NO. 27

PERSONAL AND SOCIAL

HEADED FOR TUCSON

E. R. Evans, president of the Evans Mercantile Co., was a Tucson visitor last week.

VISITS THE CAPITOL CITY

Ed. Farley, was a business visitor to Phoenix last week. Ed. reports that it was cool there.

SUMMERING AT CIRCLE Z

James Westinghouse, Jr., son of the inventor of the electric light, with his family have taken up their residence at the circle Z ranch for the summer.

DOING GOOD WORK

Weyland Hooks, has gone to work in real earnest soliciting subscriptions for the Patagonian. Encourage the lad and keep the home paper printing.

Charley Thorpe and Charley Meade of Patagonia made a trip to Vaughn and took the county road grader over to Patagonia last week they expect to use it on the Harshaw road.

R. C. Larimore, of Sonoita, bought a Dodge touring car from Cheslhire Bros, Nogales last week.

RIDDLES

by Earnhardt Kester
Answers to last week's Riddles

1. Because it is planted in the spring.
2. Smoke.
3. Pussy Willow.
4. Cattail.
5. Lady Slipper.

DANCE AT SONOITA

There will be a dance at Sonoita Saturday, June 8, which you are all invited to attend.
Pettis Music, Prize dances, and other interesting features.
COME! EVERYBODY!!

—Advertisement

VISITING HER FOLKS

Mrs. Mary L. Pearce, and daughter Sarah left this week for a visit in Kansas City, with Mrs. Pearce's folks.

TOURING ARIZONA

C. A. Pearce, and son Jack left this week for a business trip, that will take them thru Arizona and California. They will be gone about six weeks.

LIVE HERE NOW

R. H. Zimmerman, Mrs. Zimmerman, and son Roland are now comfortably located in Patagonia, having taken up their residence here.

Names Nogales

The U. S. Treasury department has designated Nogales, as a temporary airport of entrance to Mexico.

FROM SONOITA

John and Mrs. La Gendre, with their young son were Patagonia visitors last week.

TO BRIDGE DEDICATION

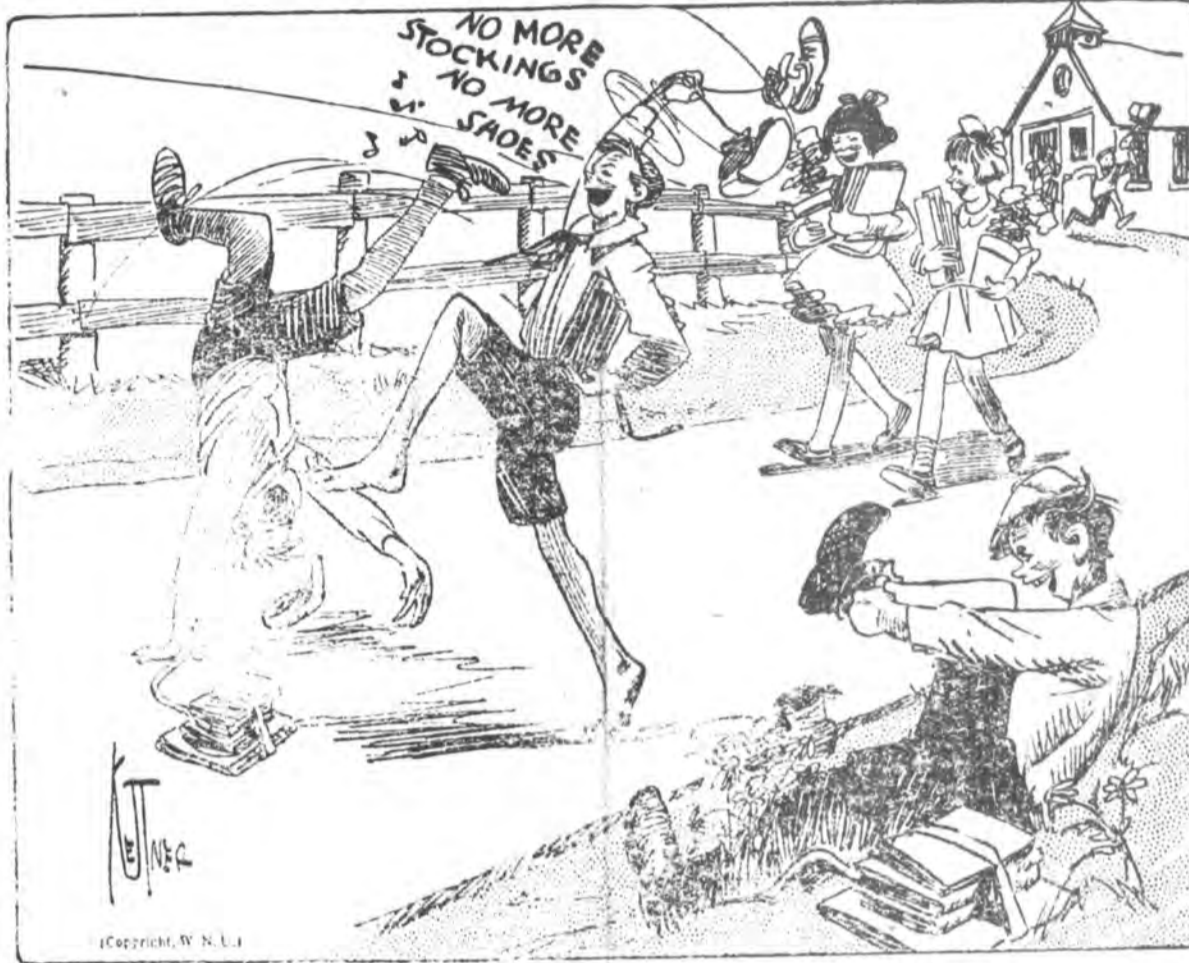

Many Patagonians are planning to go to the dedication of the bridge at Lee's Ferry next week. Why not find out who is going and make up a party from Patagonia, take a few posters along and boost the fourth of July Rodeo and Barbecue? You may leave your name at the Patagonian office. Let's go.

TRIP TO EUROPE

Mrs. Pearl Carlton, and her daughter Louise left Thursday morning, to travel by auto to New York, and from there sail for Europe. Miss Emma Carlton, will join her mother and sister at Tucson. In New York, they will be joined by another sister, Winifred, being mother and three daughters in the party.

They will visit all the principal cities of Europe and return to Arizona, about the 15th of August and be back in Patagonia some time in September.

School's Out

Copyright, W. N. L.

SURVEYING CREW

The state surveying crew will soon be encamped on Iron Mountain, to take up the staking and mapping of this district.

It will be remembered this work was started last year and is of such magnitude that it will take several years to complete it. The work is under the direction of Dr. Leonard of the University.

People from all over the state are sending in inquiries about the Fourth of July Rodeo and Barbecue to be held at Circle Z. Indications point to a bigger crowd than ever before.

Arizona Southern Mining Company Have Organized

Will Hoy and M. A. Hogan of Patagonia are in Nogales busily engaged in arranging the affairs of the Arizona Southern Mining Company. The company holdings include several well known valuable mineral claims located in the Patagonia district, namely the Marsteller group of 4 continuous claims, and the Denver group consisting of 5 claims adjoining the famous old silver lead Mowry mines. Also the Coughlin group of 6 claims adjoining the Belmont and Santa Nino groups, the later of which recently produced a single car of ore valued at \$45,000.00.

These properties have approximately \$200,000 worth of low grade in sight and it is the opinion of mining men acquainted with the properties that with a reasonable amount of development they should become large dividend payers.

Mr. Hogan and Mr. Hoy control the well known rich Trench mine which is now being operated by Frank Ahlberg and associates. The record production of the Trench is well over \$2,000,000 and conservative estimations of the ore on the dump is placed at 250,000, net profit.

Will Hoy is a son of the late John C. Hoy, Montana and Arizona mine owner who originally made a quarter of a million dollars out of the Stewart mine at Butte, and who was instrumental in developing some of the richest mines in Montana.

Will Hoy departed last week for New York to confer with his associates.

M. A. Hogan, who is recognized as one of the best geologists and mining men of the southwest, recently resigned his position with the Trench Mining Co., to accept the responsible post of general manager of the Arizona Southern Mining Company. Recently Mr. Hogan was instrumental in opening up a big new ore body in the Big Jim mine at Harshaw, and to Mike belongs the credit of discovery. With Will Hoy as president, we predict a bright future for the company. Those financially interested will be sure to get a run for their money, with Mike holding the "Vampum Belt."

Border Vindicator.

DIAMOND DRILLING

Diamond Drilling will soon be in operation at the Santa Nino mine. A contract was let this week to the Sullivan Drilling Co., to do the work. W. H. Treadway, an experienced diamond drill operator, will be in charge.

The various committees are hard at work mapping out the details of the big Barbecue and Rodeo to be held at Circle Z Ranch on July 4th.

The Three R Mine

MINING IN GREATERVILLE DISTRICT

The three R mine is one of the real producers in the Patagonia district. The mine was purchased by eastern capital from the Magma copper Co., and George R. Hullings, put in charge as manager. Under Hullings work was immediately begun in earnest, good roads have been built, ore bins erected, and repairing machinery installed.

The mine now operates two shifts a day and they are shipping three or four cars of copper ore every week. They have recently drilled 100 feet along a fracture, which looks very promising for virgin territory, and it is directed towards a large body of ore encountered by Diamond drilling, 600 feet to the south.

The progress made on the Three R Mine is especially interesting, as this mine has been in the past one of the real producers, and now every indication now points to the producing of large ore bodies which will be developed, so as to warrant the erection of a modern milling plant.

Kansas Town Anxious to Sell Nice Hoosgow

Erie, Kan.—Would some one like a nice, comfortable full?

Erie has one that is going to be auctioned off in the near future to satisfy three years of back paying taxes. It is not that Erie has been reformed, but that prisoners are now kept in the county hoosgow instead of the city jail. In recent months the jail has been satisfactorily used as a cow barn.

FAMOUS GEYSERS ARE ACTIVE AGAIN

Yellowstone Park Wonders Back to Life.

Washington.—After eight or nine years of comparative quiet, unusual activity is now being displayed by two of the largest geysers in Yellowstone National park, the Giant and the Giantess, according to reports recently received at the Department of the Interior.

The Giantess, which played only once during the summer of 1928, has played twice since the beginning of the present calendar year, with a 22-day interval. During the second eruption it played for over four hours. The period during which water was erupted lasted only about 20 minutes. The rest of the four hours being given to steam and enough accompanying water to form a fine mist cooling down.

From these two eruptions it is hoped this geyser is cooling back to activity. The average height of the Giantess eruptions is from 200 to 250 feet. Until recent years it has usually played two or three times a season.

The Giant geyser, which used to play every eight or ten days, during the last few years extended the time between eruptions to a month or more and last summer and the year before only played at night when tourists were not able to see it. It also has played twice so far this year, at one time throwing water to a height of 170 to 200 feet for a period of 20 minutes. Sometimes the Giant throws its water as high as 250 feet. Until the advent of the new geyser in the park the Giant has been classed as the greatest existing geyser since the old Excelsior, which played out in 1890.

The new geyser, which as yet has not been given a special name, suddenly broke out last July. It appears to have continued activity without interruption through the winter, although close observations have been impracticable under winter conditions. Its crater, which resembles that of the old Excelsior, measures 90 by 140 feet. Its tube may be measured to a depth of 74 feet below the surface, one foot deeper than that of the Giant. During the latter part of the past summer it erupted once in every ten to fourteen and one-half hours, the period of eruption lasting from four to six hours. It has been estimated that about 700,000 gallons of water are thrown out in one of its four and one-half hour eruptions.

Ed. Bate, is putting up a brooder house, going to raise chicks.

James Parker, is putting in a storage tank on his ranch, to store water for his cows.

James Frazier, has purchased a Chevrolet coupe, to attend to business.

Elmer McDonald, and his family are on a prospecting trip in the Santa Catalina Valley.

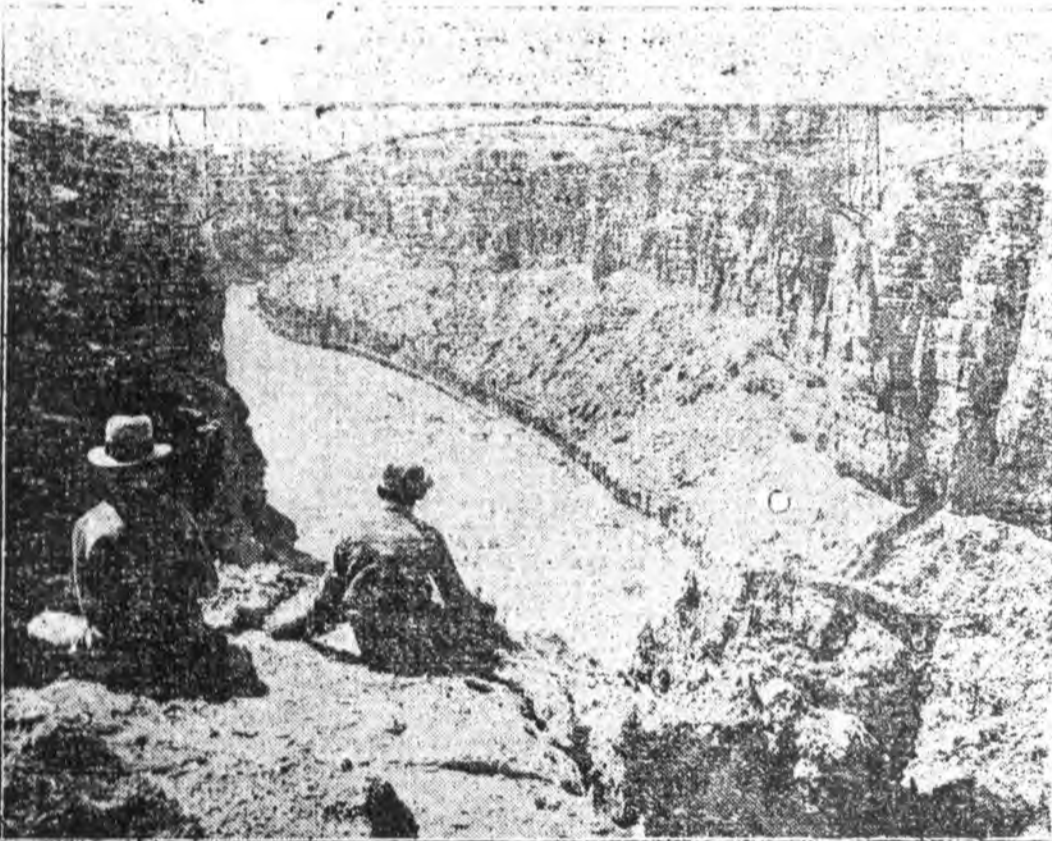

J. Mowry, 2804 1/2 ranch to Nelson, last week and left for Oregon, where he expects to go into the Auto Camp business. Mr. Mowry came to Vaughn from Oregon, about a year ago.

Bridge Dedication

A celebration unique in the history of tourist development in the Southwest is forecast for the dedication of the Grand Canyon highway bridge near historic Lee's Ferry, 135 miles north of here, in a preliminary program for the two day event announced today.

The celebration will take place Friday and Saturday, June 14 and 15, and will be attended by several thousand people from Arizona, Utah and adjoining states, as well as hundreds of Indians from the surrounding Navajo and Hopi reservations.

Friday, June 14, the opening day of the dedication, will be observed as flag day, and appropriate Flag Day exercises will be conducted under the direction of Col. J. F. Pomeroy, adjutant general of Arizona. There will come the formal dedication of the bridge itself, the highest highway structure in the world and opening the first tourist route between Utah and Arizona, presided over by Governor John C. Phillips of Arizona and Governor George H. Dern of Utah.

Saturday, June 15, has been designated "Pioneer Day," and will be notable for a series of episodes depicting early crossing of the Colorado by

Norman pioneers who migrated to Arizona two generations ago. These will be represented by descendants of those same pioneers, with a choir of 50 voices from Snowflake, Anthony W. Ivins, first counselor of the L. D. S. church and himself a pioneer of the Utah-Arizona border, will be one of the day's chief speakers.

More Indian dances; Navajo horse races and Indian sports, and other entertainment events will be included in the day's program. On both days added activity will center on a temporary "midway" on which food and drink concessions with typically old-time names will be grouped.

The celebration grounds proper will be situated on the north side of the bridge, where ample parking and camping space has been laid out near the Lowery lodge. On the south side the Indian camp will be located, under the first jurisdiction, of C. L. Walker, superintendent of the western Navajo agency at Tuba City, and three collections of Indian rugs and other wares will be displayed, with native silversmiths actually at work.

Really unique feature of the celebration considering that Marble Gorge post and the bridge are 135 miles from a railroad or settlement of any size, will be the lighting system. A group of electric plants installed by D. S. Nelson, Kohler distributor in Phoenix, will provide current for an extensive network of brilliant foot-lights. Other modern facilities will include a first aid station with physicians and nurses and an information booth manned by Grand Canyon National Park rangers.

As the limited accommodations near the bridge will be insufficient for official guests, everyone attending is warned to come equipped to camp or sleep out. Ample bedding, and cot if desired, will be necessary, and those attending also are advised to bring water and supplies, although water and food will be available. Gasoline and oil are available at four points between Flagstaff and the bridge. The road from Cameron to the bridge is unimproved, but had spots have been remedied and motorists will find it comparatively easy traveling. Motor bus service will be available both from Flagstaff and Grand Canyon.

We call the attention of our readers to News Review of Current Events, carried on the inside of your paper every week. You will find there a brief summary of National and foreign events of importance.

We feel that this is one of the interesting features of your paper.

The outlook was never brighter for mining in the states of the west. Copper, lead, zinc, tungsten and other metals are in demand at good prices and the mining districts of the United States were never more prosperous as a whole. Many new companies are being formed and financed. Arizona is pushing development in many copper prospects that have remained idle for years until the recent advance in the price of the red metal. The outlook is certainly bright for investors in western mining enterprises. —Denver Mining Record.

Crime reformers, citing the fact that England, where possession of small arms is forbidden has fewer crimes of violence than the United States, reach the conclusion that an anti-pistol law is the panacea that will save this country from the criminal.

This logic is superficially persuasive but far from complete. The lack of crime in England is due mainly to the fact that its courts are efficient and justice swift, and that it has the greatest centralized police system known.

In its special addition of 32 pages brought out to celebrate the opening of the new Gadsden hotel, the Douglas Daily Dispatch presents the largest issue of a newspaper ever produced in Douglas. The issue contains not only stories of the new hotel from various viewpoints, but it also tells the story of the city of Douglas of this section of Arizona. The Dispatch says that this issue has been produced by its usual force in the ordinary way. The issue is approximately 35 percent larger than any single issue ever put out in Douglas in former years. Congratulations. A splendid edition.

Wisconsin is the fifth state to dispose of its prohibition enforcement laws.

The state now has no other dry law than the federal prohibition act.

The lead of New York, Maryland, Montana and Nevada was followed by Wisconsin by repealing the Stevenson act, the state's dry enforcement law.

In signing the bill, Governor Kohler said he had merely followed the mandate of the people, "so overwhelmingly expressed in the recent referendum."

The referendum mentioned by the governor was held April 2, at which time the voters, by a majority of nearly 150,000, signified their desires for the abolition of the state dry law.

AN ENCOURAGING OUTLOOK

An editorial in Engineering and Mining Journal, is interesting and encouraging to many Arizonans who have been looking forward to the day when a part, at least, of the tremendous tonnages of copper produced in the state would be refined here instead of being shipped to eastern refineries. The advantages to the state that would come through the addition of the big payrolls of refineries located within its boundaries, are obvious. Increased development of hydro-electric power within the state, giving the mining companies unlimited power, is looked to as one of the factors that will determine the location of copper refineries in Arizona in the future. —Miami Daily Silver Belt.

CONSCRIPTION

Senator Reed of Pennsylvania calls attention of the senate to a pending bill providing for conscription of men as well as capital in the next war, and hopes that the senate will have time to act on it. He declares, "The next war must see no such profiteering as the last one."

With this sentiment most Americans readily agree. If there is to be any conscription, and if a way can be found to do it, by all means let the government draft money as well as men.

Only, why must it be assumed, as it usually is, that there is inevitably going to be a next war? And why so much emphasis on what we are going to do when that war occurs?

If half as much thought, effort and money as are now spent in preparation for more fighting were spent in sensible preparations for peace there probably wouldn't be any next war. —Bisbee Daily Review.

ARIZONA

By Juliet Day, in Arizona Highways
 Arizona is a land created by the hand of an artist and the soul of a poet—a land which the modern Midas is fast turning into gold for the inspiration, the pleasure and the profit of man.

Here is a country of surprise and infinite discovery—superb and unique in its scenic beauty, rich in historic and prehistoric lore, and astounding in its exhibition of what a few years of effort have done to develop its natural resources.

With an area fifth largest among the states and a population barely half that of the city of Los Angeles, the Baby State has accomplished a gigantic task in building up governmental and industrial machinery to serve its widely scattered population. From 1910 to 1920, Arizona exceeded all other states in percentage of growth and indications are that this record will have been maintained during the present decade.

The growth of Arizona has been due to that creative genius which can transform barren rocks into busy mining camps and cactus covered wastes into farms and gardens, and this ever continuing process is steadily accumulating more wealth and prosperity for the fortunate people who live within the state. These material advantages, coupled with an abundance of sunshine and pure air give Arizonans a prior lien on "health, wealth and happiness."

"The biggest contribution to Arizona's prosperity has come from its mines, which represent the oldest and largest single industry in the state. The early history of mining in this region is romantic in its association with adventurous Spaniards and their padres who followed Coronado into Arizona from Old Mexico, searching for gold. Later it is picturesque for its ripping, roaring mining camps, and for all the hazardous life of the once crude western frontier. But now mining has settled down to a real business, and today Arizona is the largest copper mining region in the world, producing 46 percent of the total output of the United States, and 22 percent of the entire world's production. Arizona also exceeds all other states in the in the combined value of its copper, gold, silver, lead and zinc.

The best way to describe the magnitude of Arizona's first industry is to give its production value, which for its five best metals, reached the figure of \$116,400,000 in 1928. Since the post war depression, the industry has become stabilized and is now operating on a sound basis and looking to a brilliant future. Modern science has so reduced operating expenses and so enlarged the field of activity, that there is now almost no limit to what can be accomplished in the mining industry in this state.

Recent developments in the non-metallic field of mining are of considerable interest in Arizona. Quick-silver is being smelted in the Payson district; asbestos is shipped from the Gila country and fieldspar from the

northern part of the state. Large lime plants are operating in Cochise county and gypsum products are showing good success, as are marble, tufa, granite, mica, silica and onyx.

The mining industry is a far reaching asset to Arizona in that it pays nearly half of the taxes of the state, employs about 18,000 men and has an annual payroll of \$36,000,000. The industry spends millions of dollars yearly purchasing supplies in the state, thus pouring a large percentage of its acquired wealth back into the coffers of the state.

Strange as it may seem to those whose ideas of Arizona have been gleaned from the movies and wild west stories, agriculture is next in importance in the state. This, of course, is due to vast projects for reclaiming the desert by irrigation which have been worked out so successfully in the wide valleys of Southern Arizona.

1268 acres would make a big farm

At Milford, Michigan, 1268 acres have been made—not into a farm—but into a Proving Ground for automobiles.

Long before your General Motors car is built, specimen models are sent to the Proving Ground. This fleet is tested in actual use. It has to meet every bad driving condition, from heart-breaking hills to slambang bumps.

But that isn't all. Other cars of American and European manufacture are bought and put through the same tests, so that General Motors always knows how its products compare with others.

The tests involve speed, power, endurance, braking, riding comfort, handling ease, fuel, oil and tire economy; body strength—every phase of car construction and performance.

When the specimen cars are finally able to meet every test, they are sent back to the factory. The car you buy is made exactly like them.

The next time you examine a General Motors car in your dealer's showroom, think of those 1268 acres. They would make a big farm. But they make a better promise of proved car value.

"A car for every purse and purpose"

CHEVROLET, 7 models. \$725—\$725. A six in the price range of the four. Smooth, powerful 6-cylinder valve-in-head engine. Beautiful new Fisher Bodies. Air Light delivery chassis. Sedan delivery model, 135 ton chassis and 135 ton chassis with cab, both with four speeds forward.

PONTIAC, 7 models. \$745—\$895. Now offers "big six" motoring luxury at low cost. Larger L-head engine; larger bodies by Fisher. New attractive colors and stylish line.

OLDSMOBILE, 7 models. \$875—\$1035. The Fine Car at Low Price. New models offer further refinements, mechanically and in the Fisher Bodies—yet at reduced prices. Also new Special and De Luxe models.

MARQUETTE, 6 models. \$965—\$1035. (5 models priced under \$1000) A new car, a great performer built by Buick. Beautiful colors and appointments. Splendid bodies by Fisher.

OAKLAND, 8 models. \$1145—\$1375. New Oakland All American Six. Distinctively original appearance. Splendid performance. Luxurious appointments. Attractive bodies by Fisher.

VIKING, 3 models. \$1595. General Motors' new "eight" at medium price. 90-degree V-type engine. Striking bodies by Fisher. Three years spent in its development and test.

BUICK, 25 models. \$1795—\$2445. The Silver Anniversary Buick. Three wheelbases from 115 to 148 inches. Masterpiece bodies by Fisher. More powerful, vibrationless motor. Comfort and luxury in every mile.

LASALLE, 14 models. \$2295—\$2875. Companion car to Cadillac. Conventional lines. Distinctive appearance. 90-degree V-type 8-cylinder engine. Beautiful bodies by Fisher.

CADILLAC, 25 models. \$1295—\$7000. The Standard of the world. Famous efficient 8-cylinder 90-degree V-type engine. Luxurious bodies by Fisher and Fleetwood. Extensive range of color and upholstery combinations. (All Prices f. o. b. Factory)

ALSO
 FRIGIDAIRE Automatic Refrigerator New silent models. Cold-control device. Tu-tone cabinets. Prices and models to suit every family.
 DELCO-LIGHT Electric Plants—Water Systems. Provide all electrical conveniences and labor-saving devices for the farm.
 Lowest G.M.A.C. Plan for time payments.

The Trail of '98

By ROBERT W. SERVICE

HIMSELF one of those who first prospected the gulches and benches of the Klondike, Mr. Service has given us a smashing story, an epic of the gold rush, written with almost biographical fire. A tremendous drama of superb magnitude, embracing a range of characters that hold the reader in unabated interest to the intense climax.

New Serial Starting in THE PATAGONIAN

MINE FOR SALE

Word is being spread around, that this country is so prosperous that it does not know what to do with its money. It has also been rumored that there are brave men who want very encouraging, and this ad is written in the hope that they are true.

As any old timer in this country can tell you, I have been developing a group of claims and am still at it. But the developing of the best mine in the world takes money, and it seems to me that the better the mine the more money it takes to get it to the producing stage. Probably every resident of this country knows that the government requires work on or for every claim, and this results in a great deal of work being scattered around where it counts but slowly toward the betterment of the mine.

In order to cut down my annual expenditure, which is fixed by law at \$100 a claim, and if possible to get a few dollars to spend on the rest, I will sell to an operator a group at either end of my ground. You can understand why I do not want to sell out a claim or two in the middle of the group, but in view of my needs you may be sure that you will get a wonderful bargain in anything that you buy from me NOW. It costs money to run this ad, and I will appreciate it if any person who wants to buy a mine will be frank about what he wants. It is too bad to say which of my claims is the best, and any one of them might turn out bonanza; personally I believe they will. You can have one claim or two, and if that is not enough, I add any number desired although I would rather sell a small group and keep the rest. But if you have not enough claims to satisfy an operator I have arrangements already made by which I can turn in for a big operation, my neighbors claims with mine. It would pay some one to buy them all for BIG BUSINESS, but they have not waked up.

These claims all have ore; the ore always carries silver, and a little gold; they will get pay for lead, and less copper. The idea of the authorities is that the lead while good near the surface, will get less while the copper gets more with depth. Shipments have been made from any group I have to sell, and these run from 12 to 260 ounces of silver, from 5 to 60 percent lead and from 2 to 20 percent copper. And there is plenty more of it. I may add for your information, that I have about 200,000 tons of ore in sight on my whole group, that will average about \$12.00 per ton, and my earnest ambition is to add to that until some capitalist wakes up. Don't be deceived by cow-boy talk; most of them pose in their idle moments as mining "experts," but the really do not know what they are talking about. This country is full of good mines in and adjoining the Santa Cruz Batholith, and it won't be long till the world knows it.

Come and see me if you want to mine with success.
JOSIAH BOND, Alto, Arizona.
via Patagonian

Man Marries Grandmother
A marriage of a grandson and his grandmother has just been reported from a village near Swede, in the Province of Overijssel, Holland. This is how it happened: A man married a girl of twenty, whose mother was forty-five. By his first marriage this man had had a son and this son married the mother of his father's second wife. Relatives figure out that the fourth not only married his stepmother, but became stepfather to his own father.

Many Kinds of Insects
In a recent statement in one of the new insect books it is said that more than 75 per cent of all the animal kinds belong to the phylum Arthropoda and more than 9 per cent of these are true insects. The estimated number of living species of insects which have been described is 225,000. This will give our readers some idea of the capacity of the study of entomology. The phylum Arthropoda is, as stated, the largest phylum in the animal kingdom, and aside from the vertebrates of most importance to man.

Good Work Is Our Specialty

BOYS AND GIRLS

We will give to the boy or girl who brings in 25, paid in advance subscriptions, to the PATAGONIAN before June 10 the bicycle advertised in this paper.

Come to the Patagonian office and get your book giving you the right to take subscriptions.

This is open to anyone in Santa Cruz County. We especially invite boys and girls from the various communities to enter this contest.

Here is your chance boys and girls to win a splendid bicycle.
