

PERSONAL AND SOCIAL

COMMERCIAL HOTEL— NEW MANAGEMENT

J. Y. McLinden, took over the management of the Commercial Hotel in Patagonia, July 1st. They come from Gleason, Arizona and are experienced hotel people. They announce that the hotel will be run with a view to please the public, with reasonable rates, and family style dining room.

RETURNS FROM BUSINESS TRIP

A. J. Hamilton, returned this week from a business trip to Chattanooga, Tenn. He says that things are running along nicely at the mine.

RETURN FROM FUNERAL

R. C. Blabon, wife and mother returned Wednesday from California, after the funeral of husband and father, who had died and was buried last week.

RETURN FROM LOS ANGELES

S. E. Hollister, Manager of the Trench and World's Fair mines, returned this week from a business visit to Los Angeles.

AMERICAN BOY MINE

Improvements are steadily going ahead at the American Boy Mine, under the personal supervision of A. F. Gross, president of the company. Two new houses have been built for the employees and an auto road for the convenience of those visiting the mine has been built. Its a busy camp these days.

ATTEND INITIATION

A number of Pythian Sisters went over to Tucson last week to attend the initiatory ceremonies, honoring Miss Fitts, daughter of Dr. T. B. Fitts, of Nogales.

FATHER OF TWINS

Phil Capin, manager of the El Paso, store, Nogales, is now the proud parent of twins, born last week in Los Angeles.

VISITING PARENTS

Frank Stone, son of Agent Stone of Patagonia is here from Superior, Arizona, visiting with his parents. Mrs. Stone his mother is in poor health.

The dance given at Patagonia in the evening was a grand success. The crowd taxed the hall to its capacity. The rain that had fallen in the early evening cooled the atmosphere and made it an ideal evening for dancing. The music furnished by the 26th infantry orchestra was, of course, a feature of the evening.

NAVAL RESERVE TO SEE SEA SERVICE

Will Spend Two Weeks on a U. S. Destroyer.

Washington.—Plans for giving each of the 9,000 naval reservists of the United States two weeks of training at sea during the coming summer have been announced by the Navy department.

Ships from the destroyer squadrons of both the scouting and battle fleets, aided by other vessels assigned for this special duty, will be detailed by the department for the cruises. It was stated.

Destroyers have been selected as training ships, the Navy department explained, because it is to this type of vessel reservists would be assigned in time of emergency. The United States navy now has 106 destroyers in commission and 153 in the laid up fleet. The latter would be manned by the trained reserves in event of mobilization.

There is no stream which has a regular current of 60 miles an hour, or even half that. The lower Amazon flows at a rate of three miles an hour. The Mississippi, in its lower course, has a velocity of about three and a half miles an hour. The Congo has many miles above its mouth a current of about seven miles an hour, the rapid of its great falls extending a great distance below them. The Nile, similarly influenced, moves for a long distance at nine miles an hour.

Burning mud to produce electric power is being tried in Germany with remarkable success. Mud at the bottom of a small tributary of the Rhine was found to be permeated with combustible matter. Up to that time it was considered worthless and a serious obstacle to navigation in the river. It was found that the mud could be burned in a special boiler and in an electric generating plant.

TAKING A VACATION

Earnest Speer, the grand old man of Le Gendre's store at Sonoita, will be missed for the next two months as he is taking a vacation for that time.

ARGENTINE MINE MAKE STRIKE.

An encouraging strike of high grade copper-silver ore with fairly good gold values was made in the Argentine Mine, in the West Huachuca Mountains, about 42 miles east from Patagonia last week. Gray copper and silver glance are the predominant minerals, but considerable chalcopyrite, bornite and copper-pyrite are contemporaneous.

The mine is one of what is known as the Old Wakefield group a mile west of bear creek and is now being operated by the Arid Mines Development Co., incorporate under the laws of Arizona, with headquarters in St. Paul, Minn.

A. F. Kearney, is president of the company, and Judge J. H. McNeven, secretary, both of St. Paul.

Considerable shipments of high grade ore have been made from the Wakefield group in former years with thousands of tons of commercial milling ore already developed in the mine, the company is now making preparations to install a concentrating mill to treat their ore as soon as their present development plans are completed, the better ore now being taken out will be shipped to the smelters.

HANDLESS WOMAN LOOPS HER PLANE

Stubs Serve as Arms, But She's Expert Pilot.

Los Angeles.—With stubs only six inches long to serve as arms, Miss Josephine Callaghan, twenty-two-year-old wealthy rancher and sportswoman recently graduated from the "stunt class" at Dyer airport when she piloted her plane alone through all the maneuvers required in the post-graduate class.

Miss Callaghan bought a Lincoln Page biplane when she was allowed to solo after 30 hours of instruction from Charles F. Dyer, chief pilot for the Dyer School of Commercial Aeronautics.

Instead of the regulation short control stick, Miss Callaghan had the plane equipped with a stick extending shoulder-high. At the top of the stick is a padded forked rod, and in her hands she holds the ends of her shortened arms.

Because of her height Miss Callaghan also had the pilot's seat raised so that she can see out and had the foot rudder bar moved up and back. Switches and throttle control also have been placed so that she can work them with her fingerless members.

Just before she zoomed her ship through a series of loops, wing overs and spins Dyer took her aloft for her last instructions.

"She tried two loops," Dyer said, "and slipped out of both of them. That often unnerves the average pilot. But Miss Callaghan just nosed the ship over for the third time, gave it the gun and made a perfect loop. She is better than many of the men students I have instructed, having a high degree of persistence, nerve and ability to follow instructions."

"Nothing like it," Miss Callaghan declared. "Why, I can pilot that plane easier than I can drive an automobile and look at the time I save. Also it's the greatest thrill in the world, and I ought to know, because I've been riding my jumpers in horse shows for several years and driven all makes of automobiles."

Miss Callaghan keeps a stable of blue-ribbon winners on her estate at Encino and takes them East each season for competition in shows.

A concentration of reserves for the summer cruise will begin July 6 and continue in various naval districts until September. The continental United States is divided into 13 sections. Separate training plans have been made for the reserves of each of them.

Training in division maneuvers, gunnery exercises, and ship routine will be given the reservists. During the first week at sea the vessels will be put through individual ship exercises, it was said. Week-end fleetly at various ports for the different cruises will follow the first week's training. The second week's schedule will include division exercises, gunnery practice, boat races and signal competition.

The cruises have been planned to take advantage of the week-end but holiday, it was said. Reservists will embark on Saturday afternoon and return to port in time to resume work on Monday morning two weeks later.

Reservists in Atlantic coast and southern naval districts will be taken aboard destroyers of the scouting fleet, presently stationed in the Atlantic. Those from the West will have an opportunity to visit the fleet, which is now based in the Pacific.

If I Had a Million

VAUGHN NOTES

Fred Richards, has painted the Vaughn School House, and the yard equipment. Everything looks fresh to being school in September.

Elmer McDaniels made a trip to the Salt River Valley last week. Elmer says that it is hot up there and that he is satisfied with Vaughn Climate.

Mrs. Charles Everhardt, is attending the Summer School at Flagstaff.

A special meeting will be held at the adobe church on the hill, Saturday, July 13th. Speakers will be here from Tucson, and everybody is invited to attend. Lunch will be served at noon.

Fred Richards, made a trip to San Rafael Valley, and says that the Crops look good out there.

Mrs. James Parker, is improved and is now able to be around. She had the pleasure of a visit from her daughters last week. Mrs. Arbuckle of El Paso, and Mrs. Kane, of El Paso, Tex.

ELGIN NOTES

Mrs. Lillian Reeves is enjoying a visit with her daughter at the grand canyon.

Mr. and Mrs. Antonia Hernandez entertained a number of friends at a dinner party last Wednesday evening, in honor of Mr. Hernandez 49th birthday. Everybody had a good time.

Mr. and Mrs. Troy Ramsey, entertained a number of friends at a dinner party last Friday night.

A. J. Hunsen is visiting his sister Mrs. Peterson.

Mr. and Mrs. Gardner, of Greaterville were Elgin visitors Saturday.

Mr. and Mrs. Grant of Canille who visited Elgin last Monday said that they had two fine rains at Canille.

Mr. and Mrs. R. Y. Blair of Canille were Elgin visitors Saturday.

Woman's Two Weddings Just Two Too Many

Oklahoma City, Okla.—A modern version of the tale of Enoch Arden, but without the climax of love and sacrifice, is being re-enacted in court here. Ella Mae McMullen, who is divorcing one husband because "she already had a husband," seems likely to lose both men. Her other mate, husband No. 1, threatens to sue her also.

Now all she asks is that her five-year-old daughter be returned to her. Ella Mae married E. W. McGruder, twenty-eight years ago in Norman, Okla. After being happily married for three years she left him to visit her father. Returning she found her husband had gone to South America. This was in 1920.

He was later reported killed in an airplane crash there. The "widow" married Earl McMullen. Believing her first husband dead, she failed to divorce him.

Recently McGruder, now operating a mining outfit in the territory, was reported killed in an airplane crash. McGruder's second husband had been reported killed in the top of a skyscraper.

Big Crowd Gathers at Circle Z Guest Ranch July 4th For Rodeo And Barbecue.

All records for attendance at gatherings in Santa Cruz County were broken yesterday when approximately 4,000 persons attended the fourth annual rodeo held by the Patagonia Volunteer Fire Department at Lee Zimmeister's beautiful Circle Z guest ranch, 15 miles north of Nogales on the Patagonia road.

Persons present from Tucson said it far surpassed in attendance that on any one day at the annual midwinter rodeo held in the neighboring city. Some estimates place the attendance at about 5,000. The crowd was almost double that of last year.

A record was kept of the cars passing through the main grounds of the Circle Z ranch enroute to the rodeo field. Four hundred and eighty cars had been checked through up to 12:20 o'clock noon and two hours later the total had passed the 623 mark. Many of these cars carried as high as eight passengers and many other cars on which no record was kept journeyed to the rodeo grounds from the north via Sonoita creek.

The day's program—one that will long be pleasantly remembered by the throng of visitors from all parts of the Southwest—opened shortly before noon with a splendid Independence Day address by James Boyle, prominent Tucson attorney.

Following the address came the barbecue for which arrangements had been made to feed a mammoth crowd. The barbecue, like all other events on the program, was handled in a fine, business-like manner and there was no delay nor hitch of any kind to mar the pleasure of the day.

Seven beers were killed for the barbecue, 3,740 pounds of beef were served, 2,000 cups of coffee, one case of milk, 2,400 loaves, 20 gallons of pickles, and water was served from two huge tanks, one containing 2,000 gallons and the other 500 gallons, and 2,000 pounds of ice were used.

Immediately after the barbecue one of the best rodeo programs ever held in this part of the state was witnessed. Loud speakers were used on the field for the first time this year and the crowd could easily hear the announcer, Gus Michaels, secretary of the Nogales Chamber of Commerce.

The opening event on the rodeo program was a cowboy race for kids between Miss Doris Seibold and Margaret Butenborg. Miss Seibold was winner.

Next, the members of the Rodeo Events Committee were introduced to the crowd by Gus Michaels at the microphone. Members of the committee were Lee Zimmeister, chairman; Sy Swyers, vice-chairman; and Nick Berch, Joe Kane, Jim Kane, Albert Gottlieb, Charles Mead and Fred Barnett.

Officials for the calf roping contest were Art Echols, Ted Simpson and Jim Finley, timers; Dan McKinley, deadliner; and Ed Voss of Amado, tie judge.

Bill Kane won the calf roping in 25 3/5 seconds, Pete Havery was second in 27 4/5, and Joe Kane, third, 30 2/5. Twenty-two cowboys took part in this event and Havery, winner of second place, proved to be the sensation of the day. He is a one-legged man from Huachuca, and despite his handicap is a barrel as a calf roper.

TEAM ROPING
Twenty teams took part in the team roping. Bob Havery and Willie Gardner took first money in 21 seconds, C. H. Martin and Willie Gardner were second in 24 seconds, and Pete Havery and Bill Sorel third, 27 2/5 seconds.

BRONC RIDING
Bob Havery won first money in the bronc riding, Ray Adcock second, and Jim Kane third.

LEGAL NOTICE

KNOW ALL MEN BY THESE PRESENTS, that we, the undersigned, having associated ourselves together for the purpose of forming a corporation under and by virtue of the laws of Arizona, hereby adopt the following Articles of Incorporation:

ARTICLE I—The name of the corporation shall be "The Cross Mining and Investment Company" and its principal place of business shall be on the property known as the American Boy Mine in Santa Cruz County, Arizona, but other offices may be established and maintained within or outside of Arizona, at such places as the Board of Directors may designate, of whose meetings of stockholders and directors may be held.

ARTICLE II—The general nature of the business proposed to be transacted is to purchase, subscribe for, acquire, own, hold, sell, exchange, assign, transfer, mortgage, pledge or otherwise dispose of shares of the capital stock, or any bonds, notes, securities or evidences of indebtedness created by any other corporation, or corporations, organized under the laws of this state or any other state or district or country, nation or government, and also bonds or evidences of indebtedness of the United States or of any state, district, territory, dependency, or country or subdivision or municipality thereof; to issue in exchange therefor shares of the capital stock, bonds, notes or other obligations of the corporation, and while the owner thereof to exercise all the rights, powers and privileges of ownership, including the right to vote on any shares of stock or voting trust certificates so owned; to do any acts and things permitted by law and designed to protect, preserve, improve or enhance the value of any such bonds, stocks, or other securities or evidences of indebtedness or the property of this corporation; to own, hold, develop, explore and operate any mine, or prospective mine, and to sell, lease, mortgage, or otherwise alien the same; to own and operate in connection therewith smelters and other plants for the reduction and refining of ores, metals, and to sell, lease, mortgage, or otherwise alien the same; to acquire, own, operate, sell, lease mortgage or otherwise alien in connection therewith any and all means and instrumentalities of transportation so far as the same may from time to time be permitted under the statutes of the State of Arizona, to issue bonds, notes, debentures, and other evidences of indebtedness and secure the payment of the same by mortgage, deed of trust or otherwise; and in general to do and perform such acts and things and transact such business in connection with the foregoing objects, not inconsistent with law, in any part of the world, as the Board of Directors may deem to the advantage of the corporation.

ARTICLE III—The capital stock of the corporation shall be 800,000 shares without par or face value, each of which said shares shall be equal to every other. All or any portion of the capital stock may be issued in payment for real or personal property, services, or any other thing of value, for the uses and purposes of the corporation, and when so issued shall become and be full-paid, the same as though paid for in cash at the price fixed; and the directors shall be sole judges of the value of any property, right or thing acquired in exchange for capital stock. No shares of capital stock shall be issued until fully paid for and thereafter shall be non-assessable. Said shares of stock shall be issued for such price and upon such terms of payment as shall from time to time be fixed by the Board of Directors.

ARTICLE IV—The time of commencement of this corporation shall be the day these Articles are filed and a certified copy of the same recorded in accordance with law, and a Certificate of Incorporation delivered by the Corporation Commission, and the termination thereof shall be twenty-five (25) years thereafter, with the privilege of renewal as provided by law.

ARTICLE V—The affairs of the corporation shall be conducted by a Board of Directors and such officers as the said Directors may elect or appoint. The directors shall be five in number and shall be elected from among the stockholders at their annual meeting to be held on the second Monday in February of each year, and said Board of Directors may meet and transact the

LEGAL NOTICE

business of the corporation at such places within or without the state as they shall from time to time determine. Until the first annual meeting of stockholders and until their successors have been elected and have qualified, the following named persons shall be the directors: A. F. Gross, Treasurer, W. J. Haake, H. R. A. Adkins, and A. P. Puelicher. The Directors shall have power to fill vacancies occurring in the board from any cause, and appoint from their own number an executive committee, and vest said committee with all the powers granted the directors by these Articles.

ARTICLE VI—The highest amount of indebtedness or liability, direct or contingent, to which the corporation is at any time to subject itself in One Million Dollars (\$1,000,000.00).

ARTICLE VII—The private property of the stockholders, directors, and officers of the corporation shall be forever exempt from its debts and obligations.

ARTICLE VIII—Duane Boyd having been a bona fide resident of Nogales, Arizona for the last three years, is hereby appointed and made the lawful agent for and in behalf of this corporation in and for the State of Arizona, to accept and acknowledge service of, and upon whom may be served all process or proceedings in any action suit or proceeding they may be had or brought against the said corporation in any of the courts of said State of Arizona; such service of process or notice, or the acceptance thereof by him and of them, to have the same force and effect as if served upon the president and secretary of the company. This appointment may be revoked at any time by filing the appointment of another agent.

IN WITNESS WHEREOF, We herein affix our signatures this 4th day of May, 1929.

Fort Huachuca Made National Guard Camp.

The permanent Arizona National Guard camp will be located at Fort Huachuca, following recommendation of that body by a board consisting of two regular army officers and two members of the Arizona National Guard. It was announced at the eighth army corps headquarters in San Antonio Monday.

Four possible sites were considered by the board. They were Fort Huachuca, Prescott, Patagonia and Sonoita.

Oh Men Turn to Afters in Search for Relief

Confederate Gulf—A California oil company, while waiting for development, is planning to add to its income by planting 100 acres of alfalfa on its holdings five miles from here. This covers the most condition in an oil region. Ordinarily farmers are looking for oil development in bringing forth wells.

Britain Wastes Millions Carelessly Each Year

London.—Great Britain throws away \$200,000,000 in petty waste every year. That's the computation of an unopposed authority quoted by the Sunday Express. One important item of waste he lists is \$15,000,000 worth of mustard left on the edges of plates. He also lists soap, match ends, candle ends, cigarette butts, tickets, pins and clips, gas, electricity and fuel, bones, town refuse, tin cans and waste paper.

THE COLD OR THE HEAT?

The time for the performing \$100 worth of work required to hold each and every mining claim is expiring. Midnight, June 30, was the limit. But little interest seems to be taken in the subject matter this year, though in the olden Arizona days many were the killings which arose as the result of contested claims.

In the old Arizona days, the federal statutes required the assessment work to be performed prior to midnight of December 31, the limit being reached with the ringing of the bells of the New Year. The change from December 31 at midnight to June 30 at midnight came as one of the products of the world war. The government at Washington, during the war, arranged for the suspension of assessment work as an economy measure, and also with the idea of helping out the pioneering prospectors. Several extensions of time were granted, the last being for six months instead of as previously for a year. This threw the time for completing the assessment work from the cold weather of the Christmas and New Years holidays to the warm weather of the midsummer dog days. Some of the prospectors and claim owners favor the change; others do not.

A wag from Washington visiting the West once rose to remark that the mining laws of the country were made by poker players for poker players. There is the location notices, which correspond to the putting up of the ante. Then comes the location work, which corresponds to the opening of the jack pot. Next comes the assessment work and the regular mining, corresponding to the more serious phases of poker playing when all hands are getting down to business.—Miami Silver Belt.

SEE ARIZONA

Now that the dedication ceremonies of the Grand Canyon Bridge are but a memory, Arizonans should bear in mind that the bridge offers a new and unexplored region for tourists this summer. Tourists from Utah may come from Salt Lake City to the bridge and crossing over travel Arizona's Highways as far south as the Mexican border at Nogales.

Arizona tourists may travel northward and see the wonderful sights in Utah, including Zion National Park, Bryce's Canyon and Cedar Breaks. They may stand on the bridge and look down with awe at the turbulent waters of the Colorado or they may stop over at the hotels on the north and south rims of the Canyon. Arizona offers a wonderland to her citizens. There is fishing in the White Mountains and the various streams and lakes of the northland. There are many places to be visited and sights to be seen. Included among these are the petrified forest, the painted desert, the Casa Grande Ruins, the missions of the early Jesuit and Franciscan Fathers, the Wonderland of Rocks, historic old Timbstone and many other interesting places.

Arizonans should see Arizona first. Arizona Highway.

THE total of American mining company dividends disbursed in June continued the record-breaking achievements of recent previous monthly totals. Many small syndicates and companies do not make public their dividends. Not only does this month's total constitute a new record for the month of June by a margin of approximately \$14,000,000, or 43 percent, but it exceeds also the record total for any previous individual month—that of December, 1928—by about \$3,000,000, or 7 percent, according to Engineering & Mining Journal. Again, as in the establishment of other monthly dividend records recently, increased disbursements by the copper companies account largely for the tremendous gain.

The Boulder Dam act has been proclaimed by the president, but that does not mean that the interstate phase of the matter has been settled. As far as the water division between states is concerned there is no change and negotiations are to be continued toward a satisfactory settlement. In the meantime press dispatches report that Imperial Valley proposes to bring in sufficient new acreage to utilize almost all of the 7,500,000 acre feet allotted by the compact to the lower states. It takes six or seven acre feet of water per acre for Imperial Valley land each year and their proposed million acre expansion looks rather far-fetched, nevertheless that very matter may be why California has been sitting back in the harness and forcing the adoption of a six state compact with no definite settlement of the water question. Thus that state could by its superior wealth, put the water to beneficial use first, there by initiating a legal right which we could not combat under the law of prior rights, as far as the main stream is concerned.

Arizona has all of the Gila and Salt river system appropriated and no other state or nation can deprive us of it nor can we be forced to divide with Mexico.

There may still be a chance of a satisfactory agreement with California before it becomes necessary to take our case to the highest tribunal, as is indicated by the desire of Ewood Mead to confer at Yuma this week with our commissioners.

WANT A MINE?

The Snta Cruz Batholith of Arizona contains a mine for every purpose, and for every purse. There must be those who would buy a mine if they knew where they could get one. Are you one of those? If so write me specifying the price, terms and other conditions you prefer and learn how near I can come to fitting you out! Anything from a single claim to a big consolidation that would run into figures. Batholithic characteristics are: wide veins continuous veins, big lodes that run into vast tonnage below, bellies of rich ore, and here, fine tunnel sites with depths of 1200 feet up. My immediate neighborhood has shipped \$2,000,000, this county about \$25,000,000 while within about fifty miles from my house the production has been more than a billion dollars. The richest mineral land in the world.

MINE FOR SALE

Word is being spread around, that this country is so prosperous that it does not know what to do with its money. It has also been rumored that there are brave men who want very encouraging, and this ad is written in the hope that they are true.

As any old timer in this country can tell you, I have been developing a group of claims and am still at it. The developing of the best mine in the world takes money, and it seems to me that the better the mine the more money it takes to get it to the producing stage. Probably every resident of this country knows that the government requires work on or for every claim, and this results in a great deal of work being scattered around where it counts but slowly toward the betterment of the mine.

In order to cut down my annual expenditure, which is fixed by law at \$100 a claim, and if possible to get a few dollars to spend on the rest, I will sell to an operator a group at either end of my ground. You can understand why I do not want to sell out a claim or two in the middle of the group, but in view of my needs you may be sure that you will get a wonderful bargain in anything that you buy from me NOW. It costs money to run this ad, and I will appreciate it if any person who wants to buy a mine will be frank about what he wants. It is too to say which of my claims is the best, and any one of them might turn out bonanza; personally I believe they will. You can have one claim or two, and if that is not enough, I add any number desired although I would rather sell a small group and keep the rest. But if you have not enough claims to satisfy an operator I have arrangements already made by which I can turn in for a bl.

eration, my neighbors claims with mine. It would pay some one to buy them all for BIG BUSINESS, but they have not waked up.

These claims all have ore; the ore always carries silver, and a little gold; they will get pay for lead, and less copper. The idea of the author-idea is that the lead while good near the surface, will get less while the copper gets more with depth. Ship-ments have been made from any group I have to sell, and these run from 12 to 250 ounces of silver, from 5 to 60 percent lead and from 2 to 20 percent copper. And there is plenty more of it. I may add for your information, that I have about 200,000 tons of ore in sight on my whole group, that will average about

\$12.00 per ton, and my earnest ambition is to add to that until some capitalist wakes up. Don't be deceived by cow-boy talk; most of them pose in their idle moments as mining "experts," but the really do not know what they are talking about. This country is full of good mines in and adjoining the Santa

Cruz Batholith, and it wont be long till the world knows it.

Come and see me if you want to mine with success.

JOSIAH BOND, Alto, Arizona, via Patagonia

If you can't boost this mining camp, don't knock it. It's going to boom!

POLICE HELPED AS DRUG CHEATS DEATH

Holdup Suspect, Wounded in Fight, Dies Twice.

Detroit, Mich.—John Jones, a negro, twenty-two years old, suspected of being a holdup man, was shot as he dived out of an alley in a running battle with the police, and died twice.

He was removed to the receiving hospital, where he died before the police could question him and secure information regarding holdups which they were sure he could furnish.

Death had cheated the law, for dead men tell no tales.

Science then stepped in and cheated death. Dr. Courtney Fremont, a member of the hospital staff, injected a charge of adrenalin into the heart muscle of the man who had been dead about half an hour and he came back to life. He lived for five hours, giving the police ample time in which to question him and secure such information as he was willing to give. He then died again.

Victory of Science.

The shooting and double death of Jones took place several weeks ago, but passed practically unnoticed as a news item. As a shooting and single death it was just one more item in the list of crime news that passes daily out of the police department. The scientific angle, however, became a matter of medical record and as such it has survived as another almost unnoticed victory of science.

Bringing persons back from the grave to live again is no longer a novelty. It has been done scores of times. When the miracle was first performed it received little publicity. It seemed as if there must be some fake about it and, of course, newspapers could not be victimized by fakers, so the stories were published with numerous qualifications hedged about all statements. Now that it has become well established as a bona fide miracle of science it does not possess quite the novelty it did at first, and even spectacular events such as the Detroit incident pass almost unnoticed.

Baby Brought to Life.

The first case on record in which a baby born dead was brought back to life occurred in a Brooklyn hospital. Mrs. Bertha Hanson gave birth to twins, a boy and a girl, at the Park Park Maternity hospital. The boy, weighing three pounds, was born dead. The girl weighed two and a half pounds. Dr. Philip Minberg administered adrenalin to the boy by hypodermic injection. It stimulated the infant's heart to action and life returned.

Both infants were fed with a medicine dropper and were raised in an incubator until they had attained sufficient growth. The boy who was brought back to life is still alive, but his sister died before reaching her fourth birthday. They were born on Lincoln's birthday, 1923. Since then the miracle has been repeated scores of times in Brooklyn as well as elsewhere throughout the country.

In Philadelphia a few years ago a man of forty who had suffered from tuberculosis half his life died. Twelve doctors gathered around his bed and for an hour applied every known test for a sign of life, without finding any. At the end of two hours rigor mortis had set in. A small amount of adrenalin was then injected into the heart.

At the end of two minutes the skin assumed a pink tinge which gradually changed to a flesh color. Ten minutes later the man was breathing faintly. His eyelids fluttered and he sighed as though awakening from sleep.

"How do you feel?" the man was asked. "All right," he answered in a tired but very ordinary tone. "Did you have any dreams?" "No, I slept." His tired eyes closed. "No unusual sensation?" "No." Shortly afterward he returned to an unending dreamless sleep.

2 Years in Death Cell Used to Educate Self

Columbus, Ohio.—The other day Sabo observed the second anniversary of his incarceration in "Death row." His attorneys have tried in vain to save him. When Sabo was "dressed in" two years ago he could neither read nor speak English. Now he speaks fluently.

His tutors were companions in "Death row"—13 of them—who have paid society's capital penalty. Sabo can read well, too, and he spends most of his time poring through the Bible and other religious books.

Educator to Translate Book of 6,175 Pages

Crawfordsville, Ind.—Prof. C. H. Oldfather, formerly of the Wabash college faculty here, now with the University of Nebraska, has been commissioned to translate the "Diodorus of Cicely," which will run about 13 volumes, a total of 6,175 pages. The commission was given by the Loch classical library. Diodorus has never been translated into English, Professor Oldfather says. He is an original writer but also is an important authority for several periods in ancient history.

G. A. R. Waning

Madison, Wis.—Fourteen of the existing posts in the Wisconsin department of the Grand Army of the Republic have only one surviving member, according to its annual report.

An enjoyable card party took place at the home of Mrs. J. J. Sullivan, on Wednesday the 12th. Refreshments were served at 12 o'clock.

Coads Prefer English; Men Pick Economics

Cambridge, Mass.—English is the most popular subject among college girls and economics among men, if a survey conducted at Harvard and Radcliffe is an accurate barometer.

Twenty-eight per cent of Radcliffe girls are concentrating in English, compared with 16 per cent of Harvard men. Seven per cent of the Harvard students are majoring in economics, while less than 3 per cent of the Radcliffe girls have shown preference for that subject.

Cat Brings Rat Home for Kitten's Playmate

Asbury Park, N. J.—Employees of a Main street grocery store were treated to the unusual spectacle of a rat playing about with Mollie, a local cat, and her four kittens. What made it most unusual is that Mollie is a feline known to be rough on rats, and had just killed two rodents before taking up with this one.

The rat, ungrateful that Mollie had spared his life, tired of his strange playmates and tried to wander away, but Mollie picked him up by the scruff of the neck and returned him among her brood. He climbed up on Mollie's back and went to sleep.

Statue of Savior to Guard Rio de Janeiro

Rio de Janeiro.—A great statue of Christ, to watch over Rio de Janeiro, from a 2,200-foot hill overlooking the harbor and city, is being built on Corcovado (Hunchback) peak, and will be finished in two years.

This 125-foot figure, which with its pedestal will reach 150 feet above the famous Hunchback, will vie with New York's Statue of Liberty in prominence and will surpass greatly in size the Christ of the Andes, which stands on the border of Chile and Argentina as a symbol of perpetual peace between those nations.

A fund of \$720,000, which the statue will cost, is being collected by the Catholic Center of this city. Work was begun two years ago. Thirty workmen are putting up the ironwork for the reinforced concrete pedestal and body, over which will be placed a surface of blue-green tiles. The Christ's outstretched arms will cover 125 feet of width, and can be seen for many miles both on land and sea.

Paul Landowski, a Russian sculptor, designed the monument, and Silva Costa is the architect. It bears the words, "Christ conquered, reigns, rules," in Latin.

With an area fifth largest among the states and a population half that of the city of Los Angeles, the Baby State has accomplished a gigantic task in building up governmental and industrial machinery to serve its widely scattered population. From 1910 to 1920, Arizona exceeded all other states in percentage of growth and indications are that this record will have been maintained during the present decade.

Escaped Monkey Has Fun With Train Crew

Bone, Nev.—N. 3, the fast mail train of the Southern Pacific, was made a monkey of whom it rushed through eastern Nevada, according to trainmen going through there.

When the train left Ogden there were 11 monkeys in a cage on one of the baggage cars. When the train reached Lakeside there were only 12 monkeys in the cage, while the fourteenth, not satisfied with the number in which the train was proceeding, was out doing its best to help.

The monkey scampered over cars and under cars and the trainmen, at a rate of speed maintained by the train had no room for the animal. For 200 miles the monkey played tag with the train crew. Then at Carlin the animal left the conveyance and played games with Carlin residents. Most of Carlin's population turned out to help capture the primate, and it took all of them to do it.

Eventually Mr. Monk was overtaken and placed on No. 10 of the Southern Pacific for transportation to San Francisco. The monkey was none the worse for his vacation.

Among Arizona's most valuable natural resources is its timber. The state boasts of the longest unbroken pine forest in the United States, located largely in National forests and invaluable as recreational areas as well as economic assets. Centers for the lumber industry are in the northern and northeastern part of the state, around Williams, Flagstaff and McNary. About 2,500 men are employed in this thriving industry, which in 1928 had a value of around \$5,000,000 for 170,000,000 board feet of lumber produced.

Yearning for Red Hat Cets Boy in Trouble

San Pedro, Cal.—A "tomorrow" kid out of Leon Garcia's, eleven-year-old schoolboy, into trouble here.

He longed for one of the new red velvet red hats. In fact, he told us boys that he couldn't think of any thing else. Finally his desire got the best of him. He broke into a local meat market, taking \$25 from the cash register.

The boy was in such a hurry for his hat that he asked the proprietor of a clothing store to open up after closing hour in order that he might get one. The owner of the store became suspicious of Leon and called police. The boy confessed.

Indian Tribe Claims \$17,000,000 From U. S.

Hayes, Mont.—Assiniboin Indians are preparing to wage an intensive battle to recover \$17,000,000 they claim is owed them by the United States government. They have appointed Everett Sanders, former secretary to President Coolidge, as their leader in the fight to succeed James Good, who resigned his post as Indian leader to help President Hoover's cabinet.

Popular for Dogs

Bridgport, Conn.—Bridgport dog owners, who once preferred the names of "Fido" in large majority, now are turning to more distinguished canine names. Scrutiny of dog license records here revealed "Lindy" and "Mus-sollit" threaten to eclipse "Fido" as a pet name.

The TRAIL OF '98 A Northland Romance by Robert W. Service

STORY FROM THE START Athol Meldrum, young Scotsman who tells the story...

CHAPTER III—Continued

"Poor old beggar," I thought; "I wonder if I cannot do anything for him." And while I was thus debating...

"No, go ahead," I said; "I wish he would." So she got an ancient violin, and the old man cuddled it lovingly...

They'll rob and kill him in the end, and the cruel part is—he's not greedy, he doesn't want it for himself—but for me...

The Wild Music Throbbled With Passionate Sweetness and Despair.

vich. That's my grandfather's name. My mother ran away from home. Two years later she came back with me...

"What can you do? If we were going in together it might be different. When I met you at first I hoped, oh, I hoped—well, it doesn't matter what I hoped. But, believe me, I'll be all right. You won't forget me, will you?"

CHAPTER IV

Never shall I forget the last I saw of her, a forlorn, pathetic figure in black, waving a farewell to me as I stood on the wharf.

were clear and steady as she bade good-by to me, and from where we stood apart, her face had all the pathetic sweetness of a Madonna.

The prodigal developed a wonderful executive ability; he was a marvel of activity, seemed to think of everything and to glory in his responsibility as a leader.

It was Moshier, with his bald head, his crafty little eyes, his flat nose, his black beard. I saw Jim's face harden. He had always shown a bitter hatred of this man, and often I wondered why.

"Here," said the man, touching one of the shells. "Right you are, my hearty! Well, here's your ten."

Improved Uniform International Sunday School Lesson

Lesson for July 7 THE STORY OF EZEKIEL LESSON TEXT—Ezekiel 1:4-11:24:15-18.

Ezekiel prophesied in the land of the captivity. The purpose of his ministry was threefold. (1) To keep before the house of Israel that they were in captivity because of their sins (14:23).

1. Ezekiel's Call (1:1, 2). Command to stand up (v. 1). He was given a vision of the Almighty God on His throne of glory (ch. 1). The purpose of this vision was to give a synthetic grasp of the execution of the divine will through the powers and forces which God had created.

2. Filled with the Spirit (v. 2). By the Spirit the divine energy entered him and enabled him to execute his commission.

3. The difficulty of his task (vv. 5-8). The prophet was to deliver the message of God whether they would hear or forbear. He was to fearlessly execute his commission, though the attitude of the people be as "briers, thorns and scorpions."

4. Eating the book (2:9-3:9). This book contained God's woes upon the stiff-necked and rebellious people. In order to speak God's threatenings effectively to others we must inwardly digest and appropriate them ourselves.

5. Entering into sympathy (v. 15). In order to minister to a people one must show that the message is from the depth of the heart. Ezekiel mingled his tears with theirs.

6. Ezekiel's Grave Responsibility (3:17-21). Two things were required of him as a watchman over the flock. 1. To hear the Word of God's mouth (v. 17).

7. Ezekiel's Courage (24:15-18). He was to be taught by a sorrowful experience. He was to turn his face from even natural desire. At the death of his wife he was forbidden to mourn.

Combination of Face Brick and Siding Makes Attractive Home

A beauty in a combination of face brick and siding. Notice the simplicity and harmony of each part with every other and study the unusual floor plans.

By W. A. RADFORD Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building...

There are a great many different building materials which used alone make an attractive home. However, some people desire a combination of two materials, thereby securing an out-of-the-ordinary home.

First Floor Plan. Second Floor Plan.

is not large the brick walls up to the second floor still give it an air of solidity, likewise the contrast of the wood above helps to take this house out of the commonplace.

three bedrooms and a bath upstairs. As will be seen by the floor plans which accompanies the exterior view, all of these rooms are of unusual good size.

through a double-cased opening in the dining room which is a front corner room with five windows, making it a light and airy place for the family meals.

An open stairway leads out of one side of the living room to a central hall on the second floor. Off this hall opens three bedrooms, two at the front being large, one 11 feet by 14 feet, and the other 10 feet by 16 feet 6 inches.

House Wiring Needs Services of Expert

When you push a button or turn a switch in your home and your lamps light, your flatiron or curling iron gets hot, your washing or sewing machine begins to move or your refrigerator begins to chill, you know what happens, but do you know why it happens?

Do you know how the electric current, one of the most frequently used home-making agencies brings heat and cold, light and motion all at the same time? Maybe if you understood it better you could use it better.

When electric current passes through a conductor of any sort it heats it up. This is commonly noticed in the various heating appliances and the lights used in a home.

Electric ranges installed in such old homes should have separate wiring installed. This can be done at a small expense.

Tells of Methods to Prevent Leaky Roofs

Drippy leaks that come with every rain or snow storm irritate the nerves as well as cause damage to furniture, walls and floors.

He advises the placing of a new flashing around the chimney or stand pipe on the roof to close a bad leak. "Buy some flashing," he says, "copper is best, but you may use lead, zinc or galvanized iron."

"The most vulnerable portions of a roof," continues this writer, "are the valleys, the ridge, the gutters, and the slopes where chimney, dormer or other structure penetrate. A roof with a few angles, few penetrations and a good slope, is the best."

Hard-Burned Common Brick Wall Charming

Where one has a brick house, a garden wall of hard burned common brick may surround this home and add a beautiful touch of color and artistry as well as contribute a sense of privacy to the grounds.

Charming House

The charming house is never easy to define or explain. It is seldom due simply to one or two outstanding beauties. The charming house is rather the result of a multiplicity of carefully considered details, combining to give the harmony, ease and shining cleanliness that is the goal of every home owner of good taste.

"Probation" and "Parole" Quoting Judge Kavanagh: "Probation lets one who has been adjudged guilty of crime go from the courtroom without any punishment at all. Parole means forgiving the rest of the punishment after a guilty person has suffered a part."

Fish Is Adapted to Its Environment Fish have all sorts of physical adaptations to their environment. Doctor Longley has found. Some have impregnable defense against enemies, such as the "shell fish."

Harmful to Lenses Many people have the habit of laying down their glasses with the lenses touching the table or whatever hard surface there may be. This produces fine scratches on the glass which interfere with proper vision.

The Sick Need the Physician And it came to pass, as Jesus sat at meat in the house, behold, many publicans and sinners came and sat down with him and his disciples.

Tri-Ply Construction A new monolithic method of building large and small homes, known as tri-ply construction, is said to be permanent and economical.

1—Mrs. Hoover presenting the secretary of agriculture trophy to Helen Drinkwater of Henrico county, Virginia, as the typical 4-H club girl. 2—Thomas J. Harkins of Asheville, N. C., who may succeed Mabel W. Willebrandt as assistant attorney general in charge of prohibition cases. 3—Edison's original lamp factory at Mazdabrook, N. J., being turned over to Henry Ford for his museum at Dearborn, Mich.

South West PARAGRAPHS

Births in Arizona exceeded deaths by 312 during April, according to figures released in Phoenix from the office of Dr. R. J. Stroud, state superintendent of public health. Births during the month numbered 780 and deaths were given as 468.

Ernest McCray, formerly of Fort Defiance, recently arrived in Rice, Ariz., to take over the duties of superintendent of the United States Indian school there. He succeeds Wm. E. Snook, who has been transferred to the Hopi Indian school in northern Arizona.

Construction work will start soon on the new 646-acre municipal airport at Clayton, N. M., which will be constructed under the bill of the last New Mexico legislature which permits municipalities in New Mexico to lease state lands for airport purposes for a period of twenty-five years.

James Black, convicted of manslaughter in the shooting of Charles B. Otey at Mormon Lake last July, was given a suspended sentence of from nine to ten years in state penitentiary. Judge Crosby of Flagstaff suspended sentence as long as Black was on "good behavior."

In an attempt to curb accidents, the Arizona state corporation commission has amended state aviation laws so that in the future planes in Arizona carrying passengers or freight for hire, shall be federal licensed and all pilots of such planes must carry federal licenses.

Call for the summer meeting of the sheep and goat raisers of Arizona has been sent out by A. A. Johns, president of the Arizona Wool Growers association. This year's meeting will be held in Flagstaff on July 9 and 10. Flagstaff has been the summer convention city for state sheep owners for many years.

The new \$15,000 dairy building at the New Mexico College of Agriculture and Mechanic Arts, in Las Cruces, is practically ready for occupancy. It will house the offices of the dairy husbandry department, a dairy laboratory and a farm dairy laboratory in addition to testing rooms for all dairy products.

KOB, radio broadcasting station of the New Mexico State college, has been granted permission to increase its sending power from 10,000 to 20,000 watts. The increased power permit makes KOB by far the most powerful educational station in the United States and places it among the strongest stations in the country.

The Phoenix street car system, rebuilt at a cost of three-fourths million dollars, is reported on a paying basis, even at the present 5-cent fare. The average daily income is \$763, compared with \$549 last year. Service frequency has been almost doubled since the start of operation of modern one-man steel cars and the lines are much more popular than before.

Gallup, N. M., is all set for the 1923 Inter-Tribal Indian Ceremonial, August 28, 29 and 30. The big show is unique in that it is put on by the Indians themselves, twenty-two tribes usually being represented. Being the "Indian capital" the aborigines gather in Gallup from all the nearby reservations and pueblos of the southwest to display their arts, crafts, ceremonials and sports.

Tourists and vacationists as well as operators and residents of the more permanent automobile camps in Arizona are included in a campaign of cleanliness as a safeguard to the public health, inaugurated by R. J. Stroud, superintendent of the public health department of Arizona. The appeal is to keep all camps, whether temporary or otherwise, clean and sanitary, and free from litter.

The New Mexico winter wheat crop should more than double that of last year according to forecasts just issued from the office of R. P. Hare, agricultural statistician, in Las Cruces. The condition of the crop in the state, he says, is 84 per cent as compared with 65 per cent on June 1, 1923. This would indicate a production of 3,612,000 bushels, which compares with 3,795,000 indicated by May 1 condition.

The graves of Indian fighters, early day prospectors and other pioneers of the southwest, which are found in the Lincoln National Forest, are to receive special markings under present plans of the forest service. O. Fred Arthur, supervisor, has asked that parties knowing of early day burials within the Lincoln National Forest report them to the forestry office together with location of the grave and a short sketch of the man's life. The movement of the marking of the graves of pioneers was started through a resolution adopted by the Historical Society of Arizona for the marking of graves throughout the southwest.

A fund of \$2,600 is now available for the construction of the swimming pool at the New Mexico State college following an intensive campaign among students and faculty.

Vandals are taking away specimens from Chalcedony petrified forest by the carload, Sam G. Baillie told members of Phoenix Rotary at a luncheon of the club. Mr. Baillie said that on a recent visit to Hollbrook he learned that four carloads of the wood had been shipped to San Diego. He added that arrangements had been made to ship eighteen carloads of the wood.

TRADES IN MAJOR LEAGUES PLEASE

Rogers Hornsby Just What Chicago Cubs Wanted.

Wholesale trading of big league ivory last winter was not entirely a wasted effort. It usually happens that one club in a deal always gets the short end, and occasionally developments prove that neither club profited by getting itself involved in a transaction, but the season so far indicates that, barring one or two cases, there is satisfaction all around.

Undoubtedly the outstanding swap, so far as results go, was the one that packed Rogers Hornsby's bag and sent him from Boston to the Cubs in exchange for a small army of talent. Hornsby has done and will continue to do just what the Cubs needed most—hit the ball—and the men sent to Boston have been instrumental in creating such an unusual sight as the Braves occupying first place in the National league, writes Irving Vaughan, in the Chicago Tribune.

The Braves obtained among others Freddy Maguire, who is playing a forlorn game at second base, and it may not be long before John McGraw, the worst trader in the business, will make an effort to bring him back to the Giants who are suffering for the want of a man at that particular post.

The Braves also took "Socks" Seibold, a veteran right-hander, who had been taken in last fall by the Cubs after he had put in a big year on the Reading farm. The first thing Seibold did after the barrier went up was to whip the Giants, and he probably will whip a few other teams before the race has run its course.

Still another in the swap was old Percy Jones, and he too copped a decision at the outset. Besides they got in Bruce Cunningham, a pitcher who looked so good in training camp that Assistant Manager John Evers proclaimed him a prize. And Leggett, a young backstop, also is expected to grow up into something of value. Thus the Braves are better fixed without Hornsby than they were with him, and yet the Cubs haven't missed what they gave away.

The Cleveland Indians have no reason to regret giving George Uhle to Detroit for Tavener and Holloway. Tavener has tightened up the Indian infield so far as defense is concerned, although he isn't hitting and probably won't. Holloway will win a few games before he finishes the season. On the other hand, Uhle has been Detroit's most consistent winner.

Evers' Legs Have Slowed Down

YEARS may have slowed up Johnny Evers' baseball ability, but his recent three-day suspension indicated that the Trojan's spirit can become as feisty as in the days of the old Chicago Cubs under Frank Chance.

What was said by Evers and Umpire Quigley in their argument over the batting order, which resulted in the punishment of the Braves' assistant manager, probably never will be made public. It undoubtedly would show that the former keystone king, as Charlie Murphy used to call Evers, employed the same sort of attack that made him a past master in getting the goats of umpires.

Evers proudly asserts that he never raised a hand to one of the field officials. The nearest he came to it, he said, was in a battle of words with Umpire Finerman. When the decision was about to go against him, he picked up a little dust and let it slide down the umpire's back.

In his pearly days, Johnny had only to make a certain gesture and he was put out of the game. But he had a gesture for each of the umpires and when he made it, it meant more than a mouthful of words.

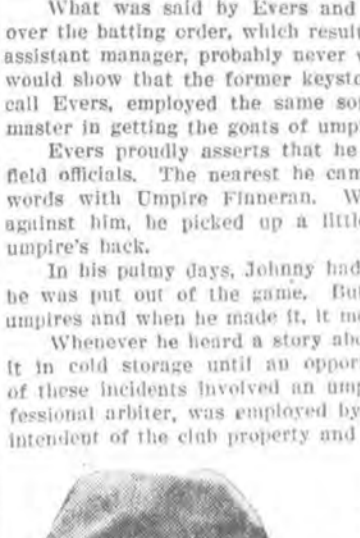

Whenever he heard a story about a National league umpire he held it in cold storage until an opportune time arose to spring it. One of these incidents involved an umpire who, before his entry as a professional arbiter, was employed by an athletic club as a sort of superintendent of the club property and umpire for its baseball games.

Once when the Cubs were visiting the Polo Grounds, the Giants got a couple of runners on the bases, one being on third, and the Cub infield, as was its practice in such situations, drew in close around the pitcher's box for a quick play that they would pull at the plate.

"The umpire momentarily stopped the game to brush the dust off the home plate, giving Evers the opportunity he had awaited since he heard of the officials former employment.

"Well, I see you're back at the old job, taking care of the grounds," said Evers as the umpire brushed the plate.

The Trojan did not finish that game and was absent from the Cubs' lineup for several days thereafter.

John Evers.

NEWS REVIEW OF CURRENT EVENTS

Dawes Making a Fine Start in London—Progress of Disarmament Plans.

By EDWARD W. PICKARD

GENERAL DAWES, our ambassador to Great Britain, is hitting it off splendidly in London so far, conducting himself and the affairs of his high office with the dignity and good sense that would be expected of him. Wednesday the ambassador and Mrs. Dawes attended their first court in Buckingham palace, and the former settled the "knee breeches" question by appearing in full dress evening attire with long trousers, abandoning the precedent set by his immediate predecessors and reverting to what is truly the correct court dress for American diplomats. Mrs. Arthur Henderson, wife of the new secretary for foreign affairs, presented Mrs. Dawes to Queen Mary, who was escorted by the prince of Wales because of the illness of King George. The ambassador's wife in turn presented a number of American women to her majesty.

In another matter that may seem trivial Ambassador Dawes has done what practically all Americans will admit is the correct thing. He has announced that during his incumbency the American embassy in London will be dry, this being the rule in his own home since long before prohibition, although he does not claim to be a teetotaler. In many of the American missions abroad liquor is still served, but the State department does not permit its cost to be included in expense bills. Otherwise the department does not interfere in the matter.

General Dawes was the guest of the British Empire Service league at a banquet, being entertained as a representative of America's soldiers and of the American Legion. He said he found in the league's constitution, "named as one of the fundamental objects for its formation, a statement of purpose which I trust is uppermost today in the hearts and consciences of the peoples of the world. It is to further the ideal of comradeship as opposed to force as the arbiter between nations. Let me say that that phrase expresses my chief instruction received from the President of the United States as I left for London to take up duties as American ambassador and enter into official relations with two great English-speaking nations. That phrase expresses the intent of the Kellogg treaty."

Hugh Gibson, American ambassador to Belgium, held a long conference with Ambassador Dawes in London, on order of the State department, and then both of them called on Prime Minister MacDonald. The subject of the talks was the progress of disarmament negotiations, the next move in which must come from Europe, Mr. MacDonald was busy all week preparing the speech from the throne which, it was expected, would announce the place and time for the proposed meeting of the powers for consideration of the disarmament question. In Washington it was believed the naval reduction conference would be held in London in the fall and that the United States, Great Britain, France, Italy and Japan, would participate. The Italians, it is reported, are ready to enter the party, and this fact will force France to come in, although the French have been clinging to the idea that all disarmament dealings should be managed by the League of Nations.

cue was received in Spain with wild jubilation for hope for the men had almost been abandoned. The ships and airplanes of four nations had been seeking for them all the week.

DEBATES on the ratification of the French debt agreements will begin in the French parliament about July 14 and will keep Premier Poincare in Paris, so the meeting of the allies and Germany for adoption of the Young reparations plan, arrangement of evacuation of the Rhineland and cleaning up of other war matters is likely to be postponed until late in July. The United States will be invited to the conference, but so far as the proposed international bank of settlement and its operations are concerned, America will keep hands off. This is the decision of Secretary of State Stimson. He said there were no recent developments to change the government's position, which he stated on May 16 was that it does not desire to have any American official participate in the collection of German reparations through the bank or any other agency.

Foreign Minister Stresemann of Germany, in an eloquent speech in the Reichstag, made it fairly certain that Germany will accept the Young plan if the allies agree to an early evacuation of the Rhineland, despite the hot opposition of the Nationalists.

RESUMPTION of diplomatic and trade relations with Soviet Russia will be one of the first acts of the Labor government of Great Britain. The Soviet regime was formally recognized by the former MacDonald government, but relations were broken off by the raid on Arcos house, headquarters in London of the Russian commercial mission, made by the Conservative government in May, 1927. MacDonald and his cabinet are seeking the co-operation of all other parts of the British empire in their Russian policy, though their approval is not technically necessary. It was said the cabinet would not renew the trade agreement by which Russia was allowed to maintain a trading organization in London with diplomatic immunity.

FORMAL approval of the Kellogg peace pact was given by the Japanese privy council, but politics entered into the affair to such an extent that the downfall of Premier Tanaka and his government may follow. The expression used by the original signers of the treaty, "in the names of their respective peoples," was explained by the privy council as not interfering with the supreme power of the emperor to make treaties, but Count Uchida, who signed the pact for Japan last August, resigned from the council, asserting he had initiated it thinking that the phrase meant merely "for the sake of their respective peoples." All of which is rather obscure to Americans. The fact is that the enemies of Baron Tanaka are using the treaty as a weapon to force his resignation.

NEWS of the accord between Mexico and the Catholic church was spread all over Mexico, by mail, airplane, radio and every other means, and was greeted with rejoicing by the people. Bells were rung, prisoners released and a general holiday enjoyed. Mgr. Pascual Diaz, who had just been made archbishop of Mexico, and Archbishop Ruiz of Michoacan conferred with the government officials and tried to make arrangements for the reopening of all churches on Sunday, the day of St. Peter and St. Paul. However the department of the interior said it would be impossible to complete the necessary inventories before about July 10 and that resumption of the normal functioning of the Catholic church throughout the country would not take place fully before that date. On Friday services were resumed at the shrine of the Virgin of Guadalupe, near Mexico City, the ceremonies being extremely impressive and magnificent. Priests who fled across the border during the troubles are fast returning.

REPUBLICANS of Virginia seem to put themselves entirely in the hands of Bishop James Cannon, Jr., and his coterie of dry Democrats. They met in state convention last week in Richmond and nominated for governor the same Dr. William M. Brown of Washington and Lee university who was selected by the anti-Smith Democratic convention at Roanoke. Not only that, but they also named the entire state slate put up by the Cannon meeting.

Virginia's reorganized form of government, as put into effect under the administration of Gov. Harry Byrd, was denounced by Col. Henry W. Anderson of the Hoover law enforcement commission, the convention keynoter. The speaker urged the repeal of many laws, especially the ones dealing with elections and Democratic primaries. Professor Brown was put in nomination by C. Bascom Slump.

IF PLANS submitted to stockholders are accepted, as it is not doubted, America is to have a great merger of aviation companies with assets of more than \$70,000,000. The concerns to be amalgamated are the Wright Aeroplane and Motor company, the Keystone Aircraft company and nine or more affiliated concerns. The new company, which will be known as the Curtiss-Wright corporation, will embrace two separate groups of manufacturing companies, the Curtiss group, headed by C. M. Keys, and the Wright group, headed by Richard F. Hoyt, vice president of Hayden, Stone and company and chairman of the board of the new company, and Mr. Keys will be president.

The company will have an authorized capitalization of twelve million shares of no par value stock of which two million shares will be class A stock, entitled to a preferential payment of \$2 a share annually, and which will be convertible, share for share, into common stock and callable by the company at \$40 a share. The remaining 10,000,000 shares will be common stock.

PRESIDENT HOOVER approved the promotion of Brig. Gen. Ralph H. Van Deman to a major general to fill the vacancy caused by the recent death of Maj. Gen. Harry A. Smith, commander of the Seventh corps area. Brig. Gen. Frank T. McCoy will be appointed a major general upon the retirement of Van Deman, September 3, at the statutory age of sixty-four. Col. George C. Shaw will fill the vacancy in the brigadier general list.

GOLD medals have been awarded to fifteen Boy Scouts who risked their lives to save the lives of others, according to announcement by the National Court of Honor of which Daniel C. Beard is chairman. The lads thus honored are:

Sidney Hershowitz, Washington, D. C.; Lawrence Bee, Provo, Utah; William Bennet, Dobbs Ferry, N. Y.; William G. Holford, Jr., Portland Ore.; Willie Evans, Rockford, Tenn.; Thomas Messader, Brooklyn, N. Y.; Marlow White, Pensacola, Fla.; Lazarishak, Sharon, Pa.; Ted Derrick, Rockwood, Tenn.; William David Jordan, Park Ridge, Ill.; J. C. Acuff, Middletown, Ky.; William J. Martin, Brookfield, Mo.; James Lucas, Macon, Ga., and Wilson Schooley, Mercer, Wis.

A gold honor medal was sent to the parents of Scoutmaster James Tawater Wright of Rockwood, Tenn., who gave his own life to save boys in his troops from drowning during the Tennessee and Alabama floods.

representative in Rome for five years. He says he will spend some months in his home in Greencastle, Pa., and that he has no other plans for the future. But it is thought in Washington he will be a candidate for the senate to fill the seat which so far has been denied to William S. Vare. Whatever action the senate takes in the Vare case, a successor to Vare will be elected not later than November, 1932, and maybe sooner if the seat becomes vacant. Mr. Fletcher accompanied Mr. Hoover on his South American trip and many thought he would be selected for secretary of state. It is said he wanted either that place or the ambassadorship to London or Paris. His work as a diplomat has been notable.

General Dawes was the guest of the British Empire Service league at a banquet, being entertained as a representative of America's soldiers and of the American Legion. He said he found in the league's constitution, "named as one of the fundamental objects for its formation, a statement of purpose which I trust is uppermost today in the hearts and consciences of the peoples of the world. Pretty Tennis Star

Betty Nuthall.

A croupier of Miss Betty Nuthall, the whirlwind tennis star of the British courts as she appeared on the occasion of her eighteenth birthday recently, Pretty Betty will soon set sail for the United States and a few tennis tournaments.

Sport Notes

Leo Lomski claims to have made \$250,000 fighting in the past two and a half years.

The University of Southern California Trojans will participate in eight truck meets this year.

Purdue has signed as wrestling coach Leslie Beers, 15-pound champion of nearly every competition for three years.

The name of Arthur Buelow, one of Max Schmeling's many managers, has been stricken from the roll of members of the German Boxing union.

Richard Martin, Winnetka, Ill., who played number one on the University of Illinois golf team this season, has been elected captain for next year.

Although he has averaged five games a day for more than 20 years, Jimmy Smith, famous bowler, has never been troubled with lacerated skin on his fingers.

The King's Plate, held for 70 consecutive years at the Woodbine race track in Ontario, is the oldest turf fixture run continuously on the North American continent.

To attract support from the gallery a betting machine is now operated at professional golf tournaments in England. Tickets are sold by the traveling pari-mutuel machine at 2 shillings 6 pence.

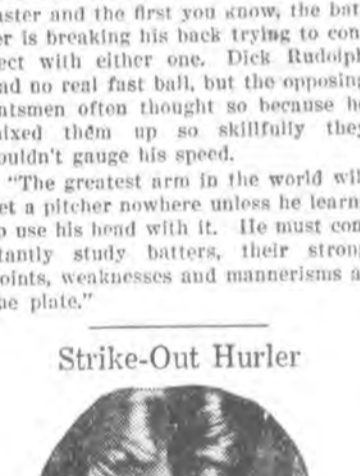

Fred Mitchell Booster of Any Brains Pitcher

Fred Mitchell, Harvard baseball coach, who managed the Cubs and the Braves for several years after serving in the big league ranks both as a pitcher and catcher, hands out an authoritative line of chatter about pitching that young twirlers would do well to ponder.

"The hardest thing to teach a young pitcher," says Mitchell, "is the value of a slow ball. They all want to breeze it by the batter. They can't understand why a batter can't hit a slow one. As the secret of hitting is timing, it follows that the secret of pitching is breaking up the batter's timing. By mixing them up, a pitcher can keep a batter from getting set. The slow ball makes the fast one seem faster and the first you know, the batter is breaking his back trying to connect with either one. Dick Rudolph had no real fast ball, but the opposing batsmen often thought so because he mixed them up so skillfully they couldn't gauge his speed.

"The greatest arm in the world will get a pitcher nowhere unless he learns to use his head with it. He must constantly study batters, their strong points, weaknesses and mannerisms at the plate."

Strike-Out Hurler

Bruce Caldwell.

Bruce Caldwell, former Yale football star is now playing at first base for New Haven. He was an outfielder when he broke in.

Family stadium arrangements may cause two stampedes to a ball park where Babe Ruth plays—one to get in and one to get out.

Francis (Pur) Griffin, Omaha outfielder, was named manager of the Omaha Western league club by Barney Burch, owner.

J. M. Mann, Princeton university graduate of '79, is credited by baseball authorities with being the first pitcher to throw a curve ball.

But for a somewhat questionable decision by Umpire Harry Geisel, George Pippen would have had a no-hit game against Boston on May 13.

The draft price, from majors to minors, in organized hockey, is \$5,000. Boston spent \$15,000 in drafting Barry, of New Haven; Taylor, of the Boston Tigers, and Chapman, from Providence.

Cy Williams, the forty-year-old veteran outfielder of the Philadelphia Nationals, has served under 15 baseball managers, despite the fact that he has played with only two clubs, the Cubs and Phillies.

Walter Beall, former Washington sandlot pitcher, for whom the New York Yankees paid Rochester of the International league \$30,000 several years ago, has been signed by the Washington club.

San Francisco, despite the fact that Pittsburgh offered a huge sum for immediate delivery of Gordon Slade, shortstop, will keep him the entire season because it figures he might help win another pennant.

The International league has six players who have been in baseball 20 or more years in Jimmy Walsh, Walter Leverenz, Jim Engly, Everett Scott, Harry Lake and Fritz Maisel. Walsh is in his twenty-fourth season

BASEBALL NOTES

Buffalo has sent Pitcher Earle Proffit to Pueblo of the Western league.

St. Paul has shipped Catcher Smith to Oklahoma City of the Western league.

The Baltimore Orioles hit better on the road than they did in their first long stay at home.

Arthur Muscat, star southpaw of the City College nine, has been signed by the Philadelphia Athletics.

Larry Woodall, sold by the Tigers to Portland, was for nine years a member of the Detroit catching staff.

Howard Maple, catcher of the Oregon State College team, agreed to terms with the Chicago White Sox.

Veterans who have seen Ad Liska use his underhand delivery say it is better than the subway ball of Carl Mays.

Chet Morrison, Lafayette pitcher, turned in his best game of the season against Lehigh, allowing two hits for a shutout.

Jack Quinn says a pitcher lasts no longer than his legs, and he spends nearly the whole winter training for the next season.

Bruce Caldwell, former Yale football star is now playing at first base for New Haven. He was an outfielder when he broke in.

Family stadium arrangements may cause two stampedes to a ball park where Babe Ruth plays—one to get in and one to get out.

Francis (Pur) Griffin, Omaha outfielder, was named manager of the Omaha Western league club by Barney Burch, owner.

Coats for Vacation Wear

By JULIA BOTTOMLEY

Unwise the vacationist who starts on a pleasure trip without a practical top coat.

Preparedness of this sort brings its own reward. For cool breezes even in summer-time sometimes hold sway.

Pastel woollens bring a charming phase of fashion into play. It adds zest to sports and town modes.

DIRECTIONS FOR MAKING "NOODLE RING"

A somewhat novel and dainty lunch dish is a "noodle ring" filled with creamed meat or stew.

- 1/4 pound noodles, 2 lbs. butter, 2 quarts boiling water, 2 eggs, 1 cup milk, 1 1/2 tsp. salt, 2 or 2 drops tab. soap, 1 cup grated onion, 1/2 cup sauce

Cook the noodles for about 20 minutes in the water to which 1 teaspoonful of salt has been added.

Clothes for Stout Women

(Prepared by the United States Department of Agriculture.)

A woman who is of medium stout build must choose her summer wardrobe with especial care.

Here is a particularly good summer dress for the women inclined to weight.

Attractive Two-Piece Dress of Dotted Swiss for Medium Stout Woman.

In the skirt, on a woman of somewhat large figure skirts should not be too tight or too short.

weight woolen coats and ensembles. In almost every instance these colorful costumes are topped with matching hats either felt or straw.

In fashioning practical coats of lovely colored woollens, style creators have done a commendable thing.

(© 1929, Western Newspaper Union.)

HINTS FOR HOUSEKEEPERS

Fine steel wool will remove starch or rust from the iron.

If the vacuum cleaner is to give good service, the dust bag must be kept clean.

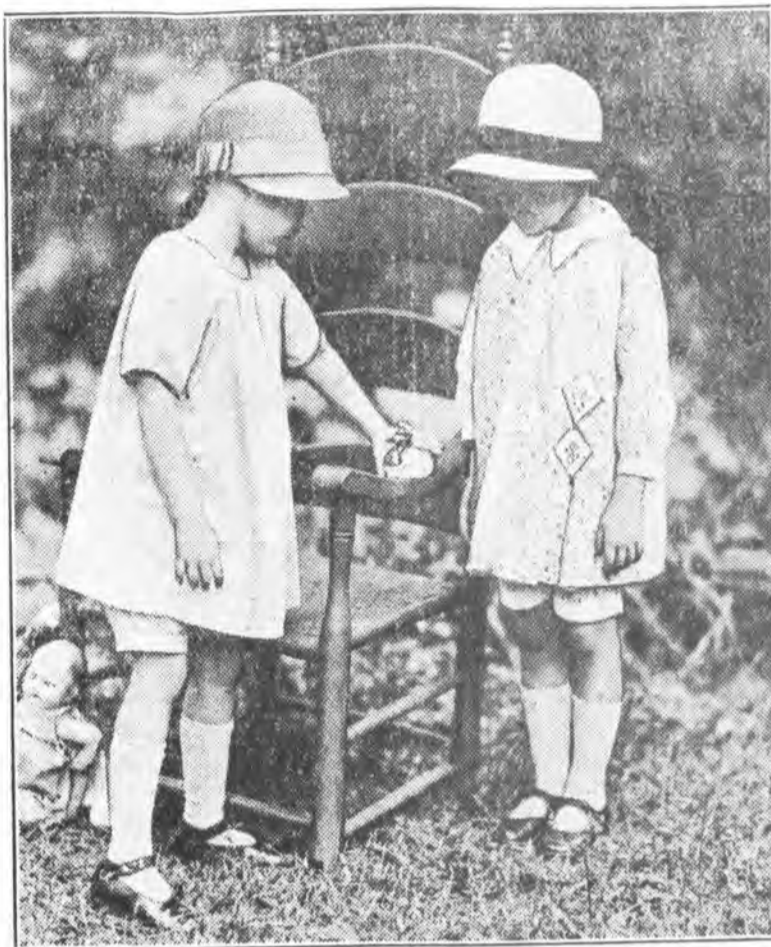

To remove the burned crust from a cake rub gently with a piece of fine sandpaper.

To alternate two pairs of shoes is more economical than to wear one pair continuously.

Browned flour does not have the same thickening power as the same amount of unbrowned flour.

Darts stitched on the right side of the material give the effect of tucks if they are finished on an even line.

Play Clothes for the Little Tots

Shade Hats Are Desirable for Summer Play.

(Prepared by the United States Department of Agriculture.)

Shade hats are desirable for children during any periods of the summer day when there is glare.

These two little girls are dressed in a very satisfactory way for the first heatless days.

One child wears a short-sleeved collarless dress, but the other is almost as cool and free from unnecessary restraint of motion.

cut fine, one cupful of sugar and two tablespoonfuls of lemon juice, with a bit of the grated rind.

Fruity Custard.—Beat the egg yolks, add one-fourth of a cupful of sugar, two teaspoonfuls of flour.

Date and Chocolate Cake.—Take two tablespoonfuls of butter, cream with one cupful of sugar.

Good Food for the Family

By NELLIE MAXWELL

When the grilling day is over, and the sun is going down.

In the country and the town; when the whippoorwill is calling.

When making a layer cake of two layers.

The mother who feeds her children green vegetables, plenty of milk, coarse cereals and breads.

In recent investigations of school children in the East, the results are most interesting.

shows that intelligence and not wealth is the important factor in well nourished children.

Fairy Tale for the Children

By MARY GRAHAM BONNER

"We just saw two people go by," said the bird of paradise.

"Oh, don't you wish you could have that bird of paradise for your hat?"

"Either of them would do beautifully," "Oh," continued the bird of paradise.

"You see," the bird of paradise continued, "we've become fashionable lately.

"In fact, we've become very scarce because so many of us have been killed.

"Of course, we don't get our long and perfect plumage until we are five years old.

"But we are beautiful birds and we have beautiful feathers. We can't help but admit it, though we're sometimes very, very sad that we are so beautiful.

"We have wonderful feathers—brownish, reddish, tannish feathers. Our throats are of soft black and green feathers.

"We're gay then, gay and glad, but alas! they kill us then for ladies' hats.

"But it's our long plume feathers,

our wavy beautiful feathers that people like—ladies like to wear them in their hats.

"But Here at Least I Am Safe." you're not so much on your guard and they can get you more easily?"

"Yes," said the bird of paradise, "there is. When we're mating, when we're dancing in the trees, dancing and chirping and shrieking with delight.

"We're gay then, gay and glad, but alas! they kill us then for ladies' hats.

"They take us when we are joyous and merry and happy for trimming for hats which can't talk and

which can't have little birdlings. Oh, it's terrible.

"I should say it is," said the lesser bird of paradise.

"How so?" "We're playing for kisses."

Athenian Vase Prized

Possession of Museum

An Athenian red-figured krater, a large ornamented vase used for mixing wine and water, of special importance owing to the fact that it is signed by the maker.

The piece stands two feet in height and is of about 420 B. C. The vase, unfortunately, had been broken and has had to be put together again with restorations of missing parts.

Chinese Marital Troubles

Chinese women, eagerly striking out for freedom, have hit a snag. Divorces have appeared as a phase of the emancipation of women.

SAME PRESCRIPTION HE WROTE IN 1892

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as today.

Without intimacy, you never have much trouble.

This prescription has proven its worth and is now the largest selling liquid laxative. It has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence.

Explaining the Sounds The Dinner Guest—Aha! I suppose your table is groaning with good things to eat.

In the Spring "What game are you playing with your lady friend?" "Put and take. And I can't lose."

To insure glistening-white table linens, use Red Cross Ball Blue in your laundry. It never disappoints. At all good grocers.—Adv.

Juvenile Sherlocking Visitor—And where is your mother today, Freddy? Boy—I think she's gone to see grandma. She put on her loveliest skirt.

Supplies quick energy!
