Pink Bollworm in Cottonseed

SPREAD of the pink bollworm has resulted from the movement of infested cottonseed. The worms protect themselves for the winter in many cases by webbing two seeds together as shown in the upper half of the above picture. These seeds are not destroyed by ginning, but house the worm through the winter to infest the next year's crop. Gins in the pink bollworm infested area are required to install seed sterilizing equipment approved by the State Entomologist before permits to handle cotton will be issued.

PERSONAL MENTION

Mr. and Mrs. Lee King, Dick Yoas and Mrs. Witcher of San Angelo, Texas, are visiting Bird Yoas at his Amado ranch.

Mrs. M. Marsteller of Nogales, who has been quite sick with flu, is improving.

A. S. Henderson was a Nogales business visitor Tuesday.

Mrs. C. H. Wilson was a county seat visitor Tuesday.

Mr. and Mrs. Carl Peterson were shopping Tuesday in Nogales.

Archie Smith, manager of the Martinez ranch of the Cananea Cattle Co., was a Nogales visitor Tuesday.

P. M. Elchells was a Nogales visitor Tuesday.

Dick Yoas, Robert Berger and Glen Perry were business visitors to Nogales Tuesday. They shipped 17 cars of cattle last week to the Los Angeles market.

W. A. Parke of Canille was a Nogales visitor Tuesday.

Mr. and Mrs. Charles May and the latter's mother, Mrs. John Smith, were shopping in Nogales Tuesday.

Mr. and Mrs. R. N. Keaton were Nogales visitors Tuesday.

Mr. and Mrs. J. J. Sullivan and son, Roy, were Nogales visitors Saturday.

Mrs. Harry Rickwalt and son were county seat visitors Tuesday.

Mrs. Bud Baldwin was a Nogales visitor Tuesday from her San Rafael valley ranch.

E. D. Farley of the Homestead mine was a Nogales business visitor Saturday.

Mr. and Mrs. Charles Mead were San Rafael valley and Canille visitors last Friday.

KEATON FINED \$100 FOR ASSAULT
R. N. Keaton of the San Rafael valley fined by Police Judge Elbert Thurman of Nogales, last Saturday, \$100 for an assault upon John Madson of Amado. According to the testimony, Keaton struck Madson from behind, having taken off his coat and deposited it in Escalada Bros. store before committing the act, according to Mr. Madson and J. J. Sullivan, and Mrs. Madson. He were with Mr. Madson when the affair occurred.

Keaton was represented by Attorney Duane Bird. The case was appealed to a higher court.

SCHOOL NOTES

(Louise Stevens, Editor)

The Primary room is making color booklets.

The B Class is working for stars in reading.

Dave Altemirano has earned a star in spelling.

The Second and Third grades have finished their writing book covers in art class.

The Fourth grade is making health posters.

The Seventh and Eighth grades are drawing free-hand sketches of a mill scene.

The Fourth grade had a spelling test. Those having perfect papers were Phoebe Beacom, Ysidora Corralis, and Tootsie Lamma.

The Eighth grade is learning the Gettysburg speech.

JURY ACQUITS JAMES OF HOOD SHOOTING IN RAMSEY CANYON

Tombstone, Ariz., Nov. 15.—Five minutes after the trial of Harvey James, charged with the attempted murder of A. E. Hood, aged keeper of Ramsey Canyon in the Huachuca mountains, went to a jury, the verdict of not guilty was returned in favor of the defendant.

EDITORIAL FEATURE SERIES COMING

How do you get along in the world? Do you treat the world? or does the world treat you? Are you harmoniously adjusted to life or do you expect life to adjust itself to you? Harmonious adjustment to life is usually the result of having some sort of a philosophy. Inharmonious adjustment to life usually comes from not having any philosophy at all or, worse yet, a wrong outlook.

"Practical Philosophies" is the name of a series of editorials which are to appear from time to time in this paper. They should aid you in acquiring a philosophic attitude towards life, and in bringing about that harmonious self-adjustment which means happiness and success.

The president of a great insurance company, J. Scofield Rowe, of The Metropolitan Casualty Insurance Company of New York has written these broad observations on life, which combine the dignity of Emerson with the practicality of Elbert Hubbard. They are the cream of a philosophy gleaned from the years by a keen and successful man who, by having learned to control and direct himself, has been chosen to control and direct others. Look for "Practical Philosophies."

MINING REVIVAL IN NOGALES NOVEMBER 19, 20, 21

The following letter, which is self-explanatory, was received by The Patagonian this week:

"Nogales, Ariz., Nov. 13, 1928.

"To the Mining Men of Arizona:

"So general has been the response to the invitation to the mining men of the state to join in a gettogether meeting at Nogales that the affair has become very important.

"All of the big copper companies of the state have reported their intention to have good delegations present. Now, to make the revival a great big success, it is necessary that there be a large attendance of the smaller operators.

"The real purpose of the revival is to get those interested in mining in Arizona together to discuss problems affecting the industry, and to give encouragement to mining generally in the state. Now is the time to 'hit the ball' in mining.

"This is by no means a Santa Cruz county affair. The Arizona Industrial Congress, the Arizona Chapter of the American Mining Congress, and the Arizona Section of the American Institute of Mining and Metallurgical Engineers are backing this meeting.

"Read the program carefully and you will agree that this meeting will be well worth while. On the program a 'prominent mining authority' is mentioned for one address. We are advised that Dr. L. D. Ricketts is to fill that place on the program. Enough said!

"On the first day's program, the second speaker was not announced. Mr. W. J. Benedict, geologist of the United Verde Copper Company, will discuss 'How We Prospect for Mines.'

"It will be a great favor if you will tell us in advance if you are to be in attendance. We would also like to know how many ladies are to be present. Our ladies' committee wishes to know.

"Aside from the program, the entertainment to be offered will be to your liking.

"This is an opportunity for constructive work in behalf of Arizona mining. Come on to Nogales Sunday and be ready for the opening session Monday morning.

"Dr. A. L. Gustetter, Chairman, Mining Committee, Nogales Chamber of Commerce."

BACA FLOAT LEASED TO SHEEP MEN FROM PHOENIX

Manager C. L. Northcraft of the Baca Float reports that the grazing land of the north half of the grant has been leased for seven months to the Valley Bank of Phoenix interests, who will put between 8,000 and 10,000 sheep on the land, most of which arrived this week.

Mr. Northcraft says water will be developed on the grant immediately. The buildings and agricultural land were retained by the owners of the property.

"IT PAYS TO ADVERTISE"

Americans Are Becoming Authorities on Music

CHARLIE FRY Atlantic City

No Longer Unappreciative of Art, Says Leader

Spanish settlements, except in rare cases of Indian tribes. While America was creating and evolving its own music, alien artists presented us with the works of their native masterpieces.

"Because we did not respond to it as did their own countrymen, we have frequently been accused of not appreciating 'good music.' But now that America has a music all its own, the absurdity of this idea is proved.

It is Charlie Fry, musical director of the Million Dollar Pier at Atlantic City, who is authority for this theory.

"Fry has played to twelve million people in the last few years. In fact, he holds the greatest attendance record of any musical director in this country.

All Native

"Examine the good music of any land," he insists, "whether it be that of Italy or the South Sea Islands, and you will see that it is native music. It speaks the language of the people for whom it was created. America is a new country politically and musically speaking. We have no record of its music before the English and

Today as a nation, America is music-mad but highly discriminating. In fact, all the civilized countries of the world are borrowing this rhythm which we have created. Many of our popular numbers will be classics of the new generation.

"I am playing a foxtrot this year, 'You're A Real Sweetheart,' which I predict will live as long as the folk dances of Hungary and the coal-miner songs of Wales. It has it."

Charlie Fry has a vivid family background for his own career as a foremost interpreter of modern American music. His grandfather was one of the first foreign artists to take native American music seriously.

There was no school Monday on account of Armistice Day. Big Jim mine to install new ball mill for grinding Hardshell ores.

BUSINESS CONDITIONS IN STATE FAVORABLE

Business conditions throughout the state were generally favorable during October, and in many respects the coming winter promises to be one of the best in some years, according to the monthly Arizona Business Review just issued by the Arizona Industrial Congress.

Fall activity in agricultural sections, increased wages in mining districts, opening of winter tourist travel, and continued progress in new construction and development are described by the report as contributing to improvement over the last several years in virtually all lines of business. It is remarked, however, that the growth of trade volume has been accompanied by increasing competition.

The month's major developments in the state's different industries, as given in the review, may be summarized as follows:

Agriculture—Cotton picking at its peak, with 62,000 bales ginned to November 1 out of a total indicated production of 133,000. Alfalfa bringing excellent returns, and citrus fruit shipments under way with more than 500 cars expected. Lettuce crop to begin moving from Salt River Valley soon after November 20, with 10,000 acres to be harvested, besides about 3500 more in Duncan, Safford, Casa Grande and Yuma sections.

Livestock—Ranges in many districts have been materially improved by October rains, though feed conditions are still spotted. Cattle movement proceeding briskly and bringing good prices. Sheep on way south to winter lambing grounds in good condition.

Mining—Further advance in the copper market to 16 cents was the month's main feature. Operations of Arizona mines show little change and development work remains extraordinarily active.

Banking—Improved financial conditions in the state shown by bank deposits on October 3 of \$86,455,383.53, against \$73,657,303.57 on October 10, 1927. Checking transactions in principal cities in October were the largest ever recorded for that month, the total for 11 cities being \$77,138,923.69, compared with \$64,611,645.04 in September, \$63,193,579.11 in October last year and \$67,151,996.40 in October, 1926.

SEVERAL BURGLARIES HERE

Patagonia has been the scene of several burglaries lately. Some time ago the vans Mercantile Company's store was broken into and \$29 was taken from the till. R. A. Campbell, who sleeps in the store, was awakened by the burglar and took several shots at him in the hand, but failed to score a hit. A few nights ago the butcher shop of George Edgell was visited by a burglar and a trunk left there for storage was broken into. This week the home of Mr. Edgell's brother-in-law was visited by an intruder, who stole several articles of value, including a diamond stickpin.

It is thought the work is that of some local person, and a watch is being maintained in hopes of capturing the evildoer.

COOLIDGE DAM READY FOR USE

Phoenix, Nov. 15.—Soon to expand into a lake which will irrigate 100,000 acres of land in the Casa Grande Valley, water began piling up behind Coolidge dam today as the dam's vent pipes were closed, marking the final step in the structure's completion.

The flow of the river today averaged 168 second feet. At the day's close a considerable body of water had already formed itself behind the barrier of steel and concrete standing in the heart of the desert.

World's Fair mine is shipping concentrates to the smelter.

VESTRIS SURVIVORS SAY LIFE BOATS WERE ROTTEN

New York, Nov. 15.—Six survivors of the fourered steamer *Vestris* today charged under oath before a United States commissioner that the disaster was marked by entire lack of discipline, that neither officers nor men were equipped to meet the emergency, and that lives were needlessly wasted by rotting lifeboats that no one knew how to handle.

When the distress signal was at last sent out, hours late, they said, the crew was left to its own devices and the passengers neither were told to don life belts nor given any assistance in getting to lifeboats.

In which their wives were stationed and members of the crew allowed to take the vacant places. The lifeboats were sprung in the seams, so they leaked faster than they could be bailed out. Two witnesses told of gaping holes in the boats, one saying to a lifeboat that had a hole 6 inches across in its side.

None of the witnesses saw any officers except the captain on deck while the crew was making vain attempts to launch the boats. There was one hearsay report of an individual instance of mutiny in which an officer was said to have drawn a pistol which a negro member wrenched from his grasp and threw overboard.

GREEK WAITER CHARGED WITH THEFT IS CAUGHT IN CANANEA

Nogales, Ariz., Nov. 15.—Demetrio Hinos, Greek waiter, who is alleged to have robbed the Palais Royal, a Nogales, Sonora, cabaret, of \$700 Monday afternoon, was captured at Cananea Tuesday morning. It was announced Wednesday by the police authorities across the line. An officer was sent to Cananea and brought the man back to Nogales yesterday.

First report of the robbery stated that Hinos robbed the cash register. This was denied yesterday. It is now alleged that he broke into the home of the manager of the cabaret, which is next door to the Royal, and took the money.

OKLAHOMA OIL FIELD BOOMS

Shawnee, Okla., Nov. 15.—Nearly a hundred drills were tearing through the surface of the earth tonight in the Maud and Mission pools of the greater Seminole oil area, in a race for production.

From a scene of virtual inactivity to one of bustling life and industry, the fields were transformed today by the termination of a drilling restriction agreement which operators had enforced to hold down production in the flush Seminole area. The two pools had been in check almost since their discovery because the flood of oil in other parts of the area was acting as a depressant on the entire petroleum industry.

Most of the drilling is being done by large companies which have virtually all of the tracts in the area under lease.

WILD HORSES KILLED FOR MEAT

Phoenix, Nov. 15.—New channels for the elimination of wild horses from Arizona livestock ranges have been developed by the operation of two packing plants here, which produce meat scrap for poultry and dog and cat food. Indian agencies and cattlemen throughout the state have been requested by the Arizona Industrial Congress to furnish data regarding the number of wild horses available and arrangements which could be made to obtain them.

Kingman—Activity renewed at St. Louis mine in Corbat Canyon, 3 miles north of this city.

Snow fell in the San Rafael Valley Thursday night, covering the ground.

BUILDERS VS. DESTROYERS

Every community, in every state, and in every nation at large we have today, has its builders and destroyers. In between we have a large class which does nothing actively in either direction.

It would seem that the less active element would at least lend its moral support to the builders, but unfortunately this is not always the case, particularly when the destroyers by noisy clamor and misrepresentation seek to discredit the constructive work the builders are trying to do.

The builder is always under fire. No matter how much he may give of time, money and effort to the upbuilding of his community and state, the destroyers are on his trail with their magnifying glass seeking to discover sinister and selfish motives. Being incapable of constructive effort themselves, they must be content with being down.

But the builder does not stop building on that account. The very spirit which makes him a builder also makes him indifferent to attacks which are as futile as they are unjust. He knows that in the long run he will win, regardless of temporary misunderstanding and abuse, because the knockers will finally hang themselves if given sufficient rope.

AN UNSEEN DANGER

With the approach of winter, the usual fatalities from deadly carbon monoxide may be expected, unless motorists heed warnings against starting motors in closed garages.

Many deaths have been caused by the poisonous gas that the United States Bureau of Mines has produced motion picture to illustrate its dangers. Besides showing how one may overcome by carbon monoxide, the picture displays these warnings: "Never run the engine in a closed garage"; "Keep the doors wide open"; "Never get under the car while the engine runs"; "Never sleep in a room with a gas appliance burning."

Carbon monoxide is an odorless and therefore insidious gas, which paralyzes its victim almost before he is aware of its presence, and is fatal unless respiration and a supply of oxygen is immediately applied.

PLUCKY GIRL FLYER

The fact that she owns and operates an airplane is in itself evidence of the courage of Miss Helen Crandall of Alfred, N. Y. But a recent exploit of hers stamps her as being a young woman of intelligence and pluck far beyond the average.

When she and her copilot, George Eyer, crashed in the woods far from habitation, she suffered several lacerations and Eyer's skull was fractured. Despite her painful injuries, she hiked her way nine miles to a house where she had her clothing repaired and them to limbs of trees to hold her up, so that her companion could find her on her return. She was taken to a hospital for treatment.

That was a courageous performance, worthy of a hero medal.

MORE SPEED IN THE AIR

If a recent press dispatch is accurate the airplane speed record of 318 miles an hour, set by Major Bernard H. Thomsen of the U. S. Army, is an official record.

The average person cannot imagine what it would mean to shoot through space at the rate of between 5 and 6 miles a minute, and most of us have little curiosity to find out. Still, we naturally have a certain admiration for those adventurous spirits who do such things.

No matter how dangerous a stunt may be, there are always some to be found who have the courage or foolhardiness to try it. But it is difficult for conservative mortals to understand how they get that way.

AMERICANISM DEFINED

The word "Americanism" is used very frequently, but the average person would doubtless find some difficulty in defining it satisfactorily.

Broadly speaking, it is understood to mean an appreciation of and loyalty to America and its institutions. But it means more than a mere passive acceptance of the benefits which are derived from citizenship.

Probably no class of citizens are better qualified to define Americanism than the veterans of the wars which have been waged in defense of the Union. It was adopted some time ago by the commanders-in-chief of five leading veterans' organizations, as follows:

"Americanism is an unflinching love of country; loyalty to its institutions and ideals; eagerness to defend it against all enemies; undivided allegiance to the flag, and a desire to secure the blessings of liberty to ourselves and posterity."

Persons who can qualify under that definition are truly Americans, whether native-born or naturalized.

WALTER P. CHRYSLER'S TRAFFIC TALKS

THE TRAFFIC OFFICER

One of the magazines lately printed an article called "Are Traffic Cops Human?" and the proven burden of the story was that they are. Certainly, one of the simplest rules for getting along in the world of moving vehicles without friction is to watch the officer. He is most human in that he wishes to be seen and obeyed.

If one is in a disputable jam, it is always the man who has not caught the eye of the traffic officer who is open to reprimand. Watching the lights as they turn green and red is not enough, although important enough in itself. In New York City it is a law that the traffic officer's whistle or his command by sign or speech constitutes the final signal and not the lights alone. In small towns where the traffic is sometimes operated by an officer on a corner of an intersection, tucked away

in a booth, the lights can usually be depended upon, but wherever there is an officer in sight he should be watched and movement made only at his command.

Always look about for the officer and do not take for granted that just because you cannot find him at once that he is not some place around. Proceed at all times as if he were present, if he cannot be located, and do that safe and courteous thing which you know he would expect of you were he there. Never argue or dispute with an officer. Catch his eye and be ready for that sudden stop, perhaps in defiance of the lights, which he will call for, in order that the right or left hand turns can be made by other cars. Always keep your eye on the traffic policeman and remember that instant and cheerful obedience is the best co-operation you can give him.

Interesting News Notes

The sale of a dozen cold storage eggs as fresh products cost Carl Bergman of Madison, Wis., \$4.16 per egg.

Testimony given by Mrs. L. R. Maier of Chicago convicted her son of burglary.

George Saunders of Chicago boarded a train for his honeymoon, thinking his bride was aboard, but she was in the station and they were not reunited until 14 hours later.

Taking her first ride in a railroad train at the age of 82, Mrs. Susie Yount of Poplar Bluffs, Mo., declared it the biggest thrill of her life.

George Clayton of St. Louis was fined \$50 for stealing a 15-cent package of cigarettes.

Two men entered the home of Mrs. E. Smith of Ann Arbor, Mich., disconnected the bathtub and walked off with it.

Because Henry Preston of Chicago called the policeman who arrested him for speeding a liar, his fine of \$35 was doubled.

Sidelights

Alphonse and Alfred Hall of Pelham, N. Y., who had suffered ridicule because of their family name, asked a court to permit them to change it to Hall. The judge thought their request reasonable and approved the change.

Government red tape surrounding another Civil War claim was finally unwound a few days ago, when the heirs of Charles Gallagher were awarded \$23,387 in payment to a schooner destroyed by the Confederates in 1864. All but \$9574 of this amount had been expended in court costs.

Samuel Reid of San Francisco has turned down a job on the stage and will go back to work as a mechanical engineer. His claim to fame is based on his spending two years in jail rather than pay alimony to his wife.

For 26 years the mummy of an "Egyptian princess" has attracted many peeples to the museum of the Hackensack, N. J., public library. Recently when the supposed ancient relic was dusted off it was found to be only a dummy stuffed with rags.

Burglaries have become tiresome to the Coursey drug firm in Atlanta, which has been robbed several times lately, last week two nights in succession. The last time a motorcycle was taken, and a member of the firm said: "We hope they will make a long trip on it."

Citizens of Portland, Ore., are now able to obtain meat at about one-half the price heretofore paid for beef; that is, if they are not too particular. Will dhorse steaks are being sold at a public market there.

Mike Haas decided that women buy from women more readily than from men, so he dressed in feminine attire and peddled wearing apparel from house to house in New Orleans with considerable success. A policeman observed the size of Mike's hands and feet and handed him in jail.

Governor Lowden recommends physical exercise and ample sleep as aids to longevity. We are willing to try the sleep as a beginning.

What's New?

A bullet carrying an anesthetic which causes unconsciousness for a short time has been developed for capturing wild animals for zoological gardens.

Following the style in automobiles, telephones are now being made in various colors.

It has been discovered that water can be effectively sterilized by exposure to the germ-killing rays of ultraviolet electric lamps.

An all-electric ship of 9000 tons, which may be operated by one man, was recently completed in Philadelphia.

An electrical camel for exercising purposes, similar to President Coolidge's famous electrical horse, has been produced.

When flood waters covered an island near Clarksville, Va., a cow that had been marooned there started swimming, and wate later found at North Bend, 20 miles away.

After a three-hour battle, Ed Steadman of Beaumont, Texas, hauled in a 2100-pound sawfish 16 1/2 feet long from the Gulf of Mexico.

Denied a marriage license in Illinois, Miss Novena Smith, 18, and Edward James, 88, went by automobile to St. Louis and were married.

James White of esplanes, Ill., had A. R. Black arrested for stealing apples.

A cow belonging to E. V. Reed of Berry, Ala., has had five calves in 10 months, twins and triplets.

Inspecting a giant pumpkin he was growing for exhibition, a farmer in Missouri found his Persian cat had scopped out a cavity and was inside with a litter of four kittens.

The nut of the Tagua palm of Ecuador produces much of the so-called vegetable ivory used by the button industry of the United States and Europe.

In two years more than 1,000,000 pounds of reindeer meat was shipped out of Alaska.

The Japanese government has purchased 5000 Canadian hens for its experimental poultry stations.

Among a party of Moroccans that arrived in Algiers was a giant 9 feet 4 inches tall.

The most expensive transatlantic telephone call made took place when an American visitor to London rang up a business associate in New York City and talked 95 minutes at a cost of \$1125.

The medicine kit carried by the Byrd Antarctic expedition weighs more than a ton.

A part of southern India has the enormous rainfall of almost 500 inches a year.

Tripoli has three Sabbath days which the religious population insist upon observing—the Christians, Sunday; the Jews, Saturday, and the Moslems, Friday.

BOYS AND GIRLS

Virginia Kellman, 2-year-old New York child, who early showed a dislike for milk, has eaten more than 5000 bananas and little else in her life.

Robert Wadlow of Alton, Ill., is 10 years old, 6 feet 6 inches tall and weighs 211 pounds.

Triplet boys born to Mrs. R. R. Calvert of Passaic, N. J., just before election were named for Herbert Hoover, Alfred Smith and Norman Thomas, then presidential candidates.

Following an annual custom, a "boy premier" for the province of Ontario will be elected on December 1.

Winifred Quelletto, 4, of Fort Kent, Me., after being shot through the brain with a high-powered rifle bullet, is recovering to the amazement of physicians.

PRINTING

Good Printing Is the Dress of Business. That Is the Kind We Do.

Let Us Show You

A Massachusetts shoemaker has had two wives. Here's hoping he sticks to his last.

A French educator opposes the study of mathematics by children under 10. Youngsters would approve that course.

COPPER MINE FOR SALE

Copper is going up to where it belongs! Larger sales and better price will make the mines of this county profitable investments, and now that the temporary stagnation caused by the presidential election is over, there will be an increase in development. The total production of copper from earliest times would only serve the world for a few years, at the present rate of consumption, and we are shortly to be confronted with an actual shortage of this metal so necessary and so widely serviceable in modern industry. I have seen it stated that there is not more than 20 years' supply of the red metal in all the known mines, and to get this from the old and deep mines will cost more and thus give an advantage to the new mines with deposits as yet nearer the surface.

As is well known, I have been developing my ground for the last 20 years and have demonstrated the enormous tonnage of merchantable ore, about 10 per cent of which is a shipping ore, the balance requiring beneficiating on the spot. Much of it could be treated at a profit in a smelter on the ground, and the rest would more suitably be milled, which means a large plant for its proper utilization. I will make attractive terms to capital for these purposes, in the way of an interest, or will join a company for the equipment, which I would decidedly prefer, or will sell on liberal terms to a syndicate with a definite plan of operation. I know my ground will warrant a company of strength, and have several groups that could be consolidated for BIG BUSINESS. For instance:

I have a group of claims upon the big lode known as the Veta Grande, and so called anciently. In one place on this there is a prehistoric working in which the stone hammers, etc., used by the stone age people have been found. The new work on this lode consists of a number of open pits from which several hundred tons have been shipped, five tunnels, the longest 450 feet, and five shafts, the deepest 200 feet, all of which show merchantable ore. The rich ore carries gray copper and glance, the mill ore mostly carbonates so far. These carbonates have only recently become available by reason of flotation, and there is a large surface extension of such ores. There are about 20 claims in this group, and there is much other work on other veins which has shown satisfactory ore. I do not remember to have ever done any work on these claims that did not strengthen my conviction of a great mine awaiting proper treatment. The tunnel on which I am now working is in 400 feet and every foot with the present width is putting in sight from \$250 to \$500 worth of ore, which will increase as more back is had. Produced this tunnel will be 1200 feet under the surface, enough stopping ground for years, as the lode is, in one place, 30 feet wide and often 10 feet up, and will probably be wider with depth.

This is one, and I have other locations that enable me to fit any pocketbook. All I ask is tenacity of purpose, and reasonable financial ability, and the world is ours! Persons desiring mining opportunity are invited to come and see me. Take the Patagonia-Alto road to the end.

JOSIAH BOND, Alto, Arizona.

A new machine will turn out cigarettes at the rate of 400 a minute.

RELIABLE USED CARS

It pays to go to the Buick Dealer

Two used cars may look much the same from the outside. Mileage, model, tires and general appearance may be all about alike.

Yet there may be a great deal of difference nevertheless—a difference in mechanical condition which will soon show up in actual driving.

You have only the word of the dealer to go by.

That's why it pays to go to the Buick dealer. You can rely on what he says. And you may be sure his price is fair.

PATAGONIA ICE & LIGHT PLANT

The Livestock Situation

Los Angeles, Nov. 15.—(Special to The Patagonian.)—On the eve of our winter livestock exhibitions where our flock and herd masters gather to exhibit their skill and science in breeding and preparation, we will see the result of many generations of effort in producing the last word in conformation and type. These conventions of breeders and breeders present a study well worth while. In fact, there's so much to learn about the flocks and herds assembled at the major stock show that the brief show period is hardly sufficient time to satisfy the real student.

Animal husbandry is recorded in early history as a noble art and a distinguished vocation. Clever, in addition to being a great orator, also aspired to be a husbandman. Naturally, the men who have attained the highest honors in their line feel—and justly, too—some degree of pride and like to have the public show an interest in their achievement.

We will find at these major shows sires and dams with a record of progeny almost back to the Ark, the animal having been carefully recorded and its pedigree preserved. The opportunity of exchange, commonly referred to as buying and selling, at the big show is the means of spreading out among the breeders and producers different blood lines and types so important in the maintenance and building up process; but the greatest satisfaction to the individual is in getting the purple ribbon, the highest honor that can be bestowed. These major shows represent the grand ensemble of livestock shown at the state and county fairs.

The winter shows are essentially livestock shows so that all interest centers in livestock. We all like to see good cattle, sheep and swine, but with many it is a passing event, and lots of people hesitate to comment or ask questions of the breeders and herdsmen, which is a mistaken viewpoint. So let's go to these shows and take an active interest in the work of the people whose own lives and their ancestors' have been devoted to improvement of our meat food supply, and to our dairy herds which mean so much to all of us.

We are a meat-eating nation and

should take an active interest in knowing more about the source of supply of a thing so important to the people as a whole. There are certain essentials in breeds that the breeders strive to reach—like constitution, type and progeny. Beef production calls for the greatest amount of the best quality of beef produced in the shortest time. That means a good constitution and the right conformation and good lines as a starting point, and these essentials can only be had by proper breeding so that the so-called pure-bred and even the well-bred, while costing more in the first place, is cheapest in the long run, because it is the quickest way to choice beef quality and the quality commands the best price for the reason that it more nearly meets the demands of the consumer for a satisfying and palatable diet with the least amount of waste.

That we cannot have successful agriculture without livestock has been recognized from the very beginning of agricultural effort. That meat food is essential to mankind was recognized by the two-by-two parade into the Ark as a heritage of civilization. How many of us really appreciate "how wholly on the Ark our victuals do depend"?

We need more of a livestock sentiment, if for no other reason than as an encouragement to agriculture because we depend upon the agriculturists for the things we eat and most of the things we wear and, finally, there is no substitute for a good piece of steak, mutton chops or ham and bacon.

ONCE A YEAR HE'S THE NATIONAL BIRD

UNDERWOOD'S ILLUSTRATION

By ELMO SCOTT WATSON
THE eagle may be the national bird of America for 364 days in the year, but there's one day when he isn't. That day is the last Thursday in November, and on that occasion the "king of birds" is temporarily dethroned and his place is taken by another, "Mortalis Americanus" is the name by which he is known to ornithologists, but the average American, who is interested in him for gastronomic rather than ornithological reasons, knows him simply as "the turkey." And on Thanksgiving day he is "King Turkey."

The turkey is a true "native American" and therefore it is appropriate that he should be one of the principal symbols of this typically American festival day. When the first whites arrived on this continent they found wild turkeys in great profusion. That he was one of the "first Americans" is proved by the fact that his bones in fossil deposits show that he is of prehistoric origin. The Indians had partially domesticated the turkey, and what appears to have been roosting places for domestic turkeys have been found attached to pueblos and cliff dwellings in excavated ruins of eight centuries of age.

The turkey's association with the Thanksgiving dinner dates from the very first celebration of that event. Of that first Thanksgiving day, held in 1621 in Plymouth, the land of the Pilgrims, Edward Winslow, who participated in the three-day celebration of thanksgiving proclaimed by Gov. William Bradford, wrote back to England as follows:

"Our harvest being gotten in, our Governor sent four men on foot, that so we might after a more special manner rejoice together, after we had gathered in the fruit of our labours; they were to one day killed as much fowl, as with a little help beside, served the company almost a week, at which time amongst other recreations, we exercised our Armes, many of the Indians coming amongst us, and amongst the rest their greatest King Massasoit, with some ninety men, whom for three days we entertained and feasted, and they went out and killed five Deere, which they brought to the Plantation and upon the Captaine (Standish) and others: There is no doubt that chief among the fowls at this feast was the native wild turkey. However, according to Mary Austin, writing in the New York Evening Post, "Our elevation of the turkey to the place of honor on the Thanksgiving dinner table is not entirely owing to its traditional importance to the first American Thanksgiving day; it is a tribute to the home-making instinct of the Puritan women who made the turkey brood a part of that association of men and their wild brethren which is inseparable from the human idea of home. The Indians domesticated the turkey chiefly for its feathers, which they prized. But I have no doubt that the English housewife, arriving chickenless, got her first feeling of being at home from the brooding cluck of the turkey hen about her door."

It is a curious paradox that this native American bird should come to our Thanksgiving tables bearing a foreign name which gives the erroneous suggestion that he came from the European-Asiatic country of Turkey. Yet such is the case and here is how it came about. The Spaniards, who conquered Mexico, found turkeys, both wild and domesticated, in that country as early as 1519. They began sending the strange birds from the New World back to Spain and the Jewish merchants, who were the leading dealers in such commodities at that time, called them "American Tukkis," meaning "American peacocks," from their habit of strutting. From "tukki" the word was corrupted to "turkey" and it became a common domesticated fowl in Europe.

It is probable that not one turkey in a thousand which grace the Thanksgiving table this year will be a native wild turkey. For the original New England wild turkey (Meleagris americana) is all but extinct in the part of the country where he first made his appearance on that festival board. The wild turkey of today (Meleagris gallopavo silvestris), according to ornithologists, is found in greatly reduced numbers only from Pennsylvania and Ohio south to the Gulf states and west to Arkansas. There is a smaller variety, the Florida wild turkey, in that state; in southern Texas is another, the Rio Grande turkey and in the Rocky Mountain region another, Merriam's turkey. All modern domesticated turkeys are derived from the Mexican wild turkey (Meleagris mexicana) of the earliest days. From him comes the exquisite pen-fowl of the modern domesticated bronze turkeys. Other varieties, bred up from "sports" of this wild progenitor are the Narragansett, the Buff, the Black, the Slate, the Bourbon Red and the White Holland.

But whatever the variety of the turkey we eat on Thanksgiving, the truth of the matter is that he is an immigrant, so far as ancestry is concerned. For he traces back to the Mexican turkey which was carried to Spain through other European countries and then came back across the water to a new home farther north. In the range of the allied but distinct wild species which the Pilgrin and Puritan fathers hunted through the woods of Plymouth and Massachusetts Bay colonies. So happens it is appropriate that a state which borders on Mexico, rather than a New England state, should now be the "turkey state of America." And that is what the state of Texas is. It produces one-tenth of all the turkeys raised in the 48 states of the Union. Down in the "Heart of Texas" district, comprising 17 counties, the farmers have found that it is more profitable to raise turkeys than it is to raise hogs. So they have gone into the turkey business on a large and co-operative scale. One year they shipped 200 cars of dressed turkeys—4,000,000 pounds of dressed stuff—and wishbones and gizzards et al. These are shipped all over the United States and it is a curious

The Sacred Pumpkin

"The pumpkin, or pompon," we read in Peters' "General History of Connecticut," published in 1781, "is one of the greatest blessings, and held sacred in New England. Of its ment are made beer, bread, custards, sauce, molasses, vinegar and, on Thanksgiving days, pies, as a substitute for what the blue laws brand as anti-Christian minced pies.

The same author explains why New

Englanders were called pumpkin heads. As every male was required to have his hair cut round by a cup, "when cups were not to be had, they substituted the hard shell of a pumpkin, which, being put on the head every Saturday, the hair is cut by the shell all around the head."—Glas Logie.

Thanksgiving in Canada

The people of lower Canada began observing days of thanksgiving as early as 1793. After the Dominion of Canada was formed in 1867 it was customary to have at least one day of thanksgiving every year, although there were some irregularities in that respect. Usually Thanksgiving day in Canada was on a Thursday in October or November. Since 1921, however, Thanksgiving day is set by parliamentary statute for the Monday of the week containing Armistice day, November 11.—The Pathfinder.

Some nets are quicker than thought.

BIGGEST THRILL IN A GRID GAME

Yale Player Blocks Drop-Kick Attempt by Harvard.

George C. Moseley, Yale football end in 1915-16, had a thrilling experience in his football career. Among other things he views with amused interest is his record of never having played a Harvard team and lost, writes Fred A. Hayner in the Chicago Daily News. Both at Hill school and as a Yale freshman his teams won from the Crimson yearlings. The year Harvard beat Yale 42 to 0 in 1915 Moseley was laid up in the Princeton game and did not get into the later Yale-Harvard mixup. He was a back in 1916 and helped beat Harvard 6 to 3. He was made an all-American end in 1916.

"Possibly my biggest thrill came in a Princeton game which we won," he said.

"In the 1916 Princeton-Yale game my team punted. There were about six Princeton men waiting for the ball to drop on about the 15-yard line. It fell and bounced high. As there was no one else jumping for it I decided to do so and took the ball to the 10-yard line. After three plays we drop-kicked a goal for three points.

"Princeton later took the ball to our 15-yard line, where they paused. I sensed a drop kick try and asked my tackle to play wide, as I was going in. As the ball was passed I shot straight in and jumped on the halfback's back. I jumped from him directly into the path of the kicked ball and it hit me fairly in the stomach and knocked me cold. It prevented their scoring and we later scored a touchdown and won 10 to 0.

"I was not taker, from the game, but played it out. In those days the coaches tried to select eleven or twelve men who could play the entire game."

Bob Meusel Has Been Dubbed "Slow and Lazy"

One of the greatest money players in the game, despite his aversion to wasting physical effort where he deems it will do no good, earned the sobriquet "Slow and Lazy" for not running out a bounder which Heinie Groh subsequently dribbled across the diamond in the 1922 series. To make it worse, Aaron Ward crossed Lanky Bob by following with a home run, which, w. Meusel's run, would have tied the score and perhaps enabled the Yankees to escape with two ties and four defeats rather than just one tie.

With Hoyt, Ruth and Huggins, Bob is a survivor of the first Yankee championship club of 1921. He bats with his right and throws the same way—throws from town to town.

Baseball School Will Open at Los Angeles

Baseball has taken its place among the fine arts in academic science. A school, whose faculty will be composed of men who have won more or less fame in the realm of baseball, past and present, has been organized at Los Angeles for the purpose of instructing young players in the national pastime. Rookies of the diamond will come under the personal supervision of such men as Frank (Top) Dillon, Jess O'Rourke and Johnnie Bassler.

The course will run for three months, December to March, and negotiations are being completed for use of Wrigley field as the training site.

Rice Puts Grid Hope in Three Old Iliini Stars

The football wagon of Rice Institute is hitched to three stars of the Illinois constellation.

Claude Rothgeb, head coach at Rice, was an outstanding Iliini athlete a quarter of a century ago.

"Pug" Doughtery, Rothgeb's assistant, was at Iliini in the era of "Red" Grange. It was "Pug's" interference that enabled the famous teen-ager to deliver touchdowns.

"Peanuts" Schulz, now mentor of freshmen at Rice, was a member of the Illinois team that won the Western conference football championship last fall.

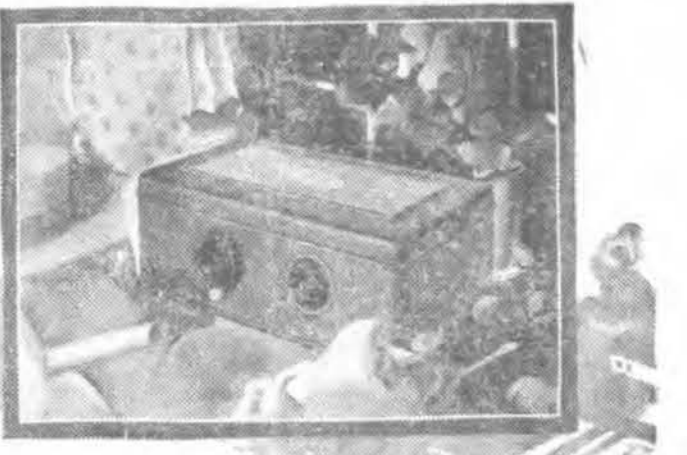

Honor Paul Prehn

Paul Prehn, head of the Illinois state athletic commission, was elected unanimously to the presidency of the National Boxing association in session at Toronto.

ATWATER KENT RADIO

MODEL 40 ELECTRIC, \$77
 The 110-120 volt, 50-60 cycle alternating current. Requires six A. C. tubes and one rectifying tube, \$77 (without tubes). Also Model 42 with automatic voltage regulator, \$10, and Model 44, an extra-powerful "distance" set, \$106 (without tubes).
 For direct current, Model 41, \$87 (without tubes).

What a comfort to know your radio is faithful ...

MARY, turn on the radio and see what the weather man says. Then let's see if there isn't a good male quartette somewhere, or a brass band—
 What a satisfaction it is to know your radio will do its duty. Good, reliable Atwater Kent Radio! What a host of friends its dependability has made! "You can always count on an Atwater Kent"—wherever radio is known, that's what they say.

This quality of steadfastness is built in, and doubly assured by 222 factory tests or inspections. Hence the common remark, "If Atwater Kent makes it, it's right."

From the house current
 The 1929 Atwater Kent all-electric set is powered wholly from the house lighting circuit. You snap a switch to turn the current on and off, just as you do with an electric light. Always ready to operate. Current costs only a fraction of a cent an hour.

—or from batteries
 The 1929 battery set also has clear tone, selectivity, great range and plenty of volume, plus beauty and compactness.

—at a money-saving price
 You cannot buy the all-round satisfaction that Atwater Kent Radio gives, for less than the figures quoted here. You can pay a great deal more without getting more.

On the air—every Sunday night—Atwater Kent Radio Hour—listen in! Prices slightly higher west of the Rockies.
ATWATER KENT MANUFACTURING CO.
 4764 Wissachickon Ave., Atwater Kent, Pa. Philadelphia, Pa.

Some Revised Opinion About the Red-Haired

Scientists have discovered all kinds of odd facts about humanity.

For instance, an expert recently stated that he had never seen a bald-headed lunatic!

Now comes the even more peculiar disclosure that red-headed girls may be low-legged, but brunettes are, as a rule, knock-kneed. These facts are based on data supplied by a certain artist's club which has been collecting statistics respecting its models.

Another interesting point is that red-haired women suffer less from serious diseases than their darker sisters. This is due to the fact that their skin throws off poison more rapidly than a dark person's.

Also, red hair, which a generation ago was looked at, nowadays is admired, as it should be. The red-headed girl has proved that she is not hot-tempered, but, as a rule, much better balanced mentally than a brunette.

—Exchange.

A Treat in Store.

Clare Sheridan, the sculptor of half-American and half-English blood, is coming back to lecture again. She said the other day to London correspondent:

"My other American lectures failed because they were too heavy. My new lectures will be light and airy—full of epigrams, you know. My lecture on love, for example, will begin:

"Love-making consists in a man running after you till you land him."—Rehabilitated Sunday Herald.

Vanquished Hopes.

Mother—Junior, do you know where the new candy shop is on Main street? Junior (expectantly)—Yes! Mother—Well, I want you to go into the grocery next door and get me a pound of onions.

Denver Boy is a Winner

Every mother realizes how important it is to teach children good habits of conduct but many of them fail to realize the importance of teaching their children good bowel habits until the poison from decaying waste held too long in the system have begun to affect the child's health.

Watch your child and at the first sign of constipation, give him a Little California Fly Syrup. Children love its rich, fruity taste and it quickly drives away those distressing ailments, such as headaches, bad breath, coated tongue, biliousness, feverishness, fretfulness, etc. It gives them a hearty appetite, regulates their stomach and bowels and gives tone and strength to these organs so they continue to act normally, of their own accord. For over fifty years, leading physicians have prescribed it for bilious, bilious, constipated children. More than 4 million bottles used a year shows how mothers depend on it.

Mrs. C. G. Wilcox, 2827 1/2 Wolf St., Denver, Colorado, says: "My son, Jackie, is a prize winner for health, now but we had a lot of trouble with him before we found his trouble was constipation and began giving him California Fly Syrup. It fixed him up quick, gave him a good appetite, made him sleep tight and he's been gaining in weight right along since the first few days, taking it."

To avoid inferior imitations of California Fly Syrup, always look for the word "California" on the carton.

Chief Mourner.
 "Mrs. Smith seems to have got over the death of her first husband."
 "Yes, but her second husband hasn't."—London Trib.

Numismatic Treasure.
 A pot of gold was found near Saint Malo, France, the other day in demolishing a building used as a hiding place by the Templars when Philippe le Bel sought to confiscate the wealth of the order. Most of the gold, worth a fortune to numismatists, bore the effigy of King Louis X.

MEDITERRANEAN Cruise
 \$500 up ss "Transylvania" sailing Jan. 30
 Clark's 25th cruise, 66 days, including Madeira, Canary Islands, Casablanca, Rabat, Capri of Morocco, Spain, Algeria, Malta, Athens, Constantinople, 25 days Palestine and Egypt, Italy, Riviera, Cherbourg, France, includes hotels, guides, motors, etc.
FRANK C. CLARK, Times Bldg., N.Y.

Sleep Bullets for Beasts.
 Bullets carrying sleeping poisons have been invented by Captain Harris, director of the Harris zoological expedition to South Africa. The use of the bullet carries a hypodermic needle, which on impact discharges a powerful drug. The animal is unconscious in a hour.

Jazz Has a Place.

Nothing has done so much good for music in its way, says an authority on music in the Woman's Home Companion, as good jazz because it has stirred up a rhythmic vitality and removed a cloying sentimentality which threatened to enshroud music at the end of the last century.

Optimism is the philosophy with which we regard ourselves.

LAUNDRESS BENEFITED

By Taking Lydia E. Pinkham's Vegetable Compound

Nashville, Tenn.—"I cannot say too much in favor of the medicine. I was in a run-down condition. I worked in a laundry but my health got so bad that I had to give up work. I took a bottle of Lydia E. Pinkham's Vegetable Compound and began taking it every time I feel run-down I get another bottle. It is an excellent tonic and I am willing to tell others about it. People take me to be much younger than I am."—Mrs. HARRY ROUSSEAU, 406 Second Ave. South, Nashville, Tennessee.

BILIOUSNESS RELIEVED

Carter's Little Liver Pills
 Purely Vegetable Laxative
 move the bowels free from bile and unpleasant after-dinner effects. They relieve the system of constipation which many times cause a sour and acid condition in the system. Remember they are a doctor's prescription and can be given with absolute confidence to anybody. All Druggists 25c and 75c Packages.

Bad Legs

Do Your Feet Swell and Inflamm and Get So Red You Can Hardly Walk? Have You Varicose or Swollen Veins?
 To stop the misery, pain or soreness, help reduce the dangerous swollen veins and strengthen the legs, use Moore's Emerald Oil. This clear, powerful penetrating yet safe antiseptic healing oil is simply wonderful for Ulcers, Old Sores and Broken Veins.

THE STORY

From his French-Canadian mother, Norman Erickson inherits a distaste for life on the water...

CHAPTER IV—Continued

He jerked down a tarpaulin and slammed it on the floor. Fire? Sure, he could beat fire! It wasn't wind...

Bay since Jim Nelson's advice to wait a little longer before coming back. He had written again, a short embarrassed letter to old Gustaf...

It had been two months... oh, longer than that, he was ashamed to figure how long... It had been nearly three months since he visited the Ribaud farm...

The Ribauds all were busy on the farm. Julie, when she saw him approach, put down the box of cherries...

She pointed down the valley, and Norman, following her gesture, saw an unpainted house and barn. Baker had told her father about the lighthouse...

Julie raised her chin. Her glowing black eyes almost met his blue ones. "I don't believe I would care for the lighthouse business," she answered...

Julie turned, and her plink face relaxed. She had been waiting for that. "Yes," she answered. "He is very angry at you, Norman. I had seen him once before since you went away. He was angry then because you did not go out in the storm with him."

He was undecided where to go. He wanted to see his father. And he wanted to talk with Julie Ribaud. He had had no word from Madrid

at that. He screamed so loud all Madrid Bay listened. He told me Eddie Baker says it was over a girl...

It is only a sheep, I get very angry with it. Sometimes, Norman... "Sometimes what?" "You are like a sheep, Julie said gravely..."

Norman nodded without a word. He was appalled by its threat. Always before a storm it seemed wailing, ready for drownings.

CHAPTER V

The Captain's Dog Norman walked rapidly the last mile of beach. The black cloud that had been visible only from the hilltop...

The Chinese claim that silk weaving was practiced in China by 2500 B. C. and the art of weaving was certainly known to the Egyptians at a still earlier period...

Stolen Goods

Bobby, aged five, had just come home from the hospital and his aunt bought him a small tinker toy. While Bobby was playing with it his aunt remarked to another aunt that it had cost so much for such a small toy...

Norman sat beside her good-naturedly. This was the second time today a girl had ordered him around, and he rather suspected that Sue Stocking didn't care a broken fishhook whether he obeyed her or not.

Norman assented without spirit. Strange where all his enthusiasm of the morning had gone. The keeper's cheeks shone bright red with excitement...

Norman looked out across the water. He was appalled by its threat. Always before a storm it seemed wailing, ready for drownings.

Norman walked rapidly the last mile of beach. The black cloud that had been visible only from the hilltop before now loomed over the lake, puffing out its dark cheeks, threatening.

Far up the beach, half-way to the fight, he saw Sue Stocking coming toward him. She was walking briskly, swinging her arms as if she enjoyed it, in a short duck skirt and a sailor's middie, with her hair blowing like a small boy's in the wind.

Loom Has Played Big Part in Civilization

The Chinese claim that silk weaving was practiced in China by 2500 B. C. and the art of weaving was certainly known to the Egyptians at a still earlier period...

Toad Burt as Witch

I have always liked the country people in America so much that it gives me a shock to read a truly dreadful occurrence in that land, says a London Daily Chronicle contributor...

Early Sewing Machine

It is probable that the sewing machine was introduced into England by Thomas Saint, who made such a machine and had it patented on July 17, 1790.

When he leaped from a moving train in an effort to elude an officer returning him to Phoenix on a counter-felting charge, Ruben Dineda, of Oakland, was killed instantly twenty miles north of Yuma.

Three hundred agricultural experts, representing federal, state and county farm and economic agencies, gathered in Phoenix for the sessions of the Salt River Valley Economic Survey conference, the first of its kind ever held in Arizona.

Establishment of the permanent campsite of the Arizona National Guard at Fort Huachuca will involve the expenditure of approximately \$100,000, Adl. Gen. Charles W. Harris announced in Phoenix.

Hunting in the Kaibab forest this season was successful, Arizona State Game Warden D. E. Pettit declared upon his return to Phoenix from a visit to the forest.

Because "competitive athletic games, from every standpoint, may properly be included in a public school curriculum," the Supreme Court of Arizona has held that statutory authority given a school district to issue bonds for new school houses includes authority to lease them for the erection of an athletic stadium...

PAUL'S EXPERIENCES IN JERUSALEM. Lesson for November 18. LESSON TEXT—Acts 21:18-25:22. GOLDEN TEXT—Be strong in the Lord and in the power of His might.

WEEKLY South-West NEWS ITEMS

Upon Paul's arrival at Jerusalem representatives of the church there gave him a most cordial reception. In order that the brethren in Jerusalem might graciously receive him, it was proposed to him by the elders that he take a Jewish vow to prove that he was in no way opposed to the law.

Paul's chief concern was not his own safety. He used this last opportunity of witnessing for Christ. His first claim for a hearing (vv. 1-3). His birth (v. 3). He was Jew-born in Tarsus, a city of no mean reputation.

Paul's earnest look at the council (vv. 1, 2). This was a solicitation of their honor to give him a fair hearing, and also a look of serious integrity and unflinching courage.

Seeing that he could not get a fair hearing, and perceiving that the body before him was made up of Pharisees and Sadducees, he appealed to the Pharisees for his preaching and something in common with their belief.

The world is in a sick condition today because the Bible says: "In the beginning, God" and the word is saying: "At the last, God—A. W. Tozer."

NEWS REVIEW OF CURRENT EVENTS

Implications and Incidents of the Great Victory of Hoover Over Smith.

By EDWARD W. PICKARD

OVERWHELMING victory for the Republican party in the national election is old stuff by this time, but some of the surprising, not to say startling, features of that victory will remain fruitful topics for conversation for a long while. To say that Hoover captured forty states with 444 electoral votes, while Smith carried only eight states with 87 electoral votes, tells only the record-breaking triumph of Hoover. On the other hand Smith received a total popular vote in excess of that given any successful candidate for the Presidency in former elections. This is accounted for by the tremendous total vote brought out by the unprecedented interest in the election and by the fact that Smith materially reduced the normal Republican majorities in many states though he could not win those states. Despite this, the Democrats as a party had little of which to boast, for Hoover smashed the solid South by winning Texas, Virginia, North Carolina and Florida, while Smith carried only two Northern states—Massachusetts and Rhode Island, in both of which there is a huge foreign-born and Catholic population. The case of Virginia is interesting. The Democrats of that state never forgave Tammany for knifing the Davis-Roosevelt ticket in 1924, and this year they quietly went out to get revenge.

Smith was supposed by the wisecracks to be the popular candidate of the "urban" Americans, yet Hoover carried eight of the country's fourteen largest cities, including Chicago. The farmers of the Middle West were alleged by various prophets to be in revolt against the Republican party and led to Smith by the bolting of Senator Norris and others. But Hoover carried every state in that region without difficulty.

The prohibition and religion issues, the former declared bunk by Charles Evans Hughes and the latter ostensibly disowned by both parties, cut both ways, as was long ago predicted, but each candidate profited by one or other of these issues in certain states. It does appear to be demonstrated that the American people do not wish, at this time, to have a President who is wet and a Catholic. Sober analysis of the vote shows, above all, that Americans realize they are the most prosperous nation on the globe and believe the continuance of their prosperity is best assured by continuance of Republican rule. That prohibition as a national issue must now disappear is the view of many. Others see the prospect of a new alignment of the electorate, wet and dry, in the not far distant future since the vital differences between the Republican and Democratic parties are fast fading into nothingness.

Republican control of the next congress is assured. The party gained seven seats in the senate and made a net gain of 28 seats in the lower house. Unofficial returns give this as the complexion of the two houses:

Senate—Republicans, 56 (including vacant Vane seat in Pennsylvania); Democrats, 39; Farmer-Labor, 1. Republican majority, 16.

House—Republicans, 265; Democrats, 168; Farmer-Labor, 2. Republican majority, 95.

Many states elected governors last week, and often the result was not in accord with the state's vote on the Presidency. An outstanding instance of this was the victory of Franklin Roosevelt, who carried New York with ease though Al Smith lost it to Hoover by nearly 100,000 votes.

HERBERT HOOVER was amazed by the magnitude of his victory but displayed no unseemly exultation. In a statement to the press he said he felt there had been imposed on him a sense of solemn responsibility of the future and of complete depend-

ence upon divine guidance for the task which the greatest electoral office in the world imposes. "That task is to give the best within me to interpret the common sense and the ideals of the American people," said Hoover. "I can only succeed in my part by the co-operation and unity of spirit of the leaders of opinion and of action, for the common service of our country."

While the President-elect has decided upon no details of specific plans for the future, he has stated emphatically that his induction into office will be attended by a simplicity equal to that of any inauguration that has been held. He expects to remain in California for several weeks and to spend the Christmas holidays in Washington.

Speculation now turns on the make-up of Hoover's cabinet. He has told the public nothing about this yet, but it is believed Mellon will continue as secretary of the treasury if he so desires. Secretary of State Kellogg is said to wish to retire and Ambassador Dwight Morrow is most frequently mentioned for that portfolio, though some believe it may be offered to Senator Borah.

Gov. Al Smith took defeat with a smile and promptly wired his congratulations to Mr. Hoover, receiving an appreciative message in reply. The governor told the reporters that he was all through with running for public office but is undecided as to his future business or professional activities. The New York Herald Tribune said he was to be offered the chairmanship of the board of directors of a new \$55,000,000 Wall street bank when he retires from the governorship on January 1.

VOTERS of Arkansas had something else to decide on besides candidates for office. The so-called "ape law" was on the ballot for acceptance or disapproval, and unofficial returns show that it was accepted by a considerable majority. Thus the fundamentalists score another victory, for the law makes illegal the teaching of the theory of evolution in schools supported by public taxes. The act will affect textbooks now in use in the various high schools as well as in the state colleges and the university. It will cause revision of the university textbooks in biology, geology, zoology, psychology, and possibly English.

CABINET crises occurred in several countries last week. In France Premier Poincare and his ministry resigned when the Radical Socialist party adopted a resolution condemning his finance bill and especially its religious articles which provide for the return of Roman Catholic monastic orders in France. Financial circles were dismayed and confusion reigned in parliament. Poincare resisted the demand that he form another ministry, and it was considered probable that, if he persisted, Foreign Minister Briand would be made premier. Vintila Bratiano, premier of Rumania, and his cabinet, were forced out at the demand of the regency council, which insisted that the National Peasant party should participate freely in the celebrations of Rumania's annexation of Transylvania. Julia Maniu, the famous peasant leader, was believed the natural successor to Bratiano and the peasants of the country prepared to become its real rulers, but complications that are difficult of explanation prevented this consummation for the present. The South African government of Premier Hertzog resigned to get rid of one member and a new ministry was at once formed by Hertzog. In Portugal the cabinet gave up office and its president, Col. Vincto Freitas, formed a new government.

KING GEORGE in his address opening parliament expressed his great satisfaction with the signing of the Kellogg pact to renounce war. In opening the debate on the address Ramsay MacDonald, Labor party leader, strongly criticized the government's action with regard to the now discredited Anglo-French naval compromise, charging it with hampering the activities of the League of Nations and putting obstacles in the way of disarmament. Next day this attack was resumed by others and

drawn from Lord Cushendun, acting foreign secretary, a vigorous defense of the compromise.

TIRRAL, the confessed assassin of President-elect Obregon of Mexico, was sentenced to death by a firing squad. Mother Maria Concepcion, the nun accused of being the "intellectual author" of the crime, was sentenced to 20 years in prison. The verdicts were appealed.

UNDER the supervision of an American commission headed by General McCoy, the election in Nicaragua passed off quietly and Gen. Jose Maria Moncada, Liberal, was chosen President, defeating Adolfo Benard, Conservative, by about 20,000 votes. The polls were guarded by American marines and bluejackets commanded by Gen. Logan Feland and there was no serious disorder anywhere. Each voter was required to dip his finger in a chemical stain as he cast his ballot, to prevent repeating, and in submitting to this regulation President Diaz, other high officials and the two candidates led the way.

M. T. EFNA is in violent eruption again, and while it is furnishing a magnificent spectacle for tourists to Sicily, it is bringing destruction and terror to the inhabitants of cities and villages on the slopes of the volcano. Before the end of the week two or three towns had been almost completely wiped out by the rivers of molten lava flowing from the crater and the entire zone was isolated from the outside world. Volcanologists said this eruption was likely to be long continued.

HIROHITO, the 124th emperor of Japan, in an unbroken lineage older than that of any other reigning family, was formally enthroned on November 10 in Kyoto, the ancient capital of the island empire. His progress from Tokyo to Kyoto, consuming several days, and the ceremonies of enthronement were accomplished with solemn rites so ancient that no one knows what they originally meant, and all the festivals were picturesque in the extreme. The emperor and his empress and all the dignitaries connected with the affair were attired in the old traditional costumes. Thousands of Japanese and a great throng of foreigners gathered in Kyoto to see all they could of the ceremonies and to shout "Banza!" as Hirohito mounted the throne of his ancestors.

AN ALLEGED embezzlement of \$25,000 of the funds of the Loyal Order of Moose school at Mooseheart, Ill., was disclosed when warrants were issued for the arrest of Hugo Doebler, controller of the school, and Harold Cook, his assistant. E. N. Roselle, superintendent, said an audit of the books might raise the amount charged in the warrants to \$100,000. Cook was arrested but Doebler is in Germany visiting his wife. The school is the national children's home of the Order of Moose, and those who know of the excellent work done there will be sorry to learn of its financial loss.

DR. FRANK CRANE, one of the best-known "inspirational" writers of the United States and formerly a prominent pastor in Chicago, died in Nice, Italy, of cerebral hemorrhage. With Mrs. Crane and a party of friends he was on a tour of the world. Doctor Crane's syndicated writings reached an estimated audience of 5,000,000. He was also editor of Current Opinion and the author of a number of books. Another author who died last week was Eliza Scidmore, who gained fame by her books on the Far East.

TRAGIC death overtook Capt. C. B. Collyer, pilot, and Harry Tucker, passenger-owner of the monoplane "Yankee Doodle" in which they had made two record-breaking flights across the continent. While en route from Los Angeles to New York the aviators were caught in a rain and fog in the Bradshaw mountains of Arizona and struck the wall of Crook canyon 23 miles south of Prescott. The heavy load of gasoline apparently exploded with the impact and the plane was blown to bits.

Makes Life Sweeter

Next time a coated tongue, field breath, or avid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect antidote that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort. Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips' Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product, "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

PHILLIPS Milk of Magnesia

Gulls Liked Strawberries. Strange picnic guests were entertained at a clambake on the shore at Belfast, Maine, when a flock of seagulls, after circling about, swooped down and made an attack on a plate of strawberry tarts, although they left the apple tarts on the plate. Only one of the birds succeeded in getting away with one of the tidbits of dessert, and he was followed for some distance by the others trying to get a bite.

Falling. "Money talks." "Feetly just now, my boy, feetly." Louisville Courier-Journal.

Letters "Relayed" in Early Colonial Days

In the English colonies in America before 1830 such postal facilities as existed were supplied by private enterprise. In 1632 the General court of Massachusetts took the first step toward the establishment of a government postal system. In Virginia each planter was required to convey the dispatches, as they arrived, to the next plantation, and so on. In 1672 the government of New York established a monthly mail to Boston, and this practice was followed in other colonies. Benjamin Franklin was identified with the early interests of the colonial post office. In 1737 he was appointed postmaster of Philadelphia. In 1753 the delivery of letters by penny post was begun. In 1775 the colonies combined to establish their own post office and to pay the necessary officials. The Continental congress appointed a committee to devise a postal system, which went into effect July 26, 1775. Benjamin Franklin was unanimously appointed postmaster general.

The Whimsical Max. Paul Jones of the family of the University of Pennsylvania, said on his recent return from Europe: "I had a great admiration for Max Beerbohm, and in August I visited him in his villa at Rapallo on the Italian Riviera."

"I had visited him before, and had told him a story about James Joyce; but I forgot this on my second visit, and retold the Joyce story."

"The whimsical Max, when I finished, said: "That's a good story, but, really, if you tell it to me again I shall have to tell it to you."

Treasure for America?

California may soon gain the altar from the famous Stoke Poges church. It was in the churchyard of this church that Gray wrote his "Elegy in a Country Churchyard." If the suggestion now before the local church council receives the final approval of the chancellor of the diocese, the altar will soon cross the Atlantic to adorn the "Church of the Little Flowers," near Los Angeles.

Trials of the Tubers.

"Can you imagine anything worse than being a constipated and having your ears pulled by farmers?" "How about being a potato with your eyes full of dirt?"—Montreal Star.

It is always safe to give a Bayer tablet; there is not the slightest harm in genuine Aspirin. You have the doctor's assurance that it doesn't affect the heart. And you probably know from experience that Bayer Aspirin does banish all sorts of pain in short order. Instant relief for headaches; neuralgia, neuritis. Rheumatism, too. Nothing like it for breaking up a cold. At all druggists, with proven directions enclosed.

Protect their Tender Skins and Silky Hair with Cuticura. TEACH your children the Cuticura habit so that they may have clear skin and lovely hair through life. The daily use of Cuticura Soap, assisted by Cuticura Ointment, keeps the skin and scalp clean and healthy. Soap 25c. Ointment 25c. 80c. Tablets 35c. Sold everywhere. Sample each free. Address: "Cuticura," Dept. B5, Malden, Mass. Cuticura Tablets is Soothing and Cooling.

Insets Add to Frock

By JULIA BOTTOMLEY

The vogue for modernistic design, which is everywhere stressed these days, of offering to the world an entirely new and refreshing channel of expression. Not only is this trend toward a startling new order of things reflected in our home furnishings, in the pictures which artists paint, and, in fact, through decorative art, that dressmaker and couturier have taken up the theme with utmost enthusiasm. Not only through print and weave is this modernistic note being sounded, but stylists by combining contrasting materials and colors through most ingenious seamwork are incorporating into dress designs the curious squares, triangles, panels and such which are so indicative of the modern decorative trend. A charming exponent of the costume which features a modernistic styling is shown in the picture. This stunning street frock suggests a ten-fifties version of the coat-dress, which fashion so emphatically sponsors for street wear this season. It is developed in navy and marine-blue worsted. The lighter material is inset by means of skillful seaming, producing a notably modernistic effect. So many of the new woollens are

treated in this way—sewed together as insets or in some instances one material applied on another. Especially is this method adopted in the handling of jersey and the now-so-popular suede-finished cloths. Then, too, frequently strips of material in various monotone shades are seamed together forming most attractive borderings for both silk and woolen frocks, blouses and even coats.

The inset idea is also cleverly adopted by milliners who sew bits of felt together or patches of velvet contrasted in coloring, accomplishing most intriguing design. Felt especially yields to inset treatments, suggesting the effectiveness of mosaic art in that the pieces are so ingeniously fitted together. Matching handbags often complement such hats.

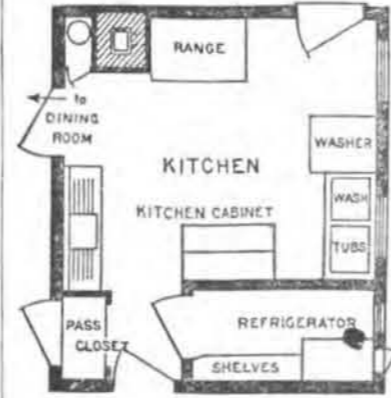

The fact that the smartly-styled street dress in the picture has a cape is significant, for capes are very important in the present mode. It adds to the wearableness of this frock that the cape is detachable. In its ensemble as pictured this costume is eminently tuned to the milder autumn days. With the cape removed it makes an admirable afternoon frock, worn under one's handsomely furled cloth coat or the all-fur wrap as the case may be.

KITCHEN USEFUL ALSO AS LAUNDRY

(Prepared by the United States Department of Agriculture.)

The kitchen is preferably the place for preparing, cooking and serving foods and for clearing away after these processes. No housekeeper wants laundry work done in the kitchen if she can avoid it, but in numerous instances she has no choice. In bungalows and other small houses, or in apartments, where the floor space is very limited, laundry tubs are often put as close as possible to the water

Plan Showing Laundry Tubs Placed in Kitchen.

supply and the stove. In many farm and out-of-town homes there is no suitable basement or other location for the laundry.

It becomes necessary to make the best of the situation in such cases. While the steamy odors of wasteful

cannot always be escaped, it is possible to see that the laundry equipment is placed so that it interferes very little with the work centers for the preparation and serving of food. It may even serve as an added convenience if the stationary tub is placed under a hinged drainboard of the sink or if the cover of one or two such tubs can be used as a work table. An ironing board can be made to fold into a wall cabinet which also holds irons and needed supplies. The cabinet for the ironing board can sometimes be put in the dining alcove.

The chief points in arranging a laundry center in a compact kitchen, says the bureau of home economics of the United States Department of Agriculture, are: To keep the equipment out of the way of the main line of travel used in doing the daily work; to insure to it good light and ventilation, and yet have it near the stove if irons or water must be heated; and to have working surfaces of the right height for the worker. The floor plan shows one way of arranging a double-duty kitchen of this kind which retains the good features of any kitchen, such as the pass closet, the double drainboard, and the correct paths from left to right for the various work centers located around the room.

For Gilt Frames

Clean gilt frames by covering with a cream of whiting and alcohol after wiping and brushing away all possible dust.

Fairy Tale for the Children

By Mary Graham Bonner

The fairies all came to the place where it was planned the big party was to take place.

All around the trees were sparkling with color and light, and Mr. Sun shone through with might and main to make the scene as beautiful as could be.

Along by the trees ran a little brook and it gurgled and laughed as it saw the fairies arrive and knew the afternoon was to be a merry one.

Back of all were the tall, dark pines. They looked so stately and dignified. And very proud they were that they

They wore costumes of different colors, too—and all like the trees.

But their costumes looked as if they might shake off with the wind. Underneath they seemed to have something very white and soft and furry.

Every fairy seemed to want to look like the autumn day—although no one knew of the other's plans.

But somehow it was whispered about that the Fairy Queen's magic wand had made them think in this way of their costumes.

They danced and they played, and the leaves waved in the wind and danced too.

Even the pine trees whispered softly. "We're dancing, too. Do you see us?"

Mr. Sun looked up at them and said,

"Ah, yes, you're dancing, too. And you will be dancing when the cold, cold winter days come and the little leaves have all gone."

The sun, of course, danced in and out among the trees, and at last he grew quite tired.

"I must be going to bed," he said. "Good-night, all. And good-night to the leaves. When spring time comes I'll help you out again, I promise."

All Around the Trees Were Sparkling.

added to the beauty of the autumn afternoon too.

In one spot was a large pile of big sticks of wood. For they were going to have a bonfire as soon as the sun went to bed.

Every fairy was in a different costume and they were of all the colors of the trees.

Some were in red, some in crimson, some in brown, and others in dark green.

But every fairy's costume was made differently, just as no two leaves are exactly alike.

The leaves of the trees waved about singing how happy they were. And then Yhab and her orchestra came.

MEAT THERMOMETER IS NECESSARY

Meat Thermometer inserted in Thickest Part of Roast.

(Prepared by the United States Department of Agriculture.)

No longer is it necessary to guess whether the roast beef is rare, but done enough to suit every taste; juicy and pink in the center while crisply browned outside. The bureau of home economics says that if the housewife will provide herself with a meat thermometer, which is made to put into the thick part of the roast while it is cooking, she can get uniform results every time. When the meat thermometer reads between 130 and 150 degrees Fahrenheit her roast will be "rare." She has a range of temperature because "rare" means a slightly different degree to different people, and because different pieces of meat look more or less pink when cooked to the same temperature. Again, "medium-done" may be right for her family somewhere between 150 and 170 degrees Fahrenheit. The preference for a "well-done" roast can be satisfied when the thermometer says about 180 degrees Fahrenheit. The meat will rise in temperature a little

after it is out of the oven, and this should be allowed for if it is to stand before carving. Once the point at which the meat is exactly right has been established, it can be cooked to the same degree every time.

After wiping off a standing rib roast of beef with a damp cloth, it is sprinkled with salt, and then lightly with flour. It is placed in an open pan without water, fat side up. As the fat melts and cooks it bastes the meat. The thermometer is best inserted in the thickest part of the roast so that the bulb reaches the center. Sear the meat for 20 to 30 minutes in a hot oven (500 to 525 degrees Fahrenheit) until lightly browned, then reduce the temperature to about 350 degrees Fahrenheit and continue cooking to the desired stage of doneness. A three-rib roast will probably require 15 minutes to the point to be rare, 15 minutes to the point to be medium, and 20 to 22 minutes to the point to be well done when cooked at the oven temperatures given.

Mary Had a Latch Key

By JANE OSBORN

OLD FOLKS SAY DR. CALDWELL WAS RIGHT

THERE was an attractive sort of intelligence about Mary that on ordinary occasions kept her from being especially talkative. But on occasions she was voluble, not to say actually eloquent. This was one of the occasions.

"Well if you don't give me a latch key I shall realize that you are not at all the colliedowned parents I had thought you were," she told her father and mother as she stood before them in the living room.

Mr. Stevens interrupted with a weary sigh. "Oh, give her the key," he said to his wife. "She's crazy—she's crazy—we're crazy to give it to her—but I can't stand her nagging."

And having received the coveted key Mary kissed her parents very sweetly, and explained that the reason she especially wanted the key was because she was going to be escorted to the club dance that evening by Frank Ormsby, a young man as she thought of much importance. "He's Miss Sally Ormsby's nephew and he's visiting her and he's been perfectly adorable to me, and he'll bring me home after the dance and if he thought I didn't have a latch key he'd just think I was a little country simpleton, I suppose."

Her parents were slumbering in their room at the back of the house when at about one o'clock Frank Ormsby's car rolled up. He had been telling Mary that he thought she was the cleverest girl he had ever met and was just wondering whether he dared tell her that he had also considered her the prettiest.

"Of course you'll come in for a while," she said. "We'll just slip in without disturbing anyone, I thought perhaps I'd make some coffee or something."

"You don't mean to say you have your own latch key?" said Frank Ormsby—then he whistled and afterward he laughed. "I'd awfully well like to come in," he said, "and I wish I had known—but you see I'm not so privileged as you are. Aunt Sally sits up for me and I told her I'd be home at one—and I just can't keep her sitting up. Let me come tomorrow, any time—please—why, Mary?"

For Mary had jerked herself away from him and had run up the path to the house. He hurried to her and tried to take the key from her hand. "You can just hurry home," she said. "I'm jolly well able to let myself in, thank you. Good night, Mr. Ormsby. I said—good night."

And Frank feeling as if the stars had suddenly fallen from the sky retreated down the path into his car and started slowly down the road while Mary was fumbling with the key. Looking back he saw her still fumbling, then he turned the car around and drove slowly back.

"The darn thing won't work," said the dejected Mary when he reached her side. "I guess they gave me the wrong key. Oh, I think it is too dreadful!" And Mary promptly began to weep. After that they rang the door bell—which sounded in the kitchen and could hardly be heard on the upper floors. They went around to the back of the house and threw pebbles against the window of the parental bedroom. Then Mary called—first cautiously, then with all her might. Still no response.

"I hate to keep you Aunt waiting any longer—" said Mary.

"I'm not worried about Aunt Sally," said Frank, "but I am worried about you."

"Maybe I could go home with you and telephone to my house. That might wake them."

Sally Ormsby who didn't look very much older than her nephew greeted Frank and Mary. "But first you must stop and have a bite with us. I told Della to leave some sandwiches on the buffer and there's ginger ale on the lee. We can telephone after that. But you don't mean, Mary, that you have a latch key? I knew some of the village girls had latch keys, but I'd no idea your mother—well, bless my heart, and you're only a child. Frank, do girls in the city have latch keys?"

"Not if there's anyone who cares enough for them to wait up—"

But Mary had flown to the telephone. After five minutes' effort the operator would only report: "They do not answer."

"But it will be quite all right for you to stay here," said Miss Ormsby. "I'll telephone your mother the first thing, so don't hurry in the morning."

"Mary's a dear," said Miss Ormsby to her nephew after she had shown her to her room. A look of quick comprehension passed between them. "But don't let her carry a latch key after you suppose she'd have one?"

"Of course she would," said Aunt Sally, and looking up they saw a very much confused, but very pretty young girl in the doorway. "I'm sorry," she faltered. "But I was so afraid they would worry and I just stole down to try to get them on the telephone again. I thought you'd gone to bed—"

"Perhaps I was wrong?" said Aunt Sally.

"Oh, no," said Mary—and then, "I don't believe I understand what you were saying—that is—I never was so embarrassed in my life—"

"Poor little," said Aunt Sally as Frank took Mary in his arms.

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headache, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois, for free trial bottle.

He had just proposed. She had just refused him.
"You are just a joke," she said.
"Well, can't you take a joke?" he asked.

Drugs Excite the Kidneys, Drink Water

Take Salts at First Sign of Bladder Irritation or Backache

"The American men and women must guard constantly against kidney trouble because we often eat too much rich food. Our blood is filled with acids which the kidneys strive to filter out; they weaken from over-work, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; if you suffer with sick headache, or dizzy, nervous spells, acid stomach, or if you have rheumatism when the weather is bad, begin drinking lots of good soft water and get from your pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act free.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate clogged kidneys, to neutralize the acids in the system so they no longer are a source of irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive, cannot injure, makes a delightful effervescent lithia-water drink and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.

Garfield Tea Was Your Grandmother's Remedy

For every stomach and intestinal ailment. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

W. N. U., DENVER, NO. 46-1928

Use Care in Curing Meats

(Prepared by the United States Department of Agriculture.)

In curing pork scrupulous care and cleanliness are fully as essential as the salt, sugar and salt-peter. K. F. Warner, meat specialist of the United States Department of Agriculture, elaborates this point.

"One hundred pounds of meat," he says, "can be cured with three pounds of salt or twelve pounds of salt and widely varying amounts of sugar and salt-peter, but unless care is taken, the resulting product will be neither economical nor palatable. The boys complain considerably nowadays about the fussy crankiness with which grandpa puns the meat in cure, but grandpa learned his lesson in the hard school of experience, and he knows that unless meat is put down with care, refined almost to the degree of crankiness, the result will be unsatisfactory."

Mr. Warner also calls attention to the fact that the home butcher should select the animals for slaughter with a view to the weight and quality of meat desired. Where lard and sausage are the products desired, very large and very fat hogs will serve, but when shoulders, hams and loins are desired these will be in proportion to the weight of the animal. A trimmed ham will weigh about 7 per cent of the live weight. If the family can make eco-

nomical use of 20-pound hams the weight of the hog may run up to 300 pounds.

The backbone cut is appetizing but if the meat is to be canned it is much more convenient to split through the center of the backbone, which makes it comparatively easy to bone the loin muscles.

HINTS FOR HOUSEKEEPERS

Always see that the water is boiling before putting in the vegetables.

Include one vegetable besides potato in the young child's largest meal.

Overcooking is commonly the cause of any prejudice against vegetables.

The child's self-confidence depends on the confidence his elders put in him.

The two essentials in cooking tough meat are moisture and prolonged cooking at a gentle heat.

When canning chicken place the more tender pieces on top in the jar so that they may be removed easily without breaking.

Food for the Family

By NELLIE MAXWELL

If you can walk with crowds and keep your virtue, Or walk with kings—nor lose the common touch, If neither eyes nor loving friends can hurt you, If all men count with you, but none too much;

If you can fill each unforgiving minute With sixty seconds' worth of distance run, Yours is the earth and everything that's in it, And which is more—you'll be a man, my son! —Kipling

EVERYDAY GOOD THINGS

The housewife who has no one at home at noon to prepare a luncheon for should serve herself something hot and sit down to eat it. People who from false notions of economy live upon improper food will find that nature cannot be tampered with and illness will result.

Luncheon Dish.—Save two or more hard-cooked eggs from breakfast. Prepare small squares of bread, but

cover lightly and put into a baking dish. Cover with a white sauce to which the eggs, sliced, have been added. Bake until thoroughly hot.

Anchovy Toast.—Trim the crusts from thin slices of bread and cut into finger-sized pieces after toasting and spreading with butter. Arrange the pieces in a baking pan. Drain anchovies from oil and lay one on each piece of toast. Sprinkle with pepper, lemon juice and cook ten minutes.

Veal Oysters.—Cut lean veal into small-sized pieces and cook in boiling water to cover until tender. Season with salt and pepper. Dip into crumbs and egg slightly beaten with a tablespoonful of water. Fry in hot fat.

Creamed Fish With Potato.—Prepare creamed salmon as usual and put a layer of fish into a baking dish, cover with a layer of seasoned cold mashed potato, then add another layer of fish and top with the potato. Dot with bits of butter and brown in a hot oven.

Filling for Pumpkin Pie.—Cook the pumpkin dry and brown. To one and one-half cupfuls of the pumpkin add one-half teaspoonful each of salt, mace, one teaspoonful of ginger, a few drops of lemon extract, two well-beaten eggs, three-fourths of a cupful of sugar, one

cupful each of cream and milk. Mix well, turn into a large pastry-lined plate and bake forty-five minutes. Serve when cool with grated cheese or whipped cream and grated cheese.

A most delicious garnish for the turkey is the following:

Chestnut Cakes.—Shell and blanch, then cook in boiling water a pound or two of chestnuts. Cook in chicken stock until tender. Rub through a sieve and to every half cupful of pulp add the yolk of an egg, salt, celery salt, white pepper, onion juice, Worcestershire sauce to sea-son rather highly. Make into neat balls, brush with egg, roll in crumbs and fry in deep fat. Place sprigs of parsley between the balls when garnishing.

Hubbard Squash.—Steam or bake in the oven squash which has been broken into pieces, the seeds and fiber removed, but unpeeled. When tender scrape out of the shell, mash and mix with plenty of butter, salt and pepper to taste and a tablespoonful of cream to moisture. Beat well and serve hot
