PERSONAL AND SOCIAL

Hon. Jose Clothier and wife of Mexico City are visiting the latter's parents, Dr. and Mrs. A. I. Oxford, for a few days. They are on their way to Lower California, where Judge Clothier will sit on the state supreme court bench, having recently been appointed to that position.

Mrs. W. H. Anderson of Vaughn was a Nogales visitor Monday.

Mr. and Mrs. Louis Hoevner of Sonoma was a county seat visitor Monday.

Mrs. T. G. Dunham of San Rafael

Frances, small daughter of Mr. and Mrs. James G. Kane, had a relapse and has been taken to Nogales for medical treatment. She has been suffering from kidney trouble.

Mrs. C. B. Wilson, who has been suffering from influenza for several days, has recovered and is able to be out again.

Mr. and Mrs. Ed Collie of the French mine were in Patagonia Saturday, guests of Miss Luz Valenzuela.

Mrs. Robert Cook and sons were guests recently of Mr. and Mrs. Nich-

Snake Skin Mode Blamed On Eve By Psychologists

CLIVE HILL WEARING SNAKE SKIN BATHING ENSEMBLE

RUTH BURR DRAPED IN A 20 FOOT SNAKE SKIN WORTH \$600

Many psychologists and scientific interpreters of human emotions are admittedly bewildered by the popularity of the snake skin as a material for general use by the weaker sex. For centuries now it has been believed that a woman is instinctively repelled by the sight of a snake, yet here we find her enthusiastic over the new snake skin hand bags, parasols, canny cases, etc. This year will see a large importation of hand bags from Paris, made from the skin of the Alpina Karung, the East Indian Python, one of the ugliest of reptiles. Even the repulsive Boa Constrictor, fashion experts report, is being used for snake skin pocketbooks. A New York Professor of Psychology, although he refused to be quoted officially, offers some explanation of women's willingness to carry a bit of snake skin under her arm. "It is undoubtedly true that women seem to have an abhorrence for the snake, but whether this feeling is instinctive or whether it is built up from tradition, I do not know," said the Professor. "Almost every little girl hears the story of Adam and Eve and the snake. Naturally she never forgets that it was the snake who tempted her early relative, Eve."

TUCSON RODEO TO HAVE BEST ARIZONA TALENT

Tucson, Feb. 22.—With the cream of the professional riders and ropers of the rodeo circuit present, and a number of stars in both sports from among the cowboys of Arizona, Tucson, on the eve of the annual rodeo has taken on her appearance of a cow town of old. High-heeled boots and broad-brimmed hats are everywhere, while the conversation is either cattle or horses, with little variation.

The rodeo committee, as its part of the huge annual program which is staged February 22 to 24, inclusive, has shipped in the largest consignment of stock on record for the annual show. Twenty-four criollos of strong, bucking horses and Brahmas, both steers and bulls, are included in

The Livestock Situation

Los Angeles, Feb. 22.—(Special to The Patagonian.)—Much of the present depression in the cattle market undoubtedly is due to the fact that hides have dropped to almost the lowest levels in a great many years. Hide prices now are not much higher than they were in the serious depression that followed the World War, and it is not over-production of leather nor the fact that there is a larger number of hides available than usual. As a matter of fact, leather and hide stocks are less than normal and still the

DEMONSTRATIONS BY EXPERTS FOR DAIRY AND POULTRY MEN

County Agent J. P. Sexton Jr. and University Extension Specialist Rowe will be in the Patagonia Union High

Pete Eichells and Forrest Gross of the American Boy group of mines were business visitors in the county seat Monday.

Mr. and Mrs. Fred B. Kollberg were Nogales visitors Monday.

Miss Luz Valenzuela visited Nogales Monday. She has been suffering with rheumatism and was unable to be at the Corner Store office this week.

Mrs. Roy Murrell and mother, Mrs. Susie Haynie, were Patagonia visitors Tuesday.

Miss Sarah Pierce, daughter of Mr. and Mrs. C. A. Pierce, is spending the week-end here with her parents.

Mrs. Boyce of Pasadena is visiting her son, Henry Boyce, at Pennsylvania ranch. Three brothers are also guests at the ranch.

The Patagonia Union High School Valentine's dance, Saturday night at the opera house was well attended.

Mrs. William Parker and daughter Mrs. Eunice Lindley of Canille were Nogales and Patagonia visitors Saturday.

Robert Bergler, who went to Mayo Brothers' clinic, at Rochester, Minn., some time ago to have a colic removed, has returned to Patagonia.

Mrs. Ilen Aster of Patagonia was a San Rafael valley visitor Tuesday.

VAUGHN NEWS

It is rumored that Stoddard brothers are contemplating moving their Vaughn service station to Elgin and acquiring the tire, gas and oil business owned by Troy L. Ramsey.

Mrs. Ruth Anderson's new car was damaged this week when it left the road and turned over. Mrs. Anderson escaped without injury.

W. H. Collie of Tucson, connected with the state highway department, spent Sunday at the Overlook dude ranch at Vaughn.

Fire of unknown origin destroyed Henry Wood's pasture recently.

Sheriff H. J. Patterson was in the district this week serving summonses on prospective jury men for the coming term of the superior court.

John McCarty as called to Tucson this week for federal jury duty.

George C. Sleath will preach at the Little Adobe Church on the Hill, at Vaughn, next Sunday, February 24. A meeting is expected to be held on that day to consider the possibility of accepting from the fores reserve a tract of land to be used as a cemetery. The land in question has been used for several years as a burying ground and many old-timers rest there.

TEACHERS' EXAMINATIONS

School Superintendent Mrs. Lula R. Larimore has announced that the regular spring examinations for teachers will be held in her office at the court house on Monday and Tuesday, March 4 and 5 for trial certificates. Applicants who pass the examinations will be entitled to trial teaching certificates in Arizona schools. To be eligible to take the examination one must have graduated from a four-year high school course.

Our idea of insecurity is being governed of Oklahoma or president of Mexico.

DO YOU KNOW WHAT ANDY IS DRIVING AT

The following copy of a letter written by Senator Adnew Bettwy to Supervisor Fred W. Hannah of Nogales came in today without any explanation. We haven't read the House Bill referred to, so readers must draw their own conclusions: "Phoenix, Ariz., Feb. 20, 1929. Mr. F. W. Hannah, Nogales, Ariz: My dear Fred—I received a letter in which you asked me to support House Bill introduced by the Yuma Chamber of Commerce. I believe that the average Chamber of Commerce is a good thing for a county, but I feel that the Nogales Chamber of Commerce, with the effort of its secretary to advertise the West Coast of Mexico and not Santa Cruz county has been of no use to the people of our county, and I will never be an accessory to an act that would permit your men to make the people of Santa Cruz county pay taxes to sustain an organization such as our present Chamber of Commerce. I feel that it has been a wonderful asset to Bristol, Bert Cummings and some of Allen Gillispie hotel deals, but as far as it doing the average person in Santa Cruz county any good, I have failed to see any result. "I am in favor of a county commissioner that will give information to any person, on any subject of information that may come into Santa Cruz county that is for all the people in our county, but never for an exclusive, ecclesiastical clerk that want to all the harvest for themselves at the cost of the masses. "With kindest regards to you personally, I remain, as ever, your friend, ANDREW W. BETTWY, State Senator."

Old Resident of Nogales Returns

Mrs. S. A. Doherty, for many years a resident of Nogales, arrived in that city last Tuesday for a few days' visit with Mrs. J. W. Larimore. Mrs. Doherty has been visiting her daughter, Edith, who is the wife of Major Thompson, at Fort Bliss, Texas, and is stopping over at Nogales on her return to her home in Beverly Hills, Calif.

Women's Tailors have designed a "seven-eighths coat."

To be worn, we assume, with the one-eighth skirt.

Without intending to be unsympathetic a good many will be relieved to know that the inventor of the "He detector" is dead.

KEYES GETS 1 TO 14 YEARS

Los Angeles, Feb. 20.—Former District Attorney Asa Keyes and E. H. Rosenberg, ex-Julian Petroleum Corporation promoter, both convicted of a conspiracy to give and receive bribes, were sentenced to terms of 1 to 14 years in San Quentin penitentiary late today by Superior Judge E. I. Butler. Judge Butler denied their motions for a new trial.

To be worn, we assume, with the one-eighth skirt.

Without intending to be unsympathetic a good many will be relieved to know that the inventor of the "He detector" is dead.

VOTES TO IMPEACH HARDY FOR ACCEPTING AIMEE'S CHECK

Sacramento, Feb. 20.—The Assembly late today voted to impeach Superior Judge Carlos S. Hardy of Los Angeles for misdemeanors in office. The vote was 57 to 18. The vote was taken following recommendations of four members of a special committee appointed to investigate charges that Judge Hardy violated a section of the state constitution when he accepted a \$2500 check from Mrs. Aimee Sample McPherson, Los Angeles evangelist.

State Mining Notes

Mining properties adjacent to Yuma are being actively developed.

Jerome—Lakewood Gold Mining Company, capitalized at \$1,000,000, has been granted a charter.

Kingman—50-ton cyanide and flotation plant will be installed at Arabian mines, near this city.

Patagonia—Three mines have begun taking out ore for shipment. It is a copper property.

Patagonia—World's Fair shipped a carload of concentrates this week.

DISCUSS RIVER DEVELOPMENTS

Santa Fe, N. M., Feb. 20.—A resolution intended to meet Utah's demands for protection of its water development plans and to insure development of the Colorado basin in all other upper basin states, was presented at the tri-state Colorado river conference today and was passed with four states voting yes, one state not voting, and one state excused from voting.

Some minds are so open that they appear unable to hold anything.

The'lma Gorman, Los Angeles film actress, sued Kenneth Sanderson for \$7122 damages because her lips were disfigured in an accident while she was riding in his car.

CHAIN FARMING PLAN

We have witnessed the growth of chain stores, chain newspapers, chain theaters, and various forms of allied enterprises popularly known as trusts. Now we may see an interesting experiment in chain farming.

J. C. Penney, whose success as a chain store operator is well known, has evolved a plan which he purposes to apply to a tract of 120,000 acres of farm land in Florida. The plan is to subdivide this tract into 20-acre farms, each with a comfortable farmhouse and improvements, costing \$25,000, to be sold to purchasers making an initial payment of \$500. It is intended that future payments shall be made from earnings of the farmer.

Provision is also made for the return of the farmer's initial investment in the event that he shall be dissatisfied. Some rather stringent requirements are to be laid down by the Penney corporation, however, among which it is stipulated that the settler shall not use liquor or tobacco, and preference is also to be given to church members.

The experiment will be interesting to watch, regardless of how it turns out.

FARM INSURANCE

Farmers throughout the country are insuring their property against fire loss to a greater extent than formerly, a recent survey by the Department of Agriculture shows. In 10 years the amount of farm insurance in force increased from 6 to 10 billion dollars.

A great deal of this insurance is carried by mutual insurance companies organized by the farmers themselves, and the average rate is very low, being only about 26 cents a year for each \$100 of insurance. Insurance is carried very generally in the northern states, while a majority of farmers in the southern states carry little or none.

Considering the very low rate at which farm insurance may be obtained, it would seem that every prudent farmer would avail himself of this means of protection.

A government authority says that a cow must have three quarts of water for every quart of milk she produces. An official vindication of the dairyman's pumpp.

Bring Happiness and Comfort to Dependent Arizona Families

Value of Life Insurance
By W. A. Fraser

Life insurance has saved many families from going to the poorhouse.

Life insurance has made it possible for children to continue with their education.

Life insurance has eliminated misery; has kept the wolf from the door of widows and orphans; has brought comfort in old age.

It is a dawn of hope that will reveal itself when days of sorrow have come.

W. A. Fraser

AMARVELOUS story of the misery that has been eliminated and the happiness and comfort that has been brought to thousands of Arizona families whose providers were members of the Woodmen of the World is strongly emphasized by figures compiled by W. A. Fraser, sovereign commander of the Woodmen of the World.

Sovereign Commander Fraser's figures showed that the Woodmen of the World life insurance association has paid \$929,574 in death claims to families of this state since the Woodmen of the World started to do business here in 1895.

"Just think what these millions of dollars paid in insurance benefits have meant to these families whose providers were snatched away from them and their regular income stopped," said Sovereign Commander Fraser. "One does not have to stretch his imagination to realize what this money has done for the widows and the orphans of the families of this state. If these bread-winners had not been insured, think of the great misery which would have come into the lives of the wives and children through no fault of their own. Just a little thoughtfulness on the part of these fathers and husbands of these families brought untold happiness, gave the children a chance for an education, kept many families out of orphan asylums and poorhouses and in this way saved the taxpayers of the state thousands of dollars. The Woodmen of the World has been glad to pay these claims and

bring this happiness to these many thousands of families of this state. "The marvelous record of the Woodmen of the World can be traced greatly to the loyalty and enthusiastic support given us by the people of this state. We enjoy doing business here and we hope we will always be able to play an important part in bringing happiness and future security to the families of this state who suffer the loss of their bread winners."

"The maintenance of the War Memorial hospital at San Antonio, Texas is one of the great services performed by the Woodmen of the World. Patients are cared for free of charge in an institution that contains every possible means of renewing the health of our members. Of the 3,000 patients that have been cared for a majority have been returned to their homes cured and in a position to become useful citizens of the nationwide communities in which they live."

Mr. Fraser announced that the Woodmen of the World is 103% solvent and now has \$89,000,000 in municipal bond holdings in its reserve. A large portion of these bonds have been invested in this state, thus aiding in the building of the state's roads, schools, and various public improvements.

"The Woodmen of the World is now the richest fraternal life insurance association in the world," said Mr. Fraser.

A Great Secretary of the Treasury

By ELMO SCOTT WATSON

WHEN the announcement was made that each denomination of the new currency, which is to be issued on July 1 of this year, was to bear a different portrait of a distinguished American, a New York congressman wrote to Secretary Mellon of the Treasury department as follows:

I am informed that the portraits on the new bills will include Washington; Jefferson, with a picture of Monticello on the obverse side; Lincoln, with the Lincoln memorial on the obverse side; Hamilton, with the Treasury building; Jackson with the White House; Grant, with the Capitol; Franklin, with Independence hall; as well as McKinley, Cleveland, Madison and Chase.

I notice with regret the absence of Albert Gallatin, secretary of the treasury under Jefferson and Madison. He was a great secretary of the treasury. Surely he should be remembered by a grateful nation by having his picture on a series of these bills. Of all foreign-born citizens who have risen to power and fame in the United States, Albert Gallatin was the most distinguished.

He made a deep impression on American history directly after the Revolution and served his country honorably as a member of congress, United States senator, minister to France, and minister to England, and peace commissioner at the Treaty of Ghent, and last but not least he was one of our honored predecessors. The purchase of Louisiana was the great measure of Jefferson's first term, but it was Gallatin who arranged for its payment and did so without in the slightest degree deranging his plans for the funding of the national debt. When the War of 1812 came upon us, great financial burdens were placed upon the Treasury department, but Gallatin, with great skill and wisdom, discharged them successfully.

Although Gallatin's portrait will not appear upon the new money, that the "grateful nation" of which the New York congressman spoke has not forgotten entirely his services is shown by the fact that last year congress passed a joint resolution authorizing the erection of a statue to Gallatin and directing that it be placed on the steps of the Treasury building in Washington with that of Alexander Hamilton to remind Americans that our financial system is due to these two great men.

Unfamiliar though the story of Gallatin's life may be to many Americans, it was nevertheless a romantic and an important one. He was one of the earliest examples of a foreign-born citizen rising to a position of prominence in the United States. He was born in Geneva, Switzerland, in 1761 and received a good education in that city which was then one of the principal centers of learning in Europe. Having been left an orphan, Gallatin decided to emigrate to America, especially as it offered an opportunity for an adventurous life in the wilderness which he desired. There is a legend that an unfortunate love affair drove him to this decision, but the truth of the legend is unknown. It is interesting to note that he was offered a commission in the forces of the Landgrave of Hesse, who was furnishing soldiers to the British king for service against the Americans, but that Gallatin declared "he would never serve a tyrant."

Arriving in Boston in 1780, he spent some time there until he grew weary of "its monotonous life and Puritan tone." Then he embarked upon a trading expedition to the frontier of Maine, but when this proved unprofitable he returned to Boston and became an instructor in French at Harvard college. After staying there a year, Gallatin proceeded to New York which was then (1783) still in the hands of the British, and their insolence to the young Swiss is said to have been responsible for his leaving there very soon and going on to Philadelphia and Richmond.

While in Virginia he became interested in the lands south of the Ohio, as a promising field for speculation, and here he purchased a thousand acres, which he bought for a hundred pounds, in Virginia money. Here he had definitely decided to become an American citizen. Soon after this land transaction he became the partner of a French gentleman named Savary de Valcour, and together, they bought warrants for 120,000 acres of Virginia land between the Great and Little Kanawha rivers.

Gallatin was to have the management of this land, and in 1784 he set out to look it over. He found the country north of the Virginia line more desirable, and finally located in Fayette county, Pennsylvania, where

ALBERT GALLATIN

he built himself a log house and also had a store.

It was here he first met General Washington. The story of this meeting, as narrated by Gallatin, is given in a paper for the New York Historical society, written by William Beach Lawrence. Gallatin "had a cot in the office of the surveyor of the district when Washington, who had lands in the neighborhood, and was desirous of effecting communication between the rivers, came there."

"Mr. Gallatin's bed was given up to him—Gallatin lying on the floor, immediately below the table at which Washington was writing. Washington was endeavoring to reduce to paper the calculations of the day. Gallatin, hearing the statement, came at once to the conclusion, and, after waiting some time, he himself gave the answer, which drew from Washington such a look as he never experienced before or since. On arriving at his conclusion, Washington turned to Gallatin and said, 'You are right, young man.'"

Of this incident John Austin Stevens, who wrote the biography of Gallatin in the "American Statesman" series, published by Houghton Mifflin company, says: "The look which Washington is said to have given Mr. Gallatin has its counterpart in that with which he is also said to have turned upon Gouverneur Morris, when accosted by him familiarly, with a touch on the shoulder."

After the incident at the log cabin on the Pennsylvania frontier, Washington is said to have tried to secure the services of Gallatin as his land agent; but the latter declined the offer.

Gallatin soon rose to prominence in his adopted state. He was a member of the Pennsylvania assembly convention; he was a member of the legislature; he was elected United States senator, but could not qualify, because he had not been long enough a citizen of the country. For thirteen years he had then been in America, and declared his intention to be a citizen three years afterward. It is believed that he was unseated on account of having been too inquisitive regarding the manner in which the finances of the nation were being administered.

It proved fortunate for the country at large that Gallatin was in Fayette county, and not in the senate, for it was largely through his influence that the Whisky Insurrection did not result in war, through the secession of several counties in western Pennsylvania and Virginia. The people were not only ready to fight, but had a flag of their own ready to float from their liberty pole. Gallatin's good sense and management saved the day for law and order.

He has been criticised for living on

the frontier instead of in the cities. He liked the life there where contention did not rule, and there was greater equality. As he expressed it, "From the suburbs of Philadelphia to the banks of the Ohio I do not know a single family that has an extensive income. An equal distribution of property has rendered every individual independent, and there is among us true and real equality. In a word, as I am lazy, I like a country where living is cheap; and as I am poor, I like a country where no person is very rich."

In 1801 he became secretary of the treasury in Jefferson's cabinet and held the office for twelve years. During this time he made the work of his department intelligible through the budget system, and some assert that as a financial genius he ranks with Hamilton. Gallatin did not care for the position, as he would have preferred to study law and practice it in New York city or in Philadelphia; but when appointed secretary, he felt it his duty to accept, although he feared he was not equal to the task.

On leaving the cabinet, Gallatin served his adopted country quite as effectively as a diplomat. According to Henry Adams, "Far more than contemporaries ever supposed, or than is now imagined, the Treaty of Ghent was the special work and the peculiar triumph of Mr. Gallatin." His shrewdness and tact won the day, where another man, differently endowed might have failed. Following his successful and adroit diplomacy in bringing about the Treaty of Ghent, insuring peace between England and America, Mr. Gallatin was sent as minister to France, and later to England.

The mission to England ended Gallatin's official life, but not his intellectual activity. Retiring to New York, he spent the last years of his life in pursuing his favorite study of etymology, and promoting education. In this manner, he usefully rounded out his eighty-eight years, dying in 1849.

The historian Henry Adams, grandson of John Quincy Adams and great-grandson of John Adams, in his "Life of Gallatin" says that, as secretary of the treasury during the eight years of Jefferson's Presidency, and for four years while Madison was President, Gallatin deserves equal recognition with Hamilton as the founder of our financial system.

Hamilton's theory was that the financial policy of the country should originate with the secretary of the treasury, and that congress should acquiesce in registering his will. Albert Gallatin, while a member of congress, organized the ways and means committee for the purpose of holding the secretary of the treasury in check. New York recognized the high position won by Gallatin by giving his name to one of its great banking institutions.

the law of the land. When a preacher makes a mistake, nobody knows the difference. But when the editor makes a mistake—good night!—Exchange.

Painter's Line.

The "S" line in a painting is so called because it is made of a double curve like the letter "S." This is illustrated in John Alexander's painting, "Isabella and the Pot of Basil." The front outline of the figure of Isabella is an "S" line.

Passageway of Mole Is Popular

Continue Active During the Winter, but Do Little Damage to Plants.

(Prepared by the United States Department of Agriculture.)

Moles, contrary to the opinion of many, do not eat roots, bulbs and seeds of plants in important quantities. They cause damage in the garden by tearing plant roots and by fluffing up the soil until it dries out too rapidly. Indirectly, too, they are responsible for the activities of other small animals, such as mice, which do eat roots, tubers and bulbs. The mole runways in the garden are favorite passageways for these little mammals. The mole itself lives principally on insects, earthworms, white grubs, and other larvae and pupae. But the mole gets—and deserves—some of the blame for the destruction done by others that follow its tunnels.

Gas and Poison Useless.

Poisons and poisonous gases are almost useless against moles. The bureau of the biological survey finds. Specialists in this branch of the United States Department of Agriculture say this is because of the highly developed sense of smell of moles, which are thus compensated more or less for poor eyesight. Also the fact that the moles feed on live insects and earthworms makes it difficult to introduce poison into food that they are willing to eat.

Active During Winter.

Moles continue active through the winter, but in that season their tunnels run so deep that they rarely do much damage. Trapping seems to be the most effective way of disposing of moles, although it is slow and requires patience. Three types of traps are in common use—the choker, or loop, the scissor jaw, and the spike or prong trap. The last is used most commonly, but the loop trap has proved far more effective if carefully set, and does not injure the pet.

Ways of Manufacturing Commercial Sour Cream

Experiments on the methods of manufacturing commercial sour cream are being conducted by the dairy department of the Pennsylvania agricultural experiment station at State college.

This product is also known as "Jewish sour cream" because of its extensive use by Hebrew people. It is not restricted to them entirely, being also very popular with the Slavic races generally and to a lesser extent with the Germans, Austrians and Bohemians.

The sour cream is, when properly made, a thick-bodied, smooth product with a clean, acid flavor. It finds use as a dressing for vegetables, either cooked or raw, as well as being the important ingredient in certain typical cold vegetable mixtures not unlike salads.

The most difficult problem in making commercial sour cream is to produce a body thick enough and smooth enough to satisfy the customers. The experiments at State college show that there are many factors to control where a high quality product is desired. This work is expected to be of considerable aid to the milk dealers who are attempting to supply the market, says F. J. Doan of the dairy manufacturing department.

Eradication of Rodents on Western Range Land

During a recent conference of Western live stock specialists at the United States Range Live Stock experiment station, Miles City, Mont., opportunity was afforded to measure the results of modern methods of freeing range lands of rodent destruction, recommended by the bureau of biological survey of the United States Department of Agriculture. Three years ago some 4,300 acres of the range was badly infested with prairie dogs and pocket gophers. It was estimated at that time that more than 2,000 acres of it was totally ruined for grazing by either cattle or sheep. Those in charge shipped in some cats, poisoned it, and distributed it over this section of the range. Today there is an abundance of range grasses, with scarcely any evidence of the former presence of the rodents. The forester for that district estimated that the vegetation is today nine or ten times more valuable over the entire region than before the eradication campaign began.

Hamilton's theory was that the financial policy of the country should originate with the secretary of the treasury, and that congress should acquiesce in registering his will. Albert Gallatin, while a member of congress, organized the ways and means committee for the purpose of holding the secretary of the treasury in check. New York recognized the high position won by Gallatin by giving his name to one of its great banking institutions.

Specialist Tells Why Goose Eggs Don't Hatch

(By J. G. HALPIN, Wisconsin Experiment Station.)

Poor hatches often are received from goose eggs due to the way geese are wintered. Often geese do not get enough hay chaff during the winter. It is a tendency also to feed too much corn, and this tends to poor hatches. Geese should be allowed out during the winter so that they get plenty of sunshine.

Another important thing is care to keep eggs laid during cool weather from getting chilled. Geese frequently lay their eggs at eight or nine o'clock at night and such eggs become chilled before morning. One can help out by giving geese nesting places with plenty of material for litter. Some geese if given plenty of litter will cover up their eggs so well that a hard freeze will not damage them.

Woods Savings Bank, Says Forest Officer

Timber Conservation Becomes Economic Need.

(Prepared by the United States Department of Agriculture.)

Timber is a farm savings bank to be drawn upon in times of extra need, says W. R. Mattoon, extension forester of the forest service, United States Department of Agriculture. The trees are the capital or principal; new growth is the interest. Each day the interest is added—and the cashier cannot run away.

Farm woodlands have many times been the means of lifting a mortgage, or making the difference between profit and loss on the farm balance sheet, Mattoon says. Timber and wood are required for the successful operation of the farm, and most farmers have some lands better adapted to tree growth than cultivated crops. The growing of timber is therefore legitimately a part of the regular farm program. Timber conservation has come to be a matter of economic necessity. No farmer can afford to pay taxes on idle land.

If the woods bank is drawn on only to the extent of cutting the growth, or interest, the capital remains untouched, and the investment continues undiminished. Some useful hints in using farm timber rightly, in cutting for continuous growth, and in marketing farm timber are given in Department of Agriculture Leaflet No. 29, "The Farm Woods—A Savings Bank." Just off the government presses. Copies of this leaflet can be procured by writing to the United States Department of Agriculture, Washington.

Artificial Manure Made From Farm-Grown Crops

Manure equal in quality to the best barnyard fertilizer can be made from farm-grown materials and without the aid of horses or other farm animals, according to a series of experiments that have been carried on by the soils department of the University of Missouri for the past two years. Ordinary wheat or oats straw is the material and a simple, inexpensive chemical mixture, combined with rain, is the chief manufacturing agent which changes the straw to manure within two or three months after it is threshed.

The cost of the artificial manure varies between 45 and 85 cents per ton, according to the experiments carried out to date.

The process is briefly this: A simple chemical mixture of 45 per cent ammonium sulphate, 40 per cent agricultural limestone and 15 per cent superphosphate is mixed with the straw at threshing time at the rate of 150 pounds to a ton of straw. The straw is blown into flat piles not over five or six feet deep in order that it may take up water readily from rains and start the rotting brought about by the chemicals through their effect on the bacteria and molds in the straw. The length of time necessary to change the straw into manure depends on the depth of the piles of straw and the amount of rainfall, as water is one of the very necessary chemical agents in the process of rotting.

Modified Rag-Doll Seed-Corn Tester Easily Made

More than a million ears of corn were tested in the spring of 1928 in community testers by the rag doll method, according to Purdue university. Plans for such testers can be secured from the university at Lafayette, Ind.

To make the modified rag-doll seed-corn tester, use a piece of heavy waterproof paper, 12 inches wide and about 52 inches long. On this lay a cloth the same width and about 48 inches long. Three sections of ordinary paper hand towels are equally good. The cloth or paper should be thoroughly wet and at least five kernels from each ear be laid in rows on the doll, which will accommodate 20 ears. The dolls are rolled and set in a heated container where the temperature can be held at about 80 degrees and the dolls can be watered daily. After seven days the dolls will be ready to read.

Agricultural Hints

If you can get good seed now, buy it. Seed prices are expected to be high this spring.

Milk your cows immediately before instead of after feeding them and you will avoid off-flavors.

Remember that onions in storage need a cool temperature, dry atmosphere, and plenty of ventilation.

A warmed tool house starts the good husbandman on next year's farm tasks by giving him a chance to put all implements in order.

Sweet clover improves the soil so much that it runs itself out of a home by making the ground more suitable to other plants which can then crowd it off the ground.

Time spent during the winter in cleaning and grading seed oats, seed corn, and sorghum seed is a time well invested. It is always advisable to have a germination test made of all seed that is to be used for planting.

Bodily Endurance Tests

Endurance tests are the outcropping of an impulse as ancient as it is unaccountable. Long before the days of purses or publicity, the same instinct found its vent in the old Indian sun dances. The Indian braves would cut four slits in the skin of their chests and run a narrow board through the slits. Leather thongs streaming from the top of a sort of maypole were fastened to each end

of the board. Then the Indians would dance until they dropped unconscious and the boards were torn loose from their skin.

What Price Mistakes?

When a plumber makes a mistake he charges twice for it. When a lawyer makes a mistake, he has a chance to try the case again. When a carpenter makes a mistake, it is just what he expected. When a doctor makes a mistake, he buries it. When a judge makes a mistake, it becomes

ASPIRIN

To break a cold harmlessly and in a hurry try a Bayer Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Bayer Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Not Really New

Inventors claim to have produced a mechanical man who can talk without thinking. Something like this has been heard of before.

Would Be Welcome

You Can't Dye a Dress with Promises!

You can't dye a dress—no matter how careful you may be—without real color. That's the idea behind Diamond Dyes. They are made to give you real service. They contain from three to five times more aniline than other dyes on the market.

Next time you want to dye, try Diamond Dyes. See how easy it is to use them. Then compare results. Note the absence of that re-dyed look; of streaking, or spotting. See how soft, bright, new looking the colors are. Then observe how they keep their brilliance through wear and washing. If you don't agree Diamond Dyes are better dyes, your dealer will refund your money.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Girl at the Top in Health Test

Millions of boys and girls all over the world, thousands of them right here in the West are being restored to health and strength by the purely vegetable tonic and laxative known as California Fig Syrup and endorsed by physicians for over 50 years.

The Treasure of the Bucoleon

By Arthur D. Howden Smith

W. N. U. Service Copyright 1923 by Brentano's, Inc. Copyright 1923, The Ridgeway Co.

SYNOPSIS

In New York, Hugh Chesby, English World War veteran, relates a story of a treasure in Constantinople in the existence of which his uncle, Lord Chesby, firmly believes.

"That sounds reasonable, too," said Nikka, deep in thought. "Why?" "The man is a—what you would call a countryman of mine. He is a gypsy. I tell you, my friends, our task grows as we draw near it. I have said before that we face a gang of international thieves. But see how their importance swells. Hugh, this man Hilyer—when all is said and done, an English country gentleman. He is a

light played on it. But what interested me was the small flexilia saw that was still fixed in the base of the panel above the dancing monks.

"Do you see what our friends were up to?" I asked. "That fellow Toutou has a keen mind. He is somebody to be reckoned with. He saw what none of us saw, even after we had worked out the cipher.

"What did he see?" asked Nikka. "For answer I switched the light on to Lady Jane's verse:

Wheue thaffe ye Vappiat Churchmanne Woude seke Hys Souls contente

Stixes heude and ye Monkes belle. So wil ye flanging drop in ye Dexter side of ye Harth. Thaffe which ye Seke you—hal Discoverour in vta proper Place.

Jane Chesby.

FRANCE HAS NO NATIONAL GAME

Rugby Attracts the Largest Number of Spectators.

Outdoor sports, practically nonexistent in France in 1900, have become an important part of French life, a power to reckon with both socially and politically.

Association football, rugby, tennis, bicycle racing and boxing vie for the honor of counting the greatest number of practicing adherents as well as for popular favor and the practical benefits derived from drawing the largest crowds of spectators at their stadium. Golf is making rapid strides, but track and field athletics are somewhat neglected.

There is no national game in France—like baseball—but the popularity of

CHAPTER IV—Continued

I had to run, and as I ran, I kicked the firetrucks in his way. They tripped him and his knife went hurtling across the room into a bookcase. But I could not escape. His companions needed me back toward him, and presently I was battling to avoid his clutch once within his reach, I was helpless as a child.

His arms wrapped around me like cables; his wicked green eyes blazed at me with insane ferocity; his teeth gnashed at my throat. And his two friends hovered near, watching for an opportunity to finish me with their knives.

Then I heard feet pattering in the hall, a cry of encouragement. I summoned all my strength for one last struggle. "Shoot! Hugh! Nikka! Shoot!" I yelled.

Teodoresch lifted me from my feet and turned the face upward in his arms. I honestly think he meant to gnaw through my throat. His pallid cheeks gleamed with sweat. His eyes were utterly inhuman. His mouth dribbled saliva. But an automatic cracked in the doorway, and was followed by a choking cry. He hesitated, glaring down at me, and could almost see the human intelligence returning to his face. There were two more shots, and he slumped me on the floor, with a barking screech of defiance.

The next thing I remember was Hugh pouring raw Scotch whisky down my throat. "Did you get him?" I stammered. "We got one fellow," answered Hugh grimly. "Or I should say, Nikka did."

I staggered to my feet with Hugh's arm around me. In the doorway I saw Watkins, a nightshirt flapping around his calves, forcing back a noisy group of servants. Nikka had picked up the electric torch which had been lying at me, and was examining by its light the body of a man that lay between the couch and the fireplace.

As Watkins closed the door, Nikka beckoned to him. "Did they see this?" he asked short lips, pointing to the body. "No, sir. None of them got inside. "Good! Oh, Hugh!" Nikka turned to us. "Hello, Jack! Do you feel your seat again?" "I'm as right as I can be," I in sister, which was the truth. "Nothing bothered me, except having the wind squeezed out of me by that gothic. "What gorilla?" "The Italian—Teodoresch." "Oh, was he in it?" Hugh and Nikka exchanged glances. "Well, take a look at this fellow," suggested Nikka.

He is that same Toutou Hugh's uncle spoke of."

He's no more Italian than you are," I interrupted. "He may be a scientist, but he's French. No doubt about that."

"Who is he, then?" asked Nikka placidly. "He is that same Toutou Hugh's uncle spoke of."

"How do you know that, Jack?" "I just know it that's all. Yesterday afternoon I saw him, although I did not recognize him, as he normally is."

"Come up here, Hugh, and help me with it," he said. "It has a stone backing," cried Nikka disappointedly, as it came away. In fact, we all experienced a profound feeling of disillusionment when Watkins received the panel in his arms, and the empty area of stonework was revealed, about four feet long and three feet high.

"Too bad," said Hugh, jumping down. "Especially as we could have gotten a body through an opening that size."

There came a yell of triumph from Nikka, and Watkins, whose eyes had been straining at the opening, shouted: "There's something there, your lordship!"

Nikka was digging furiously with the chisel at what looked to be a dark stone in the very center of the empty area. "It's an inner wood panel," he grunted over his shoulder. "I can feel something behind it."

There was a splintering noise, and the "stone" fell apart. Behind it was a shallow recess, perhaps nine inches square, completely filled by a rusty iron box. Nikka levered the box out, and handed it to Hugh.

The box was about three inches deep. It was unlocked, and Hugh lifted the cover without difficulty. Inside were two papers, very brittle and yellow from the heat of the chimney. The first was a torn fragment from a household account book:

Sept. 22nd. 1892 Paid Conrad of Nurnburgs ye Germanne sausage; item, for rentinge ye Old Crypto below ye Priors House; item, for ye engine for ye Priors vent; item, for ye carriage; item, two boxes of Flanders 417 s/6 d/4

And below this was written: And I sent Hymne forth of ye Village thaffe He might not have Chances to talk howbeit Hee ys clousemouthed and hath little English

"What did she do with the second box?" I suggested. "Probably used it in another mystery," chuckled Nikka. "What's the other paper, Hugh?" "It's the real thing! Great Jupiter see what Toutou missed!"

And he spread the second paper on his knee. It was short and to the point: To Myddel. Presse kite ye time yeo. Mye Rivven. Presse kite ye time yeo.

How the mountains of the eastern United States seem to have been in the habit, millions of years ago, of shutting up and opening out again, periodically, like an accordion—a procedure which they may not entirely have given up, was described by Charles Butts, of the United States geological survey, in a communication to the Washington Academy of Sciences.

Studies of rocks formed in different parts of what are now the Appalachian mountains several hundred million years ago, during what geologists call the Paleozoic age, have proved, Mr. Butts reported, that parts of these mountains were alternately under the ocean and exposed to the air.

And gently oscillating crust or exterior shell of the earth which caused a continual shifting of the areas of land and sea.

There is no sign of sudden changes, lifting new mountains or engulfing former lands. The land of nature worked so slowly that had men been there to see it the process might have passed unobserved.—Baltimore Sun.

Pineapple at Its Best. Travelers in Costa Rica have to tell of the delight afforded in partaking of the pineapple grown in that country, and of the novel way of serving it at the table. Servants have developed unusual skill in piling the fruit upon the entire back of the guest

thrust the torch over the rim. There was a sharp drop of three or four feet, and then the beginning of a flight of stairs, heartily carpeted with dust. A damp, earthy odor smote my nostrils. "Ever seen that before, Watty?" asked Hugh.

"Never, your lordship. 'Is life luddish, Mister Hugh, was frequently in the habit of being alone, as I daresay you know, but 'ow in the world could I have found it, your lordship, if he didn't find out at first about that?" Watkins nodded toward the gaping hole in the overmantel.

"Oh, d—d if I know," admitted Hugh. "Maybe he'll find out. By the way, how do you suppose you close the vent?" Nikka fingered the two projections, and the moment he applied pressure the flagstone slipped up into place.

"There's some counterweight arrangement," he said. "Evidently," agreed Hugh. "Well, you chaps, we are another milestone further on the road, but the first thing we have to do is to get the corpses deflected safely underground. Jack had best go upstairs and wash, while Watkins gets dressed and fetches our clothes. In the meantime, Nikka and I can be disposing of our friend here."

We adopted this plan, and Watkins also volunteered to tell cook to start breakfast. When I came downstairs twenty minutes later, Hawkins the butler, carrying a large tray, was knocking on the gunroom door.

"I'll take it," I told him. "You go back to the kitchen like a good fellow, and keep the maids quiet." I knocked for several minutes with no result, and finally set the tray down, and banged the door with both fists.

"All right! All right!" called a strangely blanketed voice. "Who is it?" "Jack!" Feet scuffled inside, and the door was jerked open by Hugh, rather dusty and cobwebby.

"We were out under the park," he explained, "and I came back ahead of the others on the chance you might be trying to get in. There's a regular passage, Jack. It seems to go on and on. We didn't have time to follow it very far."

He set the table, which I had overturned, on its legs, and I brought in the tray. Then Nikka and Watkins emerged from the fireplace, blinking owlishly, and we three drew "hairs up" to the table, and Watkins served breakfast as deftly as though we had not departed a half's breadth from the ordinary routine of life.

There was a knock on the door. "Who's that?" said Hugh. "It should be 'Awkins with the quick-hint, your lordship," answered Watkins, hastily pushing back his chair.

"Why quick-hint?" I asked, as Watkins received a bulky, whitish-powdered sack through the half-opened door.

"We can't very well dig a grave in stone," was Nikka's grim comment. "You are going to be on guard here, Watty, while we are gone," said Hugh. "Have you your automatic? Right O! Don't let anybody in."

Employment conditions show improvement over last year. Denver.—The industrial employment survey report, recently issued from the office of Quince Leonard, chief director of the U. S. Department of Labor, here, states that industrial activities and employment in Colorado were normal during January. As is usual during January and February of each year, there exists a considerable surplus of chiefly miscellaneous outdoor seasonal workers.

1—Miss Bobby Trout of Los Angeles who made three new records for women aviators. 2—President-Elect and Mrs. Hoover reviewing Boy Scout troops at Miami Beach where Mr. Hoover was made a tenderfoot scout. 3—W. M. Doak of West Virginia, vice president of the Railway Trainmen, who may be Hoover's secretary of labor.

South West PARAGRAPHS

L. Grady Mayfield was elected president of the Elephant Butte Irrigation project at a board meeting recently. G. A. London, who resigned recently as secretary of the Nogales Chamber of Commerce, has accepted the secretaryship of the Douglas chamber. Fanned by a strong wind, flames destroyed the residence portion of Madrid, a coal mining town twenty-seven miles south of Santa Fe. An official committee of prominent Globe (Ariz.) citizens has been appointed to look into conditions of the Indians at Rice and San Carlos. Arrangements are being made for the spudding in of Alamogordo's first prospective oil well on the Dunn farm two miles northwest of Alamogordo. The Deming cotton gin has closed its 1928 season after turning out 1,274 bales for the Mimbres valley farms. The product exceeded that of any previous year by about seventy bales. Michael E. Cassidy, former federal prohibition director for Arizona and prominent in Republican political circles, was appointed assistant secretary of state by Gov. John C. Phillips. An immediate renewal of efforts to build the Diamond Creek dam was forecast at Phoenix when Federal Judge F. G. Jacobs ruled that the permit for the structure granted James B. Girard and associates was valid. Necessity of expanding operations to take advantage of national advertising to be given Arizona by the railroads this year has resulted in a widespread membership campaign undertaken by the Arizona Industrial Congress. San Juan county, N. M., may have a county fair next summer if a committee of farmers who called upon the Chamber of Commerce at Farmington have their way. The committee also discussed hiring a county agent for San Juan county. The Hunt-Mayfield Gin, which was recently destroyed by fire, will be replaced by one of the most modern in the Mesilla Valley, New Mexico. The firm has let a contract for erection of the plant and has purchased all new machinery. Victor Culberson, Silver City, N. M., sheep and cattle man, will head the American National Livestock Association at its thirty-third annual convention in Denver next year. Culberson was elected president of the organization at the recent convention in San Francisco. According to a report made public by the sheep sanitary board of New Mexico, 600,000 sheep and lambs were shipped from New Mexico during the first eleven months of 1928. Sheep at the present time are reported to be in good condition and the outlook for the sheep raising industry is promising. A wage increase of 5 per cent based on the wage scale in effect prior to October 1, 1928, affecting approximately 17,500 miners employed by copper mining companies of Arizona is announced by mining company officials. The wage increase is the second granted the miners in four months. The first raise of 10 per cent was granted October 1, 1928. The 5 per cent raise now announced is to remain in effect as long as the price of copper remains at 17 cents or over. The increase is retroactive to February 1. The increase will add approximately \$1,500,000 yearly to the mining payroll of the state. The year 1928 was a banner one for the poultry industry in New Mexico, according to E. E. Anderson of New Mexico A. and M. college. The poultry interests of the state, he said, during the past year made their greatest progress in history. The 1928 commercial hatchery facilities were less than 50,000 egg capacity. In 1927 they increased to 120,000, in 1927 they reached 190,000 and in 1928 the capacity jumped to 240,000. Mr. Anderson said. For 1929 the commercial hatchery capacity now ready for operation has reached 350,000, which means that the 1929 record will exceed a combination of several years of the past. The \$1,750,000 tax anticipation bond issue was purchased at par by 17 Arizona banks at the sale held by the State Loan Commission. It was the only bid received. The bonds bear 5 per cent interest and are to be expired June 30, 1929, from the next half year's taxes due in March and delinquent in May. One of the first payments from the proceeds of the sale will be the retirement of registered state warrants dated since December 4. The banks in the syndicate include the Bank of Arizona, Prescott; Security Trust and Savings Bank, Yuma; Traders Bank at Wickenburg; and the Payson Commercial and Trust Company of Payson. Judges of Superior Courts would be required under the terms of a bill introduced in the House by Representative William Wessner of Yuma county, Arizona, to call a grand jury on the first Tuesday of March each year. Children born in Arizona numbered 849 during December, according to a report issued by the vital statistics bureau of the State Board of Health. There were 805 deaths in the same period, being nearly double the usual number for 31 days, with the influenza wave considered as a large contributing factor.

Improved Uniform International Sunday School Lesson

(By REV. F. B. FITZGERALD, D. D., Dean Moody Bible Institute of Chicago, 626, 1928, Western Newspaper Union.)

Lesson for February 24 CHRISTIAN GROWTH

LESSON TEXT—John 1:40-42; Matt. 16:15-17; John 21:15-17. GOLDEN TEXT—But grow in the grace and knowledge of our Lord and Savior Jesus Christ. PRIMARY TOPIC—Growing Like Jesus. JUNIOR TOPIC—Growing Like Jesus. INTERMEDIATE AND SENIOR TOPIC—Growing Up—To What? YOUNG PEOPLE AND ADULT TOPIC—Conditions of Christian Growth.

I. Following Jesus (John 1:40). As a result of the testimony of John the Baptist, that Jesus was the Lamb of God (v. 36), Andrew followed Jesus. The proof that he really believed is that he followed Christ. This is the first essential in the Christian life.

II. Leading Others to Christ (v. 41). As soon as Andrew had found and become acquainted with Christ, he brought his brother Peter to Christ. Christian growth can only be truly realized in the giving of oneself to the winning of souls. The one who has received the gospel, the good news, cannot help but proclaim it.

III. Confessing Jesus as the Messiah, the Son of God (Matt. 16:15-18). The disciples had been with the Lord for several years. They had heard His wonderful words and seen His mighty works. Various opinions were extant about Him. It was now necessary for them to have a definite conception of Him. Examination came after the period of school life. As the Master Teacher, Jesus knew what it meant to the disciples to have a right conception of Himself. He knew the trying ordeal through which they would be called upon to pass as the time of His crucifixion drew near. Only as they perceived His deity would they be strong in the hour of trial. In answer to Jesus' pointed, personal question, Peter confessed to the absolute deity and Messiahship of Jesus. This confession of Christ is essential to salvation (John 20:31).

No one lacking it will ever be interested in the winning of souls. Besides, the denial of His deity is the supreme lie (1 John 2:22).

1. What Peter confessed (v. 16). "Thou art the Christ, the Son of the living God." It therefore involved His Messiahship and deity. This is the burning question of today. Those who have the right conception of Christ's person and mission have no trouble in the realm of science, philosophy or ethics.

2. Christ's commendation (v. 17). He pronounced him blessed. The evidence that Peter was blessed was that he was in spiritual touch with the heavenly Father. His conception of Christ was not revealed by flesh and blood.

3. Peter's blessing (v. 18). Christ declared that he should become a foundation stone in His church, Christ Himself is the chief cornerstone on which the church is built. Christ's person and Messiahship were confessed by Peter, and on this rock is laid the foundation of apostles and prophets (Eph. 2:20). All believers are living stones of this house (1 Peter 2:5).

IV. Peter's Restoration (John 21:15-19). Peter grievously sinned in denying the Lord, but he made confession, shedding bitter tears over his sin and folly. The Lord tenderly dealt with His erring disciple and restored him. In his restoration, Jesus brought to Peter's mind the essential qualification for his ministry. Love is the pre-eminent gift for Christian service. To impress upon his mind this fact He three times asked the question, "Lovest thou me?" He not only asked the question three times to show the supreme qualification for service to Him, but to show that there are three classes of persons demanding His service, and that these classes need special care as well as food adapted to their state.

1. Those beginning the Christian life, babes in Christ, "Feed my lambs." The word "feed" means more than instruction. It applies to the surroundings, influences and examples.

2. The mature ones, "Feed my sheep." This seems to mean "shepherd my sheep." The mature class of believers not only need food, but discipline. They need correction and guidance.

3. The aged Christians, "Feed my sheep." The word "feed" here is much the same as in the first case. This is a service greatly needed today. In many places the old people are greatly neglected. All provision is made for the young people. Love is the supreme need in service to the old folks.

The Humble Person When men are cast down, then thou shalt say, There is lifting up; and he shall save the humble person. He shall deliver the island of the innocent; and it is delivered by the pureness of thine hands.—Job 22:29, 30.

Living and Giving Abundant life always means overflow. The Christian life that is not overflowing is spiritually sick. It is dwarfed instead of being full grown. It is carnal, not spiritual.

Scraps of Humor

ANCIENT HISTORY

"Have you ever studied the history of ancient Rome?" "I have," answered Senator Sorghum. "And I am impressed by the disadvantage under which that classical old government labored, through lack of modern improvements. If ancient Rome had enjoyed conveniences of radio and gas filling stations, and other methods of quick communication, results might have been different."—Washington Star.

Great Liberty

"You deny that republics are ungrateful?" "Emphatically," answered Senator Sorghum. "If anything, republics are too liberal. Every once in awhile some republic has made some historic personage a present of the entire country simply because he put up an able oration at the psychological moment."—Washington Star.

MAYBE ANOTHER, TOO

She—Does Marie still love her hubby? He—Yes. He says she writes him from Palm Beach whether she needs money or not.

Mixture

The oratory folks let slip is filled with verbal tricks. You scarce know which is statesmanship and which is politics.

A Wet Finish

Husband—Isn't it appalling? My wife insists on taking those wretched cats everywhere we travel. Fellow Traveler—Does she make you put them out at night? Husband—Invariably. Fellow Traveler—Take her to Venice.

Stage Money

First Actor—My dear fellow, I'd lend you the money if I thought you'd pay it back. Second Actor—Pay it back! Why, man, in my new play I make \$5,000 in the first act.

GLAD TO HEAR WHAT?

He—Miss Mary, it's impossible for me to tell you what I think of you. She—How glad I am to hear that!

Precautionary Remembrance

Although forgiveness may be due to some bad brother, The man who threw one brick at you Will throw another.

She Does

"What has become of Mayme?" "Sh. She is now Maybelle." "I always said that girl would make a name for herself."

Poor Memory

First Mere Man—I understand that your wife, once an ardent advocate for votes for women, doesn't vote any more. What's the reason? Second Mere Man—Oh, she forgot what age she gave when she voted the first time and she doesn't want to commit perjury.

Appropriate

"Why do the girls call that young man skit?" asked her mother. "Because there's so little to him," explained her daughter.

Extinct

Inspector (examining class)—Name an extinct animal. Small Boy—Please, sir, Tommy. Inspector—But Tommy isn't an extinct animal. Small Boy—Yes, sir. He was our cat, but the dog got hold of him.

Something to Recommend It

His Wife—When you sliced that last shot your ball clipped mother an awful wallop on her dome. Mr. Fozzle—Not so bad as I thought it was.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler pangs of colic, or constipation or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

For Wounds and Sores

Hanford's Balsam of Myrrh Money back for first bottle if not suited. All dealers. Clark's Famous Cruises NORWAY AND WESTERN MEDITERRANEAN Cruise, 52 days, \$600 to \$1300 a "Lancasteria" calling June 25 Spain, Tangier, Algiers, Italy, Riviera, Sweden, Norway, Edinburgh, Trondheim, Berlin (Paris, London). Hotels, drives, fees, etc., included. Mediterranean, Jan. 29, 1930, \$400 up. Frank C. Clark, Times Bldg., N. Y.

Garfield Tea

Was Your Grandmother's Remedy For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

Ancient Waffle Iron

Mrs. Teron Koester of Pomeroy, Ohio, has a waffle iron which is 125 years old, and which belonged to her great-grandmother, "Aunt Annie" Roosh. The "baker" is composed of two pieces of wrought iron, with the handles riveted to them and so hinged together that they hold a cake about the size of a man's hand. The back of each side of the mold carries ornamental figures that were intended to give the cake a fanciful appearance. The iron is opened and closed by means of a hinge, much like the operation of tongs. It weighs 20 pounds.

The Reason, Too?

Wife—You think so much of your poker that you don't even remember the day we were married. Hubby—I do. It was the day after I held that straight flush.—Every body's Weekly.

A Costly One

She—Have you ever had a lesson by correspondence? He—Yes. I never write to women now.—London Calling.

A WOMAN'S HEAD

is level and her judgment good when she puts her faith in Dr. Pierce's Favorite Prescription. There is no beauty without good health. Nobody expects to become a really beautiful from the use of complexion beautifiers. Bright eyes, clear skin, and rosy cheeks, follow the use of the "Prescription." All dealers. Every woman requires a tonic and nerve at some period of her life. Whether suffering from nervousness, dizziness, faintness or general debility, the "Prescription" benefits. Mrs. Mary Anderson of 651 So. Main St., Postville, Idaho, said: "On several occasions I have taken Dr. Pierce's Favorite Prescription as a tonic and nerve and it was very beneficial. During pregnancy, it is so strengthening and keeps the nerves in good condition."

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balm. Makes the hair soft and curly. 50 cents by mail or at druggists. Hancock Chemical Works, Pathecoque, N. Y.

NEWS REVIEW OF CURRENT EVENTS

Engagement of Anne Morrow and Lindbergh—Doings of Congress.

By EDWARD W. PICKARD

JUST as he was landing at Havana on his return flight from the Canal Zone, Col. Charles A. Lindbergh's engagement to Miss Anne Spencer Morrow was announced by the young lady's father, Dwight W. Morrow, ambassador to Mexico. The colonel declined to talk about it to the reporters. It was understood in Mexico City that he would fly there late this month and that, though no plans had been made for the wedding, it might take place this spring. Anne is twenty-two years old and vivaciously pretty. She is a graduate of the Chapin school in New York and of South college, and while in school showed ability to write quite good poetry. When Colonel Lindbergh was in Mexico City as the guest of Ambassador Morrow he took Anne for several short flights, but her sister Elizabeth also was his passenger, and the gossip reporters were uncertain then as to which one might become his fiancée.

Colonel Lindbergh had no sooner landed at Miami from his Central American trip than he started out again on two rescue flights. The first was over the Florida keys in search of a plane from which two persons were taken by a ferry boat after it was forced down; the second was made to try to find Pilot Harry Rogers, who had gone in search of the first plane and was himself missing for a time. Concerning the Panama mail route he had just inaugurated, he said: "There is not a great deal to be done before daily service can be inaugurated between Miami and Panama. Better facilities for communication are being installed and other facilities to aid flying are being put into condition to augment the service."

As to passenger traffic between the North and South Americas, Colonel Lindbergh said it was not planned to haul passengers "until the most minute details of transportation and communication have been worked out."

THERE is now no doubt that Hoover and Curtis were elected President and Vice President of the United States last November. Congress in joint session last week received and counted the electoral vote and Vice President Dawes announced that the tally sheets showed the Republican nominees had received 414 electoral votes and the Democratic nominees 87. Thereupon he formally declared Hoover and Curtis elected. These proceedings were supposed to be solemn and stately and the Vice President had requested that there be no applause or other manifestation of approval or disapproval, but the senators and representatives soon broke loose and indulged in gales of laughter and vigorous applause, enjoying especially the confusion and mistakes of some of the tellers and declining to be subdued by General Dawes' gavel-battering.

PRESIDENT COOLIDGE feels that the major work of his administration is ended and already is packing up his belongings for return to his home in Northampton, Mass., where he probably will reside for at least a year. He and Mrs. Coolidge expect to leave the White House after the afternoon of March 4, immediately after the inaugural ceremonies, and because of the illness of Mrs. Coolidge's mother they will lose no time in starting northward.

On Wednesday the President signed the bill for the building of fifteen cruisers and one airplane carrier and approved the appropriation of funds to begin the construction of these vessels at once.

Naval officials and adequate navy advocates in congress hailed the approval of the bill with enthusiasm. Secretary of the Navy Wilbur expressed gratification. In his opinion, the construction of the fifteen cru-

ers marks the beginning of a wholesale replacement program which will result in the modernization of the fleet and eventually in an American navy second to none.

Representative Fred A. Britten, chairman of the house naval committee, said his committee will begin new hearings next fall to determine how many more ships should be authorized as replacements for the rapidly ageing battleships, cruisers, destroyers and submarines in the battle and scouting fleets.

PRESIDENT-ELECT HOOVER had been expected to remain in Florida until a day or two before the inauguration, but last Wednesday he announced that he had a lot of work to complete in Washington in preparation for the new administration, and therefore would leave Miami for the national capital on February 18 or 19. The latter part of the week was devoted to a trip of inspection through the flood and reclamation district of central Florida. The Edison birthday party at Fort Myers on Monday was a great success and was much enjoyed by Mr. Hoover; but the weather was too blustery for good fishing on the west coast.

Secretary of Agriculture Jardine removed himself from the Hoover cabinet possibilities by the announcement that he had accepted a position as counsel for the Federated Fruit and Vegetable Growers, with his offices in Washington.

CONGRESS was asked by the President to appropriate \$9,210,500 for the construction of new public buildings in 92 cities scattered throughout the country. This is the amount needed to meet building costs during the first year. The projects when completed would represent an outlay of \$49,700,500. Mr. Coolidge also approved budget bureau estimates for the expenditure of \$48,000 to remodel and furnish the weather bureau station at Mount Weather, Va., as a summer home for Presidents, this plan being in accord with his suggestion made last fall. Mount Weather, near Bluemont, Va., and about 60 miles from Washington, is an 84-acre tract, high in the Blue Ridge mountains, on which the weather bureau, until a few years ago, conducted some of its most important observations.

INTERNATIONAL experts selected to consider the matter of German reparations began on Monday in Paris the conference that is expected to result in a revision of the Dawes plan, the fixing of the total sum Germany must pay and the subsequent evacuation of the Rhineland by the allies. Owen D. Young, one of the unofficial American delegates, was the unanimous choice for chairman, and after the necessary ceremonies he lost no time in settling the commission to work. Germany had its innings first and Dr. Hjalmar Schacht, president of the reichsbank, presented his country's case in a way that seemed to make an excellent effect on all the delegates except the French. He was moderate and made no specific demands but insisted Germany cannot continue to pay the annuities of two and a half billion gold marks provided for by the Dawes plan. He was questioned closely about the tax burdens of Germany, which the allies assert are less than their own. He offered to prove that this was not true. Doctor Schacht and his associates continued through several days. Correspondents said it was becoming apparent that the French and German points of view were not so divergent as was feared and that the success of the conference seemed assured.

MOST notable of the week's deaths was that of Lily Langtry, Lady de Batho, who was for years the leading beauty of the English stage. She passed away at her home in Monte Carlo. The Jersey Lily, as she was known, was a good though not a great actress, and was also a clever theatrical manager. In the days when King Edward was the prince of Wales and her admiring friend she was prominent in English social affairs, and she was also well known in the United States.

John II, prince of the little state of Lichtenstein and dean of ruling monarchs, died at a ripe old age and was succeeded by his brother.

ROME was en fete the beginning of the week because of the signing on Monday of the peace pact between the Vatican and the Italian state. There were imposing ceremonies, gay celebrations and exchanges of rich gifts and decorations. The general feeling throughout the world is that Premier Mussolini scored a great triumph in the negotiation of the treaty, settling an old and troublesome dispute with little expense to Italy.

again voted to depose him as commanding general, and then elected Commissioner Edward John Higgins to succeed him. The final count was 42 votes for Higgins and 17 for Evangeline Booth, head of the Army in America.

General Higgins has been chief of staff since 1919. He was born at Highbridge in Somerset and educated at Doctor Morgan's school at Bridgewater, Somerset.

LEON TROTZKY, with his wife and two children, was taken to Constantinople on a Soviet steamship, secretly landed and confined closely in the Russian embassy. It was said the authorities feared he might be attacked by "white" Russian refugees that are numerous there. The campaign against Trotzky sympathizers in Russia continues, the latest incident reported being the closing of the Kronstadt naval academy and the expulsion of its 3,700 students. Twenty of their leaders were arrested as Trotzkyites. A Leningrad paper says the Soviet war commissariat discovered a lack of loyalty among the students, who are openly discussing the possibility of a new Napoleon appearing in Russia to save the country from the hands of the Communists.

REV. DR. E. S. SHUMAKER, superintendent of the Indiana Anti-Saloon league, is now milking cows and cleaning their stalls on the state pen farm at Putnamville. He suddenly abandoned his long fight against the saloon on Saturday, after the sentence of sixty days on the farm for contempt of the Indiana Supreme court, and began serving his term. Shumaker was cited for contempt in 1926 by Arthur L. Gilliom, then attorney general, following his criticism of members of the State Supreme court in the American Issue, the Anti-Saloon league publication. He was found guilty by a Supreme court vote of three to two.

MISS BOBBY TROUT went up in the air over Los Angeles and regained the laurels taken from her by Miss Elinor Smith of New York. Bobby not only established a new endurance record for women aviators—17 hours 5 minutes 37 seconds—but also captured the women's night flying and distance records. Bobby is twenty-three years old and flies a Golden Eagle monoplane.

PRESIDENT PORTES GIL of Mexico narrowly escaped death last week when his train was blown up by dynamite in the state of Guanajuato. The explosive had been placed on the track at a point where it ran over a bridge. The fireman was killed instantly when the engine overturned and two coaches were derailed. Another bomb, unexploded, was found fixed to the track. The attempt at assassination followed closely on the execution of Jose Toral, who murdered General Obregon, and in official circles in Mexico City it was said to be the work of the League of Feligions Defense. Several members of that organization were arrested near the scene of the explosion, and it was said a number of prominent persons would be taken into custody.

MOST notable of the week's deaths was that of Lily Langtry, Lady de Batho, who was for years the leading beauty of the English stage. She passed away at her home in Monte Carlo. The Jersey Lily, as she was known, was a good though not a great actress, and was also a clever theatrical manager. In the days when King Edward was the prince of Wales and her admiring friend she was prominent in English social affairs, and she was also well known in the United States.

When Frank Davis arrived in Elgin, Ill. from Chicago to referee a basketball game he found a woman had switched suitcases with him, leaving him one containing a red evening dress and red shoes and stockings.

OPPORTUNITY!

I have read that opportunity must be seized by the forelock, that it is next to impossible to hold on to it after it has passed. This is true of mining ventures, especially. Three things are necessary: a little money, a little nerve, and a little patience! The more one has of each of these, the more surely and more rapidly will results be obtained. Believing as I do in the future of this country, it has been absolutely unexplainable why more investors have not flocked in to seize the opportunities presented to the first comer; and, a thing unusual, opportunity has stood still for the benefit of the passer-by. It is a matter of fact that properties are now being offered all over the county at prices only a fraction of those formerly demanded, due to a lack of morale, caused by the preaching of the new joy-riding doctrine. But just what the joy-riders are going to do for the luxuries, or even comforts, of life if all the world decides to live as birds of passage, is what troubles some of us old-timers. What are the riders going to do when the metals get scarce and are no longer available at a moderate price? I have mentioned this to various persons, and it is to laugh at any notion of a scarcity of any metal. But I can well remember when my mother stored all her milk in tin, pure tin, then called

block tin, pans. Has any of the generation growing up ever seen a real tin pan? If so it must have been inherited in their families. This is no joke. And we are faced by a like security of copper. It seems to me. Children growing up now, when they are old, may recall that many things were made of copper, and could be bought cheaply, and will at that time in the future, pay what would now be considered exorbitant prices, or probably not be able to get it at all. I have looked over the figures of past production, and I find that since 1845, when statistics were first kept, to now the world has produced only enough copper to last that same world a dozen years at the PRESENT rate of consumption. And there seems to be some doubt as to whether there is a score of years' supply in all the mines now known. Such figures are always subject to change as new discoveries are made, but the situation as to copper is critical, and not much less so for lead and zinc, all useful metals that will probably be in fashion as long as manufacturing continues among the activities of men.

All this brings me to advise that now is the time to secure your mine, if ever. Mines can be obtained at negligible prices right now, a situation that will not last once it dawns on the business element that the conditions of metal supply are as bad as they are. If you do not know where you can get your mine, write me, telling me what kind of a mine you would like to get, and I believe I can fit you out with what you want. Not something for nothing, you understand, but double and treble value for your money, and usually on terms that will prove attractive to persons equipped with the three essential requirements as above set forth. Address:

"IT PAYS TO ADVERTISE"

Big in every way except in price

The 6-Door Sedan, 1928, Body by Fisher

A great furor is being created in the automotive world these days. People are all agog about a new low-priced six that offers every desirable big car quality. It is the New Pontiac Big Six. . . Since the Pontiac Big Six went on display, men and women of every type have been coming to see and drive it. But most of the buyers belong to one particular group. They have taste. They love fine things. They want to step up the quality of their automobiles—and the New Pontiac appeals to them—for it's big in every way except in price!

Prices \$745 and up, f. o. b. factory, plus delivery charges. Bumpers and rear fender guards regular equipment at slight extra cost. Check Oakland-Pontiac delivered prices—they include lowest handling charges. General Motors Time Payment Plan available at minimum rate.

WALTER P. CHRYSLER'S TRAFFIC TALKS

STARTING THE CAR IN WINTER

A slow get-away in traffic in winter time is a waste of time to everyone. The modern car is built to respond instantly to traffic movement if handled correctly. In warm weather, when the motor is warm and the oil running freely, it is fairly easy to get a car which has stood idle for sometime into instant motion.

But in winter when the motor is cold and the oil thick, a car which has stood for some time out doors should be started with extreme care and no attempt made to join the throng of traffic until the engine is running smoothly.

The better the car is at starting, the more care should be given it. When a car stands idle the oil has drained down into the crank case and it takes a few seconds for it to lubricate freely. Even if the car starts easily do not move from your parking place at once and join standing traffic, counting on racing the motor while waiting in order to lubricate.

Take a few moments while still parking to gradually warm up your motor. Racing the engine under any condition is very bad, but it is inexcusable when the motor is cold.

Do not enter traffic until your motor is running quietly and normally, with all starting aids and extra gas flow cut off. These mechanical aids to starting are strictly for starting and not for steady running. Until you can dispense with them your car is not ready to move. Remember that too much pressure on the starter will wear your batteries down.

If you have trouble in starting your car in winter, ten chances to one something is wrong with your method. Consult your dealer or a good mechanic and see what bad habit you have formed. Too much gas or too little, at the wrong time, makes all the difference between getting away in good time and being stalled.

About Women

Mrs. Emma Yearlan of Lemhi, Ida., known as the "sheep queen" of that state, has 5000 head in her flocks, from which her yearly gross income is about \$100,000.

Miss Anne Spencer Morrow, daughter of the American Ambassador to Mexico, will shortly become the bride of Colonel Charles A. Lindbergh.

Magistrate Margaret Patterson of Toronto will be judge of the new "family court" recently established in that city.

Miss Jolly Ray, 556-pound circus fat woman, was placed on board a steamer bound for Australia by means of a freight hoist which swung her over the ship's side.

Cleans

as it polishes furniture and floors

What's New?

Street cars in Cologne, Germany, are equipped with loud speakers for announcing street names.

The world's largest loom, designed to weave a seamless rug 216 inches wide, is being constructed in Worcester, Mass.

An apparatus for detecting gas in mines has been invented which will avoid the necessity of using canary birds for that purpose.

A German scientist claims the synthetic production of blood pigment which may be used in treating gas poisoning and asphyxiation from smoke.

Snappy Stuff

To force a tenant to move, F. C. Goodyear of New Orleans carried away the door of the house, but a blanket was hung up in its place.

A quarrel with Miss Constance Rior of St. Paul developed into a hair-pulling match and a large section of Miss Ella Johnson's scalp was torn off.

R. V. Colston of New York was evicted by his landlord because he played his piano until 3 a. m.

Forty-six women appeared to accuse Hugo Schwartz of Moscow of illegally divorcing them.

A three-section locomotive built in Germany will take sharp curves of less than 300 feet radius.

It is said that 184 useful products may now be made from field corn.

Lady Bailey, famous British aviatrix, recently flew alone from South Africa to England.
