

PATAGONIA UNION HIGH SCHOOL
Will Present

'Looks Like Rain'

THURSDAY, MARCH 21ST, AT THE OPERA HOUSE
PATAGONIA, ARIZONA

Show your patriotism to your High School by being "among those present."

PERSONAL AND SOCIAL

Miss Rosemary Drachman, talented daughter of Mr. and Mrs. Mose Drachman of Tucson, is a guest at the ranch of Miss Grace Van Osdale in San Rafael Valley. Miss Drachman is a short story writer, whose works have appeared in several of the leading magazines. She is now engaged in writing a one-act play, which will be staged at Stanford University, California.

The postoffice is receiving a coat of paint on the interior, which will add greatly to its appearance.

Mrs. A. E. Buchenberg of Toledo, O., arrived here Sunday to spend a few weeks at her ranch, near town. She expects to leave for Ohio again about the first of April. Her daughter, Miss Margaret Buchenberg, who is a student at the University of Arizona, is expected home over the weekend.

Mr. Burns, proprietor of the Commercial hotel was a business visitor to Tucson Thursday.

On Wednesday of this week Patagonia and vicinity was favored with a snowfall. The snow was preceded by rain. No wind nor cold weather to mention; just suitable to add moisture to the range.

Mrs. Pete Bergier, Mrs. A. B. Sorrells, and Mrs. G. N. Sayre, of Harshaw were visitors to Nogales Tuesday.

The Patagonia Ice and Light Plant received a coat of paint this week.

Mrs. A. S. Henderson was a county seat visitor last Saturday.

The infant son of Ira Rothrock was taken to a Nogales hospital last Friday, suffering from a badly infected throat. It was necessary to insert a tube in the child's throat to facilitate breathing.

Mrs. C. J. Trask, wife of Customs Inspector Trask of Lochiel, was a county seat visitor last Saturday.

Mrs. W. H. Harrison of Vaughn was a week-end visitor in Nogales.

Mr. and Mrs. C. L. Northcraft were Nogales visitors Tuesday.

Fred Valenzuela, customs inspector at Naco, spent the week-end in Patagonia visiting relatives.

Elbert Kinsley of San Rafael Valley was a Patagonia visitor Saturday.

March 21 the Patagonia Union High school will produce a play at the opera house, entitled "Looks Like Rain," which is being coached by Miss B. G. Simons, commercial teacher.

State Mining Notes

Walker—Bann's mining property development will include pumping out and repairing the 350-foot shaft.

Outman—Work has been resumed on the property of the Tom Reed Gold Mines Company.

Hayden—The Christmas Copper Co., operating property near Gila Canyon, will build a mill.

Jerome—The Jerome Grande Copper Co. is pushing development work.

Patagonia—The 3-R is taking out and shipping some good copper ore.

Globe—The Miami Copper Company is installing new equipment to obtain larger metal output.

Benson—Work has been resumed at the oil well here to completely test the district.

Kingman—Arabian mine, situated in Union Pass, completes new mill.

Patagonia—Morning Glory mine is excavating for foundations, machinery etc. for its new mill, which will be built immediately. A carload of cement was recently hauled to the mine by the company's trucks.

Hackberry—the P. & M. mine, in Muske mountain, 30 miles north of here, completes 100-ton milling plant.

Chloride—Monarch Lead Co. operating old Tennessee property, planning mill and other construction work.

Bisbee—Calumet & Arizona Mining Company of Bisbee consolidated with New Cornelia.

Mexican Federals Forcing Way North

Mexico City, March 14.—General Plutarco Calles, who is directing federal government operations in an attempt to stamp out the current rebellion, has ordered soldiers who last week terminated the revolt in the state of Vera Cruz, to go to Irapuato. That town is an important rail junction in the state of Guanajuato.

The task for these troops will be suppression of activities by insurgents whose motive, according to government sources, is religious. Mention of that situation in the government bulletin gave the first prominence to that movement since the military rebellion broke out in northwest and southeast sections of the republic on days ago.

The government bulletin said that Governor Ramirez of the state of Jalisco had organized two regiments of volunteers which, with the troops brought from Vera Cruz, would be ample to hold the Guanajuato disturbances in check.

The government's communique indicated that the most significant activities in the rebellion are taking place along the American boundary of the state of Sonora. That region has been considered a possible back door for the escape of rebel leaders in case their revolt failed.

The capture of Naco, an important intermediary rail point between the rebel forces of Sonora and Chihuahua, was said by the government to have been a heavy blow to the rebellion. Imminent fall of Agua Prieta was predicted and it was said that this, taken with the capture of Naco, would completely sever communications between the Sonora and Chihuahua rebels.

The government claimed that the rebel leaders have been thoroughly alarmed by this situation, and that many of them have been transferring their funds to banks on the United States side of the border. The object of this would be to give them money for subsistence when they are forced into exile by the collapse of the rebellion.

The communique announced also that Saltillo, in the state of Coahuila, was occupied by the federals. The rebels had held the city for nearly 10 days, but the government announcement said that they fled without firing a shot.

It was surmised that the Saltillo rebels were making their way toward Torreon, where Gen. Gonzalo Escobar, commander-in-chief of all rebel forces, has been concentrating troops to resist the advance of General Calles. The rebels have held Torreon since the start of the outbreak and are supposedly strongly entrenched.

CHESHIRE AUTO CO. LOSES 24 CARS IN FIRE IN NOGALES

Nogales, March 13.—Twenty-four automobiles valued at several thousand dollars were destroyed early this morning when fire broke out in the Palace pool hall and spread to the Busy Bee candy store, the Stag Barber shop on Morley avenue and an automobile storage room owned by the C. C. Cheshire Motor Co. on Nelson avenue across the street from the burning buildings. Most of the damage to the Nelson avenue building was confined to the auto storage room and the building's roof. The building was covered by insurance.

Four of the automobiles were new trucks, three of them insured. The fourth truck was owned by a Chinese merchant of Nogales, Sonora, who had stored it in the garage for safekeeping. No serious damage was suffered by the candy store or barber shop, which were open for business today as usual.

The Livestock Situation

Los Angeles, March 8.—(Special to The Patagonian.)—The best minds of agriculture have for many years been attempting to solve the troubles that seem to beset those engaged in agriculture. There has been more or less idle talk - yet the fact that agriculture is in need of relief is a matter beyond question.

The editor of a western newspaper comes forth with the thought that the key to the puzzle is likely to be found so simple that it would have come long ago if we had not lost ourselves in the woods trying to find a tree. He then goes on to point out that agriculture as a whole has never been satisfactory unless the live stock business was profitable, and that the present tendency towards agricultural recovery was not noticeable until values of live stock had reached higher levels.

As a matter of fact, Western agriculture and Western business depends to a great extent on the prosperity of the live stock business. Live stock has always been and probably always will be the best means of marketing our grain and forage crops and without that means of transportation and marketing, the farmer must resort to artificial methods of disposition of his crops, resulting, in the end, in a substantial decrease in his income; hence, in his purchasing power. An important feature in this connection lies in the fact that off-grade hay and grain may be utilized to the best advantage when fed to live stock whereas if sold on the market, a material reduction would be made in the price. Even the cotton farmer depends, to a great extent, upon the stockman, because cottonseed cake and meal constitute important live stock feeds and these by-products have much to do with making cotton production profitable.

We can go almost without end, pointing out the connection between live stock and profitable crop production either as the most available way of maintaining soil fertility or the best way to erode our crops.

Then, too, a scarcity of live stock is likely to encourage the use of land for agricultural crops coming in direct competition with land already devoted to that purpose, and producing enough to meet all practical needs. In many cases, the land is not suited to anything but pasture with the result that it produces a low grade product sold, however, in competition with the better quality, and reducing the price levels all along the line.

When it is generally realized that live stock production occupies an important place in the agricultural setup, there is little doubt that conditions may become more stabilized. There is too much of a disposition in the Western areas to specialize in certain crops. Too many land owners hope to make a "killing" by planting a specialty crop, which has a limited market, resulting in over-production and the inevitable price slump. When we begin to recognize that agriculture is a business, selecting and continuing to produce on certain lands adapted to such use, a commodity for which there is a constant demand, we will then begin to stabilize.

Our whole business structure is based upon the law of average so that the "in and out" and the fellow who seeks the highest prevailing price on a specialized commodity is, in most cases, courting disaster as well as disturbing our whole scheme of production and distribution. When it is generally understood that cattle, hogs and sheep offer a practical means of soil fertility and farm diversification, then agriculture as a whole may be

come more profitable. Farm relief would seem to lie in producing stable crops—and in producing quality products. Poor quality foods, whether we refer to meat, fruits or what not—are always the hardest to sell. Live stock on the smaller farms will provide the fertilization which will do much towards producing such quality products.

Then, too, a section which is importing large amounts of a staple commodity which can just as well be grown at home is creating a great economic waste. For instance, the importation of millions of dollars' worth of hogs and pork products from the Middle West is economically unsound, when there is plenty of feed and plenty of room for the growing and feeding of hogs on the Pacific coast with the most favorable climatic conditions.

Farm relief undoubtedly will come only when agriculture takes stock of itself. The government can help through the dissemination of reliable crop and market information and through valuable aid in teaching us to grow better products. Livestock production and feeding is important to the average agriculturist because it is a means of cash income the year around, instead of cashing in only once a year, as in the case with most farm crops.

MRS. MINNIE ASHBURN DIES IN TUCSON THURSDAY MORNING

Word was received here Thursday about noon, announcing the death in Tucson of Mrs. Minnie Ashburn, widow of the late Oscar F. Ashburn, who was killed in an automobile accident a few years ago. Mrs. Ashburn was about 56 years old at the time of her death.

Details of the death of Mrs. Ashburn were unavailable at the time of going to press.

She is survived by four sons, Glen Perry of Patagonia, Guy Perry of Tucson, Miles Perry of Los Angeles, and Marshal Ashburn of San Diego; and two daughters, Mrs. Robert Laney of Nogales and another married daughter, living in Phoenix.

The Ashburns were prominent cattle raisers of this section for many years, being partners of in the firm of M. & Ashburn. Following Mr. Ashburn's death the cattle and land interests were purchased by Henry Boyce and brothers.

ARIZONA'S DAILY AIR MAIL

Washington, D. C., March 14.—The postal department has called for bids for a Los Angeles-Dallas air mail line. This announcement carried additional information that the new line will be inaugurated as soon after March 15 as the bids are checked and the contract awarded.

Air mail reaching Phoenix from any part of the state will be given the same treatment as that offered for transmission by Phoenix postal patrons. It is an air mail service for Arizona.

Definite assurance has been received by government representatives that the projected Los Angeles-Dallas mail line will serve points in Arizona and Texas.

While official specifications are lacking, it is understood postoffice department plans provide for daily east and west service on the line. That would mean one west-bound and one east-bound mail plane into Arizona each day.

Establishment of this line will mean a saving of at least 48 hours in mail service to points east of Ohio and a saving of at least 36 hour air deliveries to Chicago and points through the middle west.

LAWSUIT OVER COOLIDGE DAM

Los Angeles, March 13.—Colonel George Sidney Binkley, who claimed that his patented invention of the multiple dome type construction was infringed upon by the builders of Coolidge dam on the Gila river in Arizona, yesterday filed suit for damages in federal court here, and asked injunctions against all projects considering use of the method.

The Coolidge dam, \$6,000,000 structure recently completed, is said to be the ultimate in modern engineering.

Mrs. Emma Steel of Columbus, O., was sentenced to serve four hours a day in the city jail for petty larceny.

Of interest to every car owner:

A statement of General Motors' Policy

by Alfred P. Sloan, Jr., President

THE public has been visiting the automobile shows in the larger cities of the country to see new models.

Suppose you could drop a curtain over the 1929 automobile shows and raise it immediately upon the shows of ten years ago. How vividly the changes would then appear!

Go back five years, or even three, and the contrasts are amazing. So fast have the improvements followed one another that every year has offered you more for your automobile dollar—in performance, in comfort, in safety, in beauty and in style. Never was this fact quite so impressive as in the cars now on display.

This is real progress, and inevitably General Motors has been a leader in it. You cannot have hundreds of engineers, in one organization, thinking and working day and night without knowing more about making automobiles than was known the year before. You cannot have great Research Laboratories, the Proving Ground and the unmatched resources and skill of Fisher body without developing constantly better processes and new ideas. The patronage of the public makes possible all

this machinery of betterment; so the public is entitled to each improvement as promptly as it has been proved.

In this way came the self-starter, the closed body, durable Duco finish, four wheel brakes. By the same process one of the remarkable feats in industrial history has just been effected: Chevrolet has been transformed into a six-cylinder car within the price range of the four—almost overnight. Similarly, the new brakes and transmissions of Cadillac and LaSalle are a fundamental improvement; while the new models of Buick, Oldsmobile, Oakland and Pontiac all represent values that could not have been offered before.

Such progress, born of the inherent ambition of an organization of active minds to do better and to give more, is of benefit to all. It offers you more for your money with each succeeding year. It gives you more value for your present car when you trade it in.

This is our policy. This is real progress.

Alfred P. Sloan, Jr.
ALFRED P. SLOAN, Jr., President

Detroit, March 4, 1929

AN INVITATION

General Motors would like you to see the progress which it has made during the past year and which is represented by its new models. More than that, it invites you to peep behind the scenes at the methods employed to assure further progress. Simply check on the coupon below the products in which you are most interested. Full information will be sent without obligation plus a valuable little book which tells the inside story of the General Motors institution. This book—"The Open Mind"—has real value to every one owning or planning to buy a car.

DAD AND I

Here are pictures of wonderful nests. The Sociable Weaver Birds are natives of South Africa. They attach their nests to each other as honey bees do their cells. They cover the nests with a common roof, weaving it of blades of grass. Year after year new nests will be built under the old roof as many as 600 or 700 nests having been seen under one.

Here is another wonderful nest built by the family of Weaver Birds.

Oven Birds of South America. The Oven Bird builds its dome-shaped nest of clay mixed with hair, grass or fine roots.

COPPER PROSPERITY

After six years of metal depression, following the World War, copper has gradually emerged from a position of uncertainty to one of commanding supremacy.

With the rapid expansion of the use of electrical energy the demand for the red metal is widened, because electricity and copper go hand-in-hand.

While the price of copper may go slightly higher, it is not the opinion of those who are in close touch with the situation that it will rise rapidly to a level greatly higher than the present one.

Sizing up the situation, we naturally conclude that the outlook for the copper industry is especially bright. The price is not so high that it will discourage the use of the red metal and bring into use substitutes.

COST OF EDUCATION

Taking note of the widespread criticism of educational methods and the large sums expended for schools of all kinds, President Glenn Frank of the University of Wisconsin admits that improvements in curricula and methods ought to be made, yet he points out that on the whole the money devoted to education is a good investment.

He submits some figures which tend to show that the proportion of tax money spent for schools is by no means excessive. He states that less than one-fourth of all tax revenue goes for the support of public elementary and secondary schools.

The main point, however, is not whether we are spending too much for education, but whether we are getting our money's worth for what is spent. The right answer probably is that we ought to spend more than we do, provided that the money so spent be devoted more to the essentials of education and less to frills and flub-dub.

MILK IS GREATEST "CROP"

The importance of the dairy industry of the United States is interestingly set forth in some recent comparisons made by Jams E. Boyle, professor of rural economy at Cornell University, which show that milk is by far the greatest farm product in value.

In value per capita of population the figures are as follows: Milk, \$25.23; corn, \$15.91; hogs, \$14.21; cotton, \$11.06; hay, \$10.39; poultry, \$10.09; wheat, \$8.53.

Thus it will be seen that the dairy "crop" is nearly equal to the corn and cotton crop combined, and greater than those of corn and wheat combined.

The consumption of dairy products, including milk, butter, cheese and ice cream is rapidly increasing, due to the education of the public to their food and health values.

Dairying, combined with hog and poultry raising, should be an important feature of every farmer's program.

President Hoover's strong desire is to abolish poverty. We are willing to be experimented upon in the interest of science.

Jack Sharkey and Young Striffling should go into the movies. The way they hugged each other indicates that they would make great screen lovers.

HOW MANY ARE A FEW?

In a somewhat high vein, the Christian Science Monitor recently asked and discussed the question, "How Many Are a Few?" No conclusion was reached, as there appeared to be no definite authority which might be cited to establish the answer.

Later a correspondent in Newark called attention to the fact that a small Scotch boy had found the answer centuries ago, according to a story, which may be briefly related thus:

The boy was entitled to "a few apples" as a prize for memorizing more verses of Scripture than any other member of his Sunday school class, whereupon the teacher gave him three apples. The boy demurred, asserting that he should have eight apples. Pressed for his authority, the lad triumphantly produced it from no less a source than Holy Writ, quoting 1 Peter, 3rd chapter, 20th verse, in which it is said:

"Few, that is, eight souls were saved by water."
His contention being incontrovertible, the boy got his eight apples. And, therefore, if anyone should ask, a few means eight.

THE CURE OF CURIOSITY

(By Don Carico, Grammar School)
Once there was a very curious little boy whose name was Johnny Reed. Johnny was always asking foolish questions, such as, "Why does a cow breathe?" "Which one would I be if I were twins?" etc.

One day Johnny went downtown to find out something he didn't already know. A nearby shoeshop attracted the boy's attention. He quickly crossed the street and entered the building.

"Hi," he asked the cobbler, "what is leather made of?"
"Hide," said the man locking up from his work.

"Hide?" the boy asked. He was puzzled. "Why should I hide?"

"Hide, hide," the man explained. "The cow's outside."

"What do I care?" replied Johnny, more puzzled than ever. "Let the cow come in; I'm not afraid."

"Son," said the older one, "hide is the outside of the cow. In other words, the cow's skin."

"Oh!" said Johnny, and went home much wiser.

That afternoon, in the garden, Johnny and his mother were walking among the flowers, when a bee came buzzing by.

"Mother," said Johnny, "does a bee have tonsils?"

"I don't know," his mother replied, "I never was a bee."

"Why does a church bell ring, Ma?" the curious one asked.

"There is an iron rod that is suspended from the top of the bell and swings back and forth. It hits the side of the bell and the result is a ring."

Still he was not satisfied, and remained that way until Saturday. On that certain Saturday Johnny saw a peculiar looking bird, and his great curiosity was greatly aroused. It ran rather than hopped, and Johnny followed it. He would almost have his small hands on it, and then it would run out of his reach. It ran to the side of the hardware store and, with amazing ease, started to go up the side of the building.

Johnny found plenty of good hand holds, and was soon after the bird. Up and up he climbed; he was gaining on the purrped bird. On and up. He did not realize the distance he had ascended until he reached the top of the building. He looked down and gasped. The distance to the street was over a hundred feet.

Johnny thought no more of the bird. He wanted to get down, but going up was easier than coming down. He had lost his nerve. He was stranded on the roof, and there was no way to get down. He was sure he would fall before he had gone a foot.

He went to the other side of the building. Far below he saw people walking around the building when here was the creak of a nail and snap of a board, and before Johnny could think what was happening he was falling through the air. His progress was rudely checked by a rippling of cloth.

He was hanging on a nail some 40 feet above the ground.

He looked below. Going up the street was a load of hay in a truck. If it had been on the other side of the street it would have been directly under Johnny.

His progress was checked, but not for long. Fifty pounds of small boy can't rest on a nail for long. The nail gave way and, of course, Johnny came whirring down. He yelled and grabbed at the air. Then suddenly he hit something, was bounced into the air and came down right in the load of hay.

When Johnny recovered, in his mother's arms, he found that he had hit a canvas awning and bounced into the truck.

Johnny was the hero of the day, but he always remembered this little incident and afterwards was never quite so curious.

By way of last words, don't forget

let it's up to Arizona business men to show how and why "It Pays to Trade at Home" during "Trade at Home-Use Arizona Products" week next month.

Eleven southern states added 331,629 cotton spindles last year, of which 163,504 were installed in Alabama.

Big bootleggers may approve the more severe penalties on the theory that it will discourage piker competition.

Airplane models are tested in a wind tunnel. They might get a dandy tryout in the Senate chamber.

When a woman is ambitious for fame, she must choose between earning and marrying it.

LEGAL NOTICES

List 34695 "C" NMB RESTORATION TO ENTRY OF LANDS IN NATIONAL FOREST

Notice is hereby given that the lands described below, within the Coronado National Forest, will be open to settlement and entry at the United States Land Office at Phoenix, Arizona, under the provisions of the homestead law and act of June 11, 1903 (34 Stat., 233), on August 7, 1929, by any qualified person in the absence of entry by persons coming within either of the two following classes:

(1) Persons named after each tract upon whose application the lands were listed, if any, who, in order to avail themselves of the preference right, must file their application with a sixty days prior to date of opening; (2) Ex-servicemen of the war with Germany, who, in order to avail themselves of the preference right conferred by Congress, may file application within one hundred ten days prior to date of opening. All such applications filed within the first twenty days of this period will be treated as simultaneously filed at 9 a. m. on the nineteenth day prior to date of opening. Applications by ex-servicemen thereafter, but prior to date of opening, will be treated in the order in which filed.

The general public may file applications within twenty days prior to opening date. These will be treated as simultaneously filed at 9 a. m. on date of opening, but no application will be allowed prior thereto.

"C" REI 2-1-1929, 1194174 DEPARTMENT OF THE INTERIOR, U. S. LAND OFFICE, Phoenix, Arizona, February 25, 1929.

Notice is hereby given that the plat of survey of the following township has been received in this office and will be officially filed on April 20, 1929:

Tp. 19 S., R. 15 E., G. & S. R. B. & M., Arizona. Sections 1, 2, E 1/2 Sec. 3, E 1/2 Sec. 13, Secs. 11, 12, 13 to 15, inclusive, N 1/2 SW 1/4 Sec. 16, and Secs. 19 to 36, inclusive, are within the limits of Coronado National Forest and will, therefore, not be open to entry under the general public land laws except in the case of valid adverse claims antedating the withdrawal of July 1, 1910.

The remaining lands in the township, embracing W 1/2 Sec. 3, Secs. 4 to 9, inclusive, W 1/2 Sec. 10, NW 1/4 Sec. 16, Secs. 17 and 18, is reserved from settlement, entry or disposal for the use of the Department of Agriculture for an experiment station by Executive order of July 1, 1910. These lands will not be open to entry under the general public land laws except in the case of valid adverse claims antedating the withdrawal of July 1, 1910.

"C" JTK 1-2-29, 1194174 DEPARTMENT OF THE INTERIOR, U. S. LAND OFFICE, Phoenix, Arizona, February 25, 1929.

Notice is hereby given that the plats

LEGAL NOTICE

of survey of the following townships have been received in this office:

Tps. 20, 21, 22 S., R. 12 E., and Tps. 23 S., Rs. 11 and 12 E., and T. 21 S., Rs. 11 and 12 E., G. & S. R. B. & M., Arizona.

The plat of T. 20 S., R. 12 E., represents the completion survey of the township and covers Secs. 23, 29, 32 and 33, T. 23 S., R. 10 E., and T. 21 S., Rs. 11 and 12 E., are fractional.

These plats will be officially filed in this office on April 20, 1929, from which date until July 19, 1929, both dates inclusive, the vacant public lands therein will be subject to homestead and desert land entry only by soldiers and sailors of the World War who may be qualified applicants under Public Resolution No. 29, approved February 14, 1920, and amendments thereto, and by those claiming rights superior to soldiers and sailors, where such claims are recognized by existing law. Those classes of applicants may, if they wish, file applications any time within the 20 days immediately preceding April 20, 1929, the same to be considered as filed simultaneously with those presented to this office at 9 o'clock a. m., on April 20, 1929.

All land remaining vacant on July 20, 1929, will then be subject to location, selection, or entry under any of the applicable public land laws by any qualified applicant. This class of applicants may file applications any time within 20 days immediately preceding July 20, 1929, the same to be considered as filed at 9 o'clock a. m., on that date.

The following lands are embraced in the withdrawals respectively set forth and, therefore, will not be subject to appropriation under the general public land laws, except in case of valid adverse claims initiated prior to the date of the respective withdrawals:

T. 20 S., R. 12 E., the SE 1/4 SW 1/4 Sec. 33 is embraced in Public Water Reserve No. 79, Executive order of August 27, 1921, as construed by the Secretary June 16, 1928, Interpretation No. 70.

T. 21 S., R. 12 E., Secs. 3 to 10, inclusive, 15 to 22, inclusive, 26 to

LEGAL NOTICE

35, inclusive, are within the limits of Coronado National Forest, first withdrawn for forest reserve by Proclamation of November 7, 1905. The NE 1/4 NW 1/4 Sec. 4, is embraced in Public Water Reserve No. 79, Executive order of August 27, 1921, as construed by the Secretary June 16, 1928, Interpretation No. 70.

Ts. 22 and 23 S., R. 12 E., all the lands represented on these plats are within the limits of Coronado National Forest, first withdrawn for forest reserve by Proclamation of November 7, 1905.

T. 23 S., R. 10 E., T. 21 S., Rs. 11 and 12 E. All the lands represented on these plats are within the limits of Coronado National Forest, first withdrawn for forest reserve by proclamation of November 7, 1905. A strip of land in these townships 60 feet wide along the boundary line between the United States and the Republic of Mexico is reserved for the public welfare by Proclamation dated May 27, 1917.

Approximately 2524.15 acres will be opened to entry by the filing of plat of T. 20 S., R. 12 E., and 6459.99 acres by the filing of the plat of T. 21 S., R. 12 E.

THE FIRST NATIONAL BANK OF NOGALES

NOGALES, ARIZONA

Assets Over \$3,000,000

What's New?

Radium paint on fishhooks to make
them visible to fish in the ocean
depths will be used by a scientific ex-
ploring party.

A new English device cuts, crimps
and seals the edges of piecrusts be-
fore baking.

Capable of playing tunes, a mini-
ature phonograph is no larger than a
watch.

For seen govern the heads of crowds
at athletic meets and like gatherings,
a small individual periscope has been
devised.

A new utensil for boiling eggs may
be set to sound a whistle when they
have boiled for the desired length of
time.

Made of chemically and mechanical-
ly processed clay, a new building ma-
terial is said to possess greater
strength than any previously known.

Mr. Hoover's unofficial cabinet mak-
ers may now check up their scores.

OPPORTUNITY!

I have read that opportunity must
be seized by the forelock, that it is
next to impossible to hold on to its
tail after it has passed. This is true
of mining ventures, especially. Three
things are necessary: a little money,
a little nerve, and a little patience!
The more one has of each of these,
the more surely and more rapidly will
results be obtained. Believing as I do
in the future of this county, it has
been absolutely unexplainable why
more investors have not flocked in to
seize the opportunities presented to
the first comer; and, a thing unusual,
opportunity has stood still for the
benefit of the passer-by. It is a mat-
ter of fact that properties are now
being offered all over the county at
prices only a fraction of those for-
merly demanded, due to a lack of
morale, caused by the preaching of
the new joy-riding doctrine. But just
what the joy-riders are going to do
for the luxuries, or even comforts, of
life if all the world decides to live as
birds of passage, is what troubles
some of us old-timers. What are the
riders going to do when the meals
get scarce and are no longer available
at a moderate price? I have men-
tioned this to various persons, and it
is to laugh at any notion of a scarc-
ity of any metal. But I can well re-
member when my mother stored all
her milk in tin, pure tin, then called
"lock tin, pans. Has any of the gen-
eration growing up ever seen a real
tin pan? If so it must have been in-
herited in their families. This is no
joke. And we are faced by a like

secretly of copper, it seems to me.
Children growing up now, when they
are old, may recall that many things
were made of copper, and could be
bought cheaply, and will at that time
in the future, pay what would now be
considered exorbitant prices, or prob-
ably not be able to get it at all. I
have looked over the figures of past
production, and I find that since 1845,
when statistics were first kept, to
now the world has produced only
enough copper to last that same world
a dozen years at the PRESENT rate
of consumption. And there seems to
be some doubt as to whether there is
a score of years' supply in all the
mines now known. Such figures are
always subject to change as new dis-
coveries are made, but the situation
as to copper is critical, and not much
less so for lead and zinc, all useful
metals that will probably be in fash-
ion as long as manufacturing contin-
ues among the activities of men.

All this brings me to advise that
now is the time to secure your mine,
if ever. Mines can be obtained at
negligible prices right now, a situa-
tion that will not last once it dawns
on the business element that the con-
ditions of metal supply are as bad as
they are. If you do not know where
you can get your mine, write me, tel-
ling me what kind of a mine you
would like to get, and I believe I can
fit you out with what you want. Not
something for nothing, you under-
stand, but double and treble value for
your money, and usually on terms
that will prove attractive to persons
equipped with the three essential re-
quirements as above set forth. Ad-
dress:

BORDER PATROL TO GUARD THE CATTLE AND HORSES ON BORDER

Tucson, March 14.—Impending cattle and horse raids into the range district west of Nogales, Ariz., last night sent a detachment of United States border patrolmen from here in charge of Roy Hardin, chief inspector, to reinforce patrolmen already stationed on the line.

The patrolmen left last night shortly after 10 o'clock, in automobiles, equipped for any emergency. A request for reinforcements reached the Tucson sub-division office late in the afternoon.

Fear that Mexicans might run cattle and horses across the international boundary line for food and transportation has been felt in the southern Arizona district for some time.

The international boundary west of Nogales in many places affords an excellent territory for horsemen to cross into the United States for the purpose of driving off needed stock.

Anthony Cuzzuro of Brooklyn was fined \$5 for cutting off a bulldog's tail with a hatchet.

ELGIN CEMETERY COMMITTEE NAMED

Elgin, Ariz., March 14.—(Special to The Patagonian.)—Two weeks ago a committee consisting of Mrs. Jim Praizer, Mrs. Elizabeth Neil, Mrs. Charley Reeves, A. J. Stinson, Forest Ranger and Mrs. Robert Thompson, and Mrs. Charles Everhart (secretary-treasurer), was appointed to solicit funds and make arrangements to fence the cemetery known as "Black Oak Cemetery."

The cemetery lies within the Coronado forest reserve near the boundary line between the Canille and Vaughn schools districts, just off the Elgin-Canille road.

In 1917 the national government set aside 10 acres for a cemetery, which has been deeded and will be accepted by the county as a public cemetery. The location is on what might be called "neutral" ground.

The committee has arranged to fence five acres with strong woven wire protected by two strands of barb wire at the top, with strong iron gates at the entrance. Immediately following the fencing, the ground will be laid out in driveway and lots.

The late W. F. Neil was buried in this cemetery. During his lifetime, Mr. Neil was always interested in civic affairs.

270,000 SHARES OF P. D. STOCK PURCHASED BY LONDON BANKS

New York, March 12.—A banking group has purchased in London 200,000 shares of Phelps Dodge Corporation new stock and will offer the same to American investors. It will be the first large public offering of Phelps Dodge stock.

Copper mounted to 20 cents a pound today, a jump of 1-2 cent after publication of the American Metal Bureau's statistics for February, showing a further drop in stocks of the red metal on hand at refiners. Several million pounds were reported sold at 20 cents for July delivery to domestic points.

Hyman Pilnick of Chicago was arrested 10 years after a warrant charging him with theft had been issued.

LOOKING AHEAD WITH ARIZONA

(From Arizona Industrial Congress Progress Report and Arizona Business Review for March.)

Arizona took the grand sweepstakes award for Valencia oranges at the National Orange Show at San Bernardino last month—the first time California has lost the cup since the annual show was started nineteen years ago. But everybody knows that Arizona farmers can produce the best of everything if they once take the notion.

Speaking of cups, Arizona dairy cattle also have a habit of winning the blue ribbons at a lot of places each year. That's worth advertising. We're developing diversified as well as specialized farming, and our old

friend the cow seems to have been neglected a bit of late. Dairy men, citrus growers - all kinds of farmers can find a place in Arizona, provided only that they have the capital to start and the will to work.

Arizona ranked first among all states last year in average yield per acre of all wheat, all tame hay, alfalfa, cantalopes and alfalfa seed, second in cotton and grain sorghums, and fourth in barley.

Postmaster Riggs is having a coat of paint put on the interior of the Post Office. It is a good job, adds light and cheerfulness to the office.

According to an estimate by Sir Herbert Samuel, the Dead Sea contains four billion dollars' worth of minerals.

The Treasure of the Bucoleon

By Arthur D. Howden Smith
W. N. U. Service

Copyright 1924 by Brentano's, Inc.

Copyright 1923, The Ridgeway Co.

SYNOPSIS

In New York, Hugh Chesby, English World War veteran, relates a story of a treasure in Constantinople in the existence of which his uncle, Lord Chesby, firmly believes. A cablegram notifies Hugh of his uncle's sailing for New York. At the dock Hugh and his chum, Jack Nash, learn from Watkins, Lord Chesby's valet, that the old gentleman has left with a stranger, purporting to be a friend of Hugh. A mysterious telephone message notifies Hugh that his uncle is in a hospital, dying, victim of an assassin. Before his death he babbles of the treasure, and tells them he was stabbed by "Toutou." With Lord Chesby's body, Hugh and Jack sail for England. In London Hugh and Jack meet their war buddy, Nikka Zarenko, famous gypsy violinist, and pore over some old documents seemingly having a bearing on the treasure and its location. A hidden room, referred to as the "Prior's Vault," is frequently mentioned. Monty Hilyer, man of shady reputation, but owner of a neighboring estate, calls on Hugh with a party of friends, mostly foreigners. Conversation turns on the "Prior's Vault." That night Jack awakens to find three men in the library. A fight ensues, in which one man is killed. Jack is certain one of the men is "Toutou." Jack and his friends find the hidden room, and in it documents telling that the treasure is located in the palace of the Bucoleon in Constantinople. Jack Nash's cousin, Betty King, with her uncle, is in Constantinople, and Betty, Nikka, Jack, and Watkins set out for the Turkish capital. On the way Toutou and a female accomplice kidnap Jack in an effort to learn from him where the treasure is concealed. They fail.

CHAPTER VI—Continued

"You go to the Pera Palace hotel. Meet Miss King and her father, but don't let anybody suspect that you expected to meet them. Remember, you will be watched all the time. You must have Miss King hide the copy of the instructions you sent her. Not in her trunk—ah, I have it! Let her place it in the envelope, addressed to herself. Post it restate. She can go to the post office and collect it whenever we need it. You and Watkins will not be in any danger. Toutou's people will be too busy trying to find Jack and me."

"But how are we going to get in touch with you?" asked Hugh.
"Leave that to us," replied Nikka, with his quiet grin. "Make it a custom to lounge in front of the Pera palace every morning after breakfast for half an hour; and keep a watch out for gypsies. Some morning two especially disreputable fellows will come by, and one of them will contrive to get a word with you. Follow them."
"That's a corking plan," Hugh approved warmly.

If we were followed in Marseilles, we didn't know it. We only left the railroad station to get breakfast and dispatch a telegram from Nikka to his uncle—or, rather, to an address in Seres which acted as a clearing house for the operations of this particular gypsy band.
At Piræus we had a choice of several steamers sailing for Constantinople. Nikka pitched upon a French boat that lay across the wharf from a Greek liner plying to Salonika and the Greek islands of the Aegean. The Frenchman was sailing at dawn the next morning; the Salonika boat was due to cast off several hours later.

We booked two cabins on the Frenchman, and hired a clerk at the British consulate to reserve passage for two on the Salonika boat. This arrangement made, we mustered our scanty baggage, and boarded the Frenchman just before dinner time. We dined together ostentatiously in the saloon, and after dinner, with many yawns and protestations of weariness, we betook ourselves to bed.

Our cabins were next to each other, and as a matter of fact, we played poker until long past midnight. Then Nikka and I said good-by to Hugh and Watty, and sneaked out into the companionway. Several sleepy stewards eyed us, but there were no passengers about. The quartermaster on guard at the gangway we handed a Napoleon, telling him we were obliged to land in order to dispose of some forgotten business. The watchman on the pier was conciliated in the same way. And finally, the deck-guard of the Greek liner, once his fingers were greased, and our tickets shown to him, offered no objection to escorting us to our cabin.

At dawn we were awakened by the whistling of the Frenchman as he backed out from the pier, and from a porthole we watched him disappear in the mist of the harbor. At noon the Epaminondas likewise cast off, and Nikka and I thankfully abandoned our battles with the cockroaches that fought with us for possession of the banks, and ascended to the deck.
At Salonika we entered a Europe which was new to me. If an old story to Nikka, a Europe which was blended with the life and color and form of the Orient. At the railroad station we fought for places in a first-class

compartment, which had room for six and must accommodate eight. The second and third-class cars were jammed to the doors. Women wept, children howled and men swore and struck each other and their women indiscriminately.

That was a dreadful journey, not long as regards distance, but tediously protracted in time. But the engine tolled on, and in the full tide of hours we crawled over a mountain-ridge and saw the sun rising in the east beyond the close-packed roofs of Seres.

Nikka commandeered a ficer in the station-square.

"Do you know the house of Kostabidjan the money-lender?" he asked the driver in Greek that sounded more than passable to me. "Very well, then, drive us there."

"Who is Kostabidjan?" I inquired as the driver whipped up his horses.

A dour, secretive look had settled on Nikka's face in the last two days. His eyes narrowed, and their gaze

The Watchman on the Pier Was Conciliated in the Same Way.

was fixed upon the far horizon when they were not shrewdly surveying the appearances of the people around him.

"He is the agent of the tribe," he replied shortly. "It was through him I sent word to my uncle."
I held my peace after that. At last we stopped at a gateway overhung by olive trees, and the driver got down to pull the bell-wire which protruded from an opening by the gate. The solemn clangor echoed faintly, and was succeeded by shuffling footsteps. A wicket opened, and a dark, bewhiskered face was revealed. Nikka ejaculated a single sentence in the gypsy dialect that Toutou's gang sometimes used, and the gate swung ajar. I gave the driver of the fiacre a couple of drachmas, and followed Nikka inside.

The individual with the whiskers, a dried-up, elderly man, quickly fastened the gate again, with a sidewise look at Nikka, half respect, half fear. At the door, he stood aside and ushered us into a parlor furnished in the French style. A stout, smooth-faced, elderly man rose from a desk as we entered. He started to salaam, thought better of it, and offered his hand. Then he commenced to speak in the Tzigane dialect, and Nikka cut him off.
"Speak French," said Nikka curtly. "I have no secrets from my friend, Mr. Nash." And to me: "This is Monsieur Kostabidjan."

Kostabidjan—he was an Armenian

Evil Reputation of Sargasso Sea Myth

The Sargasso sea is a region of the Atlantic ocean lying off the American coast about the latitude of Florida. It is composed of floating masses of brown seaweed, characterized by numerous small berry-like bladders. This dense gulf weed (Sargassum baciferum) is the home of many sunlit marine animals, crabs, prawns, etc. It is supposed that the weed grows on the American coast, is torn away by the waves and washed by the currents round the North Atlantic ocean into the comparatively still waters where it floats in accumulated masses. The older masses of weed slowly lose their power to float and then sink and perish. Columbus was becalmed in the Sargasso sea, and this made his men despair of ever reaching land.

Wed to Get Clean Shirts

In the course of a trial in Brighton, England, a police court judge asked a man if he never loved his wife why he married her. The accused husband's answer was, "To get a clean shirt." The astounded magistrate sentenced him to do the household washing for one year, and told the aggrieved wife to report to him if the man didn't do a good job. The magistrate's parting remark was: "Now you will have clean shirts."

of uncertain parentage, I afterward discovered, with the ingrained servility pounded into that unfortunate race by centuries of oppression—drew up chairs for us.

"Your telegram was forwarded at once to the Chief," he said to Nikka.

"But Wasso Mikail sent back word yesterday that he would be delayed in waiting upon you in consequence of a caravan of carriages which the band are running into Albania. It is an affair which has attracted his attention for the past month, and he dares not trust the work to another."

"When will he be here?"

"He speaks of tomorrow—"

"Then serve us food, and lead us to a room where we may rest."

The Armenian clapped his hands, and the old man with the whiskers—who was dumb in consequence of having had his tongue cut out in one of the Turkish massacres of the red past—returned and carried word in his own fashion of our wants to the kitchen. Presently we sat down in the dining room to a hot meal of pilaf, with chicken, dough cakes and coffee, which Kostabidjan pressed upon us officiously.

Nikka sat through the meal with a black frown on his face. I was secretly amazed by the constantly growing change in his manner, for he was normally of a uniformly pleasant disposition. But it was not until we had been shown to a bedroom on the upper floor that he unmasked his feelings. I began to undress, but he paced the floor restlessly from wall to wall. Suddenly he turned on me:

"Jack, I hope I haven't insulted you in the past twenty-four hours."

"I'm not aware of it, if you have," I returned cheerfully.

"I'm having a h— of a time," he groaned. "The two selfs in me are wrenching at my soul. There's Nikka, the gypsy freebooter, who has been dead for years, and against him fights Nikka, the artist and the man of the town. Neither of them owns me. Until the other day—except now and then when the old self reared its head temporarily—I had thought I had thrust the gypsy behind me. But I was a fool to think so, Jack. God, what a fool! Why, the music in me always was gypsy!"

"My people are not like Toutou's gang. They are gypsies. They live by their own hands, and every man's hand is against them. They make their own laws, and abide by their own customs. They take what they need, and consider it their due. I tell you this because I don't want to fly false colors with you. I lived that life when I was a boy. But I should like to make you understand that in some way, by some esoteric, involved, well-nigh impenetrable process of psychology, it is not stealing in the sense that Toutou steals. My people have been outcasts for centuries; they have been bred up in this way of life. It isn't wrong in their eyes. Not they, Jack. I can see how wrong it is, and I can see how right it seems to them."

"You don't need to say all this to me," I told him. "Why, Nikka, it's—"

"It's what? Hard to understand?"

"Easy to understand," I corrected.

"Hard to phrase. But I know you too well to worry about you. As for the wrench, I'm beginning to feel it myself."

Nikka resumed his restless pacing.

"I don't mind anything so much as that oily Armenian downstairs," he insisted. "He—he is dishonest. And we make him dishonest. Not that I've earned him so, Jack. Most of what I earn goes to my people, who need it, poor souls, especially since the war laid its blight on all southeastern Eu-

Finding Square of Number

Suppose you desire the square of a certain number, but discover that you have lost the mental power to multiply. How could you find its square? Begin with one and add as many consecutive odd numbers as there are units in the number to be squared. Suppose you want to find the square of six. Add together the first six odd numbers—1, 3, 5, 7, 9, 11. The sum of these is 36, the square of six. The square of seven is equal to the sum of the first seven odd numbers taken consecutively. Likewise the square of ten is equal to the sum of the first ten odd numbers taken consecutively, etc., etc.—Pathfinder Magazine.

Mean Brute.

The meanest brute is the husband who has the morning paper sent to the office so his wife won't get a chance to see what burglars are being advertised for the day.—Cincinnati Enquirer.

rope. Kostabidjan is one of the agents I employ to distribute my funds. I use him because of his connection with my uncle's tribe."

"Most of us have to use dishonest helpers occasionally," I said. "But can we trust this man, Nikka? If he's all you indicate, isn't he likely to sell us out?"

"He'd sell us in a minute, if he dared," rejoined Nikka, with a light-flipped smile. "But he knows that if he did he would get a knife in him. It would only be a question of time."

"Nice company you've dragged me into," I grumbled. "Well, let's catch up on our sleep."

His outburst had eased Nikka's nervous tension, and he soon dozed off. For a while I watched the afternoon sunlight outside the windows, then the weariness of our travels overcame me, and I, too, slept. . . . I woke abruptly, feeling a light blazing in my eyes.

A man was standing in the doorway of the room, with a kerosene lamp in his hand, a tall man, with the proud face of an eagle. Wisps of silver-white hair escaped from the var-colored turban that wrapped his brows, but he held himself with the erect poise of youth. He was dressed in light breeches of brown cloth, and a blue shirt and short red jacket. Around his waist was twisted a heavy sash, bristling with knives and pistols.

As I prodded Nikka awake, he closed the door behind him and set the lamp on a table. Nikka, rubbing the sleep from his eyes, took one look at the apparition and leaped from the bed.

"Wasso!" he cried.

The stranger raised fingers to lips and breast in a graceful salaam, and replied in the gypsy patois, a cadenced, musical speech when used by those to whom it was a mother-tongue. Nikka grasped his hand, and exchanged a rapid-fire of question and answer, then called to me:

"This is my uncle. He arrived sooner than he expected. He guessed my need was great, and traveled without respite. Come and meet him."

The old gypsy sank to his haunches on the bare floor, with a sweeping gesture of invitation to both of us to join him.

"No, no," exclaimed Nikka as I started for a chair. "He has never sat on a chair in his life. Do as he does or he will think you are trying to demonstrate how different you are."

So I crouched cross-legged beside them—it seemed to be easy enough for Nikka to resume the ways of his boyhood—and concealed my discomfort as stoically as I could. It was close to midnight when we were awakened, and the talk with Wasso Mikail lasted for several hours. First, Nikka explained to him the circumstances of our trip to Constantinople, and the old man's eyes glistened at the mention of the treasure. He interrupted with a liquid flow of polysyllables.

"He says," Nikka interpreted, when he had finished, "that he has heard about it. It is just as I told you and Hugh, the tradition is known all through the Balkans. He says that the treasure is concealed in an ancient palace in Stamboul which has been inhabited longer than men can remember by a tribe of gypsies whose chief is one Beram Tokalji. He says there is a rumor amongst the tribes that he, Tokalji, is an ally of a group of Frank thieves. There is a tradition in Tokalji's tribe that their forefathers believed the treasure ultimately would go to them."

"Will he help us?" I asked eagerly.
Nikka gave me an odd look.
"His tribe are mine. My wish is their wish. How can they refuse?"

CHAPTER VII

The Road to Stamboul

Wasso Mikail was a very wise man. He questioned Nikka closely concerning our situation, and this was his verdict:

"When you fight with thieves you must use thieves' tricks. You did right to come to me. Now I will secure fitting garments for you, my sister's son, and for your Americansky friend, Jakeka. For him also I will brew a dye that will make him as dark as our people, so that men will not turn and stare at him on the road."

"After that I think we had best get away from this place as soon as possible. You have traveled rapidly and shaken off your enemies' pursuit. It is well to take every advantage of an opportunity. We will collect some of my young men who can handle a knife, and go on to Stamboul. All men go to Stamboul, and who will notice a Tzigane band?"

"But it wasn't my thought that you should abandon the affairs of the tribe and come and fight with me," remonstrated Nikka.

"Are you not the son of my sister?" rejoined the old gypsy. "If you had not elected to go to Buda with your violin would you not be chief of the band? Do I not stand in your place? Well, then, fight of my eyes, we will do for you all that we may."

Nikka flung me a proud glance as he translated the pledge.

Mikail left us, and Nikka and I secured another hour's sleep. When he returned he was accompanied by a younger edition of himself, who carried two bundles which were disclosed as complete suits of Tzigane dress. He, himself, carried a pot of warm, brown liquid, and he proceeded to apply the stain to us with a small paint-brush. Hair, mustache, face and body, were darkened to a mellow brown. The stuff dried quickly, and I was soon able to pull on the strange garments, which Nikka showed me how to adjust and fasten.

(TO BE CONTINUED.)

Current Wit and Humor

THAT EXPLAINS IT

A number of negroes were taken daily to the cotton fields on a motor-truck. One day the owner asked one of the men to drive the truck to and from the farm. At a short curve on the highway there was a great spilling of the occupants, and one of them explained to a friend later:

"De boss done ast him if he could drive a car and he say, yes—but dat nigger never tote him he cuden stop no kar."

OPEN WIDER, PLEASE

"Oh, oh, doctor! Can't you get it work on my mouth quick?"
"Yes, just a minute now and I'll dive right in."

The Line-Up

To few of us the skill is lent
For music finely made,
And some of us must be content
To march in the parade.

Well!

At a military dance, one officer said to another as they adjourned for refreshments:

"I don't know how it is, but my wife's lipstick always tastes different from any other woman's," and he carefully wiped his lips.
"Yes, doesn't it," remarked the other, absent-mindedly.

Well Said, George

"Well, George," said a country clergyman to an old man who sat by the wayside breaking stones, "that pile doesn't seem to get any smaller."
"No, vicar," replied the old man, "them stones is like the Ten Commandments; you can go on breaking 'em, but you can't get rid of 'em."

Rubbing It In

Mr. Fordson—Yes, I can give you a job. I need a chauffeur to run my fivver.
The Applicant—A fivver, is it? Sorry, but I'll have to pass it up. I ain't got a stationary engineer's license.

The Common Bond

Blinks—I can't understand why your wife is so chummy with that awful Mrs. Riley.
Jinks—It's easily explained, they both dearly hate the same woman.

UP ON CURRENT STYLES

"She's an electrician's daughter."
"I've noticed how well up she is on current styles."

Perfected Mechanism

The auto very soon, we know,
Human intelligence may show,
And will with ease be taught to stop
At sight of any motor cop.

Helped Swell the Total

Knutt—Look, there's something about me in the paper. It says that in June there were 15,738,526 passengers carried on the street cars.
Mrs. Knutt—Well, what of it? I don't see where you come in.
"I was one of those passengers."

Hopeful Suitor

Rich Father—What are your prospects if I let you marry my daughter?
Suitor (short of funds)—Excellent if you let me marry her.

Two Ways

Comedian—Now, I don't suppose you're ever called before the curtain, boy?
Tragedian—Well, I should say. Why, nearly every night they dare me to come out.

Golden Opportunity

Judge—Haven't I seen the defendant some place before?
Lawyer—Yes, your honor, he rang your wife how to slug like a grand opera star.

INDISPOSABLE

THERE are certain times when nearly every woman should accept the aid and comfort of Bayer Aspirin. Not just for the unexpected headache these tablets relieve so readily. Not just for colds which they check so quickly. Bayer Aspirin brings ease on the days too many women still submit to pain that is not natural, not necessary. This relief is perfectly harmless, as in all uses. Remember this! Look for Bayer on the box and follow proven directions found inside.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monocristallinester of Salicylicacid

Poor Sight
The car was crowded and many were standing. An elderly man with poor sight was sitting, and before him was standing a young woman who dropped her handkerchief accidentally into the man's lap. Another man saw the handkerchief, touched the old man and called his attention to the handkerchief in his lap, whereupon the old man, looking down and mistaking it for his shirt, quickly shoved it into his trousers and rode peacefully on, the woman being none the wiser for her loss, as she had not known the handkerchief fell.

Through a Glass Darkly
I have read of a glass kept in an idol temple in Smyrna that would make beautiful things appear deformed, and deformed things appear beautiful; carnal sense is such a glass to wicked men, it makes heavenly things which are beautiful to appear deformed, and earthly things which are deformed to appear beautiful.—Ohio State Journal.

Her Preference
Mrs. Muggs—I've just been with Mrs.iggins to see one of them talking films. Personally, I prefer the un-speakable ones.

Up-Town Position
"I hear that you have a new job."
"Yeah, I'm a manicurist in a bakery."
"Manicurist in a bakery?"
"Yeah, I got charge of the lady-fingers."

Hard work beats "bluff."

Help Kidneys After Grip
Don't Neglect Kidney and Bladder Irregularities.
HAS grip or flu left you stiff, achy—all worn out? Feel tired and drowsy—suffer nagging backache, headache and dizzy spells? Are the kidney excretions too frequent, scanty or burning? Too often this indicates sluggish kidneys and shouldn't be neglected.
Thousands rely on Doan's Pills, a stimulant diuretic, increase the activity of the kidneys and assist in the elimination of waste impurities. Are endorsed everywhere. Ask your neighbor!

Doan's Pills
A Stimulant Diuretic to the Kidneys

OLD FOLKS SAY DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1878, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of seeds and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs? A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois, for free trial bottle.

Haircuts Donated

Needy schoolboys get free haircuts in Santiago. Upon invitation of the barbers' union they began recently to go in crowds to the barbers' school, where they were shingled by student barbers. Thirty youngsters were sent in one day by the principal of their school.

Loss of Power

and vital force follow loss of flesh, or emaciation. Dr. Pierce's Golden Medical Discovery is a herbal tonic that enriches the blood, stops the waste of strength and tissue, and helps to build up healthy flesh.

Thin, pale, puny, pimply children are made plump, rosy and robust by the "Discovery." All druggists.

In recovering from "Grippe," or in convalescence from pneumonia, fever, or other wasting diseases, it speedsily and surely invigorates and builds up the whole system. Read this:

Eaton, Colo. "Twenty-seven years ago I was not able to do my housework—nothing seemed to help me. I commenced taking Dr. Pierce's Golden Medical Discovery and Favorite Prescription and began to improve and was able to do my work. I have taken these medicines several times since and they never fail to give relief."—Mrs. Anna Mills, Box 334.

Facing the Music

"What do they mean by the 'witching hour'?"

"Don't you know? That's the hour when the wife greets you with 'Which story is it this time?'—TII-BIIS.

Strategy—the science of inducing others to walk into your trap.

When the public has faith in a writer it is based on good works.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. An your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation or diarrhea; effective, too for older children. Twenty-five million bottles were bought last year.

Pedro Guana of Winslow was found not guilty in Holbrook District Court of the charge of murdering his wife, Marie Sanchez Guana, on July 26, 1928.

The federal aid road project running from Santa Rosa, west and south on the Vaughn road, will be complete within a few weeks, highway engineers on the job announced in Santa Rosa.

None of New Mexico's natural scenery would be marred by signboards, fence signs, post signs and other view obstructions, under a bill introduced in the New Mexico Legislature by Speaker Baca.

Charles Edgar Park, convicted in the Superior Court of Navajo county of the charge of murdering Perry Britte at Goodwater last June, was sentenced to life imprisonment in the state penitentiary at Florence by Judge J. E. Crosby.

The estate of Miguel A. Chaves of Santa Fe, patron of Catholic educational institutions, will exceed \$600,000 in value, even after large donations to Loretto Academy and St. Michael's College have been taken out. The inventory has been filed in Santa Fe by attorneys for the Chaves estate.

Authority has been granted to the Santa Fe railroad to publish new freight rate schedules governing fresh meats and packing house products moving between Phoenix, Prescott and Flagstaff. The new rate will apply on minimum carlots of 10,000 pounds.

An increase in the number of federal prohibition agents assigned to duty in Arizona from four to twelve, was announced in Phoenix by John H. Udall, deputy prohibition administrator for Arizona, coincidental with the change in administration by which Arizona is in a new federal district, composed of Arizona, Utah and Nevada.

Directly affecting producers in a dozen different sections of Arizona, purchases of Arizona-grown and Arizona-manufactured products by the Phelps Dodge Mercantile Company last year reached a new high record of \$202,656. It is shown in a "Trade at Home—Use Arizona Products" tabulation, prepared for the Arizona Industrial Congress.

A center of culture has blossomed out of a desert. Santa Fe and Taos, N. M., have attracted at various times such authors as Willa Cather and Sinclair Lewis and more poets and painters than have elsewhere set their faces in any common direction, writes Mary Austin in the Bookman. "There is an entertaining quality in the daily life not easily achieved elsewhere in the United States."

With installation of chlorinators to safeguard the community's water supply, and advice to residents to hot water for domestic use and to exercise other preventive measures, the typhoid fever situation at McNary, Ariz., is believed to be under control and no new outbreak of the disease is anticipated, according to a statement made in Phoenix by Dr. F. T. Fabien, state superintendent of public health.

The annual encampment of the Arizona National Guard will be held August 11 to 25 this year. It is announced by Adjutant General Leonard M. Cowley. The camp will be on the rifle range at Fort Huachuca, the same as in former years, where mess halls and other camp buildings are located. The proposed new camp site at Grand Canyon, about eight miles south of the present site, will not be available this year in time for the regular tour of duty, it was understood.

Dr. M. A. Risson, prominent Roswell dentist, was bound over to await action of the next Chaves county grand jury in the sum of \$15,000, following a preliminary hearing on a charge of second degree murder. He is charged with performing an illegal operation on Mrs. Mary Pressell, which resulted in the death of the woman.

Because deer are so plentiful, trapped yearling fawns and milk fed fawns from the Kaibab forest will be available soon for private parks and farms for those who desire them as pets.

The formal dedication of the new Chandler municipal airport and a monster aviation banquet, were held in Chandler on March 12th and 13th.

Day by day the waters of the lake created by the new Coolidge dam are rising and creeping toward the lands of 600 Apache Indians, where property eventually will be submerged. Again the red man is moving at the behest of the pale face. Although new lands are to be given him in exchange, and some \$146,000 paid for the inconvenience and trouble caused, the Indian is singing his song of lament into the ears of the great white father at Washington.

National officers and heads of three state departments will attend the tri-state convention of the Woodmen of the World in Tucson, April 4, 5 and 6, as well as delegates from Arizona and California, for the Woodmen circle convention on the same dates.

The Frontier Club of America, recently incorporated in New Mexico, is a new organization being perfected out of the former Roosevelt Hunting Club, of which former Attorney General Robert C. Dow of New Mexico is president and general manager. It was learned here.

1—Miracle church at Lourdes, France, which the pope may visit on his first trip outside the Vatican. 2—View from the Capitol steps while President Hoover was delivering his inaugural address. 3—One of Mrs. Coolidge's last official acts, planting an oak tree on Chevy Chase school playground.

NEWS REVIEW OF CURRENT EVENTS

Hoover's Cabinet Accepted by the Senate—Serious Rebellion in Mexico.

By EDWARD W. PICKARD

PRESIDENT HOOVER'S first official act of consequence was to submit to the senate the names of eight men whom he had selected for his cabinet. Radical senators were all set to make a fight against confirmation of Andrew Mellon for secretary of the treasury, but, as was explained in these columns some time ago, it was not necessary for Mr. Hoover to send in Mr. Mellon's name, since he is a holdover, so the radicals were circumvented. Making no invidious distinction, the President also omitted from the list Secretary of Labor James J. Davis, the other member of the Coolidge cabinet who was retained.

The senate without hesitation confirmed the eight names submitted. They are:

Henry Lewis Stimson of New York, secretary of state.

James William Good of Illinois, secretary of war.

William Dewitt Mitchell of Minnesota, attorney general.

Walter Folger Brown of Ohio, postmaster general.

Charles Francis Adams of Massachusetts, secretary of the navy.

Ray Lyman Wilbur of California, secretary of the interior.

Arthur M. Hyde of Missouri, secretary of agriculture.

Robert Patterson Lamont of Illinois, secretary of commerce.

After a sharp debate the senate adopted a resolution offered by McKellar of Tennessee ordering the judiciary committee to investigate Secretary Mellon's right to continue in the cabinet without reappointment and to determine if he has violated an old law that prohibits treasury officials from engaging in any business. It was not believed in Washington that this action would bring about results adverse to Mr. Mellon.

The secretary of the treasury, it was reported, intended to hold the office for not more than two years.

Since Mr. Stimson is on his way home from the Philippines, where he has been governor general, Secretary of State Kellogg consented to remain in office until his successor arrives in Washington and qualifies. In general the President's cabinet selections met with warm approval.

On Thursday President Hoover issued the call for the extraordinary session of congress, to open April 15. He said in the proclamation that the purpose is "to effect further agricultural relief and legislation for limited changes of the tariff."

During his first days in the White House Mr. Hoover received throngs of congratulating callers from all parts of the country, and also he settled down to the business of conducting the affairs of the nation. He told the newspaper correspondents he desired to continue the periodical press conferences and to develop them in directions that would assist both the press and the President. He conferred with Senator Smoot and Representative Tilson concerning the calling of the extraordinary session of congress for farm relief and tariff reform, and with Attorney General Mitchell concerning the appointment of the commission to investigate the administration of justice and especially the enforcement of prohibition. His emphatic words concerning law enforcement in his inaugural address were especially pleasing to all the church and dry organizations, and they presented him with their felicitations hand illumined with their felicitations hand illumined with gold emblems and bound in tooled leather gold embossed. Mr. Hoover desires to place the entire prohibition enforcement machinery under the attorney general. This may require legislation, and the dry leaders in congress are not all in favor of this course.

INSTEAD of whitewashing Gen. Umberto Nobile for the disaster of the dirigible Italia in the Arctic regions, the Italian court of inquiry censured him severely. The report of the court is divided into three sections. The first deals with the causes of the accident, the second with the behavior of the survivors, and the third with the relief efforts. After stating that the loss of the dirigible was due to error in handling made at the moment of the accident, for which the commander of the expedition must take responsibility, the report passes to a consideration of the charges of cannibalism in connection with the disappearance of Dr. Finn Malmgreen, the Swedish scientist, and the third man with Capt. Alberto Mariano and Filippi Zappi on the Arctic ice.

Regarding General Nobile's action in allowing himself to be rescued first, the report says: "It cannot find plausible justification and it can only be explained, not justified, by conditions of physical or moral depression in which he was found which did not permit him to estimate the just value of his action, even though it was determined by the pressing invitation of Lundborg." Lieut. Einar-Paal Lundborg was the Swedish airman who took off Nobile.

CONDITIONS in Shantung province were so serious that the Nationalist government of China was reported fearful of defeat at the hands of General Chang's rebels and therefore trying hard to arrange a compromise by which further hostilities might be avoided. Meanwhile large numbers of government troops were being mobilized. The commander at Chefoo reiterated the charge that the Japanese were financing Chang.

JOHN D. ROCKEFELLER, JR., was the victor in the dramatic "war of the proxies" which reached its climax Thursday in Whiting, Ind. The final battle round was the annual meeting of stockholders of the Standard Oil Company of Indiana and the man who went down to defeat was Col. Robert W. Stewart, chairman of the board of directors. With about twice as many shares as Stewart could control, the Rockefeller forces ousted the colonel from the board, replacing him with Dr. W. M. Burton, inventor of the famous cracking process; and Stewart's close friend, L. L. Stephens, general counsel and director, also was put out. Stewart had proxies from 31,331 stockholders, the "little fellows"; but the Rockefeller proxies, though only half that number, were from the rich men and corporations and easily controlled the situation. Stewart had the satisfaction of presenting a report that showed the company had just closed the most prosperous year in its history and he was uproariously applauded by his supporters.

THOMAS TAGGERT, for many years the leader of the Democrats of Indiana, passed away at his home in Indianapolis at the age of seventy-three years after a long illness. Starting business life in a lunch room in Xenia, he became a very wealthy man, and a power in his party both in the state and in the nation. He was given the credit for making Woodrow Wilson President, and Thomas R. Marshall, twice Vice President, said his success in politics was due to Taggart. Moses Edwin Clapp, former United States senator from Minnesota, died in Washington where he had practiced law since leaving the senate in 1917. Among other recent deaths were those of Haley Fiske, president of the Metropolitan Life Insurance company, in New York; and of David D. Buick of Detroit, a pioneer in the automobile industry.

JUST before he left office, Attorney General Sargent granted freedom on parole to Thomas W. Miller, former alien property custodian, who was serving a term of eighteen months in Atlanta penitentiary for conspiring to defraud the government in the handling of German property during the World war. Miller was convicted in 1927 and began serving his sentence last April.

IN SUMMING UP the work of the late Seventieth congress it is found that it authorized new expenditures totaling more than a billion dollars during the next decade. The chief authorizations included the following:

Mississippi flood control project, \$325,000,000.

The 15 cruiser construction bill, \$274,000,000.

The Boulder dam project, \$165,000,000.

Public buildings and army structures, \$175,000,000.

Compensation for German ships, patents, and radio stations, \$109,000,000.

River and harbor projects, \$72,000,000.

Increased capital for Mississippi barge line, \$10,000,000.

Both of them were sincerely glad to resume their unpretentious home life, and Mrs. Coolidge especially seemed gay and happy. To the reporters Mr. Coolidge said, interviewing himself, that he is not going to practice law in Northampton or anywhere else at present; that the several contracts he has made for magazine articles are all he contemplates now in that line; that he will not write a book and will not make any speeches. He will not travel in foreign countries this summer, believing there are plenty of interesting places in the United States to be seen.

Gen. Charles G. Dawes, late Vice President, hastened back to Chicago and at once resumed work in the bank with which he was long connected. He was made chairman of the board. He declined to talk politics but vehemently denied that he intended to run for senator to succeed Charles S. Deneen. On March 28 General Dawes leaves for Santo Domingo as head of a commission of his own choosing to advise the Dominican government on financial problems.

REBELLION

broke out in several states in Mexico and speedily reached alarming proportions. A number of governors and military chiefs joined in the movement, directed at the government of President Portes Gil and aimed particularly at what they called "Calles domination." The churches that had been closed by the Catholic authorities in protest against the religious laws which Calles, while President, put into effect. At first the rebels under General Aguirre gained possession of Vera Cruz and other important cities. Gen. Gonzalo Escobar was sent by the government to Monterey to combat the revolutionaries, but on arrival there he joined the rebels and was made military chief of the movement. President Portes Gil appointed Calles secretary of war, and under vigorous direction the federal troops regained possession of Monterey, Orizaba, and other strategic points. Aguirre in Vera Cruz state was deserted by most of his men, and Escobar was said to be surrounded by three strong armies. The government issued a bulletin predicting the early collapse of the entire rebellion, and dispatches from Ambassador Morrow indicated the same belief.

It was stated at the White House in Washington that the new administration would continue to enforce the embargo on arms shipments to Mexican rebels that was maintained by President Coolidge, but that licensed arms shipments would be permitted to go forward to Mexico City if requested by the Mexican government. The State department said every effort was being made to prevent the smuggling of arms across the border.

THAT fuss over an alleged secret Franco-Belgian military treaty came to an end when the man who sold the document to a Utrecht newspaper was arrested and confessed that it was a forgery. He was set free by a Belgian judge and declared he was really an agent provocateur of the Belgian government. The Dutch journalists passed a motion of censure on the Utrecht editor who published the forged paper.

TREATMENT of racial minorities in Europe was the topic the council of the League of Nations took up when it met in Geneva last week, but there was no prospect of action, for the council felt the problem was too big to be settled now and should be studied by a subcommittee. Sir Austen Chamberlain, British secretary for foreign affairs, said: "The rights of the minorities cannot be separated from their obligations, and they have to show that they have behaved loyally to the country of which they are part and given true allegiance to the country to which they are subject."

MR. AND MRS. COOLIDGE, returning to their home in Northampton, Mass., were given an impromptu loving welcome by their neighbors that affected them deeply.

Improved Uniform International Sunday School Lesson

(By REV. F. H. FITZGATHER, D. D., Dean Moody Bible Institute of Chicago, 12, 1229 Western Newmarket, Union 1)

Lesson for March 17

THE CHRISTIAN'S SABBATH

LESSON TEXT—Exodus 20:8-11; Matthew 12:1-8.

GOLDEN TEXT—For the Son of man is Lord even of the Sabbath Day.

PRIMARY TOPIC—God's Day, Sunday.

JUNIOR TOPIC—God's Day, Sunday.

INTERMEDIATE AND SENIOR TOPIC—Keeping the Lord's Day.

YOUNG PEOPLE AND ADULT TOPIC—The Lord's Day in Modern Life.

The designation "Christian's Sabbath" is a misnomer. The word "Sabbath" has a definite meaning. It signifies rest, cessation from action. When God had finished the heavens and earth, He desisted from creative action (Gen. 2:1-3). Since God's creative work was completed in six days, He ceased from action on the seventh day, which was therefore called the Sabbath, or Rest Day. Five definite objects may be assigned to the Sabbath:

- To commemorate the work of creation (Gen. 2:2, cf. Ex. 20:11).
- To keep alive the knowledge of the true God. Creation witnesses of a creator. Keeping the Sabbath in mind kept in mind the creation, and the creation made real the Creator.
- A forward look to the time when man shall enjoy full fellowship with God (Heb. 4:1-10).
- To Israel it was a sign of the covenant between them and God (Deut. 5:12-15).
- It was made for man's well-being (Mark 2:27).

At least while man's earthly condition continues, the Sabbath is needed to keep a proper balance between his body and his soul.

- The Fourth Commandment (Ex. 20:8-11).
- Obligations enjoined (20:9, 10).
- Work through six days (v. 9).
- The command to work six days is just as binding as the command to rest the seventh day. In fact, there can be no rest unless there first be work.
- Rest on the seventh day (v. 10).

There must be cessation from all work on the Sabbath. Since God gave the example and then sanctified the day, it should be kept holy. It was not only to give relief to the physical body but to be a time when man's thought would be turned to God. It was designed to keep fresh in his mind the consciousness of God and His mercies. The human spirit should be refreshed by the study of God's Word.

- How this commandment may be broken.
- By engaging in labor or pursuing business interests on this sacred day.
- By devoting it to amusements, since it was designed to keep fresh in mind the consciousness of God.
- By making it a day of feasting.
- The Son of Man is Lord of the Sabbath (Matt. 12:1-8).

The hungry disciples plucking corn (v. 1).

This took place on the Sabbath day and became the occasion for criticism.

- The Pharisees finding fault (v. 2).
- They asserted that Christ's disciples were breaking the law, when in reality they were only violating the traditions with which the law was enmeshed. The Lord's purpose in instituting the Sabbath was to conserve man's highest interest and contribute to his happiness. It is extremely unfortunate when human tradition is elevated above the Word of God.
- Christ's reply to the cavils of the Pharisees (v. 3-8).

In this reply He shrewdly answered the Pharisees and pressed His transcendent claim as to the dignity of His person. This claim moved them to plot His death. As to His claim, observe:

- He is greater than their greater king (v. 3, 4). David, when rejected, was forced to do that which was unlawful for him to do (1 Sam. 1). Because they had rejected the one greater than David, the plucking of the ears of corn became a necessity.
- He is greater than their sacrifice and priesthood (v. 5). If the priests, because of their position and services, could violate the Sabbath laws and be blameless, much more the One greater than they in performing His work of sacrifice and redemption for them should be considered guiltless. He was the true sacrifice and priest.
- He is greater than the temple (v. 6). The temple, with all its gorgeous rites and ceremonies, was typical of Christ. Much more then did He have the right to do what He did.
- He is greater than the Sabbath (v. 8), because He is Lord of the Sabbath.

Great Task of Happiness

It was for the joy that was set before Him that our Lord endured the cross, despising the shame. The joy of the Ascension is but an echo of the joy of Bethlehem, and the task of Christ was one "great task of happiness."

To Gladden Our Hearts

Love's sittings often precede His wrings. He sits to get rid of our chaff, and He lifts to gladden our hearts.—Selected.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take.

Any drug store has the genuine, prescription product.

PHILLIPS Milk of Magnesia

Extinct Bird Specimen

A specimen of the Eskimo curlew, a bird which recently became as extinct as the great auk and the passenger pigeon, is being shown in a new display at the Field museum of natural history, Chicago.

Drink Water If Back or Kidneys Hurt

Begin Taking Salts If You Feel Backache or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders. By all means, drink lots of good water every day.

For Charity

"How did you manage to get that lovely car?"

"A charity lottery."

"Managed to draw the winning number?"

"No. I got up the lottery."—Passing Show.

Continuous Performance

"Sam, are you ever tired with enthusiasm?" "Yessah! from every job I tackle."—Camera Fun.

ALWAYS KEEPS IT ON HAND

Lydia E. Pinkham's Vegetable Compound Helps Her So Much

Pittsburgh, Pa.—"I was just completely run-down. I had tired, heavy, sluggish feelings and I could not eat. I was losing in weight. I read so much about Lydia E. Pinkham's Vegetable Compound and what a good medicine it is, that I started taking it. I have taken eight bottles of Lydia E. Pinkham's Vegetable Compound and about the same in tablet form. This is one medicine a woman should have in the house all the time. I am improving every day and I am sure am able to eat. I am willing to answer any letters I get asking about the Vegetable Compound."—Mrs. ELLA RICHARDS, 21 Chautauqua St. N. S., Pittsburgh, Pa.

Brooklyn Rookie Is Making Good

THE Brooklyn Rookie made good with a bang his first year when he hit 320 and batted in 100 runs.

Del Bissonette.

Later Del went to New Hampshire state college and then to Georgetown university. In 1921, just as he was about to realize on his pitching skill, he developed a sore arm and went back to the Maine woods.

In 1922 he was signed by Cleveland and went South with the team, but that pitching arm still gave him trouble, so back he went to his Maine woods.

The veteran rookie, Bissonette, may combine fielding and hitting to that degree where he will press the best of them all for premier honors.

He went South with the Robins the next year and farmed out to Jersey City. The next year he sowed base hits and reaped batting fame on the Buffalo farm.

Bissonette himself sums up his baseball career in this cryptic and yet illuminating sentence: "I spent four years trying to cure a sore arm, and then I spent four more years learning to play first base, and I want to tell you that it takes just that long for a fellow to learn to play that bag."

He went South with the Robins the next year and farmed out to Jersey City. The next year he sowed base hits and reaped batting fame on the Buffalo farm.

SELECT TEAM FOR OLYMPIC TRY OUTS

Present Plan Does Not Please Five Big Coaches.

In the opinion of five of the country's leading college coaches, the system of final Olympic track and field tryouts as now constituted must be junked.

Although differing as to other details, four of the five whose views are published in the current issue of the New York A. C. organ, "The Winged Foot," agree that the responsibility of picking the American team must be given to a small committee with arbitrary authority rather than to have the make-up of the team hinge entirely on the outcome of a tryout meet.

This suggestion is made in one form or another by Harry Hillman, Dartmouth; Edward L. Farrell, Harvard; Keene Fitzpatrick, Princeton, and Jack Ryder, Boston college. Harry Gill, University of Illinois, concedes his recommendation to one that the final tryouts be extended "from two days to three or even four."

Voicing the apparently general feeling that the American runners left their best performances behind them when they went to Amsterdam, Hillman declared that "in Olympic year the colleges and club athletes should decrease the number of meets leading up to the big classic."

Fitzpatrick expressed the view that the normal college and club meets constitute "competition enough and we should be able to make our selection from the results."

Farrell advocated having "a pre-Olympic tryout one year preceding the final tryouts to select 50 per cent of the final team." A proposal similar to that was advanced some time ago by Jack Scholz, Olympic athlete. Scholz' plan, which opened the discussion now taken up by the coaches, was that the selection be started the fall before the Olympic year.

Ryder's chief suggestion was that the outstanding runners and hurdlers be picked in early June and sent abroad for a month's training near the scene of the games.

"Once the first-string men have been selected," he said, "you may have your 'tryouts' for the others to make the quotas in the various events."

Farrell advocated having "a pre-Olympic tryout one year preceding the final tryouts to select 50 per cent of the final team."

Fitzpatrick expressed the view that the normal college and club meets constitute "competition enough and we should be able to make our selection from the results."

Road Problem Is Yet Troublesome

There Must Be Cooperation of Authorities in Charge of Roads.

(Prepared by the United States Department of Agriculture.)

Before much definite progress can be made in getting the farmer out of the mud and in getting the city man out of the city on week ends, there must be co-ordination and co-operation of authorities in charge of local roads and highways in areas adjacent to large cities, according to the bureau of public roads of the United States Department of Agriculture.

There are approximately 2,750,000 miles of local rural roads in the United States, say bureau engineers, and approximately 1,000,000 miles are administered by town or township authorities. There are, they say, 3,000 counties or equivalent subdivisions, of which 67 in the New England states have no relation to improvement or maintenance of roads.

Authorities of the remaining 2,999 exercise jurisdiction over the 1,750,000 miles of local roads classified as county roads.

Control Construction. Only 975 of the 2,999 counties have control over construction and maintenance which may be described as reasonably competent, according to the bureau, and there are 829 counties which have no definite organization whatever for the maintenance of roads, and in which the work is of the most casual and inefficient nature.

"The county or township unit is generally so small and its taxing power so limited," says these federal road authorities, "as to preclude overhead costs for proper supervision of and equipment for road work. If adequate equipment is provided, the area is generally so small, and the mileage so limited that it cannot be employed full time.

Control Limited. "In many counties control is limited to a single engineer who, in many cases, is poorly paid and is inexperienced or relatively incompetent. Only the larger or richer counties have sufficient income to employ competent engineers. Also elective local authorities seldom have the qualifications necessary for highway administration. There is a tendency for them to permit considerations other than the requirements of traffic and other properly controlling conditions to influence their administration.

"The outward movement of population in metropolitan areas has caused a rapid growth of suburban sections. Generally, each of these urban units has partial jurisdiction over sections of the county highways within its borders, and the lack of a common plan has been a serious obstacle to continuous and consistent improvement of main highways. This condition, coupled with the rapid increase in traffic, has resulted in serious congestion."

In these areas, says the bureau, land values are higher and with the concentration of population more and better highways can be supported.

Sweet Potato Profit Could Be Increased

Diseases in Field, Storage and Transit Must Be Cut.

(Prepared by the United States Department of Agriculture.)

Much more profit could be realized from the growing of sweet potatoes than is now made if diseases in the field, storage, and transit were reduced. The inability of farmers to keep sweet potatoes in storage forces them to sell the bulk of their crop as soon as it is dug, a time when prices are at the low point. Specialists of the United States Department of Agriculture are of the opinion that more sweet potatoes would be available for winter use and disposed of at a good price if storage methods and principles were better understood.

In Farmers' Bulletin No. 1050-F, "Sweet-Potato Diseases," just issued by the department, sweet-potato growers will find much information of value concerning the prevention and control of storage and other diseases of their crop. Disinfection of the seed, use of immune varieties, and crop rotation are some of the practices advocated for the control of disease. Sweet potatoes infected with field diseases should never be placed in storage, for heavy losses will follow.

Numerous diseases are described in the bulletin, together with practical measures to adopt in reducing losses therefrom. A copy of the bulletin may be secured from the United States Department of Agriculture, Washington, D. C.

Keeping Records on the Poultry Business Best

Many farmers feel that poultry keeping is just a side line to be watched over and cared for by the women on the farm and as a consequence they pay very little attention to keeping an account of the income and expenditures involved in the management of the poultry flock. Often this condition exists even though the flock may be getting the best of care and may be receiving a very well-balanced ration.

Such a feeling should not exist, however. Poultry flocks are one of the big sources of farm income. Furthermore, they furnish, under proper management, a very steady income from week to week throughout the 12 months of the year. It would be an easy matter to keep a record of this income, and in many instances this is done. Too often the poultry flock book-keeping ceases with the record of the income and does not take into account the cost of keeping the flock.

Breeding Ducks Must Be Given Variety of Feeds

For early hatching five ducks may be mated to one drake. After April 1st, six or eight ducks to one drake will not be too many. Duck eggs require 28 days to hatch, except the Muscovy breed, which requires 33 to 35 days.

In handling ducks pick them up by their necks rather than the legs. Their legs are easily broken.

Ducks lay early in the morning and should be kept in the house until they do—or till about 9:30 o'clock. If let out before laying, they often drop their eggs in ponds or streams.

Pekin and Runner ducks rarely set. Breeding ducks must be well fed. Besides whole grain, they should have a wet mash of wheat middlings, ground corn and oats and wheat bran, with about one part of meat scrap to seven parts of the other feeds used in the mash. Oyster shell, or ground limestone, and sand, should be kept before them always.

Crossbred Sheep Used for Producing Mutton

Hampshire bucks crossed with grade Rambouillet ewes are being used to produce market lambs in Colorado, according to Charles I. Bray of the animal husbandry department of the Colorado College of Agriculture. A cross which Mr. Bray suggests is that of a long wool buck on a fine wool ewe. This cross has been used by some sheep growers of the other range states and gives a sheep with a good mutton body, the quality of fleece and plenty of size.

In making this kind of a cross, Romneys, Lincolns and Cotswolds are used most frequently. By crossing a Romney Marsh buck with the ewes, a fine type of lamb was produced, according to the experiments of the Colorado College of Agriculture. The Romney is a little blockier than other long wooled breeds and has shorter legs.

Brooder House Needed Now for Young Chicks

Probably no building is more needed right now than a new brooder house. One of the chief sources of loss of baby chicks comes from lack of proper brooding facilities, and a good brooder house will very nearly pay its cost in the first season.

A brooder house is not a complicated structure. A simple shed type is common, but it must be built with a warm floor, tight, warm walls and a tight roof. The use of good heavy building paper on the inside walls will stop all possibility of cracks, and will make it easier to maintain an even temperature. Bear in mind that in cold weather 60 per cent of the heat of a building is lost through the roof. Therefore, use an extra layer of building paper or one thickness of heavy wallboard under the roof.

Couldn't Be Anything Else

ATWATER KENT RADIO

Buy your radio just as you buy your farm machinery...

WHO MAKES IT—and how? Is it simple, and easy to keep in order? Will it do its job—and keep on doing it?

Are these the questions you want answered before you invest your money in a tractor and everything else you use on the farm?

It's the same way with radio. Here's an instrument your family will depend upon for years and years. You want to know it's always ready to go.

Atwater Kent Radio comes from the largest manufacturer. It is made of better materials than are ordinarily thought necessary. So strictly is its reputation guarded that one out of every eight workers is a tester or inspector—and every set has to pass 222 tests before it can leave the factory.

Quality Atwater Kent Radio—first choice of rural families everywhere—is offered in two forms: 1. For all-electric operation direct from the same house current that lights your home; you merely plug in. 2. For operation from batteries.

Either way, you get plenty of power for long-range reception, natural tone, and instantaneous program selection with the Full-View Dial. There are several all-electric models and two battery models. Let an Atwater Kent dealer advise you as to which is best for your locality.

Mrs. John Durrum Says Could Write All Day and Not Say Enough Good About Milks Emulsion

"Have been thinking for some time of writing you in regard to Milks Emulsion.

"When I wrote you last fall I was very much discouraged. Doctors had told me for five years that I had T. B. Five doctors told me last fall that I was in advanced stages of T. B.

"I have taken your wonderful medicine all winter. Sometimes I would neglect taking it every hour, but would take several doses a day, and this is the first winter for seven years that I haven't spent most of the winter in bed. I haven't been in bed sick this winter, and for two years I couldn't bear to press on it. That is all gone. I do all of my housework now except washing; weight 117 pounds, and feel fine.

"I can't praise your Emulsion enough. I tell every one I talk to what it has done for me and feel ashamed if I neglect it sometimes when I know what it has done for me and what it means for me.

"I could write all day and could never write enough good words about Milks Emulsion." Yours truly, Mrs. John Durrum, 451 W. Green St., Frankfort, Ind.

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

Student (suffling)—"I have a cold or something in my head." Professor—"A cold, undoubtedly."—Stray stories.

If you use Red Cross Ball Blue in your laundry you will not be troubled by those tiny rust spots, often caused by inferior bluing. Try it and see.—Adv.

So, when an Atwater Kent comes into your home, it is absolutely dependable—and it stays so. You do not have to fuss and tinker and apologize. . . . If Atwater Kent makes it, it's right—tone, volume range—everything. More than 2,000,000 owners know it.

House current or battery sets—your choice

Quality Atwater Kent Radio—first choice of rural families everywhere—is offered in two forms: 1. For all-electric operation direct from the same house current that lights your home; you merely plug in. 2. For operation from batteries.

Either way, you get plenty of power for long-range reception, natural tone, and instantaneous program selection with the Full-View Dial. There are several all-electric models and two battery models. Let an Atwater Kent dealer advise you as to which is best for your locality.

Battery Sets, \$49—\$68

Sold Again!

A small boy entered a grocer's shop. "Please have you any dry biscuits?" he asked the man behind the counter.

"Yes, as many as you want, I dare say."

He reached down a large tin. "Is that the only kind you have?" "No; here's another."

"Are you sure they are very dry?" "Quite sure."

"Very well, then"—the boy backed towards the open door—"

ADDING TO THE SPRING WARDROBE

Cottons for Spring Sewing Include Many White Goods.

(Prepared by the United States Department of Agriculture.)

The warm weather wardrobes, in most families, need a certain amount of replenishing in the spring—a few new garments added, old ones freshened up, and in the case of growing girls, hems let down and other adaptations made.

New curtains and other household furnishings are often made at this season of the year, and a purchasing trip may result not only in prints for Mary's bloomer dresses but in several selections from the white goods counter which will shortly appear at the windows, or in cretonne yardage for sofa pillows or draperies.

To judge the weave and durability of a material, ravel out a small portion carefully and see how it is constructed. Pull the fabric in the hands and note if there is an excessive amount of slippage. Scratch it with the finger nail. If the yarns are readily displaced the fabric will fray at the seams when used in a garment.

FOLDING IRONING BOARD IS HANDY

(Prepared by the United States Department of Agriculture.)

When other improvements were being made in the kitchen at the suggestion of the home demonstration agent, one Massachusetts farm woman had her ironing board hinged so that it would fold away into a narrow closet if not in use.

A wise housekeeper plans to do her ironing at the hours least subject to interruptions. It is poor economy to have to heat up an electric iron or any other and then allow it to cool while one goes to the door or chats with a neighbor.

If laundry work has to be done at home the less ironing there is, the better. This point should always be kept in mind in purchasing either household linens or clothing, and in planning washable dresses. The flatter and plainer the garments, the more quickly and easily are they ironed.

shrinkage is due chiefly to looseness of weave.

Look at the finish of the material. If it is heavily sized or stiffened, like paper cambric, or other fabrics with a coarse, loosely woven foundation, the filling or sizing will wash out and the result will be unattractive and often useless for its purpose.

There is the ever daily problem in every home, all over this broad land where plenty of good food is served, how to fatten the thin one and thin the fat one.

There seems to be some individuals who are naturally thin and cannot be made fat, and fat ones who cannot keep thin.

The best way to reduce, so the eminent authorities tell us, is not by starving oneself, or taking some advertised cure, but a sane and reasonable diet. Sweets should be very sparingly eaten; other foods of all kinds that one likes, eaten, but much less in quantity.

Use of Selvage

(Prepared by the United States Department of Agriculture.)

Making fashions supply their own trimmings is fashion's latest miracle performed. In the yesteryears of life the selvage of this and that material was an evil to be done away with—to be kept out of sight at least.

Perhaps the object lesson will consist of swaggar cloth sports coats whose front openings, pockets, cuffs and scarf collar reveal in flattering selvedge finishings. Then again you may be shown several fifty suits or ensembles of tweed or some handsome wool novelty weave, whose selvedge is its adornment.

Another element of smartness expressed in this costume is the fact of a colorful blouse worn with a white wooden jacket suit. White touched with color is already an established fact for coming months.

Children's Fairy Tale

By MARY GRAHAM BONNER

The robins and orioles and song sparrows and members of the goldfinch family all agreed to furnish the music for a concert, while the members of the trillium and hepatica flower families said they would give the stage.

They asked the crows if they would act as ushers at the concert and show the birds who were not taking part to their perches—for the birds always say perches and not seats.

The flowers thought that there were some nice ones along the ground in some of the low shrubs, and of course the fence was always the best and finest for the boxes held by the mother and father birds.

when durability is the chief consideration, unbleached fabrics are preferred, but for use in garments many cotton fabrics are satisfactory bleached, whether finally used white or printed. In gingham the yarns are colored or left white as the design may require, and are then woven.

Take home samples of fabrics you would like to buy and test them for fastness to water and to light. Wash a sample to see if it fades. Expose another to strong sunlight for several days, covering up a part of it with a piece of cardboard so you can judge how much it has faded.

Proper sleep is as important as food and exercise, for health. Some individuals need less, but the majority should have at least seven out of the twenty-four for sound restful sleep.

The children in homes where care is given to food, sleep and exercise, are able to ward off most diseases or have them very lightly.

The indulgent parent who wishes to give his child all the happiness that he has missed more often thrusts upon a cold world an individual unable to cope with life's problems and failures and unhappiness for the child is the result.

asked to act as ushers, for they were much flattered.

They went around caw-cawing in a very proud manner.

"They asked us to act as ushers, caw-caw," they said. "They wanted smart, handsome black shiny ushers, caw-caw," they boasted.

"They knew we must make the con-

Soon the Birds Began to Arrive.

cert seem very grand, caw, caw," they bragged. And so on.

The day for the concert came, and the birds all arrived on time.

But long before the time for the concert to begin the crows reached the out-door concert hall.

The flowers were hardly awake when the crows came cawing along, saying, "We are here. We are ready to show the people to their perches.

not seem to learn from advice or example; it must prove all things in its own way.

Proper sleep is as important as food and exercise, for health. Some individuals need less, but the majority should have at least seven out of the twenty-four for sound restful sleep.

The indulgent parent who wishes to give his child all the happiness that he has missed more often thrusts upon a cold world an individual unable to cope with life's problems and failures and unhappiness for the child is the result.

Must they show their tickets? Is it to be a pay concert?

"No," said the flowers, shaking their heads, "it is not to be a pay concert.

"It is to be a free concert, for we have invited everyone."

"All right," said the crows. "Caw-caw, we only wanted to know."

As a matter of fact they only wanted to talk and make a great deal of noise.

They wanted everyone around to know that they had been chosen as the ushers at the concert.

Soon the birds began to arrive. And such a hurst of color.

The orioles were looking very lovely with their bright, gay coloring, and the goldfinch-family looked like bright gold.

The robins had such handsome red waistcoats on, and the song sparrows were singing merrily and saying,

"We are happy and gay and free. Even if we are not much to see. For though our colors are not very bright,

"Twit, t-wit, chirp, c-h-r-r-p," which was their way of saying "Bravo."

All the birds sang and the crows showed all the guests to their perches.

The flowers were the stage, and how proud they were to give their beauty for the decorations.

The butterflies came because Mr. Sun had invited them. And Mr. Sun's guests were always welcome.

The humming birds and thrushes came too, and before the day was over, Mr. Sun said,

"Well, I don't know when I have had such a noted gathering to shine upon, for I have had the lovely flowers, the birds, butterflies, and the handsome crows."

So everyone was very happy, as the great Mr. Sun had paid them such fine compliments.

Backaches can sometimes be prevented by raising a sink or a wash-tub.

The most useful table lamp has a shade large enough to allow a wide distribution of its rays.

Do not let flannel or other woolen materials freeze after they are washed, because freezing causes shrinkage.

Remember cereals, cabbage, root vegetables, cheaper cuts of meat and inexpensive fish when you plan economical menus.

Raw chopped vegetables such as lettuce, cabbage and carrots put between slices of buttered whole-wheat bread are recommended for the small child's diet.

John's Mother Praises Doctor

There isn't a mother living who won't agree that no half-sick child should be the subject for an experiment with medicines of uncertain merit.

Rich, fruity California Fig Syrup clears the little stomach and bowels gently, harmlessly and in a hurry. It regulates the bowels, gives tone and strength to them and to the stomach; and helps to give your child new strength, energy and vitality.

Mrs. Joseph W. Hill, 4306 Bedford Ave., Omaha, Nebraska, says: "I'll never forget the doctor who got me to give my baby boy, John, California Fig Syrup. Nothing else seemed to help his weak bowels.

We can play by day and sleep at night. And we, without fine feathers and frills,

"To be sure the song sparrows sang beautifully, and all the other birds were saying,

"Twit, t-wit, chirp, c-h-r-r-p," which was their way of saying "Bravo."

All the birds sang and the crows showed all the guests to their perches.

The flowers were the stage, and how proud they were to give their beauty for the decorations.

The butterflies came because Mr. Sun had invited them. And Mr. Sun's guests were always welcome.

The humming birds and thrushes came too, and before the day was over, Mr. Sun said,

"Well, I don't know when I have had such a noted gathering to shine upon, for I have had the lovely flowers, the birds, butterflies, and the handsome crows."

So everyone was very happy, as the great Mr. Sun had paid them such fine compliments.

First Aid—Home Remedy Week

The Good Samaritan figures in the 1929 "First Aid—Home Remedy Week" and is designated as the "First First Aid." This annual merchandising festival arrives with St. Patrick's Day, continues March 17-23 and marks the eighth anniversary of the plan dedicated to Drugdom by Sterling Products, Incorporated, in 1922 and immediately sponsored by the National Association of Retail Druggists.

Coming at a time when housewives are thinking of house cleaning, the command has added physiological sales value. Secretary S. C. Henry of the N. A. R. D., out of long experience says: "No one knows better than the average retail druggist how much needless suffering there is because most people are neglectful in the matter of making provision for the hour of need which is sure to come when sudden illness or unforeseen accident calls for immediate attention."

"Quick Relief Insurance" is the new definition of First Aid—Home Remedy Week's objective, and is thus bringing the nation's "Health Service Stations" into closer every day life.

Twelve Simple Rules to Preserve Health

Here are twelve health rules for men, contained in the London Tit-Bits Year Book.

If your employment is sedentary, eat no more than two meals a day.

Counteract the bad effects of stooping over a desk or other cramping posture by suitable physical exercises daily.

Do not habitually breathe an atmosphere laden with smoke of any kind.

Avoid wearing a tight collar.

Do not drink stimulants (so-called) between meals.

Avoid the chain-smoking habit.

Cultivate a hobby for your hours of recreation.

Avoid excesses in eating, drinking, smoking, or walking when on holiday.

Do not cultivate inhalation when smoking; carbon monoxide impairs your red corpuscles.

If your pipe gives you a sore lip or tongue, give it up and see a doctor at once.

Don't play indoor games during the lunch hour; take a brisk walk in the open air.

Never bolt your breakfast; get up in time to enjoy it in a leisurely way.

Physician Not Needed Henry Miller, a farmer near Altoona, Kan., heard a cracking sound every time he drew a breath, and it worried him. He was afraid his heart was affected and went to a doctor for an examination. The doctor, in addition to pronouncing his heart all right, located the source of the noise. It came from a small buckle on Miller's suspenders.

Bill on the First Girl's Father—Young man, are you able to support a family? Young Man—Yes, sir; how many are there in your family?—Life.

Diamond Dyes advertisement with text: PROOF OF DYES is in the dyeing! Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye—by actual test. It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking. Next time you have dyeing to do—try Diamond Dyes. They compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance through wear and washing. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes. The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages. Easy to use Perfect results AT ALL DRUG STORES
