the airship, somewhat battered, came down safely at Seddin airdrome, near Stolp, Pomerania, where repairs were made and further trial flights begun. Two more hops will take it to King's bay, Spitzbergen, which will be the base of operations. Nobile, who piloted Amundsen over the North pole two years ago in the dirigible Norge, intends to make several flights over the pole, taking scientific observations. He carries a cross given by the pope which will be planted in the ice at the top of the

A DMIRAL J. K. ROBISON, former chief of the navy engineering bureau, was a star witness for the defense in the Sinclair Teapot Dome conspiracy trial and he assumed fuli responsibility for the change in the government's policy from conserving the pavy's oil reserves to storing fuel oil in seaboard tanks and that he favored the opening up of the whole re-"Sinclair asked me what we wanted if a contract was entered into," declared Robison. "I told him we wanted a pipe line among other things, and such arrangements as would give him the largest possible profits, and give us the largest possible share of his production. The more money he got, the more I got for the navy.

"I wanted to get the absolute maximum for the navy, and I got it." Robison almost shouted at the jury, as he banged the rail of the witness enclosure with his fist.

Under cross-examination Robison was compelled to admit a close friendship for Sinclair. He disclosed that he traveled for a week in Sinclair's private car and was Sinclair's dinner guest at the exclusive Lotus club in New York. He also admitted he had played poker with Sinclair the very night that Sinclair secured three valuable contracts, one of them to supplement the Teapot lease.

The defense sought to show through Former Secretary of the Navy Denby that the scheme to lease the Teapot Dome reserve was conceived in the Navy department, but Denby's testimony was shut out by a government objection.

Before the senate investigating committee C. C. Chase, a son-in-law of Albert B. Fall, made admissions that were considered extremely damaging to Sinclair's cause, and he was summoned by the government as a rebuttal witness in the trial.

SPRING in China brought a resumption of the Nationalist campaign against the Northerners and according to latest reports the Southern armies under Chiang Kai-shek are making great progress in Shantung province. where the miseries of war are added to those of famine and flood. Foreign military observers in Shanghal predict the collapse of Marshal Chang Tso-lin and his withdrawal to Manchuria within a few weeks. Japan expresses renewed fear for the safety of her nationals and her interests in Shantung and therefore has landed marines at Tsingtae and is preparing to send a large body of troops. It is almost certain that what Japan especially desires is to assure the status of her large interests in Manchurla in case Chang is defeated there.

G OV. AL SMITH was formally entered as a candidate for the Democratic nomination for President by the New York state Democratic committee at a meeting in the National Democratic club in New York city. His name was presented by former | that wrecked a dance hall.

Lieut, Gov. George R. Lunn, and the laudatory resolution was seconded by Mrs. Franklin D. Roosevelt. Both speakers centered the hopes of their party on the oil scandals. Senator Blease of South Carolina, who is strongly against Smith, has put into the Congressional Record his opinion of the situation in his state. Summarized, this is that South Carolina will oppose Smith for the nomination to the last ballot; that If Smith gets the nomination in the regular way by the two-thirds rule, South Carolina will not initiate or Join in any rump convention; and finally, that if Smith gets the nomination, some South Carolina Democrats, though not a great many, will vote the Republican ticket. while a considerable number of them will remain away from the polls, but not enough, in any event, to throw South Carolina into the Republican

Both Republicans and Democrats of Illinois held their state conventions, the former being strong for Lowden and the latter turning the delegates to Honston over to Smith. Republicans of Colorado refused to Instruct their delegates at large for Hoover. Those of Delaware and Connecticut chose uninstructed delegations to the Kansas City convention, and it is expected these delegations will do their best to "draft" Coolidge. Senator Fess of Ohlo, temporary chairman of the national convention, says he believes it will be the duty of Mr. Coolidge to accept the nomination if a deadlock.

real and not manipulated, develops. Meanwhile one national ticket already is in the field. The Socialists held their national convention in New York city and nominated Norman M. Phomas of New York for President and James H. Maurer of Reading, Pa. for vice president. Thomas is a minister and lecturer. Maurer is a member of the Reading city council and president of the Pennsylvania State Federation of Labor.

DUBLICATION of the government engineer's allotments for river and barbor work during the fiscal year 1929 discloses that Eastern and Southern waterways, together with the Mississippi, Missouri and Ohio rivers, have the lion's share of the Items running over \$1,000,000. Of the big allotments \$7,225,000 goes to the Mississippi river between the Ohio and Missouri rivers and between the Missouri river and Minneapolis, \$4,599,000 on the Ohio river, \$3,630,000 on the Missouri, \$1,-700,000 on the Hudson river, \$1,200,-000 on the East river, \$2,150,000 on the Delaware river, \$1.000,000 on the inland waterway from the Delaware river to Chesapeake bay, \$800,000 for the Savannah, Ga., harbor, \$800,000 fects have been proved. for the waterway from Beaufort to the Cape Fear river, N. C., \$650,000 for Miami harbor, and \$1,025,000 for the Sabine-Neches waterway, Texas. The Illinois river is allocted \$575,000 for improvement work with the development of the Illinois link of the lakes to the gulf route.

PRESIDENT COOLIDGE, in an address at the opening session of the annual convention of the Daughters of the American Revolution in Washington, criticized federal en croachment on the rights of the states and the growing interference of goverument in business and the life of the individual. He was warmly applauded when he asserted that the American theory of society "rests upon a higher level than communism." and uttered a plea that the nation re turn to the high ideals for which the American Revolution was fought.

G EN. OSCAR CARMONA, dictator of Portugal, was inaugurated President of the republic, having been elected by regular suffrage without opposition in March.

Violent earthquake shocks, extending over several days, caused the loss of many lives and vast destruction of property in the Balkans, mainly in Bulgaria. There were also destructive temblors in Peru and in Oaxaca state, Mexico.

Elisworth Milton Statler, sixty-five, who rose from bellboy to ownership of more hotels than any other man in the world, died of pneumonia at the Hotel Pennsylvania, New York, which he operated.

Forty persons were killed in West Plains, Mo., by a mysterious explosion

Treat Seed to Increase Yield

Gain of 1 to 12 Bushels of Corn Per Acre Reported in Corn Belt.

(Prepared by ins Pennid States Department of Agriculture,)

For five cents an acre, farmers in the central portion of the corn belt can treat their seed corn with a chemical dust that will largely prerent losses gaused by seed borne seedling blight organisms, according to A. G. Johnson, cereal pathologist of the United States Department of Agriculture. In tests conducted by J. R. Holbert of the department in co-operation with Doctor Kochler of the Illinois Agricultural Experiment station and Doctor Reddy of the lows Agricultural Experiment station seed corn treatment has resulted in increased yields of from 1 to 12 bushels

Treatment Explained.

The treatment consists in mixing the dust disinfectant with the dry shelled seed at the rate of two ounces to the bushel. Doctor Johnson estimates the total cost of freating a bushel of seed, or enough for eight acres, will not exceed 40 cents, or 5 cents an acre. The dust is applied with a mixing machine of the type used in treating wheat with copper carbonate dust for smut, A mixer can be made at home if others are not available. An ordinary barrel or oil drum mounted on an axis will serve as a mixer, or a barrel churn may be used. The dust should be thoroughly applied so that every kernel is covered with a thin coating. The seed can be treated any time be fore planting, but should be stored in a safe place because the dust is

Although numerous dust disinfectants have been tested, only three are commercially available at the present They are described in Circular 34-C, "Chemical-Dust Seed Treatments for Dent Corn," just Issued by the department and are known as Bayer dust, Improved Semesan, Jr., and Merko. Names and addresses of the firms manufacturing these dusts are given in the circular.

The recent tests show that treat ment with these chemical dusts benefits diseased seed and does not injure good seed. While treatment may not increase yields from good, healthy, clean seed, such treatment will kill certain seed-horne organisms and prevent losses which their presence might otherwise cause. Even many high-yielding strains of corn throughout the corn belt, thought to be healthy, frequently carry an appreciable amount of infection with certain fungous parasites. Such seed may result in a poor stand, in blighted plants, or in plants that fall to grow and yield nermally.

Yield of Diseased Seed.

At the Illinois station, seed that was known to be diseased gave a yield of 47.5 bushels per acre when untreated, and when treated gave a yield of 59.5 bushels, or an increase of 12 bushels to the acre. At the same station, seed that was pronounced good made a yield of 63.2 treated yielded 65.1 bushels or an increase of 1.9 bushels per ucre.

The fact that corn from diseased seed was benefited by seed treatmen should not be taken as an argument In favor of inferior seed, says the department. Rather, It shows the un portance of treating inferior seet when such seed has to be used, in or der to secure as high yields as possible.

The low cost, says Doctor Johnson and the case of application should make seed treatment appeal to al! corn growers in the central portion of the corn belt, where its beneficial ef-

A copy of Circular 34-C" may be obtained by writing to the United States Department of Agriculture, Washington, D. C.

Broadcasting Soy Beans

Often Quite Successful On land that is not very foul with

weeds and when handled properly, and the season is not very wet, brondenst soy beans are often successfully grown, especially if to be used for hay. There is more risk in growing them broadcart, however. A better way to grow them is to sow the seed in rows so they may be cultivated One difficulty that comes from broadeasting and covering with a drag is that seeds as large as soys are no likely to be covered well with a drag. and this gives a poor stand. The seed costs too much to be wasted in this way.

Soys may be double planted with a eorn planter that is set for wide rows of corn. Cultivation can be done with a one-horse harrow or cultivator

Tuberculosis Testing and Killing of Reactors

Evidence that tuberculosis testing and slaughter of reacting animals is having an Important effect on the health of cattle generally in this country is found in animals slaughtered under federal inspection. In 1917 the average, exclusive of reactors, was 2.4 by starring 40 to 50 bills in the hot, per cent. In 1927, after ten years of bed, in herry boxes. testing and killing of reacting animals, the proportion detected by the meat inspectors had been reduced to only 1.1 per cent, indicating that in the cattle shipped for slaughter there is less than half as much tuberculosis as | vrop. Those from the sets don't keep there was ten years ago.

Farmers' Elevators Doing Big Business

Grain Handled Had Value of About \$460,000,000.

(Propaged by the United States Department of Agriculture.)

More than 500,000,000 bushels of wheat, corn, rye, and other grains were handled by 3,331 farmers' eleva fors reporting to the bureau of agricultural economics, United States De partment of Agriculture, for the 1926 27 marketing senson. This grain basales value of approximately \$460, 000,000, and was handled for approximately \$10,000 formers in the five im cortant grain-producing areas of the plied States.

The 3.331 associations operating he elevators reported pald-up capital a the muount of \$57,000,000 and surdus of nearly \$25,000,000. The total investments in buildings and equip nent amounted to nearly \$60,000,000 The associations have about 420,000 stockholders, most of whom are farmers. Many of the associations buy farm supplies for their patrons, this business in side lines totaling nearly

\$170,000,000 last year. The reports show that during the 1920-27 season about 61 per cent of the associations hald dividends on capital stock. In addition, about 28 per cent of those reporting paid out paironage refunds to their patrons, onsidering these facts and also the act that 83 per cent of these farms' elevators had financial surpluses, while but 17 per cent reported deficits, there is justification for the statement that farmers' elevators as a whole are in satisfactory financial condition at the present time.

Raising Dairy Heifer

Outlined in a Leaflet Keep them growing and developing: This general advice to live-stock growers is emphasized particularly in regard to the dairy beifer after it has reached the age of six months, in "Raising the Dairy Heifer," just published by the United States Department of Agriculture as Leaflet No. 14-L. Since the helfer does not yield an income until she has freshened, the department advises that she be fed liberally in order that she may de velop rapidly and be bred for fresh ning at the normal age for the breed,

The leastet gives suggestions for mmer and winter feeding, for pas turing and for supplemental rations of legume bay, silage and grain un der various conditions of dairy farming. It also gives the proportions deruble in mixed-grain feeds for calves, suggests the proper summer and winer quarters, and advises as to the oper age for breeding. In concluon it mentions the desirability of handling the young heifer occasionally and teaching her to lead so that she is not likely to be shy and fearsome when she enters the dairy herd. It is wise to accustom her to the halter and stanchion. A little care at this time often prevents considerable trouble after calving and usually tends to make the cow gentle and tractable. Leatlet No. 14-L may be procured free on application to the Department

Good Yellow Corn Very Needful in Mash Feed

of Agriculture, Washington, D. C.

Good yellow corn is very important n mush and scratch feed. Difficulties experienced with coarsely cracked grains have caused some people to not use it as much as would otherwise be the case. When corn is cracked, it should be sifted and the finer parts put into the mash. The remainder should then be used as scratch grain. Moldy grain should always be discarded. If fine parts of cracked grain are not fed in the mash, it will not be eaten and will mold on the floors and other damp places where fed. Corn can be used liberal ly when properly balanced with other feeds. It is rich in vitamines, oil and carbohydrates but lacking in protein and minerals.

Hints for the Farm

Be sure to tie your wool clip with paper twine.

Prepare comfortable shelter for all lasses of live stock. Sow a row of summer radiches and

earn how good radishes can be in August. Fertilizer may be put on lawns,

rhubarh, asparagus and around perennial plants. Watch for the first flight of plant lice and shoot them quick with nicotine preparations. Get the first ones

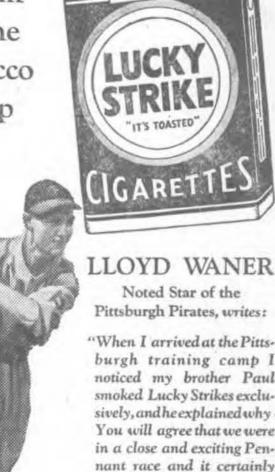

and the rest will be easy.

Onlons, the vegetable that was once the outenst of society, have at last been restored to the high position they should occupy. Plant plenty of

them. What tastes better than the first tew meals of new potatoes? You can have 'em two or three weeks sooner

Plant onlon sets or the young green onions that you can buy most everywhere now for that purpose, to use early. Plant seeds for your main

The Cream of the Tobacco Crop

Noted Star of the Pittsburgh Pirates, writes:

"When I arrived at the Pittsburgh training camp I noticed my brother Paul smoked Lucky Strikes exclusively, and he explained why You will agree that we were in a close and exciting Pennant race and it certainly called for splendid physical condition to withstand the tax and strain upon one's nerves and wind. Like Paul, my favorite Cigarette is Lucky Strike."

Lizard Scares Foes

by Display of Ruff Out in Australia, the home of the kangaroo and a lot of other curious unimals, there is a peculiar lizard, apparently impressed with the truth of the maxim that an enemy scared and chased away is an enemy less to fight today. And there's nothing like a good bluff, anyway-If It works, says the Baltimore Sun. To frighten its foes away this reptile has developed most remarkable growth of skin on its neck, ordinarily hanging in loose folds but capable of being erected into a wide fall or roll very like those of the days of Good Queen Bess, and it

ing out around the head and neck. As if all this was not enough the lizard also walks or runs on his hind feet, holding his forelegs up in the air We may hazard a guess that he borrowed the system from the kangaroos. but if he did he torgot to lend them the ruff in return. Just how terrifying all this is to the natural enemies of the frilled lizard we are unable to say, but if we look at his picture in the books we must at least admit that It makes him appear sufficiently unattractive.

show from the front when it is stand

Best Fish Story Probably the year's best fish stu-

omes from an Oklahoma correspon dent of the Farm Journal. On a recent fishing trip with two companions, he elates, his attention was distracted from his line for a moment. Suddenly one of his fellows called his attention to a powerful pull at the line and he tugged away enthusiastically-only find that an old rubber boot had been hitched to his book by his playful friends.

To complete the loke, he dragged the hoot ashore with mock seriousness and so turned the laugh on the practical lokers when an 18-inch bass leaped out.

Teach Children to Save

For the benefit of Swedish school children without money in the bank the postal savings authorities of Sweden will open 25,000 new accounts, depositing two crowns on each. Permission has been asked from the government to use \$13,400 of the postal savings income for 1927 to defray the expenses. Sweden's pri vate savings banks have made similar distributions of money for several years in order to teach the school children how to save.

Cats Before Relatives

When the will of Mrs. Emma P Rennett of Lindley, N. H., was probated it was found that her eight cats had fared better than her ten relatives. To the animal friends went a total of \$7,000, while the ten relatives had only \$4,450 to divide among themselves.

ring out sweet music and which, when touched accidentally even, resound with sweet music.—Philone and one-half hours. We all know that a dinner seems

THE IMPORTANT DESSERT

Character is like bells which

unfinished and unsatisfactory without a dessert of some kind, even a handful of raisins with a few nuts will satisfy. From

the housewife's point of view a hearty dessert will be found a real help in round ing out a meal on a cool day.

Rice Pudding de Luxe.-Heat one quart of milk in a double boiler and add one-third of a cupful of rice, onefourth cupful of sugar, one-fourth teaspoonful of sait, and cook at low temperature for two hours or longer; add one-half cupful of raisins added the last of the cooking. Stir frequently; the mixture should be like soft boiled rice. Cool, add one-half teaspoonful of vanilla and fold in, very tightly, one cupful of whipped cream. Pile in a shallow serving dish and decorate with halved cherries or shredded almonds. Candled fruit or preserves

may be used, or other nuts. Peach Betty,-Sprinkle a well-buttered baking dish with fine bread erumbs, add a layer of halved canned peaches, sprinkle with a few blanched atmonds shredded, then another layer of crumbs, dotted with butter or wellbuttered, using the crombs to finish the top. The amount of materials to use depends upon the size of the fatuliy and appetite. Pour over the topenough of the canned fruit juice to moisten well, adding a tablespoonful has been added.

of lemon juice to a cupful of the juice. Bake slowly until well set-one to

Marmalade Mousse.-Whip one pint of cream, add three-fourths of a cupful of sugar and one-half cupful of orange marmalade with a pinch of salt. Freeze for three hours.

Pleasures of the Table. When one is denied the appetite

to enjoy the delightful foods that are daily placed upon the table one is cut off from one of the main pleasures of life. The dainty service, the attractive coloring of dishes, as well as the viands and flowers, all add tremendously to our delight.

During the cool months when shut in from inclement weather in the North, is the time to use our most brilliant tableware, the brightest flowers and the most appealing dishes.

For those who are much in the open. foods of a much heartler kind may be prepared, but for the inactive, invalid, or aged, foods easy of digestion and appealing to the senses are desirable. A dessert should be planned as a part of the menu, rather than, as is

so often the case, a dish tacked on, as a sweet. Children always enjoy puddings so much that it is a pleasure to serve them. These will be found suitable for either young or old, active or inac-

Good Food Preparation Center. activities in the daily routine should follow each other from one center to the next without confusion, so that there is a good light at each, and so that the necessary passing of persons through the kitchen does not intering a few drops of hot water and | fere with the work. A shelf or table by the back door for incoming supplies will cut down the traffic.

serving, and clearing away and dishwashing are the four activities that follow each other every day and several times a day in most kitchens, Compact centers for these Jobs should therefore follow the same order around the room from left to right, since for the right-handed person work generally moves conveniently in this direction. The centers for serving and for clearing away and dishwashing should be nearest the diningroom and close together. Dishes and silver can then be washed and put away all within the space of a few square feet and are just where they are wanted for use at the next meal.

Raw food is prepared chiefly at sink and work-table or kitchen cabinet. At the sink, fruits and vegetables are washed and pared, and mensils are filled with water for cooking. Near the sink, then, should be kept brushes, knives, colunder, strainers, and similar tools; stewpans, double bollers, and other mensils that are filled with water before they are put on the stove; and a garbage can. Small stores of the less perishable fruits and vegetables may be kept in a cupboard or bin under one of the drainboards. At the work-table are needed sugar, flour, sait, spices, and other dry groceries. It is not necessary to have a kitchen cabinet, but many home-makers find this piece of equipment useful. Mixing bowls and spoons, measuring cups, molding board, rolling pin, food chopper, bread and cake pans, and all such utensils, large and small, needed frequently in mixing and getting food ready to serve, are also kept at the food preparation center.

JERUSALEM ARTICHOKE CHIPS

Jerusalem artichoke chips are de licious and easily made. Pare the artichokes, slice very thin, and sonk half an hour in cold water. Dry between towels and drop into very hot fat (400) degrees F.). Cottonseed oil is the best fat for this purpose, Skim out the chips when nicely browned and drain and salt in the usual way.

: A Savory Pot Roast :

Pot Roast of Beef With Buttered Carrots and Stuffed Onions.

(Prepared by the Bureau of Home Economics United States Department of Agriculture.) The secret of a savory, flavory, pot roast fies in browning the meat well, followed by long, slow cooking in a covered vessel with but fittle addecwater. Some of the inices of the meat will cook out so that when the meat is done there will be considerably more figuid in the pan than you put in. All of this liquid is utilized in making the gravy, so none of the goodness of the meat is lost. There is all the difference in the world between a pot roast made in this way. and a piece of boiled meat, which has lost much of its flavor in the surround

The bureau of home economics gives the following directions for preparing a tasty pot roast from such cuts of beef as chuck ribs, cross arms, clod, round or rump.

Brown the meat well on all sides in a heavy kettle, using a small quantity of beef fat. Slip a low rack under the meat, add one-half cupful water, cover tightly, and simmer until tender. The time required for cooking cannot be definitely stated, but it will probably be about three hours. Turn the roast occasionally. Sprinkle lightly with salt toward the end of the cooking. When the meat is done, remove from the kettle and your out the liquid, and skim off the excess tat. To each up of meat stock, add 11/2 to 2 tablespoonfuls of flour, mixed until smooth with a small quantity of cold water, Cook the gravy until thickened, add more salt if necessary, and season with pepper and chopped parsley. Serve the meat on a hot platter with buttered corrots and stuffed onlona.

Select a piece from 4 to 6 pounds in

weight. Wipe with a damp cloth.

HIS MISTAKE

Tilden Is Silent on Prospects

TILL TILDEN, captain of America's 1928 Davis cup tennis squad. believes "the only way to train for tennis is to practice" and is accordingly putting his idea into effect among the candidates for the international competition team.

"The boys don't need a nurse to tell them what time to go to bed and what to eat, all they need is common horse sense," Tilden declared when asked whether, as captain, he would institute training rules for the first tennis training squad ever assembled in the United States. Thus the leader of the

eight American Davis cup teams dispelled an idea of many observers that Tilden would put into effect new theories on how a racquet wie:der should prepare for internation-

al competition. Tilden is making no promises of what the 1928 team will do

toward recapturing the cup taken to France by Lacoste, Cochet, Borotra and Brugnon. He is merely smiling confidently and starting the candidates to work early and continuing late.

The only point stressed by Tilden in the drill was getting to the showers and dressing after play was completed. He was taking no chances of any of the candidates contracting a

A check of players on hand, according to the ranking of the Tennis association disclosed that five of the first ten ranking players of the nation are competing for team places. The first ten are: Tilden, Francis Hunter,

George Lott, E. Manuel Alonso, John Hennessey, John Van Ryan, Arnold Jones, John Doeg, Lewis White and Cranston Holman. Tilden. Lott, Hennessey, Jones and Doeg are on hand,

in addition to Edward G. Chandler, Harvard law student and former intercollegiate title holder; Wray Brown, sensational St. Louis player; Wilmer Allison, intercollegiate champion; Frank Shields, national junior champion, and W. F. Coen, Jr., protege of Tilden, Alonso is not eligible for the Davis cup team, since his home is Spain,

Pilot Moriarty Sees Odd-Year Jinx Shattered.

Sight of Harry Heilmann sending the baseball rocketing off his bludgeon over the distant fences of the Texas league circuit this spring would gladden the hearts of the customers of Navin field, writes Harry Bullion in the Detroit Free Press.

Not an ounce of superfluous weight on his gigantic frame, the world's champion hitter is in the best condition of his athletic life right now and if all signs are not an unanimous "bust" be'll be a big factor in whatever success is achieved by the Tigers

Precedent is against Heilmann's leading the American league this year, but tradition is apt to fade out before the slugging ability of the big right

In odd years, 1921, 1923, 1925 and 1927, Heilmann led the batters in the American and in two of them compiled the highest average in both of the majors. This is an even year, and his complex is against a repetition of his performance in the four odd years.

Still Morlarty, for one, is nursing the hunch that Heilmann is going to surpass his best previous performances with the bat, and one of the four championship years he batted over

Heilmann entered the camp weighing less than at any time last season and he tips the beam now at 194 pounds. "Let up a little hit," Fothergill adelsed Heilmann, "you're making It tough for me,"

While it is not generally known, it is a fact that Heilmann is holder of a batting record that stood for 21 years. He is the only right-hand hitter who ever led the American lengue four times. In his heyday, Napoleon Lajole topped sthe batters in the junior loop three times. His last year was 1905.

No other right-hand hitter led the league from then until 1921, when Heilmann broke the reign of the left handers, In 1923 Harry led the parade again and in 1925 he tied Lajole for batting honors by righthand hitters. Then, when he slugged his way to the top last year, he broke Lajole's and his own record by winning the fourth championship,

This spring Hellmann has given every indication that he is into his stride by the way he hits to right field. Like a bullet the ball sails off the club to the sector back of first

This Rookie's Name

Possibly Is Angus The following story comes from San Antonio, Texas, where the Tigers were training:

"A Tiger rookle struck up an acquaintance with a clerk in a cigar store and formed a habit of dropping in on him every morning to read his paper. The other day a customer came in and ordered a certain brand of igar for ten cents. He was quickly followed by a second, who ordered the same thing.

As both departed the rookie nsked the clerk: "'Ain't those clgars three for a quarter?' To which the clerk

replied 'yes.' "'Well, give me the third." said the rookie, laying down a nickel!"

Makes Hole in One That Is Not to Be Recorded

Here's the story of a golfer's holen-one that wasn't a hole-in-one. But Charles J. Foret, Modesto druggist, for a few minutes experienced all the thrills and joy that go with the their all, sinking of a tee shot. On the fifth tee at the Stanislaus links, Modesto, Calif., Foret whacked his balt. It was a perfect shot; it landed on the green and disappeared. "A hole-inone!" yelled his caddy, "And I'm here to witness it," ndded Attorney

T. B. Scott, Foret's opponent. But Foret didn't experience the pleasure of removing the ball from the cup. It had rolled down a freshresident of Baltimore, Md. Only three by made gopher hole nearby-and sprinters-Howard Drew, Cyril H. when he started to pick up the ball sight down the hole.

Lesson for April 29

THE COST OF DISCIPLESHIP LESSON TEXT-Mark 10:17-27; 12:

GOLDEN TEXT-Where your treas-PRIMARY TOPIC - Loving Jesus

Best of All.
JUNIOR TOPIC-Putting Jesus First INTERMEDIATE AND SENIOR TOP C-The Supreme Choice, YOUNG PEOPLE AND ADULT TOP-

I. The Rich Young Ruler (10:17-27). 1. His question,

"What shall I do that I may inherit eternal life?" This young man was in earnest. He came running and kneeled to Jesus. This question reveals a vold in his heart. He was a young man with a lovable character. "Jesus beholding him, loved him." He was moral, honest, earnest and courageous, but had a defective theology. He thought that eternal life could be obtained by good works. Though he claimed to have kept the law, he was conscious of tacking something. He was willing to do something to fill up that which was lacking, therefore he came to Jesus to make inquiry as to that lack.

2. Jesus' reply (vv. 18, 19). He knew the young man's heart and put His finger on the weak spot in his life. Jesus reiterated the commandments. The young man averred that he had all his life kept these commandments, but when it came to parting with his possessions in order to help his neighbor be parted with the Lord, going away sorrowful.

3. Lacking one thing and yet tost (vv. 21, 22).

When the Lord pointed out to him that the defect in his life was the love of money, he was unwilling to pay the price. When the time came in his life to choose between eternal life and riches he chose wealth and parted company with Christ.

4. The perit of riches (vv. 23-27). Jesus said, "How hardly shall they that have riches enter into the kingdom of God." When He discerned the astonishment of the disciples He answered again and sald, "How hard is it for them that trust in riches to enter into the kingdom of God. It is easier for a camel to go through the eye of a needle, than for a rich man to enter into the kingdom of God," The difficulty does not lie in the fact that a man possesses riches, for one may possess riches and still be an heir of the kingdom. Wealth is a mighty power. In itself it is good. It will provide bread for the widow and orphans, amelioration for the suffering, and send the gospel of Christ to the ends of the earth. The peril of riches lies in trusting in them. However, the step from possession of riches to trusting in them is a very New York countles. the soul. So long as a man possesses riches he is safe, but as soon as riches

possess the man he is in deadly peril. II. The Widow's Mite (Mark 12: 41-44). Jesus had spent a strennous day and was now quietly watching the

surging throng. Observe: 1. Jesus sitting over against the treasury (v. 41). The treasury was the place where the worshipers deposited their tithes and offerings Jesus sat where He could see them drop their money into the chests. He saw the poor casting into the treasury their small coins and He also saw the rich bringing larger coins. It is a solemn truth that Jesus' eve always beholds the gifts of the people. We may be able to conceal them from the people, but we cannot conceal them from His eve-

2. A certain poor widow threw into the treasury two mites (v. 42). The mite was the smallest conne

coin made. The mite was worth about one-eighth of a cent, therefore her offering was one-fourth of a cent in value. 3. Jesus sald unto His disciples.

Verily I say unto you that this poor widow bath east more in than all they which have cast into the treasury" (v. 43). The Lord estimates gifts by the motive of the heart, not by their amount.

4. Gifts are mensured by what the giver has left, not by what was given (v. 44). This widow cast into the treasury all that she had, even all her living. The rich gave of their abundance. Though their gifts were much more than that of the poor widow, yet they had an abundance

This woman's influence goes on Many devoted Christians have followed her example and have given

Improved Uniform International

Who Was "Uncle

By ELMO SCOTT WATSON HO is Uncle Sam? As

everybody knows, he is that genial, lanky individunl dressed in a starspangled coat and striped trousers and wearing the tall beaver but who is universally accepted as the symbol of the United States, just as John Bull is the symbol of England But who WAS Uncle Sam? That is to say. was there a real person who was the

original of this figure, made so famillar to all of us by the cartoonists? The answer is: there was, but alhough Samuel Wilson, a native of New York and a government contracor during the war of 1812, is said by nost historians to have been this original, there are a few inconsistencies in the commonly-accepted story of Samuel Wilson's being the original Uncle Sum which need to be reconciled and some account also needs to be taken of a fictitious person, the product of a Canadian humorist, before the history of "Uncle Sam" can be declared complete.

Two states claim the honor of being he burlal place of the original Uncle Sam. Recently the United Press sent out the following dispatch which presents New York's claim to that bonor:

Catskill, N. Y .- Few persons know nat this peaceful Hudson river village the birthplace of one of the most mous nicknames and trademarks the orld has ever known.

Uncle Sam, who was largely respon-ible for the feeding of the American orces during the War of 1812 was a native of Catskill, according to Charles A. Elliot, a grand-nephew of the fa-mous "U. S."

According to Elliot, this is the story f the origin of the nickname.

There were Samuel, Nathaniel and Edward Wilson, brothers, who were as-sociated in the meat packing business n the Hudson valley early in the Ninecenth century. The countryside knew hem as Uncle Sam, Uncle Nat and Uncle Ned. Samuel, who lived in Troy, came to Catskill during the War of 1812 to take

active part in the firm established by Nathaniel. They were under contract to supply best and pork to the United States army, drawing their supply from Greene, Delaware, and other centra Many of the casks shipped from the

wealth is to destroy the noble life of Catskill dock bore the government the soul. So long as a man possesses mark "U. S" upon them. The nation was young then and the abbreviation of its name was not so common in that day as in tals.

So one day, when a boatman asked the man who was branding a pork shipment what the two letters repreented, the brander replied: "Why, hat means Uncle Sam, the senior part-

er of the firm. The boatman thought it was a great iver, retelling it whenever opportunity

Thus, Uncle Sam, the American came reated by an unknown boatman but estined to rank with the world's reatest figures of history and fiction. After the war, Uncle Sam returned his business at Troy and his sons Benjamin and Albert. He died in Troy uly 31, 1844, and is buried in that city, ut his namesake lives on, a truly im nortal being in the opinion of his mil-ions of patriolic nieces and nephews

But Indiana also lays claim to olding within her soil the dust of this famous character and that claim was put forth recently in the foilowing article which appeared in the Indianapolis Star:

Kendallville, Ind -A woman's intul tion and her love of patriotic history has led to the discovery of the last resting place of the original "Uncle Sam," whom admiring millions of Americans have held in worshipful es-

A chance remark came to the ears of Mrs. Louise B. Young of Kendaltville associated with your correspondent in the publication of the Noble Farmer, an agricultural publication. Her for news scented a story, and arming herself with a camera, she set out for the facts and obtained a picture of the tombstone erected at the grave of Uncle Sam, buried in a little obscure raveyard near Morriam, Noble county. Indiana, on the route of the Lincoln highway. The stonecutter made a mistake of thirteen years in the date of nis death, which has never been recti ed, as the family hoped at to erect a monument fitting the charac-

er it represented. Visiting the son, John M. Wilson, ninety-three years old, and his grand-

were obtained and fully verified: Samuel Wilson, one of triplets, two

boys and a girl, was born at Wilming-ton, Del., March 4, 1773, the son of Marmaduke and Mary Wilson, who came to America from Scotland. There rere no other children in the family Growing to manhood there, Samuel with his brother joined the Lewis and

Clark Northwest expedition in 1894, ac-companying them as far as where Man-dan, N. D., is now located. These young men spent the winter there, returning to St. Louis, Me., in the spring. Later they returned to Troy-on-the-Hudson, N. Y., where they joined with one Elbert Anderson, who owned and operated a general store.

When war with Great Britain was eclared in 1812, the Anderson store was converted into a government sup-ply headquarters, with Anderson as commissary and Samuel Wilson as his superintendent, afterward a quarter-master. Among Mr. Wilson's duties was that of examining and marking all packages for government use. The his associates as "Uncle Sam," and on day when a longshoreman was asked the meaning of these initials, he replied by saying: "For Elbert Anderson the commissary and Uncle Sam, his superintendent, for he and the United States are all one. He represents the government, too," Meant as a joke, the idea took hold and Mr. Wilson's name, "Uncle Sam," since that time has passed current as a personification

Later Uncle Sam began to appear in ariculure, in many guises before the Civil war. Although tall and slender as Mr. Wilson was, it is thought the present conception of Uncle Sam, which began to appear in cartons in the early 'ass, had its inspiration in the tall, gaunt figure of Abraham Lin-

"Uncle Sam" had a varied experience during the war. He was on board the Constitution in that famous twenty-five minute hattle with the Guerriers when the latter was sunk off Cape Gace. In this battle Uncle Sam was cited for gallantry by Capt. Isaac Hull and when he was honorably discharged he received two land warrants from the government. One of these war-rants he sold to his son John M., who now lives at Albion, Ind., white the other went to a Jim Harrison and was also used in Indiana. After the War of 1812, Uncle Sam

went to Pennsylvania where he was united in marriage to a Miss Sasan Anderson of Cumberland county. To this union ten children were horn-seven boys and three girls, as follows: Nonh, David, Andrew, Samuel, An-thony, James, John, Mary, Angeline

By trade and profession Uncle Sam was a tailer and a doctor. His son, John, new has a lance that was used by Uncle Sam to allegate the sufferwhen "bleeding" was regarded as a cure-all for most allments.

As time rolled on, and the caricature of Uncle Sam became more and more in use, his family developed a strong antipathy to this familiarity, and when they moved to Indiana among strang

daughter, Mrs. Clasa Zumbaugh, both | identity of Uncle Sam a secret. How-living at Albion, the following facts | ever, a chance remark furnished a clew which when followed brought the above story, which and fully verified.

Uncle Sam died March 7, 1878, in Koscinsko county, Ind., at the age of one hundred years and three days. His body was later removed to Merriam where it now rests with other mem-

bers of the family. Accompanying the Star story is a photograph of Uncle Sam's gravestone which has since been widely printed in newspapers throughout the country. On the gravestone appears the legend "Soldier of 1812-SAM-UEL WH.SON-Died Mar. 7, 1865, Aged 100 Years & 3 ds." From the two accounts given above, it is apparent that, while there is no doubt as to Samuel Witson being the origtestimony on his death and burial raises some interesting questions, Did he die on July 31, 1844 or on March 7, 1865 or on March 7, 1878? How did the stone-cutter happen to make the mistake of 13 years in the date of his death? Is he buried in Troy, N. Y. or in the obscure little

cemetery near Merriam, Ind.? The contribution of a Canadian humorist to the history of Uncle Sum is rather an incidental one, but interesting, nevertheless. In 1835 Judge Thomas Chandler Hallburton of Windsor, Nova Scotia, created a charneter known as "Sam Slick of Slickville, Onion county, Connecticut," whose adventures appeared anonymously in The Nova Scotlan, Later it was published as a book by the editor, Joseph Howe, under the name of "The Clockmaker, or the Doings of Sam Slick of Slickville," A copy was lent to Bentley, the English publisher. who issued an English edition.

To the English Sam Slick was the typical American, in his shrewd sayings, his shrewd business dealings and in his bonsting that the United States was the greatest nation in the world. Consequently the pictures of Sam Slick, as drawn by Hervien, a Frenchman, and Leech, the artist who made Punch famous, for the English editions of "The Clockmaker," came to be looked upon as the symbol of the United States and some unknown artist, whether English or American is unknown, at some unknown time, went a step further with the conception of the typical American. He added a goatee to Sam Slick's smoothshaven face, put some stars in the hatband of his tall hat, some more stars on his coat and stripes on his trousers, beld down by long straps, and behold-Sam Slick was Cacle Sam, the symbol of America henceforth!

Relief for Filipinos

Driven out of business following the ecent opening of a new road and the subsequent introduction of motor truck transportation, 1,000 bull-cart drivers in the mountain province of the Philippines are facing destitution. They constitute more than one-half the inhabitants in the vicinity of Tagudin, which is enjoying one of the best rice crops in years. Efforts are being made to interest them in rice | watched the water flowing torrentially

growing and to introduce into that ter- | down the gutter toward the drain. ritory a new variety of rice that will permit the harvesting of two crops a year and double the yield. The government is distributing the seed which is especially adapted to the climate there.

Too Late to Change

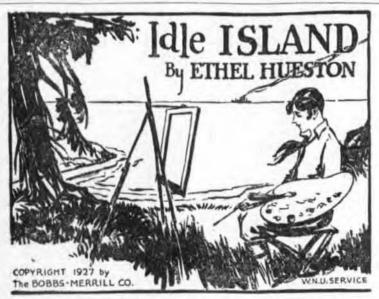

The rain was pouring stendily down and the children were feeling distinct ly unhappy. With their faces pressed close to the window panes they

"I am afraid we'll have to give up the idea of going to the zoo, children," remarked their mother. "You see, it's never going to leave off,"

"But, mummie," protested little

Maurice, who had set his heart on an elephant ride, "we must go! Yes, we must, 'cos I've put it down in my diary that we went?"

of us. But you won't be-very long.

Where are your papers?"

CHAPTER XII __Continued

-17-

The captain studied the papers again. "Pulled a boner bringing that fool

Besser on board," he said softly. "What am I to do with him?" "Sorry, but I had to bring him. I

couldn't let him go. He had been smooping about, and I didn't know how much he had picked up."

"Why didn't you-" The captain's gentle voice trailed off suggestively.

"Two reasons, and both d-d good ones. We couldn't get rid of him in that cove. You ought to know that .-My God, I'll never forget poor Blakely, and how he kept coming in on every wave.-That cove, I tell you, is a trap. The tide gets nothing out, brings everything back .- Five times Blakely came in-the men cursing and praying -crossing themselves,-And at the last we had to keep him there in the shack till be rotted. I tell you, rotted. -Besides," he said, "that was my bargain with you. I told you in the beginning that I stuck at murder, and I still do. D-d if I'll kill them unless I have to."

"A good preacher was lost in you, Ronnie," the captain said affectionately. "You've got a conscience-or a weak stomach-same thing.-Why, what's one crook more or less in a world full of 'em?"

"Blakely was no more a crook than I am," Ronald muttered dougedly.

The captain taughed jovially, "Well, bless us, boy, what else are you?-Come, have more coffee.-You've got the blues." He touched the bell. The captain glanced at the list of names in his hand, "Bring Mr. Rivers," he sald to the seamon who answered.

"There's a reward of three thousand for him, but he had plenty on him, so I said five."

One of the men from the Little club came in, his hat in his hand. The two officers nodded to him curtly, without offering him a chair. He laid his papers before the captain.

"John D. Rivers. London. Passports, visas, birth certificate, everything O. K .- Ninety dollars, Mr. Rivers. I understand you are going home on this old freighter because of the economy.-Sorry we can give you no better accommodations," he said suavely, "but we do not cater to passengers, really.-Fare, ninety dollars."

The man Rivers without a word counted out five thousand from his wallet, and laid it

Ingram handed him a receipt for the

One after another the men from the Little club were ushered into the cap .tain's room, their papers examined with great attentiveness, their money taken-usually fat rolls of bills for which a form receipt was given in ex-

When the last man had gone out the captain figured swiftly on the back of an envelope for a moment. Then, detaching a small amount from the heap in his open drawer, he counted out a portion of it, and put it in a eection of the wall safe beside the desk.

"One thousand eight dollars for the good ship Roger Williams," he said. "Twelve stalwart passengers at ninety dollars a head."

The rest of the money he tucked quickly into a steel box, and touching a secret spring in his table, fitted the box within it, closed it again. "And for the brains and blood behind the Roger Williams-a wee mite more," he said taughingly.

They smoked for a moment in silence. The captain poured out fresh coffee, "The papers were good," the captain said in a tone of satisfaction. "He's getting better and better.-We may need to keep a friendly oversight on him. He's getting almost too good. -Well, let's turn in. I'm tired. You look like the face on the bar-room floor, Ronnie. Cheer up. Things are tooking up to heaven. That takes care of everything, doesn't it?"

One instant they both paused, on the edges of their chairs, for a final pull at their eigarettes. And in that moment Gay wriggled out from be neath the bunk silently and took one firm but fearful step toward them.

"It-doesn't take care of-me," she stammered weakly.

CHAPTER XIII

"Gay Delane!" The exclamation

was Ronald Ingram's. Even in that terrible moment Gay was quick to observe the sinister change that came over the captain's face. His air from one of rich wellbeing became portentous and greatly still. The soft brown eyes receded into themselves, became fathomlessly deep and dangerous. His tips showed a straight red line between the black of his mustacle and beard. One quick why he had purchased the clubhouse, how Blakely's body came into the cove- I put everything together and it was strange. So-I-just snooped." A quick flash of amusement lightened the black fury of the captain's face. "Oh! You snooped!"

"Yes, I-I loved him, and I had to find out from the plazza floor and crawled under and peeked through the oilcloth over the window and-I saw everything."

"And knowing - everything - still you took a chance and came along?" "I could not bear to-to let him go away-into such danger-alone, Besides-it is all your fault," she said accusingly, but there was no very convincing quality in the accusation. "You are older than he, you are magnetic, powerful. You led him into it." The captain laughed softly at that, but frowned again in a moment.

"This is a devilish kettle of fish," ne grumbled anxiously to Ronald. "Where are her papers?" "She has no papers, sir. She only

decided to come tonight." "How do you expect to get her

shore-"She won't go ashore, sir. She is an American citizen, so am L. She will stay on board when we are in foreign ports. And when we come back we can land ter at the Island .- I couldn't come away-without ber."

The captain lighted a cigarette, and bit the end of it thoughtfully. His mildness of manner had returned. "I'm not blaming him, you under-

stand, Miss-Miss-"Gay is my name, Gay Delane."

"Gay. That's dce. Like that. Call you Gay then, right off, since you'll sort of be my mate-in-law as you might say .- You'll have to keep in your cabin, out of sight of the men,-

"Why Do Women Have to Blab Everything They Know"

You understand how men are, miss, when they're at sea, no women, you know-goes to their heads-nice chaps our men, fine chaps-but the thought of a comun goes right to their heads."

"I-I wouldn't cause trouble for anything," Gay said quickly, and hope sprang into her heart again. "I am sorry I came. I see now how foolish it was. But things just-went to my showed in the captain's black eyes head, too, I suspect.-Perhaps you'd be or just put we off and send me ashore in a small boot."

"I'd like to," the captain said pleasantly, and a smile snowed in the dark mild eyes, "I'd like to first rate. But It's too late now. No, you'll have to stick it out with the Roger Williams this trip. Keep her in your cabin. Ronald, until- You'll have to be married! That's the dope. The men don't have much regard for women. but they show . ome respect to a wife." Gay flashed a frightened, appealing

look at Ronald. Married! "The captain marry us," he stammered. "At sea. Captain's privilege. Yes, that would be-best." But he

did not meet her eyes. "Yes. And me utime, keep her in your cabin, and out of sight." The captain's eyes wandered to Gay again warmly appraisin; slowly approving 'Maybe she'd better stay here, My eabln is safe enough, for woman, child or beast. I'll keep her for you."

"No. She'll be all right in my mhin.-She-she is very nervous; Imust console her."

"I could console her," said the captain, smiling broadly.

Punishment Not Given for the Child's Good That most children are punished not to make them better but because the

Lane, writing in the Delineator Maga-"Parents have certain pictures of themselves," points out Mr. Lane, "certain conceptions of themselves, and they do not like to have these disturbed. Even a child, if he steps on an adult's ego, is likely to regret it. And then we have to admit that children are nuisances. Love them as we may, cherish them as tenderly as we wish, they annoy us tremendously. They make us climb the stairs at night to give them drinks; they disobey us; they endanger our property by striking matches. They break things -they lose things. They pile all the chairs in one corner of the room and call it a steamboat. They trail mud

through the house: they leave marks

on the walls. They break out in new

misconduct every day. We cannot

cope with all the varieties of their mischief.

"And so we punish them. We punish them because they make us angry, interfere with our plans and cause us vorry. No parent likes to have his day knocked into a cocked bat."

Peculiar Roman Sauce

The use by the Romans of the sauce which they called "garum" and which consisted of the thoroughly rotted entrails of the tunny fish, must mean that despite the fact that the Roman taws forbade selling in the market any fish that had ceased to glisten, and for that reason forbade the wetting of fish after it left the water, much unclean fish was enten and needed therefore to be flavored with a sauce made of decayed fish.

Garum cost in the days of the Roman empire about what a good bottle of brandy costs in France today.-Scrib

Ronald answered with a straight definnt stare. He stepped quickly to the door and opened it, then, after a moment's pause while he waited for a seaman to pass through the corridor, he took Gay's hand.

The captain, rilling, gave her a friendly touch on the shoulder. "Don't be frightened, little girl," he said, "I'm going to take care of you. I am the captain here. Don't be fright-

"Th-thanks," stammered Gay weakly, and then, hurried by Ronald who held her hand, the ran, a boyish slim figure beside him, down the corridor to the farther cabin, and the door closed behind them. Safe in their retreat, Gay faced

opturned, hands in pockets, eyes stubown. She was not afraid of Ronald Ingram, "What-what in the-the name ofheaven and earth-" he began wildly,

what in the name-of heaven-

Ronald Ingram defiantly, chin sturdily

"You said that once," she interupted coldly, "Don't be silly," And then she wilted suddenly. "D-don't scold me. 1-1-feel just-terrible, 1 -I know I'm going to cry." Then, remembering Rand, she stiffened, faced him furiously again, drove the quiver from her lips, "Where is he," she cried, "where is Randolph Wallace?

What have you done with him?" "Oh!" Ronald Ingram looked white and sick all at once. "Oh, the Cavafier !- So that's It. I might have known. Fool that I was, for a moment I believed it-1 thought-I beleved you really did come-because you loved me-" His voice broke, and his eyes were smartingly bright,

But Gay was heartless. She caught his arm, held it in wrenching, strong young fingers. "You tell me," she commanded. "If you have hurt-one hair of his head-"

"I baven't seen him, Gay, I don't know anything about him. What has he to do with-us?"

Gay wilted again, broke into soft painful sobs. "Rand, Rand," she whispered through tears.

"Don't cry. Don't. He-he's all right. D-n him, I don't know where he is, but he's all right. Nothing ever -only us poor-devils-who-get-Don't cry, Gay." He put his arm about her tenderly, but Gay wept passionately and would not be comforted.

"What the dickens did you tell him all that for?" he broke in at last impatiently. "Nice mess you've got yourself into. Why didn't you keep your mouth shut, as I gave you a sign? Why do women always have to blab everything they know?. You put yourself in his power by your own words. If he thought you were innocent, knew nothing, he would send you ashore, But now, knowing you have his life In your hands, you are his slave for life. You'll never get out of his sight as long as you live. He wouldn't dure let you go."

"I was afraid of it," she said faintly. "I knew I bad made a mistake when saw his eyes. I was very foolish. I was never-very wise," she admitted pathetically.

"No. But you are-very sweet," he said sadly.

"Help me, Ronald. Won't you help me? You said you-liked me. I only came because 1 thought-" "You thought that chap-the Cava-

"I thought you would kill him, so I came-To intercede for him-to save

hlm?" "Alas, no, I had no hope. I thought

you would let us die together." "I will belp you, Gay. It is putting my nose behind the bars to run the risk, but I will do what I can. We must think, we must plan it out. You must pretend to be in love with mekeep away from the captain-fear him more than the men. Gay, I am afraid be will insist that you marry me. I almost hope he will."

"Oh, no: oh, no." "You could easily have it annulled. Gay, don't be foolish-marriage would protect you-uptil you reach home. I the captain. Do not think he would stick at murder? Don't you know that when a man is facing exposure, capture, death, he is mad-quite mad? Well, you mean those things to the captain, Gay, exposure, capture, death. He will keep you in his web like a spider. Remember Blakely-"

"Rlakely," she said sadly, "Poor Blakely!"

"You stand where Blakely stood Watch the captain, and do not cross him, or you'll lie where Blakely lies. Blakely got in a mess-with a woman, 100-no wonder Garman rules the women out; we've lost three good men because of them. Well, Blakely tried to swing Garman in to clear bimself. You saw the end of Blakely. I tell you, Gay, watch the captain, and do not cross him." "But, Ronald, I can't marry you.

-1 love- 1 can't marry you. "Sh!" He signaled her into silence, his manner changed. "I know, dear est," he said clearly, "but don't cry Don't be afraid of him. We were

very wrong to do this, and put

him in such a position, but he has

promised to take care of you and he will keep his promise." He indicated for her to take her "1-1 am afraid, Ronald," she said faintly at first, but gaining courage as she spoke. "I-I wish I could go

me. I know. He tooked very flercely at me. He is bandsome, is be not? But I know he hates me." A brisk tap at the door, and it opened. The captain entered, and, is to give it a seating capacity of 450, of sufficient proportion to carry out one of the bravest of men, not without

upon Gay were amorous, (TO BE CONTINUED.)

More than fifty young business men in Las Vegas have organized the Active Boosters' Club, with Dr. F. O. Ladd as president

Dr. Harry L. Kent, president of the New Mexico A. & M. College, has acepted invitations to deliver commencement addresses at the graduation exercises of the Carlsbad and Rogers high schools in May.

A jury in Superior Court at Phoenix deliberated 17 hours before returning a guilty of manslaughter verdict against John Downs, 68: charged with the fatal stabbing of George Gideon 37, last month in a Wickenburg pool hall.

Statewide construction on Arizona highways and bridges was evidenced when the state highway commission made public a report showing that its budget on projects throughout the state had a value of \$2,331,960. The projects are now under construction or actually completed.

At a recent meeting of the State Highway Commission in Phoenix, it was announced that an agreement between the United States secretary of interior and the state commission which permits immediate construction of hie Cooley-White River Apache Indian reservation highway.

One hundred acres for tomatoes have been signed up by Mesilla Valley growers for this season, L. W. Giles. their field superintendent, stated in Las Cruces, and another 100 will be added before spring planting. The canning factory at Mesquite is preparing to enlarge'its output this year and approximately 200 acres will be planted to tomatoes there.

With the revival of mining operations at the Warnock lead mines and increasing recreational activities in the Lincoln National Forest, the Alamogordo Commercial Club is urging the forest service to cooperate in building the uncompleted eight miles of road leading from Dry Canon past the Warnock mines into the timbered area of Alamo Canon east of Alamo

The volume of employment materi ally increased in New Mexico during March and a continued upward trend is expected. Demands are increasing for outdoor seasonal workers and a great many men who winter in the various cities of New Mexico are gradually migrating to the agricultural sections and other localities where outdoor work is being resumed. Soil cultivation and work in connection with the lambing season is affording employment to many workers. Build ing and municipal improvement work is increasing and onlie a number of large projects are under way. A majority of the industrial plants are operating on normal schedules. Lumbering activity is increasing. Additional seasonal workers are employed on highway maintenance and road of-way and construction work. Railroad shop employment is steady There is a plentiful supply of all classes of labor in this state.

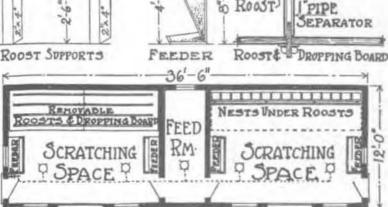

The industrial employment survey been sold because of some peculiarity report recently issued from the office of the same, handsome fixtures, beauof the U. S. Employment Service of tiful approach, convenience to car line, the U. S. Department of Labor at fireplace, kitchen, light in the house, Denver, states that an upward trend etc. was noted in several industries in Arizona during March, principally in connection with building and general construction, agriculture, horticulture, and highway construction. The surplus of labor heretofore apparent. principally seasonal agricultural workers, will probably be absorbed soon would not-bother you. Gay, watch with the increase in farming operations. Many workers are employed in connection with the sheep-shearing and lambing campaigns. A large volume of building is reported in many sections of the state. Resident building labor is well employed and adequate. General construction work under way, or to be started soon. Includes the Coolidge Dam: 19 miles of railroad bed and two steel bridges between Globe and Bowle: and the double tracking of 40 miles of railroad between Holbrook, Arizona, and Gallup, New Mexico. The extensive highway program includes 35 miles of road construction from the Coolidge Dam east. While there is an increase in the demand for highway maintenance and construction workers, an ample supply of highway labor is available for all demands. Producing metal mines are operating normally. The supply of skilled and unskilled metal mine labor is slightly in excess of the demand. An active season is indicated in the lumber industry. Labor supply in connection with lumbering, adequate. Railroad labor supply, adequate.

Poultry House Designed to Make Raising of Chickens Pay Better

By W. A. RADFORD

Mr. William A. Radford will unswer uestions and give advice PREE OF OST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On ac-count of his wide experience as editor, author and manufacturer, he is, with-out doubt, the highest authority on the subject. Address all inquiries to Wil-lam A. Radford, No. 1827 Prairie ave-ture. Chicago, Ill., and only business nue, Chicago, Ill., and only inclose two-cent stamp for reply.

Every farm has its chicken house, out how many of these chicken houses are so built and equipped that the chicken raising will even pay for the time, labor and feed used, let alone make a real profit on the investment? You would be surprised to know how often the raising of chickens is an actual loss when figured on a real usiness basis. And it is all a matter of proper equipment plus proper handling, just like any other part of the

If you want a fair proportion of our chicks to live, want them to mature properly and lay well, then you

must provide them not only plenty of good food but also suitable housing. The accompanying illustration and plan show how to build a chicken house that will help to make the chickens pay. The small details show the supports for roost, the feeder and the roost and dropping board as indicated on the plan.

The plan shows a well laid-out space which makes it easy to take cure of the chickens. It will be noted that ample windows are provided to make the inside of the house light and well ventilated. That is essential. Chickens do not thrive in dark. foul quarters any more than cattle

do, or than human beings. You will also note that the inside of the house is equipped with electric lights. Many farms have electricity these days and more are getting it all the time. Lights insidethe chicken house will, especially in the north part of the country where days get very short in winter, materially increase the laying. More light, more eggs. It pays.

Purchasing of a Home

Needs Careful Thought Buying or building a home proves greater task than anything ever tackled before, apparently, and the head of the family and the belomate scrutinize with all their power to select that which will suit, the means, financially being foremost in the con-

sideration "by all instances, where ... hased, the real estate Lionie iman or representative of or seller, personally, sets out the virtues of the home in particular. The good qualibuilding, also on railroad maintenance ties are given in all of their ideals, had in the home itself and the locality are told of without reservation.

It is a fact that many homes have

Writers have stated that electric fixtures have attracted more attention than any other thing, while others say that closets in homes have had wonderful effect.

The statement has been made that many people who are tooking over homes to purchase see more in fixtures and decorations than in walls, foundations and construction. The eye of the wife is credited with many purchases of homes. Something attracts her vision and a sale is almost consummated.

While good construction, substantial foundations, walls, roofs and other work about a home are essential and there is no intent to in the least criticize, still there are many other things which hold out a strong persunsive hold and are carefully pre sented. Salesmanship is essential in many instances and it is this fact that brings out the qualities as above stated, decorations, fixtures, furnishings, doors, closete and so on.

The greater number of people, it is pointed out, are interested in convenlences and beauty; in short, many sples are made where the home at Home buying is an important step

in the life of any mun, for it gives that feeling obtained in no other way. There are few men in the world who are not happy to walk up to and through his own door. The fact that a debt has been contracted on which there must be consideration given for Although Indian pueblos in recent many a day is overcome with the feel

Then Buy Your Home It is of primary importance that the home seeker has financial ca-Mexico, has rented the building in pacity to pay and that he should not Estancia, N. M., formerly occupied by undertake the purchase of a home until he is assured that the equity which he has saved in that house is which will provide Estancia a place his burgain. First of all he should look to his mortgage market, and this usually contemplates both first and second mortgage market.

Casements of Steel

Refine Newer Homes Distinction in the home is best arrived at by careful forethought in the

assemblage of the seemingly unimportant detail features of design which in the aggregate make up the necessary components of tasteful smallhouse architecture,

Certainly nowhere in the home design do judgment, personality and good taste manifest themselves more conspicuously than in the choice of .

This in itself accounts for the constantly increasing popularity of the the home. These windows, with their picturesque qualities reminiscent of the older architectures of Europe, achieve the distinction of simple good taste in their appropriateness to interior and exterior decorative schemes.

Nor is the cost of modern and convenlent steel window equipment beyoud that of other types. Modern methods of fabricating steel products and of efficiently distributing the manufactured products have reduced the cost to the home owner.

One type, in which the casements are made from specially designed not rolled bars of rust-resisting copper steel, is so manufactured that frames and sash give double weathering, obviating the usual requirements of weatherstripping. Hinger are of heavy pressed sieel equipped with brass bushings, and are securely welded to ' frames, reinforcing the entire unit at the corners. Either extension or standard hinges may be obtained. Friction stays permit of easy ventilating, holding the window at any point desired.

Awnings Add Touch

of Color to House The most unusual artistic effects in exterior decoration are being obtained with awnings. No awnings so harmoniously colorful have ever before come into vogue as those now offered to the home owner. The secret of their peculiar charm lies in their original and exclusive scroll design, which blends appealing hues in such a way that they become an integral part of the home architecture. Such a color treatment is lastingly beautiful and lends itself to appropriate use on ev-

Color in Home

ers type of home.

Color has come into its own in the American home, The appealing beauty and livableness that result from its proper use are more appreciated than ever before. And nowhere is color being used to more advantage than on the floor.

Save Closet Space

A space saver in the form of a folding clothes hanger rod is now available for the closet. Each rod ist capable of holding six bangers. A set of two or three will fully equip the ordinary closet.
