PATAGONIA, ARIZONA, FRIDAY, AUGUST 3, 1928 (\$2.00 a Year in Advance)

PERSONAL AND SOCIAL

There will be a dance Saturday night, August 4, at the San Rafael Valley school house. P. J. Her's Nogaies orchestra will furnish the music. Everybody invited to attend. A large crowd is expected, as the San Rafael district has not had a dance for many months.

George Parker, Jr., son of Mr. and Mrs. George W. Parker of Nogales, formerly of the San Rafael Valley, a recently acquired member of the Texas national guard, now living in El Paso, scored 68 more points than any other member of the guard at the recent national guard encampment at Palsolos, Texas. He is connected with the United States immigration department.

Mr. and Mrs. J. P. Sexton, Mrs. Harlow Mills and Mr. Peterson of Nogales left Wednesday on a fishing trip in the northern part of the state.

J. R. Collie, Fred and Val Valenzuela Jr., were dinner guests Sunday at the San Rafael Valley ranch of Miss Grace Van Osedale.

Mrs. Bud Baldwin and Mrs. A. C. Best were Patagonia shoppers Saturday.

Mrs. Frank Skutt of Rain Valley, who has been very sick, is greatly improved.

Mark Sullivan of the San Rafael Valley was a Patagonia visitor Wednesday.

Mr. and Mrs. E. E. Bethell and H. B. Riggs were Nogales visitors Wednesday.

A. F. Parker of Long Beach, Calif., who owns some mining claims in the Washington Camp district, has returned after an extended visit to his family in California.

Mr. and Mrs. E. M. Knight of Elgin were Patagonia visitors Saturday.

Border Patrol Inspector Lou Quinn and sister, Mrs. H. B. Riggs, and the latter's daughter, Edna, left today for Abilene, Texas, and Albuquerque, N. M., for a month's visit with relatives.

Customs Inspector Fred Valenzuela is spending a month's vacation in Patagonia with relatives.

Miss Eunice and Master Bennett Blackledge, children of Mr. and Mrs. Harry Blackledge of Tucson, are enjoying a vacation with Mr. and Mrs. C. J. Trask at Lochiel, where Mr. Trask is customs inspector.

Elmer King of Ajo, a former resident of Patagonia and owner of a ranch at Elgin, is here for a two weeks' vacation.

LOST—On July 4, from my car, which was parked at the Patagonia Opera House, Patagonia, a pair of horn-rim glasses in a soft leather case. Liberal reward if returned to C. A. Pierce, Patagonia, Arizona. 2tp

A movement for the wider use of bathtubs in France recalls a former custom at the aristocratic girls' school at St. Cyr, founded by Madame de Maintenon 250 years ago. Then the girls had to take "three great baths" a year, one each in May, June and July—whether they needed them or not.

Her necklace broke as Mrs. A. J. Largin of Chicago was standing on the curb in Oxford street and the rain washed away 112 pearls.

State Senator Andrew Bettwy of Nogales was a business visitor here today.

Miss "Patty" Montgomery of Duncan, Ariz., is spending the week with Miss Dorothy Farrell and Miss Evelyn Frances of Nogales.

Mrs. James A. Parker and daughter, Jewel, and Mrs. Charles Everhart of Vaughn were Patagonia visitors today.

Harry B. Fryer of San Rafael Valley, candidate for constable in Justice Precinct No. 2, was a Patagonia visitor today.

ELGIN NEWS NOTES

Mrs. Sam White is enjoying a visit with her son and daughter in Los Angeles. She also has a granddaughter with her from El Paso, which will remain for the summer.

Mrs. Eva Barnett was a Tucson visitor over the week-end.

Troy Ramsey is building a new warehouse and will soon begin the erection of a new residence.

Everything is green and nice around Elgin since the summer rains have fallen.

Mr. and Mrs. W. A. Parker were Elgin visitors Monday.

Mr. and Mrs. B. Lewis of San Rafael Valley were Elgin visitors Monday.

Mrs. Joe Felix of Benson spent the week-end with her mother, Mrs. John Tallas.

Mr. and Mrs. Harvey James and mother, Mrs. E. James, of Ramsey Canyon were Elgin visitors Sunday, guests of Mrs. Eva Barnett.

TEXAS MAN BOOSTS GOV. HUNT

The following letter was received this week from Joseph S. Myers of Houston, Texas, and is self-explanatory:

"Houston, Texas, Aug. 2, 1928.

"To the Editor of The Patagonian: "It's a long way from this part of Texas to Arizona, but it does not prevent Texans from being greatly interested in the re-election of that grand old man, Governor George W. P. Hunt.

"Many of our leading newspapers not only chronicled his recent announcement but expressed editorial hopes of his being successful in his seventh race for the governorship.

"Texas has had her share of graft, scandals and impeachments with high public officials, but we never hear of such things coming from Arizona.

"There will be great rejoicing in the Lone Star State if Governor Hunt is re-elected in Arizona. We will know then that your state will have another two years of good government.

"Joseph S. Myers, "Formerly Commissioner of Conciliation, U. S. Department of Labor."

PRYOR AND FESSLER AT SPRINGS

A letter received this week from William Fessler of Patagonia contains the information that he and Nels Pryor are sojourning at Hot Springs, N. M. He says the weather there is very hot. He wishes to be remembered to "the boys."

HIGHEST-POWERED TRANSMITTER FOR "VOICE OF HOLLYWOOD" NEW KNX RADIO STATION NEAR COMPLETION

Sectional perspective of the studios and offices for station KNX, "The Voice of Hollywood," to be dedicated upon completion of the newest and most powerful radio transmitter in the West.

A. S. HENDERSON ANNOUNCES CANDIDACY FOR SUPERVISOR

A. S. Henderson of Patagonia has announced his candidacy for the office of county supervisor from the third district.

Mr. Henderson is a Republican and is one of Santa Cruz county's oldest pioneers. He was formerly a member of the board of supervisors and understands thoroughly the duties of the office. He has been engaged in mining, ranching and merchandising here since coming to the country, and has formed many worthwhile friendships and business connections. During the years that the mining business in this district was practically at a standstill, Mr. Henderson had many men at work on his claims and leases and was practically the only one for several years who steadily shipped ore from this camp to the smelters.

If elected, Mr. Henderson will endeavor to conserve the taxpayers' money so far as is consistent with good business, and will oppose all attempts to illegally donate money to other enterprises than the business of the people of the entire county.

Mr. Henderson is a heavy taxpayer and is vitally interested in the business affairs of the county board of supervisors.

U. OF S. C. TO GIVE INSTRUCTION IN PUBLIC SERVICE

Los Angeles, Aug. 2.—Professionalizing public service to the end of better civic government, more efficient management of public funds, better traffic conditions, more effective planning and zoning, better power service and engineering, and more healthful sanitary and social conditions, is the objective of the division of public administration of the University of Southern California, which announces the first intensive college course dealing exclusively with the duties, powers, and responsibilities of public officials and personnel, to be given August 13 to 18 in Los Angeles.

3-R MINE HAS BEEN SOLD TO HARRY BROWN AND ASSOCIATES

The 3-R mine was sold this week to Harry Brown of Nogales and associates by the Magma Copper Company of Superior, Ariz., who have been negotiating for its purchase for a long time. The terms of the sale were not made public. It is understood that operations will begin immediately, as Mr. Brown is familiar with the needs of the property in the way of machinery, etc. He had the mine sampled thoroughly several months ago.

There appears to be a surplus crop of third parties this year.

PEEK QUITS G. O. P. AND MAKES PLEDGE TO SMITH

New York, Aug. 2.—In his fight for the presidency Alfred E. Smith gained an ally today from the corn belt in the person of George N. Peek of Illinois, one of the champions of the McNary-Haughen farm bill which was frowned on by the Coolidge administration.

Peek announced that he had bolted the Republican party to enlist under the Smith banner after he and the Democratic nominee had discussed the farm question for two hours.

Immediately after their conference, which took place over a breakfast table in the governor's suite at the Biltmore, Smith reaffirmed his intention, if elected, of calling on the best minds to confer on the agricultural situation, among whom was mentioned Frank O. Lowden of Illinois, as one of the Republicans he would like to consult.

TEACHERS' EXAMINATIONS

Teachers' examinations will be held in the office of the county school superintendent in the court house, Nogales, on Monday and Tuesday, August 6 and 7. Examinations in the United States and State Constitutions for the renewal of certificates will be held Monday morning, August 6. For further information apply to the county school superintendent.

NOTES ABOUT LOCAL MINES

(From Arizona Mining Journal) Approximately 20 men are to be placed at work in four of the old shafts and tunnels of the Kino Copper Company, Nogales, Ariz., by the new interests who have optioned the property. This is in preparation for the extensive diamond drilling program planned.

The Tonopah Mining Company, Mr. McDonald superintendent, and George H. Garfrey, consulting engineer, is pushing the work on the Alto mines, at Alto, Ariz., recently acquired. The working face of the long tunnel is being extended and the upraise under the No. 2 shaft is progressing. The old work had stopped in an altered section of the vein, and a few shafts have driven through this and disclosed about three feet of shipping ore, with one streak of high grade. The road from Patagonia to the mine has been put in good repair. The compressor is now in action and work is being done with machine drills.

The American Boy Mining Company, Patagonia, Ariz., P. M. Etchell, superintendent, has advanced its long tunnel about 2400 feet, with still 600 feet to go to cut the main objective. It has already cut through 11 veins, from 36 feet wide down. These veins all carry ore, and one of the last to be cut is reported to run \$20 in gold over four feet. There is a general desire to see this tunnel continued to cut the veins lying to the north, and this is now being discussed. The American Boy lode is about 25 feet wide and is long, with several spurs and feeders. The ore consists of a mixture of chalcocite, chalcocite and bornite, with a little galena and sphalerite. The lower drifts assay up to \$15 in gold, which has increased with depth. It is being developed by Albert F. Gross of Duluth, Minn.

The tunnel at the Sure Shot claims, Alto, Ariz., is being advanced systematically, cutting a vein about every 50 feet. So far all have shown good ore. This work is being watched by mining men in the district with considerable interest.

While doing assessment work on the Colocass group of claims, Josiah Bond of Alto, Ariz., discovered a body of oxidized copper ore, mostly carbonates, but with some gray copper running high in silver. A shipment will be made from this work.

Kingman—Operations have been started on old Goldroad mine. Globe—75,000 tons of Old Dominion slag will go for rail ballast.

CAPT. COURTNEY AND CREW ARE RESCUED AT SEA

New York, Aug. 2.—After drifting helplessly in mid-ocean, sending occasional radio messages to guide searching ships, Captain Frank T. Courtney and his three flying companions were located by the steamer Minnewaska today in the flying boat in which they had attempted a flight from the Azores to Newfoundland.

A wireless message from the liner at 4 p. m. announced that another tragedy of the air and ocean had been averted. The sturdy plane had been located 605 miles northwest of Horta, where it took off, and about 776 miles southeast of Cape Race.

It was drifting 275 miles northwest of the point where the Italian flyer De Pinedo was picked up last summer after a forced landing en route from Newfoundland to the Azores.

When the flying boat, which had taken off from the Azores for Newfoundland late yesterday, was forced on, Courtney sent out a radio distress call giving his position as 42 north 41 west. A dozen ocean liners turned from their courses to race to the rescue, but when the first of them arrived at the position given the Courtney plane could not be found.

Accompanying Courtney are E. H. Hosmer, wealthy Montreal banker of the flight, Fred Pierce, mechanic, and E. W. Gilmour, wireless operator.

J. W. (BLACK JACK) GARDEN DIES

J. W. Garden, better known as "Black Jack" Garden, a prospector of the old school, died Tuesday in a Nogales hospital, following an illness of several weeks. Burial was in the Patagonia cemetery.

He is survived by his widow and three children and a sister residing in California.

The Richardson Estate, E. F. Bohlinger, executor, Patagonia, is improving and reconstructing the buildings at its Connecticut camp in Josephine Canyon. No announcement has been made as to the work to be done.

Maude Lavender, aged 24, of Wallis, Eng., who recently died, weighed only 23 pounds. Her body was that of an infant, while her head had grown to adult size.

Marie Snow, 14, won a spelling contest in Price county, Wis., defeating 175 competitors and spelling 10 hours without misspelling a word.

Storks in Denmark, one of their favorite haunts, are said to be rapidly diminishing in number. The mythical stork seems to be holding his own, however.

Miss Norah O'Sullivan, a nurse of Roseville, Ind., was willed \$75,000 recently by C. C. Lewis, one of her patients.

John C. Garran of Temple, Texas, built a fortune from \$50 his wife had when they were married, and died possessed of \$1,500,000.

A writer advises: To acquire a voice of authority, saturate yourself with your subject. They generally do when the subject is booze.

Mexico is now without a president-elect. Members of the Suicide Club are expected to shortly announce their aspirations to fill the vacancy.

As Robert F. Wonnell of Pittsburgh left the registry office where he had been married, a woman stepped up, slapped his face and then ran away.

Two ragged men of St. Louis who took to a police station 500 they had found gave their occupations as "tramps."

GRAVEYARD HILL BEND TO BE RESURFACED FOLLOWING SEVERAL ACCIDENTS

Since the rainy season started the curve on the Patagonia-Nogales highway known as "Graveyard Hill Bend," just south of town, has been the most dangerous part of the road. A crew of men has been at work for several weeks resurfacing the road and at the place mentioned a surface of adobe dirt was spread over what had been a good gravel top. The adobe dirt became a sea of slippery, slimy mud when wet with the rain and it was almost impossible for autos to pass the spot.

Within 10 hours three cars went off the road there, luckily only one of them turning over. The wrecked car was carrying a load of men and women (colored) to Fort Huachuca from Nogales, and, not knowing of the dangerous condition of the curve, were unable to avoid going off the road. None of the occupants of the car was seriously injured, although it seemed miraculous that they escaped.

State Senator Andrew Bettwy, who came here Thursday morning on business, was told of the dangerous condition of the road and sent a telegram to the State Highway Department requesting immediate relief and the elimination of the danger. Results were not long in coming in the form of an order by wire to the foreman of the crew, who said that trucks would be put to work tomorrow morning hauling gravel to cover that part of the highway.

HOOVER NOTIFICATION AUGUST 11 AT STANFORD STADIUM

San Francisco, Aug. 2.—An opportunity for thousands of people of the west to participate in the making of a chapter in American history will be provided Saturday afternoon, August 11, when the Hoover notification ceremony is held in the Stanford University stadium.

As far as is known this is the first time that any presidential nominee has afforded such an opportunity to the public as that which Herbert Hoover has arranged in obtaining the stadium for this purpose. The stadium will have a capacity of approximately 100,000 so that those in charge of the program have felt safe in saying that the accommodations for the event will be practically unlimited.

Batteries of loud speakers are to be provided so that the voices of those taking part in the program will be plainly heard in all parts of the great arena. In addition to this, arrangements have been completed for a nation-wide radio hookup which will enable an unseen audience extending from coast to coast and estimated at upwards of 30,000,000 to listen in on the program.

MRS. FLORA E. FRAIZER DIES IN NOGALES

Mrs. Flora E. Fraizer, 75, passed away at 12:30 a. m. Sunday at the home of her son, I. P. Fraizer, in Nogales. Death was due to cancer, from which she had suffered for many years.

Funeral services were held at 10 o'clock Monday morning at the Methodist church. The remains were shipped to Rolla, Mo., for burial.

Deceased is survived by four sons, I. P., Charles, Claude, and James, and one daughter, Mrs. A. D. Wilson of St. Louis. A sister, Mrs. Margaret Smith, of Rolla, Mo., also survives.

DANCE AT SONOITA

There will be a dance at Floral Hall, Sonoita, a Saturday evening, August 18. Music by "The Collegians," one of Tucson's best orchestras. Meet your friends there! 2t

MINE INVESTMENTS ARE SOUND

The president of a large national bank was recently criticised for investments in a gold and copper mine. His reply, as reported in a news item, is well worth reading.

"Mines will be producing millions in gold, silver and copper in the future day when national banks are unknown," he said. "A mine contains a crop already reaped harvested and on deposit for you to check against at your pleasure."

"The wealth gathered from the mines is more than King Solomon." "Mining made Great Britain the world's commercial dictator." "Mining made the United States the richest country in the world."

"Show me the country without mines and I will show you the people in degradation and poverty. We all know that poverty makes cowards of nations as well as individuals." "Mining has transformed more poor men into millionaires and raised them to positions of honor and trust than any other business."

"Mining has scored less than 35 per cent of failures against 95 per cent of failures shown in the general merchandising business of the United States." "To be criticised for intelligently investing money in mines is to be criticised for assisting the development of one of our great and necessary basic industries."

AERIAL MAIL CLERKS

Even greater speed in mail delivery is demanded by modern business, and the rapid development of the air mail is the most recent means adopted to meet the demand. Now it is proposed that clerks shall travel in mail planes and sort the mail en route, as railway mail clerks do on trains.

Illustrating the progress in rapid transportation which has been made within the memory of men now living, it may be recalled that in 1850 it took a letter three days by train and 21 days by stage coach, 24 days in all, to travel from New York to San Francisco. Today the same journey is regularly made by airplane in 32 hours.

The presence of clerks on planes will expedite delivery of mail somewhat, as it will be delivered into post-offices at various points sorted for immediate city distribution or transfer to other carriers, thus saving the time ordinarily taken in its handling by clerks in those postoffices.

It is predicted that within a very few years a large percentage of all mail matter will be transported by airplanes.

The weather bureau was established 37 years ago, but so far it hasn't improved the weather an awful lot.

At last Lindbergh has had a real thrill. He got a ride in the cab of a locomotive.

It doesn't pay to be fussy about one's traffic rights with a 10-ton truck on the port bow.

MINING PROPERTY FOR SALE

I offer for sale three lode mining claims in the Josephine watershed. These claims cover a wide ledge, which makes certain a large tonnage of ore. Work done consists of location works, pits and cuts, one shaft down 60 feet, with a crosscut at 50 feet showing one wall and exposing nine feet of ore, with the other wall untouched. The lode may be much wider than nine feet. A tunnel 40 feet long cuts the big ledge and shows eight feet of ore of mill grade. A tunnel has been started on a companion ledge, and this shows good ore. A tunnel 160 feet long above these reaches the big lode; this tunnel makes enough water to run a 25-ton mill, which can be piped into the top of the mill, in an ideal location, which also allows the ore to go through the mill by gravity.

as depth is obtained. The new tunnel will give, if produced under the ridge, hundreds of feet of back. Shippers lie on three sides, the Emma, the old Holland mine, the Delaware, and the Connecticut belonging to the Richards' estate.

The road is nearly completed to the property, and a small amount of work will enable a truck to load up at the mill. The geologic conditions are favorable to big deposits of ore. I will take 1500 cash as a first payment, and the balance partly in royalty on ore shipped or in stock in the operating company; or both if desired. A man, meaning business will be allowed to write his own terms within reason.

UNITED STATES OF AMERICA

STATE OF NEW YORK

BY ROBERT MOSES

Secretary of State and Custodian of the Great Seal Thereof.

IT IS HEREBY CERTIFIED that Frank S. Sharp was, on the day of the date of the annexed Certificate and Attestation, Deputy Secretary of State of the State of New York, and duly authorized by the laws of said State to make such Attestation and Certificate and to perform the duties belonging to the Secretary of State in making such Attestation and Certificate; that said certificate and attestation are in due form and executed by the proper officer; that the seal affixed to said Certificate and Attestation is the official seal of the Department of State of the State of New York; that the signature thereto of the said Deputy Secretary of State is in his own proper handwriting and is genuine; and that full faith and credit may and ought to be given to his official acts; and, further, that the Secretary of State is the Custodian of the original Certificate of Increase of Number of Directors so certified and attested and Custodian of the Great Seal of said State, hereunto affixed.

IN TESTIMONY WHEREOF, the Great Seal of the State is hereunto affixed.

WITNESS my hand at the City of Albany, the twenty-sixth day of June, in the year of Our Lord one thousand nine hundred and twenty-eight.

ROBERT MOSES, Secretary of State.

CERTIFICATE OF INCREASE OF NUMBER OF DIRECTORS OF S. H. KRESS AND COMPANY

Pursuant to Section Thirty-five of the Stock Corporation Law.

We, the undersigned, Paul B. Scarff, a Vice-President, and Frank E. Palmer, an Assistant Secretary, respectively, of S. H. Kress and Company, do hereby certify and state, as follows: 1. The name of the corporation is S. H. KRESS AND COMPANY, and such name has not been changed.

2. The date of filing of the certificate of incorporation in each state office where filed is:

June 21, 1916, in the Office of the Secretary of State of New York.

June 21, 1916, in the Office of the Clerk of the County of Ulster.

The date of filing of the certificate of (1) Increase of number of shares; (2) Change of previously authorized shares with par value into shares without par value; and (3) Re-classification of shares; pursuant to Section Thirty-six of the Stock Corporation Law, in each state office where filed is:

January 12, 1927, in the office of the Secretary of State of the State of New York.

January 12, 1927, in the office of the Clerk of the County of Ulster.

The date of filing of the certificate of elimination of provisions classifying directors, pursuant to Section Thirty-five of the Stock Corporation Law, in each state office where filed is:

May 8, 1928, in the Department of State of the State of New York.

May 8, 1928, in the office of the Clerk of the County of Ulster.

3. The number of directors previously authorized is nine.

4. The number of directors so authorized is increased by two, so that hereafter the number of directors, as hereby increased, shall be eleven.

IN WITNESS WHEREOF, we have subscribed and acknowledged this Certificate in duplicate this 8th day of May, 1928.

PAUL B. SCARFF, Vice-President.

FRANK E. PALMER, Assistant Secretary.

(SEAL)

STATE OF NEW YORK, COUNTY OF ULSTER.

On this 8th day of May, 1928, before me personally came Paul B. Scarff and Frank E. Palmer, to me known

and known to me to be the persons described in and who executed the foregoing Certificate and severally duly acknowledged to me that they executed the same.

HAROLD F. CUNNINGHAM, Notary Public Kings County.

(NOTARIAL SEAL) Kings County Clerk's No. 469, Reg. No. 9075, New York Co. Clerk's No. 95, Reg. No. 9086.

Certificate filed in Ulster County, Commission expires March 30, 1929.

STATE OF NEW YORK, COUNTY OF ULSTER.

Paul B. Scarff and Frank E. Palmer, being severally duly sworn, each for himself deposes and says that he, Paul B. Scarff is a Vice-President of S. H. Kress and Company, a stock corporation organized and existing under the laws of the State of New York, and that he, Frank E. Palmer, is an Assistant Secretary thereof; that said Paul B. Scarff and Frank E. Palmer have been authorized to execute and file the foregoing Certificate by the votes, cast in person or by proxy, of the holders in record of a majority of the outstanding shares of the corporation entitled to vote thereon; to-wit, by the votes of 887,744 shares of the common stock out of 972,514 shares of such common stock issued and outstanding; and that such votes were cast at a stockholders' meeting held on the 7th day of May, 1928, upon notice, pursuant to Section Forty-five of the Stock Corporation Law.

PAUL B. SCARFF, FRANK E. PALMER.

Sworn to before me this 8th day of May, 1928.

HAROLD F. CUNNINGHAM, Notary Public Kings County.

(NOTARIAL SEAL) Kings County Clerk's No. 469, Reg. No. 9075, New York Co. Clerk's No. 95, Reg. No. 9086.

Certificate filed in Ulster County, Commission expires March 30, 1929.

STATE OF NEW YORK, COUNTY OF ULSTER.

I CERTIFY that I have compared the preceding copy with the original Certificate to increase the Number of Directors of S. H. KRESS AND COMPANY filed in this department on the 9th day of May, 1928, and that such copy is a correct transcript therefrom and of the whole of such original.

WITNESS my hand and the official seal of the Department of State at the City of Albany, this twenty-first day of May, one thousand nine hundred and twenty-eight.

FRANK S. SHARP, Deputy Secretary of State.

(SEAL)

CERTIFICATE OF S. H. KRESS AND COMPANY

Pursuant to Section Thirty-five of the Stock Corporation Law.

STATE OF NEW YORK, DEPARTMENT OF STATE.

Filed May 9, 1928. Tax, none. Filing fee, \$20.00.

ROBERT MOSES, Secretary of State.

ROBERT MOSES, Secretary of State.

CERTIFICATE OF ELIMINATION OF PROVISIONS CLASSIFYING DIRECTORS OF S. H. KRESS AND COMPANY

Pursuant to Section Thirty-five of the Stock Corporation Law.

We, the undersigned, Paul B. Scarff, a Vice-President, and Frank E. Palmer, an Assistant Secretary, respectively, of S. H. Kress and Company, do hereby certify and state, as follows: 1. The name of the corporation is S. H. KRESS AND COMPANY and such name has not been changed.

2. The date of filing of the certificate of incorporation in each state office where filed is:

June 21, 1916, in the office of the Secretary of State of the State of New York.

June 21, 1916, in the office of the Secretary of State of the State of New York.

3. The provisions to be eliminated from the certificate of incorporation are the second, third and fourth sentences of the first paragraph of Article Seventh, reading as follows: "The directors shall be classified with respect to the time for which they shall severally hold office, by dividing them into three classes, to be known as Classes 'A,' 'B,' and 'C.' Of the directors first chosen, Class 'A' shall consist of three directors, each to hold office for one (1) year, or until the next annual election; Class 'B' shall consist of three directors, each to hold office for two (2) years, or until the second annual election; and Class 'C' shall consist of three directors, each to hold office for three (3) years, or until the third annual election. At each annual election the successors to the class of directors first chosen, the remaining directors by affirmative vote of a majority thereof, may elect a successor to hold office for the unexpired portion of the term of the director whose place shall be vacant, and until the election of a successor."

In case of any increase in the number of directors the additional directors shall be elected by the directors then in office.

IN WITNESS WHEREOF, we have subscribed and acknowledged this Certificate in duplicate this 7th day of May, 1928.

PAUL B. SCARFF, FRANK E. PALMER, Vice-President, Assistant Secretary.

Sworn to before me the 7th day of May, 1928.

PATAGONIA ICE & LIGHT PLANT

FARMERS AND FAIRS

Fair time is approaching and prospective exhibitors should be planning to make the most of their opportunities to show their best products. The real success of a fair, whether it be one embracing a state, a county, or only a local community, depends more on the number of exhibitors than upon the number of exhibits.

That a farmer can not display a great variety of superior products should not prevent him from entering at least a few. Even though a prize is not won, the effect to win is stimulating and beneficial to every exhibitor.

In these days of home demonstration agents, more attention is being given to exhibits by farm women and girls, and these should be encouraged in every possible way. There are few farms which could not make a creditable exhibit of some kind, and no farm should be unrepresented in its local fair.

George Claven of Winnetka, Ill., was sent to jail for 10 days for hugging a girl he had never met before.

WALTER P. CHRYSLER'S TRAFFIC TALKS

TOURING FOR EVERYBODY

The first passionate wish in the heart of every driver who is not guided entirely by the herd instinct, is that he may be able to find roads which are not congested. Certainly it is the spoken desire of the Chamber of Commerce and automobile clubs and highway executives in general that new roads be sought out and followed. The first step towards motoring in the country would seem to be to get a map, trace out the main artery marked in red, and then avoid it. Mark out a course on the secondary roads, holding to the general direction which you wish to follow. If you remember your course well, or if you have an able assistant to call off the towns and the turns, you will be surprised at the ease with which you can follow these new routes.

Do not be too proud to ask questions, but be careful to use discrimination in the choice of a person to question. Never try to "make time" if you are roading, for the main joy in hunting out new highways is the arrival of the unexpected which should be met with ingenuity and interest. Certain roads are impassable in bad weather, and careful inquiry should be made as to the condition of the road bed if there have been recent rains. Roads in hilly country, even if third rate, are apt to be fairly safe even after a rain, but roads by rivers and in flat lands are apt to be bad after heavy rains. Roading as well as driving in heavy traffic calls out the same requisites in a driver—caution, alertness to conditions, courtesy to others and infallible good temper.

PATAGONIAN ADS BRING BEST RESULTS

The Livestock Situation

Los Angeles, Aug. 2.—(Special to The Patagonian.)—The trend of the hog market has attracted attention during recent weeks. The upward swing has been gradual until values are now the highest for the year and the recent top of \$13.36 per hundred-weight at the Los Angeles market dated back to September, 1927.

In view of the general trend toward increased hog production in the west and particularly in California and Arizona, producers are naturally interested in profits accruing from hog feeding operations. Pig production in the country as a whole shows a decrease of 7 per cent from a year ago, whereas the California pig farrowing indicates an increase of 20 per cent. This increase is general throughout the state.

It is generally agreed that with finished hogs selling on the market at 19 cents a pound or over, there is good profit in hog feeding on the average ranch. Some California hog producers who raise all of their own grain and have no feed or green stuff to purchase, find that they can produce hogs for as low as 7 cents a pound. Where grain is purchased, it has been found that with sacked barley at 1.70, hogs can be produced for around 8.50 per hundredweight, as a hog will gain approximately 100 pounds for every 50 pounds of barley fed. Through the use of supplemental feeds such as waste fruits, cocked beans and other waste products of the farm, it is easily possible to greatly reduce the actual cost of fattening porkers.

There is a feeling in trade circles that favorable prices may be expected to continue in the hog market for some months to come. In fact, most students of the market are of the opinion that as long as the scarcity of bee continues there will continue to be a broad demand for pork, and, of course, this factor will aid in maintaining values on the higher level.

The hog slaughter in Los Angeles for the first six months of 1928 was by far the largest on record, the total being around 400,000 head. Despite the fact that the climate in southern California is mild throughout the year the consumers are fond of pork, probably due to the fact that so many Pacific coast residents come from the east and middle west, where pork has been one of the principal foods for generations.

There is still room for vast stimulation in hog production in the intermountain country, the southwestern states and California. Nebraska and Colorado continue to supply more hogs to the California markets than any other states, including California. Iowa, Missouri, Kansas, Texas, Oklahoma, New Mexico and Idaho are regular shippers to the Pacific coast markets, due to the fact that the coast values average from 1 1/2 to 2 cents a pound higher than the Missouri river markets.

In the hog expansion program, it should be borne in mind that the California trade demands a lean, long-

lacked type of swine. The evenly covered bacon hog, weighing from 160 to 200 pounds, best answers the coast market requirements, as this type of hog does not carry much lard but does carry good hams and bacon and dresses out a satisfactory percentage of lean pork, which goes into fresh meat channels.

It would be well for western agricultural leaders to continue to encourage hog production for the Pacific coast markets, for there are very few farms where a few hogs could not be raised economically and to the profit of the producer.

STATE FAIR OPENS ARMISTICE DAY FOR 7-DAY PERIOD

Phoenix, Aug. 2.—Offering more attractions and exhibits than ever before, the 24th annual Arizona State Fair will open on Armistice Day, November 12, and continue for seven days, instead of six, as in the past. Secretary J. P. Dillon announced. He is making his headquarters at 610 Heard building. It was announced that the premium books would be ready for distribution within the next week.

High lights of the big seven-day exposition will include the greatest circus acts in the country, six days of top-notch harness racing, band concerts, automobile races, and the greatest array of Arizona products ever seen anywhere. The 1927 state fair was declared by visitors to be the greatest of them all, but this year's exposition is expected to shatter all records.

Frocks for Summer Needs Are Varied in Type

Every kind of summer frock has found its way into our department—do come in and select the ones that satisfy your needs—it can be done for very little!

\$9.90—\$14.75

Flat Crepe—Chiffon—Georgette

A wide variety of materials, fashions, plain and printed frocks for every hour of the day—and night! The prices are unbelievably moderate, too.

Quality Is Our Failure Insurance

A successful merchant once said that he considered honesty the greatest single factor for success in retailing. "Build integrity into your business," he advised, "and you not only safeguard it but your contribution to the community you live in is immeasurable."

Wise words! And that is one of the reasons why we pay so much attention to the quality of the goods we sell. It is so easy to skim on a lining, or substitute inferior leather in the inner sole of a shoe. But then we would not be running an honest business, and it would gradually crumble into ruins.

Selling honest merchandise at a fair price is more than an ideal with us. It is our "insurance policy" against failure—

The delicate colors make these frocks appropriate for all kinds of summer occasions—gay prints, too, are included. You can refresh your wardrobe for so very little now!

Three Noted Track Athletes

The photograph shows, left to right, Lee Barnes, holder of world's pole vault record, Lawson Robertson, head coach of the American Olympic team, and Charley Borah, track champion, as they appeared at Franklin field, Philadelphia, during the Olympic trials.

Tris Speaker Plays in Many Different Spots

No outfielder ever played in as many widely different spots as Speaker during a single game, writes H. G. Salsinger in the Detroit News. He would play close behind second base for one batter and near the fence in right-center for the next. He has caught fly balls at wider ranges and run less distance for them than any outfielder ever did. That is one reason Speaker is still able to play. Like the pitcher who does his pitching above the shoulders, rather than with his arm, Speaker does his outfielding above the shoulders, rather than with his legs. He is still able to think and being able to think he will do a great deal of fielding although his legs were pronounced "dumb," as far as baseball is concerned, three and four years ago.

Holds Many Records

Miss Martha Norelius of the Women's Swimming association and holder of practically every free-style record from 100 yards to 880 yards, who smashed her own world's record for the 440-yard swim at the final Olympic swimming tryouts. Her time was 5 minutes 49 3/5 seconds as compared to the old time 5 minutes 51 2/5 seconds.

Sporting Squibs

The Penn State college golf course has never been played in par. Miss Helen Wylie, expert swimmer of Australia, has been winning races for the past 27 years. Texas university has organized a golf class for girls as part of the regular physical training work. Lloyd Hahn, premier middle distance runner, has so many medals he doesn't know what to do with them. Cornell, which has not won the Poughkeepsie rowing classic since 1915, has the best record of all the contestants, having won the event 13 times. Race-track bettors in France neglected to collect the cash due on \$51,850 worth of tickets last year. This amount has been turned over to various charitable organizations. A result of the transcendent foot race may be six-day walking contests in various cities next fall, including New York, Chicago, Detroit and Los Angeles. Toronto, too, may enjoy the novelty. Barring a possible game for the Navy on December 1, Annapolis and West Point have arranged their football games for next fall. Only one common opponent is on the lists, namely Notre Dame. Jack Caywood, Fort Crook heavyweight boxer claims the longest reach of any fighter in his class. Jack's reach is 51 inches, just an inch short of that of the former heavyweight champion, Jess Willard.

MOBILE ROOKIE IS COMING STAR

Giant Right-Hander, Edward Morris, Has Fast Ball.

When you win twice as many games as you lose with the Boston Red Sox you have to be good. And that is what Edward Morris, giant right-handed rookie with the Red Sox must be, for he has accomplished that one thing with Bill Carrigan's outfit this year. Any pitcher who doubles his wins in ratio to his losses is O. K., and when it is done with the Red Sox, the feat is all the mightier. Ofttimes an ordinary ball player in the minors develops into a whirlwind in the majors. Hornsby, Bancroft and others were just players in minor circuits, but once given a chance in big time blossomed out into greats. While Morris has not yet gone through an entire season to prove that he is a star, it appears that he also will be one of those ordinary minor players turning into a major star. Last year with Mobile in the Southern association, Morris won 15 games and lost 17—a record that would hardly attract major league scouts. But he had a fast ball that was really fast, and the Red Sox grabbed him. This fast ball today gives way to none, excepting possibly the speeders of Grove and Phipps. He won his first three out of four games and allowed an average of one and a half runs a game. The most effective pitcher in the league last year, Wiley Moore, led the twisters with 2.28 runs per game. And he had the Yankees behind him, so Morris' record is all the more impressive. Morris' first game with the Sox resulted in a defeat by a 3-2 margin. He allowed the Athletics eight hits, and they won, 3-2. His next time out was also against the A's. This time he cut down their hit allowance to four and won, 3-1. The White Sox were his next victims. Four hits were all they could get off his curves and swifts. The count here was 5-1. Then came a 3-2 victory over the Browns and a five-hit game. He once had a trial with the Cincy Reds, but failed to get far. Manager Carrigan has been noted for developing young pitchers and turned Morris from a mediocre minor leaguer into a winning major twister. Morris is but another of a batch of Red Sox youngsters who has been pitching such good ball as to show the success of Manager Carrigan in the handling of young moundmen. The others, Ruffing, Russell, MacFayden, Bradley and Settlemire, have been going good enough, but the brightest satellite of the outfit is young Mr. Edward Morris, a punk in the Southern association and a big frog in the major league puddle.

Alexander Is King

After 18 years on the pitching hill, Grover Cleveland Alexander, the famous veteran, is as effective as ever. King of pitchers for a dozen years, he is a king still. Last year he won his greatest laurels. He is more effective this year than last.

Highbrow Caddy Amuses English Golf Devotees

One of the most patronized golf courses near London has a highbrow caddy who sometimes astonishes visitors with pointed comments on their play. A nervous player who had revealed his faults to the elderly spectacled man who carried his clubs was startled by the latter suddenly remarking: "You have a fear complex, sir. Unless you surmount it you will never make a good golfer." The nervous one found that his critical caddy was a graduate of one of the big English universities.

New \$25,000 Stake for Runners at Arlington

The American Thoroughbred Championship, a new \$25,000 stake for two-year-olds and upward, will be sponsored by the American National Jockey club, Chicago, as an added feature for Arlington park's 17-day summer racing season. The event, which will be over a mile and one-eighth, is expected to attract the best blue-ribbon winners of America, including Reigh Count, Vito, Victorian, Port Harlem, Toro and Mistletoe. Its inaugural will be on September 1.

Cotter Pin or Fate?

By H. OXLEY STENGEL

"PLEASANT prospect!" Nan exclaimed bitterly to herself as she stood ankle deep in mud and surveyed the very flat tire on the left rear wheel of her little coupe. "Ten miles from nowhere and raining cats and dogs! Oh, it's a great life if your tire doesn't weaken! Well, this one did—so I might just as well make up my mind to take the punishment." Wherever she proceeded to take off her new coat, fold it carefully and lay it on the seat, roll up her sleeves and don a brown smock. "Quick work needed here," she went on to herself as she realized how fast the night was approaching. "Nothing's so bad but it might be worse." The wheel had been jacked up with difficulty when another car came into view around the curve. Nan was both hopeful and a bit worried. It might be a friend and one in need—if only for company. There wasn't a house visible. Only fields and the hills before and behind. "It might be"—she shivered. The shiver was partly due to her thoughts and partly to a fresh bath of muddy water which she received as a big car sped by without so much as slowing up. "That's that!" Nan grinned ruefully as she wiped mud from her eye with a soaking wet handkerchief. Anyway it wasn't hold-up men! Everything went wrong. The spare rolled down into the ditch just as she was about to adjust it. That rescued and at last fitted into place, the cotter pin slipped from her wet fingers and rolled off also. Desperately Nan hunted in the deepening gloom, stepping into the mud up to her ankles. All to no avail. "I can't go without it," she almost wailed. "The wheel would be sure to come off and land me into a ditch this time." She sat down on the wet mud guard. It was quite dark now except for the lights on her car. She knew the road well. Hilly as it was and full of curves it would be foolhardy to attempt to drive, however slowly, the ten miles into town. At least she could get inside the car, out of the rain while she decided what she would do. What was that? Not a car this time but footsteps coming down the road. Nan's instinct was to cut off her head lights. But it was too late for that and not so dark that the car wouldn't be visible to passersby. She sat tense and still. Closer and closer the footsteps came. Queer loud ones. Then—into the line of her head lights. Nan uttered a shriek of mingled surprise and relief as she saw the forms of two cows followed by a young boy take shape out of the shadows. She opened the door and told the boy her troubles. "Maybe I can find it for you if Queen Mab and Lady Lu don't go too far," he offered. "It's sure one wet night." "It is indeed!" Nan agreed heartily. "No, I don't think you could find it, either. I haven't my search light. How far are you going?" "Just up the road a piece—to Longview farm." "Longview?" Nan had forgotten Longview was on this road and she had been certain there wasn't a house within miles! "I'll tell you what you can do, Sonny. Will you telephone Mason's garage for me and tell them just where I am and just what is wrong? Tell them to send out at once, please, that it's Miss Henderson's car." "Yes, sir." A big man was lounging before a great log fire smoking a pipe while waiting for dinner. He heard Pete in the hall asking Sarah if he might telephone. "A lady's broke down up the road," Pete explained. "The big man called out: 'Go ahead, Pete! It's a shame for a lady to be caught on a night like this. Is she all alone?' " "Yes, sir." "Would go help—but she might not understand a stranger's offering aid," he thought. Then he caught the name Henderson. He was in the hall in an instant. "Pete! What is she like? Is she small with brown hair?" Pete stared. "Small, sure. Don't know about her hair. She's a pretty lady." "That's Nan!" the big man exclaimed. "Never mind, Pete. I'll go myself." "But I phoned the garage, sir." "All right." He had his coat on and was gone. A big car drew up beside the coupe and the big man peered anxiously into the window. A pretty girl was fast asleep. "Nan!" he called softly. She started. "Don't be frightened. It's only Tom." "Have you a spare cotter pin?" she asked solemnly as he opened her door. "No, but I have an empty car. Leave yours here, Nan. Mason's man will get it." They had eaten dinner together and Nan was warm and dry. "Do you believe in Fate Nan?" Tom asked, as he looked into her eyes. "Fate sent you to me. I need you so, dear, but until tonight I didn't even dare to hope!" "But I didn't know Longview was on that road," Nan protested—which was all the answer Tom required. Her eyes told him the rest.

Hobo Americanus New Model

By ELMO SCOTT WATSON

Hark! Hark! The dogs do bark! The beggars are coming to town—Some in rags, and some in tags, And some in velvet gowns.

DOES that old nursery rhyme bring up in your mind a picture of that class of vagrants, variously called hoboes, tramps or bums, which were once a picturesque, if not exactly ornamental, part of the American scene? If it does, then you'd better change the reel, for the picture isn't exactly true any more. For Hobo Americanus isn't the "bird" that he used to be. First of all, it is interesting to note that no one can tell for sure just how the word "hobo" originated. There is one theory that it came from "hoo boy," long used in certain parts of the country to designate all migratory farm workers. Another says that it is from the call "Ho! Boy!" used by the early mail runners. The hobo himself, who has a picturesque vocabulary all of his own, has contracted the name to one syllable and simply calls himself a "ho. He it knows also, that he has become class conscious and, according to his caste system, the three words used to describe him are not synonymous. According to his definition, the hobo is a migratory worker; the tramp, a migratory non-worker; and the bum, a stationary nonworker.

It is doubtful if the public would make that fine distinction, but would be inclined to lump them all together as one class under the generic name of hoboes, a class that was brought into being by the first railroad and that until the last few years was ever increasing. But now the "Wearly Willie" type, as depicted on the vaudeville stage and in the comic strips, is almost extinct. He was a strong individualist, responsible to no one but to himself and his inward urge to "go places and see things." The hobo, 1928 model, is still pretty much an individualist but he's also a member of the International Brotherhood Welfare association. He has organized and is trying to standardize his "profession." He is seeking a definite status in the modern order of things. He holds conventions, such as the one pictured above. He goes to "college" and, like as not, carries a "diploma." In addition to being organized and standardized, he is also becoming motorized. For the advent of the cheap car has taken him off the freight trains. There has developed a new type of hobo, divided into three classes: whole families gypsying about the country in "tin lizzies"; young hoboes who have their own cars and travel alone; and the "hitch-hiker" who haunts the paved roads and main highways, instead of the railroads, and who "bums" rides from passing motorists. Perhaps no better illustration of the contrast between the hobo, old and new style, can be shown than a comparison between "A. No. 1," a famous hobo of the old days, and James Eads How, founder of the hobo college idea and perhaps the best-known hobo of the

new era. For 30 years Leon Ray Livingston carved or painted his "monecker" (name or distinctive sign) on railroad watering tanks, railroad bridges, freight sheds and other places near railroads not only from the Canadian line to the Mexican border and from the Atlantic to the Pacific, but also from Alaska to Argentina. For more than a third of a century he rode on brake beams and the blind baggage, and by keeping a careful account of his expenditures he was able to estimate that before he retired (as he did a few years ago to marry, settle down, write his adventures and do the work he is doing at present—trying to keep boys and girls from yielding to the call of the road) he had traveled a total of 529,000 miles for the total sum of \$7.01!

During the course of his travels, this most-famous hobo knew another who later became famous as a writer—Jack London—and the life they lived was typical of the old-time hobo. Told in terms of the picturesque language of the hobo, they rode the "bummers," "tops," "blinds" of "trucks" of railroad trains until some "shack" (brakeman) or "con" (conductor) became "hostile" and threw them off of the "sidedoor pullman" (freight car). If they succeeded in eluding the "snakes" (switchmen) or "yard dicks" (railroad detectives), they made for the nearest "jungle" (place where tramps and hoboes congregated) where they were sure to find a varied collection of "fore-and-afters" (hoboes who walked from place to place), "blindle-stiffs" (a migratory worker in the true sense of the word who "glommed fruit," "skinned mules," glommed spuds, or did any other menial labor whenever he had the chance), "gay cats" (ordinary tramps and "stake men" workers with some money). There, too, would be certain to be some "stew bums" (the tenderfoot of the profession) who listened eagerly as the elite of the brotherhood, the "comers," "berfesh" of "blowed-in-the-glass stiffs," told of their experiences in towns that were "Jake" (not "hostile" to a ho), where he could "batter" (beg) on the "main stem" (main street) for "light pieces" and be sure of getting some "scoff" (food) from a "hay bag" (woman) when he battered the back door. Then, too, there would be reminiscences of "deeking" (riding) a "peddler" (local freight) on a "jerk" (branch line); or an "orange special" (fruit car) in "crimpy" (bad) weather, of being "outlaid" (discovered) by a "shack" and forced to "hit the grit" (walk), dodging as he left the train, no doubt, a "dewdrop" (stone) hurled by the "shack" or "con." Or there might be tales of adventures in the big cities where they had to "carry the banner" (walk the street) all night or take in the "Jesus screamers" (religious salvationists who speak and sing in the streets) in order to get a "flap" (place to sleep).

All of this talk would pass around the campfires in the "jungle" as the "stiffs" sipped their steaming "java" (coffee) made in one of the tin cans

which were always to be found there. Other tins were used for "crum kettles," "peori" and "mulligan," and others for plates. The "jungle" was always located near a stream and the unwritten law of the "jungle" was that tins should be washed after use and left for the next 'bos who should wish to use them. Water for cooking was always taken from upstream and downstream the hobo "crummed" (cleaned up) and washed his clothes which he hung on the "gooseberry" (clothes line). His food consumed and he himself "crummed" he brought out his "stoop tobacco" (cigar stubs picked up on the street) and lay back for a pleasant hour of gossip with his fellows.

That was the hobo of the old days. James Eads How, the "Millionaire Hobo," is typical of the new. He is a grandson of James B. Eads, builder of the Eads bridge at St. Louis, and a son of the late James F. How, an official of the Wabash railroad. Brought up in an atmosphere of luxury and refinement, a college man, he became a hobo by choice, and for twenty years had devoted his time and money to the hoboes. He was the founder of the hobo college, which may be established almost anywhere. Usually it is a one-room affair and here the men eat, sleep and are taught. Teachers come from universities and colleges nearby to lecture on almost every subject under the sun. The "classes" are conducted through the winter, for, with the coming of good weather, the "students" take to the road again, some of them carrying their "diplomas," mimeographed on paper, certifying that they have attended a certain number of "classes."

The forerunner of the college and the new status of the hobo was the organization movement which began in 1907. In the fall of that year there was much unemployment and about five hundred men were stranded in Tacoma, Wash. Jeff Davis, Dan O'Brien and a few other prominent members of the fraternity made an offer to the mayor. If an unused schoolhouse were given to them for shelter they would keep the hoboes from begging at back doors and out of mischief. The mayor agreed. Restaurants supplied leftover food and the hoboes spent a quiet winter there. There was held the first hobo convention and the organization idea came into being.

So now they have the International Brotherhood Welfare association, in which J. Eads How is a leading light, which holds conventions from time to time in various parts of the country at which economic problems are discussed and the purpose of which, in the words of How, are to "educate, organize, abolish poverty and squander and unemployment everywhere." They have "advance agents" on the road who carry the gospel of the organization throughout the country and organize "focus." For the hobo, 1928 model, is no longer the picturesque individual. He is fast becoming a standardized member of an organization.

Bazaars

Streets in the bazaar districts of Asiatic cities are only 8 to 10 feet wide. The larger shops are 8 by 10 and the smaller ones 5 by 8 feet, with one side giving directly on the street. In each bazaar there is a klan for every 10 or 12 shops. These klans are two stories high with an open court in the center and rooms on the four sides, all opening into the

court. A door leads from the open court into the street.

Each bazaar has a coffee shop, which is a large open place, covered partly by a roof, where are a number of wooden settees ranged in rows. Any visitor who sits down is first given a cupful of Turkish coffee and then a tangle of native pipe filled with Shalva tobacco. The charge for coffee and the use of the pipes is 2 cents. How merchants gather to discuss trade bills.

Giant Turtles

There are numerous types of ocean turtles. The largest type, which has no commercial value—the trunk turtle or leatherback—weighs several hundred pounds and attains a length of 6 or 7 feet. An official record on file at the National Smithsonian Institution describes a specimen found at the American Museum of Natural History, which was caught off the coast of Connecticut and was six feet long and weighed 715 pounds.

The Colfax Bookplate
By AGNES MILLER

WNU Service © by The Century Co.

SYNOPSIS

On a certain Monday morning Miss Constance Fuller, seller of rare books at Darrow's Bookshop, New York, notices that the first customer is a dignified old gentleman, who saunters into the alcove placarded "Medical Works".

CHAPTER VIII—Continued

"On examining the bookplate with a magnifying glass, I noticed on it an object that bore the same pattern—in miniature, of course—as the arrangement of those sixteen slits you see on that paper. I took the object as some kind of surgical instrument, as it was on a table with others I could identify, such as the scalpel. This instrument had sixteen slits, six down the center, a row of five on each side of the central row."

may be that he did know him. Your statement of his interest in this law book, provided it can be proved that Mr. Grosvenor also had an interest in it, might confirm this idea. "Why did I lose that book! And who took it?"

CHAPTER IX

Night at Normandy Terrace

Nancy was awaiting me at my desk, as it was two minutes past five o'clock. She insisted on my accompanying her forthwith to Normandy terrace, declining my offer to appear tactfully just before dinner.

"I'm sure she detested her grandfather." "I'm amazed that she should have even hinted such a thing!" "Do you really think she would have had such rotten taste, especially when he was dead?"

Next Second a Man Sprang Through It.

So, after a suitable interval had followed an excellent dinner served presided over by Ernesto, I followed Nancy downstairs to the second-story door which, unknown to her, I had entered two days previously. The long room, with its bright ceiling and rosewood furniture, over which lamplight

WEEKLY South-West NEWS ITEMS

Construction work on the foundation of the New Gadsden Hotel at Douglas has been completed. Three cars of Malaga grapes were shipped from the George Kinne ranch in the Coolidge district recently.

Seventy carloads or approximately 2,700,000 pounds of wool have been shipped from Gallup this season.

Plans for a \$40,000 water system at Farmington, N. M., for which bonds were issued, have been approved.

Two new short staple gins have been practically completed in the Mesa section for the Mutual Cotton and Oil Company in Arizona.

H. W. Purday, a pioneer of the section around Alamogordo, has been granted a government pension for service in the early Indian wars.

T. G. Wright, long a local resident and widely known in southern Arizona, passed away at his home in Nogales after an extended illness.

President Coolidge will not come West for the dedication of the Coolidge dam this fall, according to information received from his secretary.

The authentic Arizona Society of Southern California, formerly called the Hassayampa Society, will picnic at Long Beach on Saturday, Aug. 18.

Ray S. Fitzmorris, teacher in the schools of Georgetown, Colo., for the past six years, has been appointed superintendent of the Aztec schools.

The board of trustees of Montezuma Baptist College in New Mexico has voted to launch a campaign to raise \$50,000 for the college within the next sixty days.

The acreage planted to all of New Mexico's chief crops has been increased substantially this year. The cotton acreage was advanced from 100,000 to 114,000.

Work is under way at Tucuman on the new building for the Mountain States Telephone and Telegraph Company, which will be two stories high and cost \$20,000.

R. J. Sloan, sentenced in Catron county, N. M., five months ago to serve eighteen months to two years in the state penitentiary was granted a conditional pardon today by Gov. R. C. Dillon.

The San Carlos Ice and Cold Storage Company's new plant, equipped with machinery of the Arctic type and having a capacity of twelve and one-half tons, was opened for public inspection recently.

Arrangements for the new polo field at the University of Arizona are proceeding satisfactorily. It is expected that the turf will be ready for play by the time the school playing season opens in the fall.

Announcement has been made at the president's office of the University of Arizona, of county scholarships awarded for the years 1928-1929. These scholarships are for \$1,000, one-fourth of which is to be paid each year of college course.

Fish reared in New Mexico's five hatcheries will not be released in the future to hustle for themselves until they attain more size, State Game and Fish Warden Perry has announced. A legal trout must be six inches or more in length.

The Carlisbad Chamber of Commerce will send a large delegation to the annual convention of the Southern New Mexico Association which convenes in Silver City on Sept. 3-4, at which time the latter city will celebrate its semi-centennial.

Indication that the total valuation of all property in Arizona for taxation purposes this year will show an increase of \$10,000,000 is shown in an abstract of county tax rolls prepared by Charles R. Howe, chairman of the state tax commission.

A motion for a rehearing of a suit brought by the Citrus Growers' Association against the Salt River Valley (Ariz.) Water Users' Association to determine the validity of two bond issues aggregating \$5,200,000, was denied by the Supreme Court.

Hundreds of persons from the plains of west Texas and the valley towns of New Mexico are spending their vacations in the Lincoln national forest. Commercial organizations of Alamogordo and Roswell estimated the visitors at more than 200,000 last year, and that the 1928 season will probably exceed that number.

Following Gov. R. C. Dillon's suggestion that proposed legislation be prepared early, State Land Commissioner B. F. Pankey has made three suggestions. These are for a law providing for the disposition of 25,000 acres of land just granted New Mexico by Congress; a code covering mineral leases, in the event of passage of a proposed constitutional amendment, and protection of the public interest in gas and oil development in southeastern New Mexico.

The acquisition of a large tract of land for the production of out-of-door operas, pageants and concerts and work on the remodeling of campus buildings are steps taken recently in Gila College's expansion program at Safford.

Gasoline consumption in New Mexico increased 22 per cent in the fiscal year just closed over the one preceding, while the number of motor vehicles licensed in the state gained but 7 1/2 per cent. This reflects the tourist increase that highways bring about.

Improved Uniform International Sunday School Lesson

(By Rev. F. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.) (©, 1928, Western Newspaper Union.)

Lesson for August 5 PAUL IN A PAGAN COUNTRY

LESSON TEXT—Acts 14:1-28. GOLDEN TEXT—I know both how to be abused and I know how to abound.

PRIMARY TOPIC—Paul and Barnabas Preach to the Heathen. JUNIOR TOPIC—Paul and Barnabas Preach to the Heathen. INTERMEDIATE AND SENIOR TOPIC—Paul Unmolested by Flattery and Danger.

YOUNG PEOPLE AND ADULT TOPIC—The Heroism of Foreign Missions.

I. Paul and Barnabas Preaching at Iconium (vv. 1-7).

1. Their manner of preaching (v. 1). This is suggested by the little word "so" in verse 1. They so spoke that a great multitude believed. They were true preachers. Only that which brings conviction of sin and induces decisions for Christ can be truly said to be preaching in the Biblical sense.

2. Their attitude towards opposition (v. 2). This is suggested by the word "therefore." "Long time therefore they tarried." The opposition did not prevent their preaching, but incited them to continue preaching. Christian workers should learn not to give up work because of opposition.

3. The Lord accompanied their preaching with miracles (v. 3). Since the opposition was so fierce, the Lord granted help which was needed.

4. The effect of their preaching (v. 4). The multitude of the city was divided. Where men faithfully preach the gospel there will be division. Such division comes frequently in the home just as Christ predicted.

5. Paul and Barnabas assaulted (vv. 5-7). The Jews and the Gentiles united in planning this assault. Being apprised of this plot, Paul and Barnabas fled to Lystra and Derbe, where they preached the gospel.

II. An Attempt to Worship Paul and Barnabas as Gods (vv. 8-15).

1. The occasion (vv. 8-10). It was the healing of the lame man, God's gracious power shown in healing this lame man occasioned a new difficulty. The man was a confirmed cripple. He had never walked. On hearing Paul preach faith was born in his heart (Rom. 10:17). When Paul perceived that the cripple trusted Christ, with a loud voice that all could hear he bade the man to stand upright. The cure was instantaneous for he leaped up and walked (v. 10).

2. The method (vv. 11-13). They called Barnabas Jupiter, and Paul Mercurius because he was the chief speaker. The priest of Jupiter brought oxen and garlands ready to offer sacrifice unto those men (v. 13).

3. Their efforts frustrated (vv. 14-15). This foolish act was happily averted by the fact of the apostles as exhibited in the address of the occasion.

(1) They denied that they were divine beings and declared against the worship of men of like passions with themselves. What awful folly to worship such beings when the infinite God, who created all things and is above all, spreading out His beneficent hands in blessing upon all, is seeking true worshippers!

(2) They directed them to turn away from these vain things unto the living God who made heaven and earth, and has left witness of Himself in that He has always done good, giving rain and fruitful season, filling their hearts with gladness.

III. The Stoning of Paul (vv. 19-22).

Wicked Jews from Antioch and Iconium pursued Paul with relentless hate to this place where they seized up the very people who were willing to worship the apostles a little while before. This hatred took form in the stoning of Paul and dragging him out of the city for dead. These things are easy to talk about, but how awful they must be to experience. God raised him up, and with undaunted courage he pressed on with his duties as a missionary, bearing the good tidings to the lost. The church today needs men with such zeal and courage, and such a passion for the souls of lost men that they will do as Paul did.

IV. The Organization of Churches in the Field (vv. 23-28).

Evangelization with Paul did not mean a hasty and superficial preaching of the gospel, but the establishment of a permanent work. Elders were appointed in every church. The work of the missionary is not done until self-governing and self-propagating churches are established on the field.

Fly to Him If it be true that God is not only willing to befriend us, but is spoken of as touched with sympathy for our miseries, so as to be all the kinder to us the more we are miserable, what folly were it not to fly to him without delay.—John Calvin.

A Verse From the Bible Let nothing be done through strife or vainglory; but in lowliness of mind each esteem the other better than himself.—Philippians

LIFE'S LITTLE JESTS

CERTAINLY NOT A young husband was recently playfully questioning wife on her bust. "Tell me truly," he said, "did any other man ever kiss you?" "Well," was the reply, "I was once up the river with a man, and he started rocking the boat, at the same time exclaiming: 'Now, Mary, my dear, either you kiss me or we both drown!'" "And did you kiss him?" gasped the husband. "Was I drowned?" asked the wife.

Betrayed Miss Gushington—My dear, you must pardon my boldness, but I can't help raving over your wonderful Heener coloring. Miss Penchlow—You noticed it? And my hairdresser assured me that the henna stain she put on my hair couldn't be detected from a natural color.

THE GUSHER

"She's rich now—her father struck oil." "And she does nothing but gush."

To the Driver Stop and let the train go by. It hardly takes a minute. Then your car starts off again. And, better still, you're in it!

Ancient Bride—Boo, hoo! Walter doesn't like my cooking. Her Mother—How do you know? Does he say so? Bride—He didn't come right out and say it, but he told me he liked fruit cake to be at least six months old—and we've only been married five weeks!

Craft Suspected "My dear," said Mr. Meekton, "you should talk over the radio every night and tell the world some of the wonderful things you say to me." "Leonidas, look me in the eye! Are you trying for an arrangement that will enable you to shut me off as soon as you get tired of listening?"

USUALLY WITH A ROPE

Business Rhymes The rose, one knows, is very red. The violet is blue. The florist has his overhead. So render him his due.

Overheated First Taxi Driver—I hear Shorty Manasco is in the hospital with a nervous breakdown. Second Bandit—Yeah, th' poor sap took his wife out in his bus and let her drive.

His Rule Landlady—Naturally, I expect the rent to be paid punctually every week. New Roomer—That suits me, naturally. My policy is either punctuality or not at all.

Mother's Defense Disgusted Dad—Does that boy ever do anything—anything to get up in the world? Fond Mother—You certainly must know that Willie is growing taller every day.

Kangaroo Court News Returned—Convict—What became of the executioner they had when I was here before? Convict 96980—Oh, he's still hanging around.

(TO BE CONTINUED.)

1—Warren D. Robbins of New York, new American minister to Salvador. 2—General view of the funeral procession of General Obregon leaving the national palace in Mexico City. 3—John H. Mears and Capt. C. B. D. Collyer landing at the Battery, New York, after record-breaking trip around the world.

NEWS REVIEW OF CURRENT EVENTS

America Assists but Japan Hampers the Nationalist Government in China.

By EDWARD W. PICKARD

JAPAN seems to be doing what it can to hamper the new Nationalist government of China, while the United States is proceeding toward recognition of that government and taking the lead in negotiations to free China from the unequal treaties that have restricted the nation. Only a few days ago the withdrawal was ordered of 1,350 American officers and marines from the "danger zones" in China, so there will be left in Shanghai and Tientsin only about 2,000 of our troops. Immediately following this, Secretary of State Kellogg dispatched a note to the Nationalist foreign minister offering to begin at once negotiations for a new treaty that will permit China to levy on imports such tariff duties as she sees fit. Under the old treaties with various powers China is not permitted to levy duties higher than 5 per cent ad valorem. Abolition of the privilege of extraterritoriality and the recognition of the Nationalist government will, it is believed, come along soon in due course.

The negotiation of a new tariff treaty will not subject American goods at once to higher duties. Under the stipulations made by Secretary Kellogg, Chinese tariff autonomy would not become effective until the unequal treaties with all other nations also are abrogated. This precludes discrimination against American exports should other nations fail to scrap the old treaties.

The Nationalists have already renounced their old treaty with Japan, but the Japanese government refuses to agree to this action, holding that, as revision of the pact was not accomplished within the stipulated period, it was automatically renewed for ten years. Premier Tanaka told the foreign diplomats in Tokyo that Japan was unable to accept the Nationalist demand in view of the provisions of the treaty itself and would be unable even to agree to a revision of the treaty until the Chinese government withdrew its notice of abrogation.

GOV. AL SMITH went down to a country club at Hampton Bay, Long Island, for a few days of vacation during which he expected to make much progress in the writing of his speech of acceptance which will be delivered on the evening of August 22 from the steps of the state capitol at Albany. Herbert Hoover, who has been resting at his home at Palo Alto, Calif., started on a fishing and automobile trip of about a thousand miles through northern California. His acceptance address is practically completed and it will be made in the great stadium of Stanford university the evening of August 11.

Probably 100,000 persons will be present to hear Mr. Hoover, and as many will gather in Albany to listen to the words of Governor Smith. But their real audiences will be perhaps a third of the population of the United States in each case, for arrangements have been made for a hookup of ninety radio stations for the broadcasting of the speeches.

ONE of the hopes of the Democrats—the winning of Wisconsin—was stimulated by the hot fight up there between the regular Republicans and the La Follette group. The young radical senator is up for renomination and is opposed by G. W. Mead, mayor of Wisconsin Rapids. The real battle is over the governorship, for there are three candidates. Gov. Fred Zimmerman, who is a dry and has become rather a free lance, seeks re-election. Walter Kohler was nominated by the regular Republicans on a middle of the road program; and Joseph D. Beck is the La Follette candidate and for Volstead act revision. Democrats believe their cause would be aided by the nomination of Beck and La Follette. The primaries are to be held on September 4. The wet sen-

timist in Wisconsin is notoriously strong. On the other hand, the Republicans say that the Wisconsin swing toward Smith will be stopped effectually by the prospects of a good harvest and that they are confident of carrying the Badger state in November.

John J. Raskob, Democratic national chairman, has resigned as chairman of the finance committee of the General Motors corporation, because, it was said, some of the directors of the concern who are supporting Hoover thought Mr. Raskob's retention of the position would make it appear that the corporation was backing the Smith candidacy. In his letter of resignation Mr. Raskob recognized this possibility and also said his duties as national chairman would take all his time.

In one way it was a Hoover week. The Republican candidate and Senator Hiram Johnson of California ended their eight-year-old feud; Robert L. Owen, former United States senator from Oklahoma and a Democratic power, announced that he would support the Republican candidate, believing him "the best qualified man any party ever presented for President"; Senator F. M. Simmons of North Carolina, who opposed Smith's nomination, resigned as a member of the Democratic national committee without explaining his action; and officers of the Daughters of the Confederacy in California declared most of that state's members of the order, Democrats in the past, would vote for Hoover. William H. Woodin, president of the American Car and Foundry company and for years a member of the stanchly Republican Union League club of New York, came out for Smith.

ROY O. WEST of Chicago, former secretary of the Republican national committee and a Deneen adherent in Illinois politics, was appointed secretary of the interior to succeed Dr. Hubert Work, and assumed his duties in Washington. He faced several big matters that will require his official action. These include the Boulder dam investigation, big reclamation and irrigation projects, oil leases on public lands, and the Alaskan railroad. Doctor Work in introducing Mr. West expressed the hope that the latter might serve even longer than his own five-year term. In view of Doctor Work's close connection with Herbert Hoover his remarks were interpreted as implying that he expects Mr. West to remain in the cabinet in the event of the election of Mr. Hoover.

It was stated in Washington that President Coolidge had offered the vacant secretaryship of commerce to William M. Butler of Massachusetts, former Republican national chairman.

GENERAL NOBILE and the other survivors of the Italia disaster arrived at Oslo, Norway, on the Clitta di Milano and were immediately put aboard a train for Italy. An armed seaman guarded the vessel's gangplank and no one was permitted to see or talk with the Italians. With them were three Swedes who took part in the sledge expedition to search for Captain Amundsen and his comrades.

The Russian ice breaker Krassin, which rescued the Nobile party, had another chance to save lives. It received wireless calls for help sent by the German motorship Monte Cervantes which, with 1,500 passengers aboard, had struck a rock at Bell Island, Spitzbergen. The Krassin hurried to the rescue and sent divers down to examine the damage to the German boat's hull.

Bert Hassell and Parker Cramer hopped off from Rockford, Ill., in the plane Greater Rockford on their projected flight to Stockholm, Sweden, by way of Greenland and Iceland. But the plane was too heavily loaded and the aviators were forced to land on rough ground. Neither man was injured, but the machine was so badly smashed that the flight may be delayed for several weeks.

Paris, Marrot and Cadou, Frenchmen, flew to the Azores from Brest on their way to the United States, but one of their motors was crippled hopelessly and they were ordered home.

JOSE TORAL, stayer of General Obregon, confessed that he was persuaded to commit the crime by Manuel Trejo, an employee of the national arms factory in Mexico City,

who purchased and gave to him the pistol he used. He said he thought he was aiding the cause of the Catholic church, but now realized he had been the tool of labor leaders. A priest induced him to make the confession by telling him he was doing great harm to the church by concealing the truth. Luis Morones, head of the Mexican laborites, who resigned as secretary of labor and went into hiding, and his associates are bitterly scored by the agrarian groups which were supporters of Obregon. The agrarians are demanding that "all labor influences" be removed from the national government, holding them morally responsible for the assassination. They do not even ask the death penalty for Toral. During the week the Obregonista leaders were trying to determine who should become President on December 1. It seemed probable that either President Calles would be asked to succeed himself as provisional President under certain constitutional arrangements which might be made or that Aaron Saenz, governor of Nuevo Leon, would be favored.

REV. RT. HON. RANDALL THOMAS DAVIDSON, archbishop of Canterbury and as such primate of the Church of England, has announced his resignation which will take effect on November 12. He has been in poor health for several years, but the real reason for his action was his recent failure to obtain adoption by the house of commons of the revised book of common prayer. Doctor Davidson was eighty years old and had been primate since 1903. He always has taken a keen interest in industrial and economic affairs. It was presumed he would be succeeded by the archbishop of York.

DURING a debate on unemployment, Prime Minister Baldwin of England told the house of commons that lower freight charges on all selected traffic, including agricultural produce, coal and basic industries, would go into effect next December, ten months earlier than had been planned, and would bring industrial relief estimated at \$20,000,000 a year. The prime minister also announced that the export credits scheme, which is due to terminate in September of next year, is to be extended for another two years, while the government will assist with money grants the removal of unemployment labor from distressed areas to other districts.

Another scheme of the British government, announced by Chancellor of the Exchequer Churchill, is the sending of more than 15,000 persons to Canada from the mining districts at a cost of \$3,000,000.

DAME ELLEN TERRY, Britain's best loved actress and almost as well known and well loved in America, died at her home in Kent in her eighty-first year. In deference to her own request there was "no funeral gloom" at the obsequies, held in the village of Small Hythe and St. Paul's church, London, and her ashes were deposited in the crypt of St. Paul's.

Others who died during the week included Dr. George Colvin, president of the University of Louisville, Kentucky, and Rear Admiral W. M. Folger, retired.

CIRCLING the world in 23 days and 15 hours, Capt. C. B. D. Collyer and John Henry Mears established a new record when they stepped from a boat at the Battery, New York city. The journey was made by steamships and airplanes and they traveled in all 19,725 miles at an average speed of 840 miles a day.

FIFTEEN nations are invited by France to send representatives to Paris for the signing, on August 27, of the Kellogg antiwar treaty. The ceremony will be held in the famous Halle d'Horloge of the ministry of foreign affairs and will be most elaborate.

GENE TUNNEY is to retire as the unbeaten heavyweight champion. In his last fight, with Tom Heeney of New Zealand, he scored a technical knockout in the eleventh round. The referee stopped the battle, Heeney having been knocked unconscious in the tenth and being at Gene's mercy. It was estimated that Tex Rickard, the promoter, lost \$400,000 by the contest.

Complete Records by Live Stock Dealers

Law Enacted to Insure Fair Treatment by Dealers.

(Prepared by the United States Department of Agriculture.)

To insure fair treatment, and prevent opportunities for dishonesty in the marketing of live stock at public stockyards is a primary purpose of the Packers and Stockyards act, which is enforced by the packers and stockyards division of the bureau of animal industry of the Department of Agriculture. This imposes definite duties and obligations on dealers engaged in buying and selling live stock at posted public stockyards. It is no longer possible to do business "on the cuff," as was discovered to be the practice of one dealer who was cited to appear for a hearing. He was charged with and admitted failure to keep adequate records of his dealings.

The departmental order required that in future this dealer shall keep the following accounts, records and memoranda pertaining to his transactions:

1. Copies of scale tickets issued by stockyards covering purchases and sales by him.
2. Copies of bills for all purchases of live stock by him.
3. Book record or register of each purchase and sale of live stock showing date, number of head, weight, dockage if any, amount, and incidental expenses.

4. A complete file of canceled checks issued.

5. A check stub corresponding to every check issued.

6. Copies of account sales rendered by market agencies in connection with sales for him.

If any shipper or producer of live stock has reason to believe that he has been treated unfairly at any stockyards, the existence of the required set of records enables the agents of the department to check over the account of the questioned transaction. It is the policy of the department to be lenient toward first offenders, and give them opportunity to mend their ways and comply with the provisions of the law. Subsequent offenses are regarded as more serious, and in such cases the department intends to make full use of the powers conferred by the Packers and Stockyards act.

Causes Responsible for Decline in Summer Milk

During the summer months the milk flow generally drops off badly. At this time the cows are tormented from morning to night by flies and the common idea is that the flies are responsible for this drop in milk.

The fly is not the only cause. The real trouble is that the cows do not graze enough and cannot keep up milk production because they do not eat enough. The reasons for this are the hot weather, the flies, the unpalatable condition of the mature grass in seasons of good pasturage, or in most seasons, the shortness of the grass.

Using fly repellents does not increase the yield of milk enough to be noticeable, although by spraying the animals once a day it is possible to keep them reasonably free from flies. The most important thing to do is to make it easy for the cows to get all the feed that they need. They should be in the pasture early in the morning and during the night, as little grazing is done in the heat of the day.

Vicious Poultry Pests Difficult to Eradicate

Chicken mites are small grayish red mites about the size of a pinhead when filled with blood. They hide away during the day in cracks and crevices throughout the hen house migrating to the roosting birds at night to suck blood.

Stick-tight fleas are small flat-bodied hard-bodied creatures that appear as dark areas about the eyes, comb and wattles. Flea-ticks or blue-bugs are closely related to mites but are always larger, easily seen and have a thick, leathery skin. They are flat, egg-shaped and dark brown in color. Their habits are essentially the same as those of the chicken mite.

Notes of the Farm

Crop rotation is the surest method of weed control.

When you burn wheat straw or wheat stubble, you are destroying plant food.

Soy beans make a splendid supplement to a short timothy, or timothy and clover crop.

Blackhead in turkeys cannot be cured, but it can be prevented by keeping the birds off of ground on which chickens range.

Lambs that are docked are much more attractive to buyers and command a higher price than do undocked lambs. The docking should be done when the lambs are 7 to 15 days old.

Pigs weighing around 70 pounds will consume about one pound daily of alfalfa hay if the grain ration is fed at about three and one-half pounds daily per hundredweight of pigs.

Live Stock TB Being Conquered

Doctor Wight Presents Facts and Figures to Substantiate Statement.

(Prepared by the United States Department of Agriculture.)

The allied forces of eradication are gradually crushing the menace of tuberculosis of live stock in the United States. This was the encouraging announcement made by Dr. A. E. Wight, chief of the tuberculosis eradication division, United States Department of Agriculture, before the ninth annual Eastern States Tuberculosis conference, held at The Weirs, N. H.

In support of his optimistic views, Doctor Wight presented an array of facts and figures showing the current progress of the campaign.

Facts and Figures.

"During the last 12 months, federal, state, and county veterinarians, working under the uniform co-operative plan, tested more cattle than during any other 12-month period. During two of the months (October, 1927, and March, 1928), the number of cattle tested exceeded 1,000,000 head and the number has been nearly as high on several other occasions, as shown by monthly reports.

"Within the last year, 157 counties completed the testing of all cattle within their borders and were recognized by the United States Department of Agriculture as modified accredited counties. This term signifies that infection did not exceed one-half of one per cent and that in addition old reactors were removed.

"In 90 per cent of the area of the United States tuberculosis infection among cattle is not more than 3 per cent.

Controlled Diseases.

"Along with the aggressive campaign of eradication, the administrative officials have controlled the spread of the disease. About 45,000 cattle are moved monthly from one state to another for dairy and breeding purposes. Tuberculosis tests of this stock have resulted in the discovery and removal of reactors averaging somewhat over 250 a month. Except for this safeguard, the diseased cattle would probably carry the infection to new herds and areas. With the increasing numbers of counties that are being freed from tuberculosis, farmers should soon be able to obtain healthy, new stock locally, with benefit to home industry and a considerable saving in transportation charges.

"That the eradication of tuberculosis involves small loss to cattle owners, especially when the benefits of healthy herds are considered, is shown by appraisal, indemnity, and salvage figures.

"The average appraised value of cattle condemned because of tuberculosis was \$109.61 during the 12-month period ending April 30, 1928. The combined value of federal and state indemnity and salvage was \$55.48. This figure is within 25 of the appraised value and represents the amount that the owner received for the average diseased animal. The sum which the owner receives is commonly used toward the purchase of healthy stock, usually of better quality than those condemned."

Proper Development of Heifers of Importance

Dairy heifers which freshen too young, or which do not receive proper feed so they reach their proper size, are often less profitable than heifers which are properly developed. A case of this kind is reported by a county cow testing association. Two heifers which are full sisters and which were in the same herd, freshening at different ages. One heifer freshened at two years of age while the other was bred early and was only eighteen months old when she calved. As a result one heifer will grow into a 1,200-pound cow while the other is stunted.

The stunted heifer during the first six months of lactation produced 2,636 pounds of milk containing 108 pounds of fat. The larger heifer during the first six months produced 3,823 pounds of milk containing 167 pounds of fat. The larger heifer returned \$34.89 above feed costs, while the stunted heifer only returned \$16.16.

Agricultural Squibs

Do not milk cows completely dry for 48 hours after calving.

Watch the garden for the insect visitors. A bug in time saves nine, and it saves the garden, too.

Dipping is the only known practical method of eradicating sucking or biting lice from sheep and goats.

Hogs seem to have a special liking for wild morning glories, and if given a chance will destroy the vines by going after the succulent roots.

Crowding young chicks is false economy. Failure to give the chicks ample room is a serious mistake, for congested conditions usually lead to stunted growth and heavy mortality.

Dairy farmers are looking more and more toward leguminous hay crops for their roughage. Alfalfa is very profitable where the soil is suitable, and where liming, proper preparation of seedbed, hardy seed, and inoculation have been attended to.

Small Bears Clearly Not Wanted at Feast

Yellowstone park ravens and magpies evidently never heard of Elshag; at any rate they certainly have no fear of bears.

Ranger Thad Pound was making his rounds a short time ago, when he noticed a great commotion among a flock of ravens and magpies. Upon investigation he found that the center of the disturbance was a very much distressed she bear with a pair of cubs which were receiving the mauling of their lives from the birds' beaks. The cubs were rolled over on their backs, trying to defend themselves with their paws, while the mother was hard put to it to shield her lustily howling offspring.

The occasion of the battle was the carcass of a winter-killed elk, on which the birds had evidently been feasting. Interrupted by the bears, they had resented the intrusion and turned to do battle with the uninvited guests.—Kansas City Star's Science Service.

Cecile's Sharp Wit

Here's the latest on Cecile Evans, Hollywood's sharpest wit. The story, told by James R. Quirk in Photoplay Magazine, goes that she drove her roadster into the temporary garage of a four-thousand-dollar-a-week man on the First National lot, along came the Rolls-Royce.

"What do you mean by stalling your contraption in my garage?" yelled the Justly irate E. T. A. W. M.

"I'm sorry," apologized Cecile. "I saw one of your pictures last night and I thought you were through here."

No Wood in This House

A house without a single sliver of wood in its construction is being built in Gary, Ind., for the president of a local steel company. The framework is made of angle-irons with a complete system of diagonal bracing. Both bolting and electric welding is used to fasten the steel together. Concrete is used in the foundation and for the floors, while stairs, sills and interior trim are all steel.

Farmers to Use Planes

Many owners of large farms in South Africa are considering the use of airplanes for trips to the city. Farms in that country are enormous in size, as a rule, and planes could also be employed in making trips of inspection. Yards are so large that there is ample space for landing at the owner's front door.

Fooling Evil Spirits

Among semi-civilized races inter-change of dress is a serious business and is practiced regularly. In many of the numerous islands in Australasia, whenever a man is troubled with an evil spirit he leaves his home secretly, dons a woman's dress, assumes a female voice and pretends to be other than he really is.

Not Today

Little Betsy was cazing out of the window one afternoon during a recent severe storm. She saw the sun become overshadowed by heavy clouds and the day grow almost dark. "My, there won't be any daylight savin' today," she said sadly.

Commercial Discovery

It has been discovered that the hot mineral waters of Bath, England, will permanently tint glass, and it seems possible that the well-known glass-rosing center.

Fair Enough

"You are having the duke's title searched?" "Why not? He has investigated my town."

A little old town has lots of lilacs and lots of patriotism.

NURSES know, and doctors have declared there's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box!

To Cool a Burn Use Hanford's Balsam of Myrrh

Money back for first bottle if not satisfied. All dealers.

His Qualification for Service in the Tanks

After a six weeks' intensive campaign, Richard Barthelmess and his fellow-players in "The Patent Leather Kid" company were honorably discharged from the United States army at Camp Lewis, Washington.

While at Camp Lewis some of the finest battle scenes were screened. More than 3,000 United States regulars and 600 civilians participated in the war spectacle, which is featured by the 50 huge United States tanks.

During the shooting an extra came up to Richard and announced he'd like to enlist in the tanks.

"Why so keen about the tanks?" asked Dick.

"Oh," replied the applicant modestly, "I'm a pretty good swimmer"—Film Fun.

Colored Sugar Latest

Cleopatra's pearl liquor is modernized in the drinking of "Jewels" with the after-dinner coffee in Europe. The "Jewels" are tiny crystals of sugar colored like amethysts, topaz, sapphires and other gems. The sugar is said to be beautiful and palatable as well as attractive.

Sometimes it seems well to say, "Well, well," and leave well enough alone.

ALLEN'S FOOT-EASE

Stops the pain of Corns and Bunions and you can walk all day in ease and comfort. Nothing gives such relief to hot, tired, aching, inflamed or swollen feet, blisters or calluses. A little ALLEN'S FOOT-EASE, sprinkled in each shoe in the morning will make you forget about tight shoes. It takes the friction from the shoes. Always use it for dancing and to break in new shoes. For free sample and a Foot-Ease Walking Ball, address ALLEN'S FOOT-EASE, Le Roy, N. Y.

In a Pinch, Use Allen's Foot-Ease

RICH MAN'S CORN HARVESTER. Free trial of Allen's Foot-Ease. Free catalog showing names of harvester. Progress Co., Salina, Kansas.

W. N. U., DENVER, NO. 31-1928.

Here's Speedy Relief From Bunion Pains and Soft Corns

Get a two-ounce bottle of Moore's Emerald Oil (full strength) today. Every well-schooled druggist has this, with the distinct understanding that your money will be cheerfully returned if it does not reduce the inflammation, soreness, and pain much quicker than any remedy you ever used. Two or three applications of Moore's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the inflammation is gone. And as for Soft Corns a few applications each night at bed time and they just seem to shrivel right up and seal off.

No matter how discouraged you have been with pads, shields, or other applications, if you have not tried Moore's Emerald Oil you have something to learn. It's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

Every good druggist guarantees the first bottle of Moore's Emerald Oil to end your foot troubles or money back.

What! haven't you heard about it?

DON'T you know that Black Flag—the deadliest insect-killer made—costs just one-half the price of other liquid insect-killers? Black Flag costs only 25 cents for a half-pint. Other liquid insect-killers cost 50 cents a half-pint. Black Flag comes in two forms—liquid and powder. Both are sure death to flies, mosquitoes, roaches, ants, bed-bugs, fleas, etc.

Powder, 13c up. Money back if not satisfied.

Neat Stucco Design Suitable for Setting of Trees and Shrubs

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building...

Here is a design well carried out in stucco over a frame construction, a type of house which, when well built, offers wide possibilities for the designer and lasting satisfaction for the owner.

First Floor Plan.

found very pleasing, especially when placed in a setting of trees and shrubbery.

The exterior presents an artistic simplicity made more attractive by the brick work of the foundation, porch and small paneled windows...

Every One Has Own Idea for the "Dream" Home

To the average person ownership of a home is perhaps the dream of a lifetime—in many cases it is the great objective of all effort.

The dream may be of a modest city dwelling or it may vision a suburban cottage—New England, southern or Dutch colonial type, English half-timber, California bungalow or a pretentious mansion...

Ownership may come through purchase of a house already standing, or it may be the result of long planning and the personally supervised construction of a new house.

It is one thing to dream of a home and its comforts and delights and quite another matter to assure them. Unless the prospective home owner gives careful attention to essential details of construction...

Four walls, a roof and interior equipment do not by any means constitute a real home. The character of the materials entering into structural work is of vital importance in making your home all that a home should be.

The old saying "appearances are deceptive" applies nowhere more forcefully than in home building. Something more than good looks is necessary in the proper construction or alteration of a house.

To be certain that you are securing a home in keeping with your dream of cozy comfort and lasting service you should take counsel with those who know how to build.

Many new houses soon become a source of trouble and expense to their owners because of false economy practiced in their construction.

This means replacement at an expense much greater than the so-called saving effected by use of substitute materials at the beginning.

Therefore, the first point to be remembered is that substantial, enduring materials increase the cost of your home but little at the start.

of this cozy home would be lacking.

The plan, too, is one which will be found highly satisfactory just as it has been laid out. On the other hand, for those whose requirements indicate a somewhat different arrangement...

Second Floor Plan.

could be made much more useful in some other way.

The space might be utilized as a maid's room, also it would serve admirably as a study, a sewing room or as a nursery where the children could make as much noise as they pleased without disturbing the family...

The first floor lavatory will be found a most convenient extra, one which will save tiresome trips up and down stairs. The regular bathroom is placed on the second floor...

ally they are the cheapest as well as the most satisfactory materials.

Whether you build a new house, remodel the old house or buy a ready-built house it will pay you to give close attention to the character of its construction.

Common Brick Makes Spurt in Home Building

That most common of building materials, common brick, has literally written its own varied history in the different bonds developed for its utilitarian and decorative uses in all the countries of the world over a period of many centuries.

American home owners are afforded a wide range of selection in common brick bonds, and many interesting contrasts may be secured by laying the brick walls and chimneys in different patterns.

The bonds most commonly used for walls in this country are the Flemish cross bond and the garden wall bond. Chimneys, which offer a small expanse, usually require a different header, English and Flemish bonds probably are most popular.

Skinted brick, a roughly laid type, is now coming into popularity and its about the most economical type. Rolo walls, in which the bricks are laid on edge, also are inexpensive to build.

Concrete Fence Posts Will Not Rot or Burn

Concrete fence posts will not rot or burn. They are uniform in size and shape and are easily set and lined up. They are a paying investment on the farm and an adornment on the home grounds.

The correct location of reinforcement in posts is very important. The rods are located near each corner, where the greatest tensile stresses occur, and from one-half to three-quarters of an inch from the surface to protect them against possible exposure.

A false impression entertained by some is that almost any kind of scrap wire, even barbed fence wire, will serve for reinforcement. Such wire is often so rusty or dirty that concrete will not stick to it and it is therefore useless.

Telephone Users

Within 15 months there will be 35,000,000 telephones in use throughout the world, the chief statistician of the American Telephone and Telegraph company estimates.

Fairy Tale for the Children

By MARY GRAHAM RONNER

"I'm glad you like the sea as I do," said Mr. Sharp-Tailed Sparrow, "and it is nice that you have your nest in the same salt water marsh that I have chosen for my nest."

"This marsh leads right into our beloved ocean, as we can see from here."

And then both birds began to sing a song about the beautiful ocean and how they loved the salt water and the salt air and the salt sea breezes.

"It's strange that we should have met here," said Mr. Sharp-Tailed Sparrow, "though I have heard our two families often did have their nests in the same places."

"And I've heard that we do the same things—we build the same sorts of nests, and are just as alike as brothers."

"We're cousins," said Mr. Seaside Sparrow.

"But we act like brothers," said Mr. Sharp-Tailed Sparrow.

"We admire each other's ways," said Mr. Seaside Sparrow.

"Yes, that is why we do things so much alike," said Mr. Sharp-Tailed Sparrow.

"Let's take a little hop through these glorious long grasses."

"It's almost like playing hide-and-go-seek," said Mr. Seaside Sparrow.

So they went through the tall grasses and rushed and ran over the sand, or rather hopped over the sand.

They chattered and chirped and trilled and squeaked in their funny little voices and chattered of everything possible, but mostly they talked of the sea and of how they loved the

wind and the salt in the air and the salt in the sea and the salt in the marshes.

In fact they agreed that they were very fond of salt and they were so glad that the sea always was salty.

They said how horrible it would be if the sea were ever without salt, and then they became quite sad.

But after awhile they comforted themselves by remembering that the

"Just as Alike as Brothers."

sea had never been without salt as far as they had ever heard, and they didn't believe it ever would be.

"What sort of a home do you have, Mr. Seaside Sparrow?" asked Mr. Sharp-Tailed Sparrow.

"I have a nest of seaweed and long grasses which I find does very well—grasses such as we have here," said Mr. Seaside Sparrow.

"And Mrs. Sparrow has greenish white eggs, speckled with brown which she lays in the nest."

"I often cover my nest with dried out seaweed, dried by Mr. Sun."

HOT WEATHER DRESS FOR LITTLE GIRL

(Prepared by the United States Department of Agriculture.)

Here's an excellent type of sleeveless dress for a little girl to wear on warm afternoons in summer. It was designed by the bureau of home economics to be made from any plain commercial pattern that has kimono sleeves with a seam on the shoulder.

The armholes and front opening are bound in the white voile, and slight gathers are taken in at the neck and bound in green voile. To make the stitched trimming, the yarn is wound

machine. On children's dresses hand-sewed hems facilitate letting the dress down when necessary. The first hem should be very wide to allow for growth. In sheer materials like voile the turned-under part of the hem will look best if it is the full width of the hem, and the allowance for letting down can be taken care of in this way.

MAKING COTTAGE CHEESE

One gallon of skim milk will make about one and one-half pounds of cottage cheese. If the milk is sweet it should be placed in a pan and left in a clean, warm place at a temperature of about 75 degrees F. until it clabbers, when it should have a clean, sour flavor.

An agreeable sight is an old man who is dressy to his dying day.

A Cool Hot Weather Dress for a Little Girl.

on the bobbin, after loosening the shuttle tension, and white thread is used for the upper stitch. The design is marked and stitched on the wrong side of the material. The turned-back corners of the square pockets are also trimmed with the stitching. These pockets are made of a double square of voile, and turned with the seams in. They are in keeping with the design on the front.

It is a good idea to use a double bias neck binding about three-fourths of an inch wide when folded. The raw edges and the top of the dress are seamed together, with the binding lying on the right side of the garment. The binding is then folded over, but does not have raw edges to be turned under on the other side.

Hems on any dresses are much more attractive if put in by hand, and often set better than when stitched on the

"The very same ways as I have," said Mr. Sharp-Tailed Sparrow.

And then they talked of their many cousins, the Nelson Sparrows, the Dusky Seaside Sparrows who would only live in Florida, and of the many other seaside sparrows.

But most of all they enjoyed finding out that their ways were just the same.

(© 1924, Western Newspaper Union.)

Household Notes

A coat of tan is a coat of health; but don't put it on too quickly.

If stockings are purchased half a size longer than is actually needed for the foot, less mending is required.

Crisp foods like toast, celery, or raw cabbage for children give the teeth exercise and encourage digestion.

To prolong its usefulness and increase its efficiency, keep your sewing machine clean with gasoline and a stiff brush.

Rhubarb is one of the best palate tempters for spring appetites and contains valuable calcium and iron. Use it while it is plentiful and inexpensive.

Nellie Maxwell's Recipes

The luxury of all summer's sweet sensation is to be found when one lies at length in the warm, fragrant grass, soaked in sunshine, aware of regions of blossoming clover and of high heaven filled with the hum of innumerable bees.—Harriet E. Prescott.

There is such a variety of fancy cakes and desserts that one may prepare with chow paste that it is a good recipe with which to become familiar. To the untrained cook, the making of chow paste seems difficult, but if directions are followed carefully even the most inexperienced will have good results.

During the winter months of summer, as the appetite is not so keen, more slippy and less hearty foods are enjoyed. Here are some old standbys:

Ice Box Pudding.—Take one-half cupful of minute tapioca and add to one pint of hot grape juice, place in a double boiler and let stand over hot water until cooked and clear.

SANDWICHES WITH CREAM CHEESE

Cream Cheese Mixed With Finely Chopped Watercress.

(Prepared by the United States Department of Agriculture.)

The rolled sandwiches in the illustration, taken by the United States Department of Agriculture, are spread with cream cheese mixed with finely chopped watercress. Chow chow, chili sauce, or any desired pickle mixture might have been used in place of the watercress.

Crushed crackers are used for the round sandwiches. In a hollow on top of each a little colorful jelly is placed. These crackers should not be spread until just before they are to be eaten, as the cheese softens the crackers if allowed to stand.

on juice may be included in the seasoning.

The bread for rolled sandwiches should be fresh and elastic in texture, so that it will not crumble or break when rolled. Spread the sandwich mixture on the cut end of the loaf, then with a very sharp knife, cut off the thinnest possible slice, roll it up, and trim the ends.

Frocks With Coats to Match

By JULIA BOTTOMLEY

THE call of the midsummer mode is to complete the costume picture with a complementary coat. Greatest enthusiasm is shown by both fashionists and fashionable for the new custom of matching the coat to the frock.

This popular matching mode finds its happiest expression in the realm of gay print ensembles which top lively patterned dresses with coats of the selfsame lively patterned material. The picture emphasizes the fact that this colorful ensemble vogue which is so prominent in the midsummer landscape features both "the long and the short of it" as far as coats are concerned.

The model to the left, as you see, is the fashionable seven-eighths length. It is a highly colorful affair from start to finish, its navy silk background being enlivened with a print done in vivid scarlet and buff—quite Spanish in its coloring. The hemline of the dress and its diagonal front opening are scalloped. A piping of plain red outlines all the edges.

One is almost justified in referring to the three-piece sports costume to the right as a travelogue ensemble, because of the fact that the printed crepe of which it is made is one of those new scenic silks, this one cleverly depicting certain famous playgrounds of the world. There are palm trees and little figures and sea and sky and such, admirably depicted so as to produce a handsome all-over design. The colors are particularly fetching, harmonized and blended so as to produce a fascinating pastel effect.

Another important style feature of this sports frock is the fact of the blouse being sans sleeves. The sleeveless mode is spreading. This, however, need not alarm those who do not admire sleeveless frocks. Likewise those to whom sleevelessness is any-

thing but becoming may solve the problem of being chic by wearing a sleeveless coat of the identical material as that of the dress. Most of the sheer costumes for dressy garden

party wear and the like stress a matching coat, as well as do the smart sports outfits of silk and crepe, of pique or linen as the case may be.

A "Company" Dessert

Here's a "company" dessert that will appeal to your guests, whether young or old. It must be made several hours before it is wanted, and that is always an advantage, since it permits the housewife to "get the dessert out of the way" and give her attention to other dishes on the menu. The bureau of home economics sponsors the recipe:

1/2 lb. dried apricots 1/2 cup boiling water
2 1/2 cups cold water
1 1/2 lbs. gelatin 1/2 pint whipping cream
1 cup sugar 1/2 teaspoonful salt

Wash the apricots and soak them over night in 2 cupfuls of cold water. Cook the apricots until soft in the water in which they were soaked and press them through a fine sieve or colander. Put the 1/2 cupful of cold water over the gelatin and after it stands for 5 minutes add the boiling water. Stir until the gelatin has dissolved, then add the sugar, salt, and apricot pulp. Chill and fold in the cream which has been whipped. Line a serving dish with lady fingers or slices of sponge cake and pile the apricot mixture lightly in the center. Place the dish in the cold for an hour or more before serving.
