PERSONAL AND SOCIAL

GOES ON TRIP

H. L. Stoddard and Mrs. Stoddard left last week for a two months trip thru Iowa and Nebraska, by auto WITH HIGHWAY DEPARTMENT L. E. Heavener, of Sonoma, who is connected with the state highway department was a business visitor in Patagonia Wednesday, looking after matters pertaining to the Sonoma school

MEXICANS CELEBRATE

The annual celebration of San Juan's day took place in Patagonia last Monday. There was horse racing in the afternoon and a dance in the evening. The horse race was won by Vincent Farley and Juan Orres.

RATTLE SNAKES BOUGHT

All kinds, alive, recently killed, or skinned. 10 cents to 50 cents a foot. O. N. Arrington, Third house west of High School, Patagonia.

RAIN

The long looked for and desired rain came to Patagonia in the afternoon of Thursday June 27. It was a good downpour lasting about an hour. The long drought was broken and the rain cooled the atmosphere and will relieve the anxiety caused by the water shortage.

DOING ASSESSMENT WORK

Ed. Sheely, mounted Inspector, in the customs department is doing some assessment work on his claims thus pending his vacation.

GOT THE PRIZE

Dolly Kame, and wife, won the prize at the last dance at Sonoma, for being the most graceful performers of the old fashioned two-step.

LOOKING OVER THE FIELD

Mr and Mrs. Hinman, of the Public Utilities Corporation of Nogales, were business visitors in Patagonia last week. Mrs. Bethel entertained Mrs. Hinman, while Mr. Hinman, made a survey of the town for his company.

FORM A MINING CORPORATION

A. F. Gross, president of the Gross Mining and Investment Company, is in Patagonia this week, looking after the interests of the company. This has just been incorporated under the laws of Arizona. Its property being the American Boy Mine. The work done so far on the American Boy Mine shows that it will be one of the leading producers of this district.

Deputy Sheriff Kindly Gives Thief a Lift

Billings, Mont.—Walter Scott, negro porter, will be very careful while he rides in the future.

He left a barber shop, where he was employed taking some hair cuts, upon horses and large cash with him. Catching a ride out of town the following day, he was forced to take to the road again when the track became bogged in a mud hole. His buck held out, apparently, as he approached another car that had stopped on the road.

Scott was given a ride to Phoenix and escorted into the police station there by the kindly benefactor, who happened to be a deputy sheriff from Billings who had heard of the barber shop robbery.

LEGAL NOTICE

KNOW ALL MEN BY THESE PRESENTS, that we, the undersigned, having associated ourselves together for the purpose of forming a corporation under and by virtue of the laws of Arizona, hereby adopt the following Articles of Incorporation:

ARTICLE I.—The name of the corporation shall be "The Gross Mining and Investment Company" and its principal place of business shall be on the property known as the American Boy Mine in Santa Cruz County, Arizona. Other offices may be established and maintained within or outside of Arizona, at such places as the Board of Directors may designate, of where meetings of stockholders and directors may held.

ARTICLE II.—The general nature of the business proposed to be transacted is to purchase, subscribe for, acquire, hold, sell, exchange, assign, mortgage, pledge or otherwise dispose of shares or voting trust certificates of the capital stock, or any other notes, securities or evidence of indebtedness created by any other corporation, organized under the laws of this state or any other state or district or country, nation or government, and also bonds or evidences of indebtedness of the United States or any state, district, territory, department, or county or subdivision or municipality thereof; to issue in exchange therefor shares of the capital

DEATH OF C. J. M. BLABON

The many friends of C. J. M. Blabon, father of R. C. and B.B. Blabon of Patagonia, and O. C. Blabon, of California were sorry to hear that he had passed away rather suddenly last Monday morning at his home in San Diego, Cal.

He had just undergone an operation and was considered out of danger and recovering, when the end came. He was buried at 2 P. M. Thursday, the Moose Lodge had charge of the burial. R. C. Blabon, accompanied by his wife and mother left for California

Warm Weather

Patagonia with the rest of the nation has been "enjoying" a severe heat wave the past week.

Weather records in all parts of the country have been shattered, and in the east numerous deaths have occurred

people who have been complaining about the heat have the consolation of knowing that June, always the warmest month of the year is almost gone, and the annual two months rainy season should begin. After the rains set in it is usually cool.

LEGAL NOTICE

and A. P. Puscher. The Directors shall have power to fill vacancies occurring in the board from any cause, and appoint from their own number an executive committee and vest said committee with all the powers granted the directors by these Articles.

ARTICLE VI.—The highest amount of indebtedness or liability, direct or contingent, to which the corporation is at any time to subject itself in One Million Dollars (\$1,000,000.00)

ARTICLE VII.—The private property of the stockholders, directors, and officers of the corporation shall be for ever exempt from its debts and obligations with smelters and other plants for the reduction and refining of ore, minerals, and of oil, lease, mortgage, or otherwise alien the same to secure, own, operate, sell, lease, mortgage or otherwise alien in connection therewith any and all means and instrumentalities of transportation so far as the same may from time to time be permitted under the statutes of the State of Arizona, to accept and acknowledge service of, and upon whom may be served all necessary process or papers in any action suit or proceeding they may be had or brought against the said corporation in any of the courts of said State of Arizona; such service of process or notice, as the acceptance thereof by him and each of them, to have the same force and effect as if served upon the president and secretary of the company. This appointment may be revoked at any time by filing the appointment of another agent.

IN WITNESS WHEREOF, We hereto affix our signatures this 4th day of May, 1929.

Arrangements For Patagonia Rodeo On July 4th Completed

JULY FOURTH BARBECUE AT THE CIRCLE "Z" RANCH TO BE BIGGEST EVER SERVED IN SOUTH WEST.

even from professional contestants.

Robert Campbell of Patagonia is the general chairman of the Rodeo Committee and Lee Zusmeier, owner of the Circle "Z" Ranch is the Rodeo director.

Final arrangements have been completed for one of the biggest show events in Arizona, the Patagonia Rodeo and Barbecue, which will be held at the Circle "Z" Ranch on July 4th.

This will be the fourth annual celebration sponsored by the Patagonia Volunteer Fire Department. Each evening the rodeo has drawn a large audience and this year it is expected that all previous records will be broken in point of attendance.

The Patagonia Rodeo has become famous throughout the state as being one of the most interesting shows of its kind because of the speed with which the various events are handled. There are

two events on the Circle "Z" field and the events are so arranged that no time is lost between events. The program will include calf roping, steer tying, bronc, wild horse, wild mule and bull riding, steer bulldogging and horse racing.

There is no rodeo field in the entire state to equal the one at the Circle "Z" Ranch. A perfectly level flat, fifteen hundred feet long and a third as wide, entirely surrounded by giant willow, walnut and cottonwood trees. There is parking space around the field sufficient to accommodate more than six hundred cars.

Another famous day's trip from Phoenix as a central point, roads lead in every direction where a few hours' drive will reveal all the startling beauty of Arizona's ever-changing panorama. Straight south, 205 miles away, is the Mexican border and Nogales, with Casa Grande ruins—some of the oldest and best preserved prehistoric ruins on the continent. Tucson, second largest town in the state, San Xavier mission and partly ruined Tumacacori mission lie west along the way. West, half a day's drive takes the motorist to Yuma and its fertile farmlands irrigated by the Colorado river on the border of California and half way to Los Angeles.

Another famous day's trip from Phoenix lies over the historic and colorful Apache trail to Roosevelt Dam. The road dips and curves through painted canyons and oval dizzy heights, skirts shimmering dam-created lakes, and leaving lovely Roosevelt Lake, returns through the

Globe and Miami copper mining districts. So long ago this region was the haunt of the fierce Apache Indians, and the ruins of cliff dwellings along the way tell the story of an ancient civilization before history began.

From Globe another mountain road goes east over the new Coolidge dam—unique for its architectural beauty, and then on through a fertile valley to Safford and Clifton, famous for its healing hot springs. On it goes into the north, over the Coronado Trail, leading into a marvelous mountain region which rivals Switzerland for beauty—a paradise for lovers of outdoor sports.

Back to Phoenix and north over splendid roads to Prescott, a veritable jewel of the pines and to the east is Jerome, picturesque mining town which clings to a high precipice of the mountain side like an ancient cliff dwelling. On the east and north, through another brilliant colored canyon, is Flagstaff, guarded by the snow-clad San Francisco peaks; and still farther on the Painted Desert and the great Petrified Forest.

Practically the same.

Billy, the small son of a prominent doctor, was playing at his father's profession, walking up and down the street with a "pretend" medicine case in his hand and a very serious expression upon his face. Much impressed, next door Lillian inquired of her mother,

"Is Billy a doctor, mother?"

"He's a quack doctor," said her mother jokingly.

The next day one of Lillian's dolls developed croup.

"Mother," suggested the little girl, importantly, "I'm going to call to Doctor Dach."

Our State

By Juliet Day, in Arizona Highways

Among Arizona's most valuable natural resources is its timber. The state is in nature. But the supreme delight and reward to the lumber industry is an easy day's trip from Phoenix through Prescott Ashfork and Williams, to the Grand Canyon of the Colorado—that most gorgeous of nature's wonders—that thrill and awe-inspiring chasm which draws people from the four corners of the earth to its brink to marvel at its magnitude and colors.

So it goes—cactus blossoms and orange blossoms, sage brush and trout streams, lofty mountains and vivid canyons, weird, barren wastes and rich farm lands—Arizona. And too, a state fully alive to its industrial possibilities and eager for their fulfillment in a brilliant future.

On the Safe Side

There are so many "unsafe" things around a home. If a mother will think of such things, serious injury is spared the baby at its investigating age. She can teach the older children to cooperate with her in keeping sharp objects, such as pencils, scissors and knives from the baby's grasp. Matches and matches may be kept on a high shelf, and while cooking, the handles of pans should not be left. In such a position that baby can grab at them and spill the hot liquid. Eternal watchfulness is the price of safety!

Old Roman Sacrifice

The relief of *Anaconda Trajan* in the Roman forum represents the sacrifice of the bull, sheep and pig which is usually accompanied by the putridities of incense or incense. Each animal represents a valuable part of the farmer's stock. The ceremony generally took place at the close of the census and for the army at the beginning of a campaign and probably also in connection with the founding of temples and other similar occasions. The animals were led around the arena and then sacrificed.

Not to Be Expected

An actress was traveling to the south to join a concert party. At the London station the porter cast a disapproving eye upon her large quantity of luggage and intimated that she would have to pay "extra" unless she was a theatrical artist.

"That's exactly what I am," said the girl.

"Well, then, miss," said the hurried man, "why didn't you say so at first? I can't go about all day long troubling passengers by asking them if they're actresses."

HISTORIC JULY FOURTH

No day in the year is fraught with such significance for the American people as July 4, the anniversary of the singing of the immortal Declaration of Independence. The story of the Declaration has been told and retold until it is a part of the consciousness of every American, old and young.

While other events which have transpired on that date have been overshadowed by the annual national celebration, it may be interesting to note that July 4 is also the anniversary of the following happenings:

Founding of Providence, R. I., by Roger Williams, 1636.

Nathaniel Hawthorne born, 1804.

John Adams and Thomas Jefferson died; Stephen Collins Foster, song writer, born, 1826.

James Monroe died, 1831.

Cornerstone of Washington monument laid, 1848. Surrender of Vicksburg, 1863.

Calvin Coolidge born, 1872.

The first week in July is filled with significant anniversaries, among them being the following:

Battle of Gettysburg, July 1-3, 1863.

Battle of Santiago, July 1-3, 1898.

Washington took command of the Continental army, July 3, 1775. Admiral Farragut, born July 5, 1801. John Paul Jones born, July 6, 1747.

United States annexed Hawaii, July 7, 1898.

A FISHERMAN'S LUCK

Many of the world's greatest thinkers, and also some notable doers, have been enthusiastic fishermen. There appears to be something about fishing which lends itself to constructive thought and the world doubtless owes much to the quiet meditations of the patient angler.

At all events, an idea which came to Clarence Birdseye, a young American biologist engaged in Labrador, while on a fishing expedition, is said to be destined to revolutionize the food preserving industry.

It is well known to scientists that ordinary slow freezing methods, as applied to food products, causes ice crystals to form which pierce the minute cell walls of fish, meat and other perishable foods, thus permitting the escape of a large percentage of natural juices and flavor. Birdseye reasoned that if the freezing process could be accomplished quickly at an extra low temperature, the cell structure would not be ruptured, and he began his extensive research into methods of producing and merchandising consumer packages of quick frozen fish. He succeeded in developing such a process.

Now the Birdseye quick freezing process has been adopted by the great new General Foods corporation which has purchased a controlling interest, and will apply it to the fresh fish and a variety of foods, such as meats and vegetables, poultry and fruits.

So, our congratulations to Birdseye, upon having a most unusual and remunerative kind of "fisherman's luck."

WHOSE MONEY IS IT?

A newspaper headline on June 15 said: "War of Oratory Waged by Senators Against Orgy of Stock Speculation." All of which reminds us of the saying credited to Mark Twain to the effect that "we talk a lot about the weather but no one seems to do anything about it."

American citizens have an inborn desire for adventure. The majority of them are not satisfied to settle into dull routine and merely exist year after year without experiencing pleasures and excitement as well as sorrow and regrets which inevitably accompany speculative excursions into any line of endeavor. After government has provided laws and regulations to protect investors against fraud, it has done its part.

We are not a nation of babies who have to be told what we can buy and what we cannot buy. The day laborer who has saved \$100 and thinks he sees an opportunity to invest it with profit has as good a right to exercise his judgment as the wealthiest man in the land. Moralize or argue as you will on this subject -- the American people will not take kindly to any paternalistic policy which attempts to tell them when, how or where they may spend their money.

WANT A MINE?

The Santa Cruz Batholith of Arizona contains a mine for every purpose, and for every purpose. There must be those who would buy a mine if they knew where they could get one. Are you one of those? If so write me specifying the price, terms and other conditions you prefer and learn how near I can come to fitting you out! Anything from a single claim to a big consolidation that would run into figures. Batholithic characteristics are: wide veins, continuous veins, big lodes that run into vast tonnage below, bellies of rich ore, and here, fine tunnel sites with depths of 1200 feet up. My immediate neighborhood has shipped \$2,000,000, this county about \$25,000,000, while within about fifty miles from my house the production has been more than a billion dollars. The richest mineral land in the world.

Fish Liars Club Now Issuing Liar's License

Waterloo, N. Y.—Prompted by a real need, the Liars club of Waterloo now issues a Har's license.

It all started when W. Fred Bacon, an attorney, returned from Florida with a story, accompanied by photographs, of catching 88 fish totaling 800 pounds in a single day. He was immediately awarded a card of honor by the Liars club.

But the lying became so rampant that the executive committee decided to issue a card permitting its members to falsify. The card allows recklessness with the truth in all matters pertaining to fish or fishing for the current season. The grand seal of Ananias is affixed to the document.

Link Ancient Egypt**China in Snake Rites**

Stockholm.—Belief that the Chinese during the Stone age had the same kind of snake worship as the inhabitants of Egypt, Mesopotamia, Persia and Russian Turkestan, was expressed by Prof. J. G. Anderson, Sweden's foremost expert on Chinese archeology.

Professor Anderson based his belief on the discovery of the cover of a Chinese grave urn made during the Stone age in China.

Around the head of the figure of the urn, and down the man's back, Professor Anderson found twined a plaited braid of snakes corresponding almost exactly to snake designs found on Stone age objects discovered in northern Africa and in the Near East.

The Opportunist

After the motor accident the unfortunate victim was carried into a house nearby. A few minutes later a smartly dressed young man ran up the steps and rang the bell.

"Excuse me," he said to the maid who opened the door, "can I see the gentleman who was brought in here a few minutes ago?"

"I'm afraid not," replied the girl; "he hasn't come to his senses yet."

"Good!" exclaimed the other. "That'll just suit me fine. I want to sell him another car."—Boston Transcript.

MINE FOR SALE

Word is being spread around, that this country is so prosperous that it does not know what to do with its money. It has also been rumored that there are brave men who want very encouraging, and this ad is written in the hope that they are true.

As any old timer in this country can tell you, I have been developing a group of claims and am still at it. But the developing of the best mine in the world takes money, and it seems to me that the better the mine the more money it takes to get it to the producing stage. Probably every resident of this country knows that the government requires work on or for every claim, and this results in a great deal of work being scattered around where it counts, but slowly toward the bottom of the mine.

In order to cut down my annual annual expenditure, which is fixed by law at \$100 a claim, and if possible to get a few dollars to spend on the rest, I will sell to an operator a group at either end of my ground. You can understand why I do not want to sell out a claim or two in the middle of the group, but in view of my needs you may be sure that you will get a wonderful bargain in anything that you buy from me now. It costs money to run this ad, and I will appreciate it if any person who wants to buy a mine won't be frank about what he wants. It is better to say which of my claims is the best, and say one of them might come out, bonanza; personally I believe they will. You can have one claim or two, and if that is not enough, I will any number desired, although I would rather sell a small group and keep the rest. But if you have not enough claims to satisfy an operator to have arrangements already made by which I can turn in for a big operation, my neighbors claims will do. It would pay some one to buy them all, for BIG BUSINESS, but they have not waked up.

These claims all have ore; the ore always carries silver, and a little gold; they will pay for lead, and some copper. The idea of the author is that the lead while good near the surface, will get less while the copper gets more with depth. Shipments have been made from any group I have to sell, and those run from 12 to 200 ounces of silver, from 5 to 60 percent lead and from 2 to 10 percent copper. And there is plenty more of it. It may add for our information, that I have about 200,000 tons of ore in sight on my whole group, that will average about 2200 per ton, and my earnest intention is to add to that until some capitalist wakes up. Don't be deceived by showy talk; most of them pose in their idle moments as mining "experts," but the really do not know what they are talking about. This country is full of good mines in and adjoining the Santa Cruz, Bathurst, and it won't be long till the world knows it.

Come and see me if you want to do with success.

MAHARAJAS, BEGUMS AND NIZAMS SECURE

Picturesque Indian Rulers to Keep Jobs.

Washington.—The recent report of the Indian states committee opposing the federation of the Indian native states and the British administration in India, tends to perpetuate the picturesque rulers of the hundreds of little and big states in the giant peninsula of India.

According to a bulletin from the Washington (D. C.) headquarters of the National Geographic Society, these rulers, although they have adopted western dress and customs for many occasions, still are among the most colorful potentates of the East.

Fortunes in Jewels.

"Consider the maharaja of Patiala in festive array if you would have a true picture of eastern splendor and color," the bulletin continues. "He wears a diamond thair from which hang loops of diamonds, pearls and emeralds. Around his neck is a three-row pearl collar and, on his breast, an emerald breast plate. His coat is of rich brocade, and his hand rests upon a diamond-bladed sword sheathed in velvet scabbard studded with diamonds, rubies, emeralds and pearls.

"Patiala's maharaja is outshone by other princes by the splendor of their jewels. One ruler has a carpet of pearls, 8 by 10 feet. Maharaja Holkar, of Indore, has a carpet of gold in his throne room and half gold chairs. The gakwar (prince) of Baroda's treasure includes gun carriages and canons of gold. White bullocks, with silver-capped horns and brocaded trappings, to carry these cumbersome carriages through the streets in official parades.

"Until a few years ago the ruler of Bhopal was a woman, the begum. Bhopal is a Mohammedan state and its woman ruler made pilgrimages to Mecca, and also visited England. There she was protected from 'infidel' eyes by an enveloping robe which fastened across her head, with lace-trimmed slits for her eyes.

"Perhaps the most novel banquet table in India is that of the maharaja of Indore. A miniature landscape of flowers and trees illuminated by revolving colored bulbs adorns the table. A tiny electric train runs around its edge on a small track. The train contains seven coaches, one each for carrying brandy, port, sweets, nuts, chocolates, cigars and cigarettes. At the end of the meal, the maharaja starts the train by pressing a button at his place, and it stops automatically at the slightest touch of a guest who wishes to make his selection.

"The nizam of Hyderabad, the ranking Mohammedan prince of India and probably its richest ruler, has the largest bazaar in India. His household, including all retainers, numbers 7,000. Hyderabad was once known as Golconda, a famous market for diamonds in ancient days, and the sultan's personal collection of jewels is worth millions of dollars.

Colorful Courts.

"Although lacking in quality and quantity of jewels, the retainers of the rajahs, in their voluminous fortunes and richly colored saris, are almost as picturesque as their rulers. Corps of match girls wear fortunes in heavy gold ornaments, and are picturesque in their brilliantly-hued skirts and pastel-tinted saris. Even the elephants of state take to jewels and jewelry. Their tusks are set in gold bands with brass rings. In some states they are provided with solid gold anklet bands, and are tattooed with shawl effect on their foreheads and ears. One ruler has a solid-gold pectoral mounted on the back of his favorite elephant, and others gift these beauties and hang them with gorgeous trappings and tapestry curtains.

"The maharaja of Udaipur has some famous dancing horses. These are purebred horses, caparisoned in gold-covered bridles and brocade saddles, which prance with careful steps to the sing-song music of their Indian accompanists. These dancing horses are popular and may be found in the stables of many of the Indian princes.

"Despite the enormous wealth of the princes and other potentates of India the masses of the people live in poverty. The average individual income of India's 300,000,000 people is estimated at less than the equivalent of \$25 annually. British rule has brought two blessings to India, the building of railroads which avert the regional fashions which, in the past, dealt death to thousands, and protection of her northwest border against invasion by marauding tribesmen."

STORY FROM THE START

Abel Meldrum, young Scotsman who tells the story leaves his mother and brother, Garry, in San Francisco. At San Francisco, after getting paid off, he takes a laborer's job, and meets a fellow adventurer whom he dubs, the Prodigal. The Prodigal is anxious to join the rush of gold seekers into Alaska, and Meldrum agrees to go with him after he (the Prodigal) comes back from a visit to the wealthy father in the East.

CHAPTER II—Continued

"Huh!" he ejaculated when I had finished. "I'm glad by the grace of God I've been the means of givin' you a hand-up. Better come to my room an' stop with me till somethin' turns up. I'm goin' north in three days. I'm goin' to join this crazy rush to the Klondike. I've been minin' for twenty years, Arizona, Colorado, all over, an' now I am a-goin' to see if the North hasn't got a stake for me."

In his room he told me of his life.

"I'm saved by the grace of God, but I've been a Bad Man. I've been everything from a city marshal to a gambler. I have gone headed for two years, thinking to get my pass to hell at any moment. It's all over now, an' I've seen the evil of my ways, but I've got to talk once in a while. I'm Jim Hubbard, known as 'Salvation Jim,' an' I know minin' from Genesis to Revelation. Once I used to gamble an' drink the limit. One morning I got up from the card table after sitting there thirty-six hours. I'd lost five thousand dollars. I knew they'd handed me out 'cold turkey,' but I took my medicine."

"Right then I said I'd be a crook too. I learned to play with marked cards. I could tell every card in the deck. I went after the suckers. There was never a man did me dirt but I paid him with interest. Of course, it's different now. The Good Book says: 'Do good unto them that harm you.' I guess I would but I wouldn't recommend no one to try and harm me. I might forget."

The heavy, aggressive jaw shot forward; the eyes gleamed with fearless ferocity, and for a moment the man took on an air that was almost tigerish. I could scarce believe my sight; yet the next instant it was the same cheerful, benevolent face, and I thought my eyes must have played me some trick.

Perhaps it was that sedate Puritan strain in me that appealed to him, but we became great friends. He told me of the girl he was married and worshipped, and of the man who broke up his home. Once more I saw that flitting tiger-look appear on his face and vanish immediately. He told me of his wild days.

"I was always a fighter, an' I never knew what fear meant. I never saw the man that could beat me in a rough-and-tumble scrap. I was uncommon bushy an' as quick as a cat, but it was my fierceness that won out for me. I've gone up unarmed to a man I knew was headed to shoot me on sight, an' I've dared him to do it. Just by the power of the eye I've made blue take water. Then, as the drink got bold of me, I got worse and worse. Glory to God! I've seen the evil of my ways."

I wish I could paint or act the man for you. Words cannot express his curious character. I came to have a great fondness for him, and certainly owed him huge debt of gratitude.

One day I was paying my usual visit to the post office, when some one gripped me by the arm.

"Hello, Scotty! By all that's wonderful, I was just going to mail you a letter."

It was the Prodigal, very well dressed and spruce-looking.

"Say, I'm so tickled I got you; we're going to start in two days."

"Start! Where?" I asked.

"Why, for the Golden North, for the land of the Midnight Sun, for the treasure-troves of the Klondike Valley."

"You may be," I said soberly; "but I can't."

"Yes you can, and you are, old sport. I fixed all that. Come on, I want to talk to you. I went home and did the returned prodigal stunt. The old man was mighty decent when I told him it was no good, I couldn't go into the glue factory yet awhile. He staked me handsomely, and gave me a year to make good. So here I am, and you're in with me. I'm going to grubstake you. Mind it's a business proposition. I've got to have some one, and when you make the big strike you've got to divvy up. Of course, if you're afraid of the hardships and so on—"

"Poor little beggar!"

Then I cursed myself for a sentimental impressionist and I went home. Stateroom forty-seven was mine. We three had been separated in the shuffle, and I knew not who was to be my room-mate. Feeling very down-hearted, I stretched myself on the upper berth, and yielded to a mood of penitential sadness. As I lay, there came voices to my door, guttural tones blended with liquid ones; lastly

just the man we want. We'll ask him to join us."

I brought the two together, and it was arranged. So it came about that we three left San Francisco on the fourth day of March to seek our fortunes in the Frozen North.

CHAPTER III

"Say! you're looking mighty blue. Cheer up, darn you! What's the matter?" said the Prodigal affectionately.

And indeed there was matter enough, for had I not just received letters from home, one from Garry and one from mother? Garry's was gravely censorious, almost remonstrant. He pointed out that I was in a fair way of being a rolling stone, and hoped that I would at once give up my mad notion of the South seas and soberly proceed to the North-west.

Mother's letter was reproachful, in parts almost distressful. She was failing, she said, and she begged me to be a good son, give up my wanderings and join my cousin at once. Also she enclosed post office orders for forty pounds. Her letter, written in a fine faltering hand and so full of gentle affection, brought the tears to my eyes; so that it was very blankly I leaned against the ship's rail and watched the bustle of departure.

"I've just heard from the folks," I said, "and I feel like going back on you."

"Oh, beat it," he cried; "you can't reneg now. You've got to see the thing through. What you want to do is to get busy and make yourself acquainted. Say! Of all the tooted outfits this here aggregation has got everything else skinned to a hard-boiled finish. They've got a notion they've just got to get up there and pick big nuggets out of the water like cherries out of a cocktail. It's the truth."

Our eyes roved round from group to group, picking out characteristic figures.

Salvation Jim was talking to two men.

"There's a pair of winders. I put my money on them. Native-born Americans, all grin and get-up. See the tall one smoking a cigar and looking at the women? He's an athlete. Name's Mervin. See the other. Benson's his name; solid as a tower; muscled like a bear; built from the ground up. You can't down a man like that."

He indicated another group.

"Now there's three birds of prey Bullhammar, Marks and Mosher. The big pig-eyed heavy-jowled one is Bullhammar. He's in the saloon business. The middle-sized one in the plug hat is Marks; calls himself a mining broker. The third's Jake Mosher. He's an out-and-out gambler, a sure thing man, once was a parson."

"A bad-looking bunch," I said.

"Yes, there's heaps like them on board. Just get next to those two Jews, Mike and Rebecca Winklestein. They're going to open up a sporty restaurant."

The man was a small bandy-legged creature, with eyes that squinted, a complexion like ham fat and waxed mustaches. But it was the woman who seized my attention. Never did I see such a strapping Amazon, six foot if an inch, and massive in proportion. She was handsome, too, in a swarthy way, though near at hand her face was sensuous and bold. Dangerous, unscrupulous and cruel, I thought; a man-woman, a shrew, a tormenting!

But I was growing weary of the crowd and longed to go below. I was no longer interested, yet the voice of the Prodigal drooped in my ear.

"There's an old man and his granddaughter, relatives of the Winklesteins, I believe. I think the old fellow's got a screw loose. Comes from Poland. Speaks Yiddish or some such jargon. Only English he knows is 'Klondike, Klondike!'" The girl tooks heartbroken poor little beggar. I was not listening to what I'm saying. Look, why don't you!"

So, to please him, I turned full round and looked up on the deck. Erect by his side, with her hand on his shoulder, stood a slim figure in black, the figure of a girl. Indifferently my eyes traveled from her feet to her face. There they rested. I drew a deep breath. I forgot everything else. Then for the first time I saw—Berna.

I will not try to depict the girl. Pen descriptions are so futile. I will only say that her face was very pale, and that she had large pathetic gray eyes. Twas the face, I thought, of a virgin martyr with a fear-haunted look hard to forget.

"Poor little beggar!"

Then I cursed myself for a sentimental impressionist and I went home. Stateroom forty-seven was mine. We three had been separated in the shuffle, and I knew not who was to be my room-mate. Feeling very down-hearted, I stretched myself on the upper berth, and yielded to a mood of penitential sadness. As I lay, there came voices to my door, guttural tones blended with liquid ones; lastly

a timid knock. Quickly I answered it. "Is this room number forty-seven?" a soft voice asked.

Even ere she spoke I divined it was the Jewish girl of the gray eyes.

"Yes," I answered her.

She led forward the old man.

"This is my grandfather. The steward told us this was his room."

"Oh, all right; be'd better take the lower berth."

"Thank you, indeed; he's an old man and not very strong."

Her voice was clear and sweet, and there was an infinite tenderness to the tone.

"You must come in," I said. "I'll leave you with him for a while so that you can make him comfortable."

"Thank you again," she responded gratefully.

So I withdrew, and when I returned she was gone; but the old man slept peacefully.

It was late before I turned in. Every one had gone below, I thought, and the loneliness pleased me.

Suddenly I heard a sound of sobbing, the merciless sobbing of a woman's breast. Wonderingly I looked around. Then, in a shadow of the upper deck, I made out a slight girl-figure, crouching all alone. It was Grey Eyes, crying fit to break her heart.

"Poor little beggar!" I muttered.

"Gr-r-r—you little brat! If you open your face to him I'll kill you, see!"

The voice was Madam Winklestein's, and the words, hissed in a whisper, of incredible malignity, arrested me as if I had been struck by a live wire. I listened.

"See here, Berna, we're next to you two—we're onto your curves. We know the old man's got the stuff in his gold-belt, two thousand in bills. Now, my dear, my sweet little angel, we need the man, see!" (Knock, knock.) "And we're goin' to have it, see!" (Knock, knock.) "That's where you come in honey, you're goin' to get it for us. Ain't you now, darlin'?" (Knock, knock, knock.)

Faintly, very faintly, I heard a voice:

"No."

"If it be possible to scream in a whisper, the woman did it.

"You will! you will! Oh! oh! oh! There's the cursed male spirit of your mother in you. She'd never tell us the name of the man that was the ruin of 'er, blast 'er!"

Faintly, very faintly, I heard a voice:

"No."

"If it be possible to scream in a whisper, the woman did it.

"You will! you will! Oh! oh! oh! There's the cursed male spirit of your mother in you. She'd never tell us the name of the man that was the ruin of 'er, blast 'er!"

Faintly, very faintly, I heard a voice:

"Is there somebody sick?" I asked.

"I'm sorry to trouble you, but I was thinking I heard groans and—I might be able to do something."

Piercingly she looked at me. "Why, my niece in here's got a toothache, but I guess we can fix it between us. We don't need no help, thanks, young feller."

"Oh, that's all right," I said. "If you should, you know, I'll be nearby."

Then I moved away, conscious that her eyes followed me malevolently.

The business worried me sorely. The poor girl was being woefully abused. That was plain. I felt indignant, angry and, last of all, anxious. Mingled with my feelings was a sense

of irritation that I should have been elected to overheat the affair. I had no desire just then to champion distressed damsels, least of all to get mixed up in the family brawls of unknown Jewesses. Confound her anyway! I almost hated her. Yet I felt constrained to watch and wait, and even at the cost of my own ease and comfort to prevent further violence.

For that matter there were all kinds of strange doings on board, drinking, gambling, nightly orgies and hourly brawls. It seemed as if we had shipped all the human dregs of the San Francisco dead-line.

As I sat in silent thought there came to me Salvation Jim. His face was grim, his eyes brooding.

"I don't like the way of things a bit," he said; "I don't like it. There's enough evil on this boat to stoke a sub-section in hell. Sooner or later there's goin' to be a reckoning. There's many a one shoutin' an' singing to-night'll leave his bones to bleach up in that bleak wild land."

"No, Jim," I protested, "they will be all right once they get ashore."

"Right nothin'! You mark my words, young feller, for I'll never live to see them fulfilled—there's ninety in a hundred of all them fellers that's goin' to this here Klondike will never make good, an' of the other ten, nine won't do no good. As for me, I feel as sure as God's above us guidin' us through the mazes of the night, I'll never live to make the trip back. I've got a bunch. Old Jim's on his last stampede."

He sighed, then said sharply: "Did you see that feller that passed us?"

It was Mosher, the gambler and ex-preacher.

"That man's a skunk, a renegade sky-pilot. I'm keepin' tabs on that man. Maybe him an' me's got a score to settle one of them days. Maybe."

He went off abruptly, leaving me to ponder long over his gloomy words.

Although he was my room-mate I had seen but little of the old Jew. He was abed before I retired and I was up and out ere he awoke. For the rest I avoided the two because of their obvious connection with the Winklesteins. Surely, thought I, she cannot be mixed up with those two and be everything that's all right. Yet there was something in the girl's clear eyes, and in the old man's fine face, that reproached me for my doubt.

What was there about this slip of a girl that interested me so? Ever and anon I found myself thinking of her. Was it the conversation I had overheard? Was it the mystery that seemed to surround her? Was it the irrepressible instinct of my heart for the romance of life? With the old man, despite our stateroom proximity, I had made no advances. With the girl I had passed no further words.

But the gods of destiny act in whimsical ways. Doubtless the voyage would have finished without the betterment of our acquaintance; doubtless our paths would have parted, nevermore to cross; doubtless our lives would have been lived out to their fullness and this story never have been told—but it not been for the luckless fatality of the Box of Grapes.

Pugot sound was behind us and we had entered on that great sea that stretched northward to the Arctic barrens. As we forged through the vague sea lanes, we were like a glittering trinket on the bosom of the night. Our mad merriment scarce ever abated. We were a glare of revelry and a blaze of light. Exultation mounted to fever heat.

But one there was who, amid all our unrest, remained cold, distant and alien—the Jewish girl, Berna. Even in the old man the gold fever betrayed itself in a visionary eye and a tremor of the lips; but the girl was a statue of patient resignation, a living reproof to our febrile and purblind imaginings.

The more I studied her, the more out of place she seemed in my picture, and, almost unconsciously, I found myself weaving about her a fabric of romance. I longed to know her uncommon well, to win her regard, to do something for her that should make her eyes rest very kindly on me. In short, as in the way of young men, I was beginning to grope blindly for that affection and sympathy which are the forerunners of passion and love.

That day I had missed the old man, and on going below, found him lying as one once stricken.

(TO BE CONTINUED)

Great Painter's Work Revealed by Accident

At Graz, Austria, Doctor Bienenthal, government art expert, looking over an art exhibition, stopped before a large canvas depicting the ascension of the Virgin Mary into heaven. Something led him to examine it closely, and he discovered that the canvas bore two coats of paint. The outside coat was removed and beneath it was revealed a genuine Tintoretto valued at \$500,000. The government ordered the complete restoration of the canvas, 12 by 13 feet, which was the property of a church. The discovery is like many that have been made before. When invaders went into Italy many of the Italian masterpieces were painted over with ordinary pictures, and when the foreign armies had withdrawn they were restored. But sometimes the foreign art robbers could not tell the difference between a dub and a masterpiece, so the camouflaged art treasures were carried off. Many of them have been since discovered, but doubtless there

are others still concealed by camouflage pictures.—Pathfinder Magazine.

Texas' Beginnings

Texas won her independence from Mexico and became known as the "Republic of Texas" in 1836. In the years immediately following there were repeated invasions and massacres by the Mexicans, who never abandoned their claims to the Texas territory. They advanced three times as far as San Antonio, but in each case were repelled. Statehood was offered to Texas, but the question of annexation brought up the difficulties of the slave question, which became the national issue of the Polk campaign. However, he won the presidency by favoring the annexation of Texas. Before he took the oath of office, congress passed a joint

1—Tent city where boys and girls of 4-H clubs live during their annual visit to Washington. 2—President Hoover signing the farm relief bill. 3—Dr. Joseph S. Ames who has been elected president of Johns Hopkins university to succeed Dr. Frank J. Goodnow, resigned.

NEWS REVIEW OF CURRENT EVENTS

Congress Recesses, the Farm Aid and Reapportionment Measures Are Signed.

By EDWARD W. PICKARD

WITH the farm aid bill signed by President Hoover and \$151,500 appropriated to begin putting its provisions into operation, and the census and reapportionment measure also made law by the President's signature, Congress quit work for the summer in the middle of the week. The Senate recessed until August 19, when it will reassemble to begin debate on the tariff bill which its finance committee is expected to have completed by that date. The recess of the lower house is to extend until September 23, and between that day and October 14 it intends to hold only perfunctory sessions twice a week on the supposition that the Senate will not have passed the tariff measure before the latter date.

Senator Borah of Idaho made a strong fight to have the tariff revision confined to agricultural and directly related commodities and in the course of a heated debate asserted that his resolution to that effect was in accord with the President's views and the primary purpose of the special session. Most of the regular Republicans and seven Democrats, however, stood firm for more general revision and succeeded in beating the resolution by the narrow margin of one, the vote being 38 to 39.

JUST before recessing Congress gave its approval to President Hoover's recommendation that France be relieved of the necessity of paying the \$400,000 due August 1 for the surplus war supplies it purchased after the close of the war, on the condition that the Mellon-Berenger debt funding agreement be ratified before that date by the French parliament. Under the terms of that accord the sum mentioned is absorbed as part of the entire French debt which is funded over a period of sixty-two years. The arrangement was attacked in both houses. The Senate adopted a separate resolution on motion of Senator Howell of Nebraska declaring that in effect the United States under the Mellon-Berenger agreement canceled the entire \$4,230,777,000 of the principal and accumulated interest up to 1925 of the French debt. The payments to be made by the French government over a period of sixty-two years are merely the equivalent of annual interest payments of 2.17 per cent on the original sum, the resolution declares.

As the matter now stands, if either the French parliament or the American Congress fails to ratify the Mellon-Berenger agreement, France must pay the \$400,000 on May 1 next.

TTRANSFER of prohibition enforcement activities to the Department of Justice has been indefinitely postponed. Senator Jones introduced a resolution for the appointment of a joint committee to study reorganization and centralization of dry enforcement, as asked by the President, but the anti-Voistead senators, aroused by the repeated killings by enforcement officers, started such hot debate, demanding that the shootings also be investigated, that the administration leaders had the resolution withdrawn until August 19, when it was promised a vote would be taken.

Citizens of International Falls, Minn., where Henry Virkula, an apparently innocent man, was killed by enforcement agents, appealed directly to the President for protection. He did not reply immediately, so the city council of the place sent a telegram to him to the same effect. Then, at the White House press conference, Mr. Hoover gave out this formal statement:

"I deeply deplore the killing of any person. The Treasury department is making every effort to prevent the misuse of arms. Any case of misuse will be determined by the orderly proceedings of the department and the courts. I hope that the communities along the border will do their best to

help the treasury end the systematic war that is being carried on by international criminals against the laws of the United States. It is these activities that are the root of all of our difficulties."

Mayors of Detroit, Wyandotte, River Rouge, Trenton and other towns and cities of Michigan close to the Canadian border responded with pledges of wholehearted co-operation with the federal authorities if a same enforcement is adopted. That the run runners up that way are encouraged by the attacks on the enforcers was shown when the crew of well-known liquor smuggling boat opened fire on a customs patrol speed boat near Detroit, smashing its bow and windshield and damaging its machinery. Officials of the Province of Ontario announced that they would try to reduce the peril of border gun fights by disarming the occupants of all boats leaving lake and river ports.

WHEN Oscar De Priest, colored, was sent to Congress by a colored Chicago district, everyone knew trouble was likely to result. It has come, and is likely to stay for some time. In the House Mr. De Priest had conducted himself in a manner that cannot be criticized, but the presence of himself and his family in Washington has brought on social complications. Mrs. Hoover recently entertained several congressional women in the White House, and among her guests was Mrs. De Priest. Of course the South rose in immediate and loud protest, and the action of the First Lady has been attacked as unseemly and unwise by southern legislatures, officials and individuals. The implications of the affair are more than social, for the administration is receiving numerous warnings of a renewed solid Democratic South, these coming especially from those states below the Mason and Dixon line which were carried by Hoover.

VIRGINIA'S anti-Tammany Democrats, who being bone dry, were opposed to Al Smith, consolidated themselves in a state convention in Roanoke which was dominated by Bishop James Cannon, Jr., of the Methodist Episcopal church south. The 800 delegates nominated Prof. William M. Brown of Washington and Lee University for governor and C. C. Berkeley for attorney general. The executive committee was authorized to select a candidate for Lieutenant general, and may name either J. H. Price, the regular Democratic nominee, or the man to be picked by the Republican convention. The De Priest incident cropped up here, too. L. C. Trotter bolted the convention when it rejected a platform plank he offered denouncing Mrs. Hoover's action in entertaining the Negro woman.

AMBASSADOR DAWES and Prime Minister MacDonald between them gave a great boost last week to the cause of reduction of naval armament and consequently of world peace. Their speeches, the one at the dinner of the Pilgrims' Society in London and the other at Lossiemouth, Scotland, had been awaited with intense interest and neither of them was a disappointment. General Dawes declared that naval reduction was the problem of outstanding importance to the world at the present time, and he discussed the methods whereby it might be brought about. He said it must concern all naval powers and should have world sanction. The final negotiations, he asserted, must be carried on by statesmen rather than by naval experts, from whom he personally would expect a failure to agree. Said the ambassador:

"It would seem that to adjust to human nature the method of arriving at naval reduction each government might separately obtain from its respective naval experts their definition of the yardstick and then the inevitable compromise between these differing definitions, which would be expressed in a final fixation of the technical yardstick, should be made by a committee of statesmen of the nations, re-enforced from the beginning by these separate expressions of abstract technical naval opinion and able again to seek further naval advice if necessary before the final fixation."

"These statesmen should further be the ones to draw up for the world the terms of the final agreement upon

naval reduction which should be couched in those simple terms understandable to the ordinary man in the street and which, while the pet aversion of the casuist, are the highest expression of true statesmanship. That final agreement covering quantitative dispositions would go to the nations for approval or rejection."

Mr. MacDonald told of his conversation with General Dawes and expressed his sincere belief that they might be instrumental in preparing a board around which other nations might ultimately sit in co-operative fellowship studying the arts and the ways of peace."

PREMIER POINCARÉ of France held a long conference in Paris with Foreign Minister Stresemann of Germany, who was on his way home from Madrid, and though there was no public announcement, it was understood they reached a complete agreement concerning the coming conference that will put the Young reparations plan in operation. Then M. Poincaré went before the foreign affairs and finance commissions of the house of deputies and urged that the way be cleared by the ratification of the American and British debt agreements. He told the two commissions that the great liquidation conference would be called soon so as to enable the chamber of deputies and the Reichstag to ratify the Young plan in good time for it to go into effect on September 1 and for the former body to put its O. K. on the debt agreements.

LOSSIOTTI, Assolant and Lefevre, the French aviators who flew across the Atlantic from Old Orchard, Maine, are being accorded all due honors in their home land, for they made a great flight notwithstanding the fact that they landed first on the coast of Spain instead of Le Bourget. This was made necessary by the unexpected presence in their plane of one Schreiber, a brash American youth who stowed away on the Yellow Bird and whose added weight made the take off difficult and prematurely exhausted the supply of fuel. Displaying scarcely the intelligence of a seven-year-old child, Schreiber did not realize that he was endangering the lives of the aviators and imperiling the success of their flight. The three Frenchmen treated him with the greatest forbearance and admitted he had nerve. But it is good to read that he was almost completely ignored in Paris and all right minded people hope that that will be his fate on his return to the United States. M. Lotté made the youth sign an agreement that half of any money he might receive as a result of his foolhardy exploit should be given to Assolant and Lefevre, the pilots, and to a fund for victims of air accidents.

Seven persons lost their lives when the City of Ottawa, huge air liner of the Imperial Airways on her way from England to Paris, with eleven passengers fell in the English channel three miles from the English shore. The main shaft of one of the two motors broke and the plane was unable to keep the plane up or land safely. Four passengers and the pilot and mechanic were rescued.

COLONEL and Mrs. Lindbergh emerged from their honeymoon seclusion aboard a power boat on Wednesday, appearing at Mitchell Field, New York, to take part in the first tests in the prize competition held by the Guggenheim Fund in the hope of discovering an absolutely safe airplane. Lindy put on a helmet and parachute and took up the first entry, after which he gave Mrs. Lindbergh a ride in a fast army plane.

ALL the troubles of Gen. Bramwell Booth, former commander in chief of the Salvation Army, came to an end when he died at his home in London. He was given a great funeral by the army whose council had deposed him recently, and its flags were kept flying high for as its officials said: "General Booth is not dead—he has passed to glory." Others taken by death were Asa P. Potter, well-known capitalist of Boston; Sir A. Maurice Low, for many years American correspondent of London papers, and S. F. Kingston, veteran general manager for Florenz Ziegfeld.

South West PARAGRAPHS

State Game Warden R. L. Bayless of Arizona has declared that he would recommend to the State Game Commission that deer hunters in Kaibab forest this year be allowed to kill two animals instead of one.

Reported deaths in Arizona by accidental causes numbered 449 in 1928, with 110 of these attributable to motor vehicles, according to statistics in a recent bulletin issued by the Chicago National Safety Council at Chicago.

During the present year, the Santa Fe railroad is spending \$1,300,000 on publicity, a large part of which is for the advertising of Arizona and New Mexico, according to Carleton J. Birchfield, of Chicago, assistant advertising manager of the Santa Fe system lines.

A gain of nearly a quarter of a million dollars in the return for citrus fruits raised in the Salt River valley is indicated this season. The increase, the largest in the history of the industry in Arizona, is due to increased acreage and a better price.

State Treasurer Emerson Watts, of New Mexico, announced in Santa Fe that final arrangements had been made for the sale of the \$750,000 in highway debentures to New Mexico bank buyers and \$250,000 worth to an out-of-state bond firm.

Clarence S. Brown, a member of the faculty of the Ajo, Ariz., high school for the last four years and assistant superintendent of school for two years, has been appointed to succeed C. C. Conley as superintendent of schools here, who resigned.

Judgment of \$63,846.62 was granted

the St. Elmo Mines, Inc., from the Mildred Consolidated Mining Company in an order signed in federal court in Phoenix. The judgment was granted by default, as the defendant failed to make an appearance.

Human carelessness started 22 out of 32 fires in Arizona national forests since June 1, according to a report received in Phoenix from regional headquarters at Albuquerque, N. M. There were 166 fires in Arizona since January 1, covering a total of 6,508 acres.

Announcement was made at the Las Vegas offices of the Santa Fe Railroad that H. R. McKee has been named superintendent of the New Mexico division of the road to succeed the late J. F. Anton, who died recently from injuries sustained in an automobile accident near Fort Sumner.

The tourists who will come to New Mexico in 1929 will find touring conditions better this year than ever before, a survey by the highway service bureau shows. The trunk line roads and many of the secondary roads are in better shape this year due to the intensive construction and reconditioning work of the fall and winter months.

Disruption of a large automobile disruption ring using Phoenix as its clearing house in the sale of stolen cars was revealed in Phoenix when V. R. Belnap, special investigator of Los Angeles, cooperating with the Arizona vehicle division, announced that James McClellan and Dick Johnson are under arrest in Los Angeles as leaders of the car-running syndicate.

The charred remains of Henry W. Austin, prominent merchant and livestock dealer of Curry county, were found in a little grove two and one-half miles southwest of Melrose. Austin had disappeared from his home in Melrose. Guy Austin, a son, and Clyde Degrafeneid came upon the body while posse were searching the sand hills and highways for Austin.

James G. McNary, president of the Cody Lumber Company of Albuquerque, has been named to represent the Albuquerque and New Mexico lumber interests in opposing the suit which has been brought in Washington by the Federal Trade Commission to enjoin 46 lumber companies in the western states from using the term "white pine" in connection with the sale of certain timber.

Providing certain grades and standards, governing the sale to consumers, and designed to compel stamping and branding of eggs in cold storage longer than three months, the egg standardization act, passed by the ninth legislature, is now in effect. The law applies to eggs offered for resale to the consumer, but does not apply to the transaction between producer and distributor.

The lure of the rodeo is drawing cowboys, cowgirls, tourists and native westerners to Las Vegas, where the fifteenth annual cowboys' reunion begins July 4th, to continue through a four-day program, ending July 7th with a big race meet at Cowboy Park. The opening day will be Governor's Day, and will be featured by the big cowboy rodeo, in which hundreds of real cow-punchers take part annually.

G. E. Brown, superintendent of public schools at Greeley, Colo., for thirteen years, has been appointed by the school board of education at Bisbee, Ariz., to replace R. E. Souer, as superintendent. Souer's official said: "General Booth is not dead—he has passed to glory." Others taken by death were Asa P. Potter, well-known capitalist of Boston; Sir A. Maurice Low, for many years American correspondent of London papers, and S. F. Kingston, veteran general manager for Florenz Ziegfeld.

"I deeply deplore the killing of any person. The Treasury department is making every effort to prevent the misuse of arms. Any case of misuse will be determined by the orderly proceedings of the department and the courts. I hope that the communities along the border will do their best to

Three Girls of a Kind

By H. LOUIS RAYBOLD
(Copyright)

FOR several years Marcia Glen, Cora Bassett and Jerry St. Claire had taught adjoining rooms in the Webster grammar school and were popularly supposed to possess similar talents along all lines.

Only in one respect did they differ, and that was on the subject of the most desirable spot in which to pass the annual summer vacation.

Had you eavesdropped from Mrs. Bates' living room one June evening as the three chatted on the porch you would have heard them expressing their opinions thereupon along with Mrs. Bates' other boarders, from the Trumbull twins to Lacy Haskell, eccentric bachelor.

Marcia delivered herself definitely. "My boy fever will not stand any place but Bretton Woods."

"It's futile to urge me," interrupted Cora briskly. "The surf, the crowds, the boardwalks—Ocean Grove for me."

Marcia delivered herself definitely. "My boy fever will not stand any place but Bretton Woods."

"It's futile to urge me," interrupted Cora briskly. "The surf, the crowds, the boardwalks—Ocean Grove for me."

Marcia delivered herself definitely. "My boy fever will not stand any place but Bretton Woods."

"It's futile to urge me," interrupted Cora briskly. "The surf, the crowds, the boardwalks—Ocean Grove for me."

Marcia delivered herself definitely. "My boy fever will not stand any place but Bretton Woods."

"It's futile to urge me," interrupted Cora briskly. "The surf, the crowds, the boardwalks—Ocean Grove for me."

Kansas "Grasshopping Coed"

Miss Dorothy "Grasshopper" Bolinger, star running high jumper at the University of Kansas, who won the high jump event at the annual track meet for women held recently. Miss Bolinger cleared the bar at four feet to beat all opposition. Her form is said to be one which but few men can duplicate.

"Mike" Miles to Coach Grid at Georgia Tech

Oliver "Mike" Miles, last fall's Tiger fullback, has accepted the offer made him by Georgia Tech to become backfield coach, he states.

Miles journeyed to the home of the Yellow Jackets at the request of the Tech Athletic association. No contract was signed, Miles said, but arrangements were otherwise completed and the contract is being mailed.

The agreement calls for Miles reporting for his new position on September 1. He would not divulge the length of his contract, but it is understood he will be in charge of Tech backfields for a two or three-year period.

The tutor being replaced by Miles is Don Miller, one of the famous "four horsemen" who carried Notre Dame to intercollegiate gridiron heights. Miller is coaching at Ohio State.

This makes the fourth member of the 1928 Princeton team who is going to enter upon a coaching career after graduation this year. Capt. Chuck Howe, center, and Johnny Stinson, wingman, are going to report to head coach Bill Roper of Princeton on September 15. Joe Caldwell, Nassau lineman, is going to help his brother, Charley, coach at Williams.

Old Ned Hanlon Boosts Chicago Cubs and Ruth

Ned Hanlon, owner and manager of the Orioles when they were the sensation of the country, is still interested in baseball.

"The Cubs look like a great ball club," he said. "When they lose it is a close one and they are always pounding the ball. They lose a game and then win three or four. Hornsby makes a big difference to the team. He is a great hitter. It looks like they traded him right into another world's series."

But of Ruth he waxes more eloquent. He has always been a great follower of the Bambino. The Babe originated in Baltimore.

"Babe is a marvelous player and I love to watch him," Hanlon continued. "You never see him do anything wrong. He is the greatest hitter in the game, one of the best fielders, and had his legs been stronger he would have been one of the best base runners baseball has known."

"Babe Ruth" of Japan

Here we have the "Babe Ruth" of Japan—Kintchi Matsu, centerfielder of the Meiji baseball team of Japan—Matsu was picked for the all star Cubs of Japan.

He Has Quicker Tongue Than Any Living Umpire

Billy Carpenter, dean of the International League arbiters, is said to possess a quicker tongue than any living umpire, and comparable to Tim Hurst, whom American leaguers held in awe for many years. This is said to be one of his most famous comebacks:

Billy had made a decision with which one of the teams obviously did not agree. He happened to have a warm personal friend on the objecting outfit. The next time his friend came up to the plate he sniffl'd disdainfully and turning to Carpenter said, "Some'n' round here smells awful."

Billy went through the grimaces of detecting an unpleasant odor. "So it does," he agreed, then quickly added, "but I never noticed it until you came up to me."

Startling Figures of Pirate Rookie

Probably one of the best training trip yarns and a true one at that, was pulled when the Indianapolis club was doing its spring conditioning down in Florida. Donie Bush, now manager of the Pittsburgh Pirates, was boss of the team at that time.

A rookie catcher joined the club at Plant City and Bush asked of the newcomer, "Well, how did you hit last season?"

"Did fairly well with the old willow," responded the rookie with a look of pride. "The truth of the matter is that I clubbed the pellet for an average of .362."

"Well, then, he was wrong," the rookie affirmed. "I certainly know that I hit .307 in the Piedmont league and .325 in the Cotton States league last year, and if that doesn't make .362 I had better go back to school."

Fertilizer Pays.

"Exact amounts will depend upon individual soils and cash returns, but the tomato crop will usually pay for additional fertilizer up to 1,000 pounds to the acre, although good crops are grown with less.

In addition to proper fertilizers, however, the plants must be well-grown and must be set at the proper time. Soil and weather conditions also play their part."

Johnny Reving, of the Red Sox catching staff, always works when Big Ed Morris is pitching.

Clark Griffith says Washington's opening day crowd of over 25,000 was the biggest in the history of the park.

Judge Emil Fuchs says that despite Rabbit Maranville's age, he wouldn't "swap" him for any other shortstop in the league.

The Atlanta Crackers have purchased First Baseman Mike Martinek from Newark of the international league.

Pitcher Floyd Johnson who was let out to Springfield of the Eastern league by the New York Giants has been recalled.

In the 22 years of the Texas League's existence Bentsen has never won a pennant. Fort Worth has come in last six occasions.

The New York Yankees have released Arndt Jorgens, recruit catcher, to the Jersey City club of the International League on option.

George Sisler, Boston first baseman, set a world's record by driving out 257 base hits in 1920, when he was a star for the St. Louis American League club.

Ty Cobb was the hitting champion of the American League in 12 seasons. Honus Wagner in the National eight seasons, and Hornsby so far in seven years.

Fred Lindstrom of the Giants compered in a world's series at the age of nineteen. He supplanted Heinie Gash at third in the 1924 classic with Washington.

"Tuffy" Wagner, Brooklyn pitcher, has struck out 35 batters in a major league game on five different occasions. He once fanned 17 in a 10-inning game.

The major league record for pitching effectiveness over a full season is held by Fredie Schupp who allowed an earned run average of only .30 per game during 1916.

Frank Schulte, home run king of the Chicago Cubs in the old days of the team's championship reign, is in a hospital at Akron, O., suffering from a nervous breakdown.

Hasten Tomatoes by Fertilizing

Plants Need Long Season and Right Aids to Hurry Their Growth.

"Fertilize tomatoes to hasten their maturity," advises F. O. Underwood, of the vegetable gardening department of the state college of agriculture at Ithaca, N. Y. "The tomato," he points out, "requires a long season to mature a full crop, so that anything a grower can do to ripen them is apt to mean a bigger total yield."

Professor Underwood says that many points have to be considered in fertilizing the crop, such as type of farming and soil, previous crop grown and fertilizer used, money returns, and the cost of the fertilizing materials.

Plant Food Needed.

Tomatoes need some of all the plant foods for their best development. Nitrogen is needed early in the season to help develop a good vine to carry the fruit; though too much nitrogen may produce too rank a leaf growth at the expense of fruit. Some potash is also needed, but phosphorus is particularly needed to get large yields and ripen the fruit before frosts in the fall.

"If a grower," says Professor Underwood, "is applying manure liberally, say at the rate of twelve or twenty tons an acre, he is probably supplying enough nitrogen and potash, but additional phosphorus will probably pay. Phosphorus increases the fruit and seed parts of plants, and acid phosphate is the best source. Applied at the rate of from five hundred to a thousand pounds to the acre, it should give good yields.

"On sandy soils, or on other soils where little or no manure is used, complete fertilizers usually pay. The 4-12-4 or 5-10-5 are both good; the former on the heavier types, while the 5-10-5 makes a good mixture for soils less well stocked with nitrogen and potash. Though the 2-8-10 is often used, a 4-12-4 seems better for the crop. The 2 per cent of ammonia in the former mixture is probably derived from some organic chemical which will be slowly available to the tomatoes. Tomatoes need nitrogen early in the season, and not when the fruit is forming.

Fertilizer Pays.

"Exact amounts will depend upon individual soils and cash returns, but the tomato crop will usually pay for additional fertilizer up to 1,000 pounds to the acre, although good crops are grown with less.

In addition to proper fertilizers, however, the plants must be well-grown and must be set at the proper time. Soil and weather conditions also play their part."

Supply Farrowing Pens With Needful Fenders

Every farrowing pen should be supplied with fenders to protect the little pigs during and after farrowing. These consist of 2 by 8 inch planks fastened as shelves about eight inches from the floor, along both sides of the corner in which the sow makes her bed. This largely prevents the sow from squeezing the pigs against the wall or lying on them while they are small. If the farrowing pen has a concrete floor, a board overlay in the nest corner makes the sow's bed warmer, drier and cleaner.

Recommending Apple Spray With Pink Buds Appear

Sumer spray for apples, usually known as the cluster bud or pink spray, is most effective when applied as soon as the pink buds appear in the blossoms clusters, says L. C. Williams, extension horticulturist, Kansas State Agricultural College. The cluster bud spray consists of one and one-half gallons of liquid lime-sulphur and one and one-half pounds of arsenate of lead to each fifty gallons of spray. Dry lime-sulphur may be used instead of liquid material.

Agricultural Hints

Poisoned bran will stop the army worm army.

Get in a planting of peas at two weeks' intervals.

Let's give the pasture a hair cut—get those bitter weeds before they get into the milk.

African millet is regarded as one of our most drought-resistant crops. It is a good forage and hay crop.

Grading of farm products is a vital factor in the profits of the farmer and promises to become even more so.

Croppers and weeds growing along roadsides and fence rows offer a perfect winter haven for many insect pests.

Maintain the fertility of your garden and truck crop soils by the use of green manures, barnyard manures and proper crop rotation.

Co-operative marketing has been getting on a sounder basis in recent years, and farmers will probably find it an important way of safeguarding their interests in the future.

Per Capita Potato Yield Right Guide

Price Trend Upward When Production Is Low.

Per capita production of potatoes in the country, as a whole, is as good a guide as any, when the grower is trying to decide whether he should store his crop in hope of higher prices that prevail at harvesting time, or sell them for the market price when they are dug, according to C. R. Arnold of the rural economics department of the Ohio State University at Columbus.

Arnold reports that the bureau of agricultural economics of the United States Department of Agriculture has been studying records for the past 27 years, and finds that when the national production has exceeded 3.8 bushels per capita, the price has tended downward during the ensuing season. The trend has usually been upward when the production has been less than 3.2 bushels per capita.

Only when the indicated crop was not much more than three bushels per capita was the grower usually justified in holding his potatoes. In other years the chance of profit was too uncertain to balance extra cost of risk, storage and shrinkage.

Production in the late potato states, according to the federal investigators, is the most important factor in determining the season's price level.

Cleanest Culture Helps Strawberry Leaf Spot

The Ohio station gives the following advice about handling leaf spot of strawberries:

"Plant resistant varieties; the majority of present-day commercial varieties are somewhat resistant.

"Set plantations where both air and water drainage are good. When setting out plants remove and destroy the diseased leaves; do not leave them about the patch. Practice the cleanest culture possible.

"Rotate strawberries with other crops frequently. It is rarely profitable to fruit a strawberry plantation more than two years, due in part to the accumulation of fungous pests. Many plantations should be plowed under after one crop has been secured.

"In renovating a plantation to be fruited the second time, destroy all diseased leaves. The fungi causing the leaf spots over winter on affected leaves. Mowing off the old leaves and burning over the plantation is advisable when a planting is badly infected.

"If these recommendations are followed closely spraying will not usually be necessary. However, one to three applications per season of 4-4-50 Bordeaux spray may be profitable in controlling unexpected attacks."

Pigs at Weaning Time Should Be Given Grain

Pigs at weaning time should be getting all the grain they will eat. The ration should include tankage or skim milk. With a good pasture on which to run, pigs should be getting a good start for market weight.

Pigs which are doing well should make a pound a day gain in weight. Self-feeders are a convenient means for feeding corn and tankage, and the use of self-feeders results in as good and often better gains than the hand-feeding method. A self-feeder should keep the feed dry, keep feed before the pigs at all times, and prevent waste.

Treating Potato Seed Increases Usual Yield

Seed potatoes treated three or four weeks ahead of planting will show no delay in sprouting as is often the case with seed treated to kill disease organisms it may be carrying. Treating seed that is coming out of dormancy may cause it to become somewhat dormant again. Early treating gives the seed time to come out of dormancy and be ready to grow as soon as planted. Treating seed potatoes has increased the average yield 22 bushels per acre in the test plots conducted for the past eight years in Kansas.

Dusters Satisfactory in Fields for Killing Bugs

Dusters are fairly satisfactory in potato fields for killing bugs. However, under most Nebraska conditions they are not nearly as satisfactory as they are in regions further east. To be used most advantageously the dust should be put on when the plants are damp with dew and when there is little wind. It is not at all advisable to try to use a duster on a windy day. Consequently it is very desirable to dust the plants in the early portion of the day before the wind comes up.

—B. O. Werner, University of Nebraska.

Grinding Feed Does Not Increase Digestibility

For feeding dairy cattle, the grinding of a roughage will not increase its digestibility nor its value as a feed. Grinding coarse feeds may reduce waste by eliminating the coarse parts of the feed and may make the feed more palatable. When feed is high in price, grinding may prove advantageous. Grinding coarse feed will not make the feed into a concentrated feed. Neither will grinding dry, coarse roughage make the feed as good as when put in the silo.

With a Steak of Red

Question—What color has infested Washington society this season?

Answer—Garnet green.—The Pathender.

Ends That

Sue—John, what did you do with that widow doctor's bill?

He—Vetoed it.

Fools never stop to count the cost until the bill collector calls.

New energy for work in this Wake-up Food POST TOASTIES

START your breakfast with a heaping bowl of golden crisp Post Toasties in milk with fruit—and you've made a grand start on the day. Energy is what people need in the morning. Here in Post Toasties, the Wake-up Food, is the kind of energy that gets to work for you quickly. It's called the Wake-up Food just for that reason!

And it's so good for boys and girls and grown folks because it is so easy to digest. They all just naturally take to that wholesome, delicious corn flavor.

Take the crisp flakes right out of the package into the bowl—they're easy to serve. Don't forget—there's just one way to get the Wake-up Food. Ask your grocer for Post Toasties—in the red and yellow wax wrapped package.

Women Willing to Work

Way on Ocean Liners

Modern women hear the call of the sea just as insistently as do their adventurous brothers. Judging by shipping companies' long waiting lists of women seeking jobs on ocean liners.

Hundreds of applicants for positions as stewardesses, conductresses, nurses, manicurists, hairdressers and shop attendants on shipboard present themselves to shipping companies weekly.

Many of them are women of good birth and education, and with a love of travel, but who cannot afford world tours, and are willing to work their way in order to get them.

Shipping officials point out, however, that shipboard jobs are so strenuous and exacting that there is no chance for the woman who takes them as a means of cheap travel getting to see much of the world while she is working in a liner.

Average Human Heights

There have been no statistics compiled as to the average heights of men and women in the United States, but the Public Health service states that approximately 5 feet 8 inches is the average height of a man, and 5 feet 4 inches is the average height of a woman.

Snowy linens are the pride of every housewife. Keep them in that condition by using Red Cross Ball Blue in your laundry. At all grocers.—Adv.

Rather Rough

"Tommy," asked the teacher, "what is a relief map?"

"Well, I dunno," said the future physicist, "but it looks like Willie Brown's map did when I had got through with it."

Used to It

"Having any trouble getting along with the widow you married?"

"

Some Good Things to Eat

By NELLIE MAXWELL

Where the pools are bright and deep,
Where the gray trout lies asleep,
Up the river and over the sea,
That's the way for Billy and me.
—James Hogg.

Salads, greens, and fresh vegetables should be used abundantly at this season.

Salad.—Slice three-fourths of a cupful of green onions and cover with french dressing to which a teaspoonful of sugar has been added. Let stand one-half hour. Drain and arrange with one cupful each of sliced new beets and green peas on a bed of water cress. Garnish with cheese balls made by mixing the cream cheese with two-thirds of a cupful of finely chopped peanuts. Mold into small balls and dust with paprika. Serve with more french dressing.

Boston Brown Bread.—Take one cupful each of graham flour, corn meal and rye meal, three-fourths of a teaspoonful of soda, one and one-half teaspoonfuls of salt, three-fourths of a cupful of molasses and two cupfuls of sour milk. Mix and sift the dry ingredients, add milk and molasses, beat well, add a few raisins and pour into a well greased mold, two-thirds full. Cover and steam three and one-half hours.

Plain Muffins.—Mix and sift together two cupfuls of flour, three teaspoonfuls of baking powder and one-half teaspoonful of salt. Add one cupful of milk, two tablespoonfuls of sugar and one unbeaten egg. Beat and mix the batter thoroughly, stirring in wideopen circles, keeping the spoon on the bottom of the bowl. Place in muffin pans and bake twenty minutes in a hot oven.

Spanish Meat Loaf.—Take two cupfuls of ground beef, one-half cupful of fat salt pork ground, two cupfuls of cracker crumbs, one cupful of milk, one beaten egg, salt, pepper, tabasco sauce, one onion, one and one-half

cupfuls of strained tomato, strips of bacon. Mix all the ingredients except the tomato, form into a loaf and place in a greased baking pan. Cover with strips of bacon and over the top pour the tomato sauce. Bake forty minutes in a moderate oven.

Gooseberry Relish Sandwich.—Add enough finely grated Herkimer cheese or old American cheese to one-half cupful of the strained gooseberry relish to bind. Spread on thin slices of toast cut into fancy shapes. Serve on lettuce.

A nice dish to serve for luncheons, which may be prepared from steamed fowl is:

Chicken Warmers.—Take a large fat fowl, cut up for serving, and put on to stew in plenty of water. When tender, remove the chicken, and cut it into small pieces, removing all the bones.

Put a bunch or two of diced celery into the broth and cook it until tender, remove it, and add noodles, cook for fifteen minutes, then serve a nest of noodles with celery and top with the chicken. Add a little gravy made with broth, cream and serve.

Maple Syrup Salad Dressing.—Heat one-fourth of a cupful of maple syrup to the boiling point and pour over three egg yolks well beaten, add a bit of salt and paprika and one teaspoonful of lemon juice and one-half cupful of cream beaten stiff, when the mixture is cool.

Green Peas, Onion and Cucumber Salad.—Take one and one-half cupfuls of cooked, drained, small green peas, the same amount of thinly sliced young cucumbers and one cupful of thinly sliced green onions. Mix and serve.

Planning Ahead for Picnics

Community Picnic With Cafeteria Service.

Prepared by the United States Department of Agriculture.

Whether it occurs on the "glorious Fourth" or on any other day of the summer, a community picnic, attended by persons of all ages, is likely to be successful if consideration is given to everybody's comfort. Young people do not mind perchering on logs or rocks to eat their lunches, or sitting right on the ground, but those who are less energetic prefer a bench of some sort and a place to set their dishes or beverages. Mothers with little children, too, can manage them better and get them to take their milk or fruit drinks more readily in spite of the prevailing

distraction and excitement. If the arrangements for eating are somewhat like those they are used to, Set tables and benches such as are found in automobile tourist camps, answer admirably, however roughly constructed.

Shade is essential to a comfortable outing. A grove of tall trees with no underbrush is ideal, and if there is a stream or lake in sight to make a pleasant outlook and add interest for the children, so much the better. A supply of pure drinking water should be assured, either from a well or spring known to be safe, or carried from home. Children should be taught not to touch the water in brooks or ponds, lest it be contaminated.

Foods for the community picnic should be planned beforehand by a competent committee. The preparation of the various articles on the menu may then be allotted to volunteers and there will be no unnecessary duplications or omissions. Some hot foods like bacon, steak, wieners, or rounds of hamburger wrapped in bacon may be cooked on the grounds. Coffee may be cooked when wanted or carried in thermos bottles. On the whole, however, cold foods and beverages will be found easiest to manage for a large group of people, especially on a warm day. Sliced and mixed foods which might easily spoil, are best avoided, either as separate dishes or in sandwiches. Salad ingredients may be carried separately, packed with a little ice, and put together at the picnic.

The cafeteria method of serving is quick and easy. It insures every one's getting the foods preferred, so there is a minimum of waste. The Oregon women in the illustration, taken by the United States Department of Agriculture, belong to a home demonstration club under the direction of the state extension staff. They have found cafeteria service very satisfactory.

"Since then we've all followed her example. Do you like our shade?"

"It's exquisite," said the yellow rose.

"Well, I'm glad you like me," said the pink rose. "But I like you, too."

"I've always been very fond of yellow roses."

The yellow rose smiled—a lovely rose saffron—and just then some people came in to look at the pink roses and the yellow roses.

"I want to wear a rose," said a young girl who had come to the shop; "it is my birthday and my sister is giving it to me."

"Ah, boy I love them."

"Well," said the florist, "here is a rose which won't prick you."

"There are no thorns around this flower." And the pink rose was worn proudly by the young girl.

But a little later the yellow rose and some other yellow roses—oh, a glorious bunch of yellow roses—were taken to a little girl who was sick.

"It's exquisite," said the yellow rose.
