

PERSONAL AND SOCIAL

SPRAINS ANKLE

Charley Mastin, received a rather painful sprained ankle last week, at the mine.

LET 'ER RAIN

While we have been getting number of showers almost daily about Patagonia, we are not receiving enough to do any lasting good, and while we are thankful for what we get we want some more. Let 'er Rain.

DOING ASSESSMENT WORK

L. C. Campbell, of Los Angeles is in Patagonia, making it headquarters, while he is doing the assessment work on his extensive holding near GreATERVILLE. He is accompanied and being assisted by Edgar H. Sargent of Los Angeles.

SERVING SPLENDID MEALS AT THE COMMERCIAL HOTEL

J. Y. McLinden, the new proprietor of the Commercial Hotel is making a hit with everybody, for the quality and quantity of meals now being served at the Hotel. Of course, Mrs. McLinden, does the cooking but "Mac" sees that everybody is satisfied, and from talk heard on all sides everybody is delighted with the meals and the way they are served.

REPAINTING THE SIGNS AT THE HOTEL

Edgar Sargent, who is here doing assessment work on mining claims, keeps himself from being lonesome by painting over the signs at the hotel, and doing a good job of it.

LIGHTNING KILLS CATTLE

Mrs. Hirsch, who lives near GreATERVILLE, had two cows killed last week by being struck by lightning.

LIGHTNING SHAKES SEVERAL BUILDINGS, AT GREATERVILLE

During an electrical storm that broke near GreATERVILLE last week, several buildings were threatened.

CLOUD BURST IN THE VALLEY

Just above Ed. Mc Farland's place, on the San Rafael Valley road, there was a cloud burst this week during one of the rain storms. The water morooned a number of cars for a long time, on account of the height to which the water had risen in the creek. The dam that Mr. Macfarland, had worked so hard to compete, was completely washed out.

AMERICAN BOY MINE, GOING AHEAD

The work of tunnelling the American Boy Mine is going ahead rapidly these days. They are making about four feet a day, with everything looking favorable.

The building and painting of the new office and houses for the workmen is nearly done and will make for the comfort of the employees.

SMASHED HIS RIGHT HAND

M. M. Jones, of the Morning Glory Mine met with an unfortunate accident, while unloading a motor at the mine, smashing a finger on his right hand.

NEW CHEVROLETS

The East Side Garage received a carload of New Chevrolts this week. "Bueck" gave a demonstration of the chevrolts last week, now he can't supply the demand.

INTERESTING NOTES

Two dry dock sections, each 80 by 116 feet, were recently towed from New York to New Orleans for installation.

In its 75 years of existence the American Bible Society has distributed 76 million bibles.

It is proposed to enclose a new railroad across the Sahara desert in a steel tube to keep out drifting sand.

Ten large ships are taking tourists around the world cruises this year.

Beggars in Hungary must register and prove that they are unable to work, besides if they are successful they must pay an income tax.

A statue of Christ, 125 feet high, is being erected to overlook the city and harbor of Rio Janeiro.

The University of Toronto has been working on no less than 315 research problems during the past year.

A natural deposit of helium has been discovered in Colorado, which will aid in developing airships of the dirigible type.

RANGE FOR SALE

The Board of education of the Patagonia Union High School District will sell at auction at the CORNER STORE, on Thursday July 25th at two o'clock one range in first class condition.

J. R. COLLIE, Clerk.

BASKET PICNIC ALL INVITED

Through the courtesy of Mr. and Mrs. E. E. Bethel the Knights of Pythias, will hold a state wide picnic at the beautiful Bethel grove on the Sonoita river, Sunday July 21st. Lodge members and their families from Phoenix, Tucson, Douglas and Nogales, and other Arizona Cities will attend.

The Knights of Pythias have cordially invited the citizens of Patagonia to join them in a basket picnic Sunday July 21st.

INSPECT THE COMPANIES MINES.

A. F. Kearney, Pres. and Judge J. H. McNiven Sec. Tres. of the Arid Mines Development Co., inspected the companies mines, near camp Petaque and on Cave Creek in the west Huachuca Mountains the first of the week. They found good ore in the Argentine Mine still showing fine and going down.

The judge has returned to his home in St. Paul, Minn., but Mr. Kearney will remain at the mine for some time and assist in the development work now being energetically pushed on the properties.

PARTY AT STEVEN'S RANCH

The party given at the Steven's home last Tuesday evening was well attended by the young people as well as several grown-ups. It was well planned on the impulse of the moment, because the "bunch craved excitement," but was met with as much if not more enthusiasm as though it had been well planned beforehand. Card playing and phonograph music furnished the pastime for the evening, and refreshments of punch and ice cream were served. After an enjoyable evening of fun, the crowd departed for their homes about eleven-thirty.

WEEKLY SINGING

The weekly singing and orchestra practice was held at the home of Mrs. H. B. Riggs last Thursday night. The evening was spent singing songs, both religious and popular, and playing the piano. At nine-thirty refreshments of cake and lemonade were served. A large crowd, twenty-seven to be exact, was present and spent an enjoyable evening. These meetings are held once a week at the homes of the Mesdames May, Fortune, and Riggs and have increased in size each time, which we might say is a compliment for the hostesses.

TO NOGALES

A crowd of six young people, Martha Hamilton, Leta Mead, Sarah Pierce, Jack Pierce, Carlton Floyd, and Ralph Riggs, motored to Nogales Tuesday evening for the show.

THE SPIRIT OF PATAGONIA

Of course we are all acquainted with "The Spirit of Patagonia", by this time; the Ford without a top, only half a windshield with red wheels, with white and blue signs and paintings all over it, and with a spare tire on the right running board. It's a great car, and both the boys and the girls have had their share of fun in it. It is "on the go" from early morning till late at night, but with the exception of a flat, "running out of gas and water", and a knock now and then, it never wavers in looks or strength. It has known both sad and glad experiences which we feel the young people will not soon forget. Hurrah for "The Spirit of Patagonia"!

TEMPE COW MAKES HIGH PRODUCTION RECORD

TEMPE, ARIZONA, July 18.—V. L. Wildermuth of Tempe, Ariz. has recently completed the third official production test on Dolly Rosebud Majesty one of his fine purebred Jersey cows, with the result that her total yield for 344 days was 566.23 lbs. of butterfat and 9,937 lbs. of milk. This splendid record was made on two milkings a day and Rosebud Majesty was with calf 267 days during the test. She was started on this test at the age of 9 years and 1 month and for six months she yielded above 50 lbs. of butterfat per month, her highest monthly production of butterfat being 66.43 lbs.

Two previous 305-day official test records have been completed by this fine producer one of 424.53 lbs. of butterfat and the other of 395.08 lbs. of butterfat. Mr. Wildermuth has been doing production testing in his herd of fine purebred Jerseys for some time and at the present has 11 cows on test.

The Week-ender

SAN RAFAEL VALLEY NOTES

Mr. and Mrs. Sam White from Elgin were visiting in the San Rafael Valley Friday.

Tom Heady, and wife from the San Rafael Ranch were visitors to Patagonia on the Valley Saturday.

Mrs. Clyde Shields from Douglas was in the Valley last Saturday.

Mrs. B. Baldwin, and Mrs. Clyde McPherson were in Patagonia Thursday.

J. Kent Fryer, accompanied with his mother, went to Tucson last week to visit with Mrs. Fryer's daughter Mrs. Allison.

VAUGHN NOTES

N. L. Horton, is putting a well on his newly acquired Vaughn ranch, drilling being done by Harry Richmond, of Sonoita.

Frank Richard, was a Nogales visitor Wednesday.

W. H. Anderson is planting quite an acreage of beans this year.

A guest at the Overbrook Guest Ranch has been receiving the attention of the doctor from Fort Huachuca, Major O'Connor, this week.

Mrs. James Kane of Wilcox has been visiting her mother, Mrs. James Parker.

W. H. Anderson, is taking his annual vacation from the crew of the state highway. It's the first vacation on pay, and he appreciates it.

Mr. Mc Daniels has been seriously ill at the Woods Ranch the past week.

James Fraizer, is building a barn and garage on his sleepy hollow ranch.

About 20 people gathered at the adobe church on the hill for the "polish up" day. The seats floors and all the interior was painted, thus making a great improvement on the inside of the building. A bountiful lunch was served at noon, which kept up the reputation of Vaughn and vicinity, for generosity.

Frank Jolly motored to the county seat this week.

July 11th one of the heaviest rains of the season visited Vaughn section. From two o'clock in the afternoon till daylight the next day 23.4 inches of rain fell, which was the heaviest fall of rain in years.

T. W. Yeong intends putting down a well on his forest allment.

Cigarette butts carelessly cast aside or thrown from automobiles, campfires made improperly or left smoldering, matches dropped in the grass—these are the causes of irreparable damage and costly fire fighting.

The sole test for any law is whether it protects society and punished or reforms the criminal.

"It would be a great mistake to suppose that we can continue our national prosperity with the attendant blessings which it confers upon the people unless we continue to insist upon constructive economy in government."—Calvin Coolidge.

KINO MINE LOOKS GOOD

Patagonian's dream of many years—a big mine in the eastern part of the county—is about to be realized, according to reports leaking out concerning the diamond drilling at the Kino Copper company's mine about fourteen miles northeast of the city.

Although the Nogales International has had no interview with the drillers, this paper learns through good authority that the diamond drill has been in ore since the start of the drilling operations and much of the ore runs high.

The drillers are trying to establish the fact that the Kino has a large body of commercial ore. There is an unconfirmed report that one of the drillers made the statement that "every indication points to the Kino being a second Ajo or a second Cananea." The Kino is in the same range of mountains as the Cananea.

The diamond drill is now down 400 feet in the first hole. Many holes will be drilled, it is said, to determine the extent of the ore body in Red Mountain where the work is under way.

Walter Quinn owns all the drilling machinery on the property and has the contract to do the drilling. N. H. Jensen of Salt Lake City has a lease, bond, and option to purchase 30 of the Kino Copper Company's 127 claims. Jensen has been an engineer for the Anaconda Copper Company for many years. The Anaconda is one of the world's greatest mining companies. All the Kino's assays are being sent to Salt Lake City.

With exception of the 3R sine time ago, this is the first diamond drilling ever done at a mining property in the eastern part of the county. Immediately after the diamond drilling at the 3R that property was sold to the Magna Copper Company.

On account of the reported excellent showing made by the diamond drill, there is some activity in Kino stock. Only a limited amount of the stock is still for sale at \$1 a share.

Holders of Kino stock may be come wealthy if the diamond drilling proves the Kino a real mine, a second Ajo, or a second Cananea. Just prior to a big body of commercial ore being struck by the Greene Cananea Copper Company a few years ago stock in that company sold for a few dollars a share. The strike caused it to go up to more than \$170 a share. The same has been true in other mining stocks.

Less than 400,000 shares have been issued so far by the Kino Company. Among the largest stockholders are Col. Woodson Hoeker, formerly commanding officer of the 25th Infantry; Louis Hudgin, Col. Allen T. Bird, W. F. Overton, J. W. Macfarlane, W. J. Mitchell and T. L. Shannon.

The Kino mine where the diamond drilling is under way is near the Twin Bells, Gladstone and Proto mines and not far from the Duquesne and 3R mines.—International.

In 1931 a world's fair will be held in Peking, China, in celebration of the republic's 20th anniversary.

Paris is considering the building of underground streets for automobiles in order to relieve traffic congestion.

About 47,000 tons of rubby were shipped from Sumatra last year.

The record price of \$400 a carat was paid for a diamond weighing 33 carats recently found in South Africa.

DELINQUENT TAXES

The following is a list of Taxes due and unpaid as shown by the Records of the County Treasurers office in Santa Cruz County, Arizona.

From the year 1913, to 1929, the total delinquencies is: \$178,709.43.

The above amounts are taken from records of the Treasurer's office now being compiled for the purpose of complying with the New Tax Laws (House Bill No. 127) passed by the last Legislature and now in force and effect.

The amounts here set forth are upon Real Estate and Improvements all of which will be listed, advertised and tax certificates sold upon the same during the month of September 1929, under a ruling of the Attorney General of the State of Arizona as follows, viz:

"The first sales of property for delinquent taxes under the provisions of House Bill 127 will include all property on which taxes are delinquent, although the taxes are more than five years delinquent."

Persons owing delinquent taxes should visit the Treasurers office and adjust the same at their earliest convenience in order to avoid the extra penalties that will attach should their property go to a sale.

The provisions as set forth in the Law are mandatory upon the Treasurer with heavy penalties for non-compliance; It is the intention of the Treasurer of Santa Cruz County to comply strictly with the Law in all cases without exception.

The Treasurers Office has noted many cases of delinquent tax in which the properties have been transferred and in many cases we are of the opinion that present owners are unaware of the States lien against their property. Persons not having clear abstracts of their properties will avoid future trouble by making a check of same, before they go to sale.

SNAPPY STUFF

Peter Ramoski of Philadelphia saved \$80 by having on two pairs of trousers when he was held up, by the bandit searched only the outside pair.

Mrs. Alice Sparks of El Paso asked that her marriage to Phil Mahoun be annulled, saying: "We were on a party and I just forgot I was already married."

Barking of their dog awakened the family of P. J. Wolden of Winnetka, Ill., enabling them to escape from their blazing home.

Testifying in court, G. V. Morehead of Chicago said: "I deny emphatically that I was drunk; why, I had only 14 drinks."

Bees ran J. W. Redman's family out of their home in Toledo, Ohio, and firemen had to clear the house with smoke bombs.

After 27 years of blindness, Miss Lavada Amos of Augusta was caused to see after an operation.

Citizens of Bourbon, Ind. have erected a monument to the old town pump which for years supplied them before the advent of waterworks.

Father Gillis of Burlington, Vt., announces that "women wearing short-sleeved or low-necked dresses are forbidden to enter this church."

INCREASED PAYROLLS REFLECT IMPORTANCE OF MINING INDUSTRY

A million dollars a month has been added to Arizona payrolls in comparison with last summer as a result of increased activity and higher wage levels in mining districts of the state, according to estimates compiled by the Industrial Congress as of July 1.

Latest data available indicates that large mines and smelters of the state are now employing approximately 19,200 men, as compared with 14,500 a year ago. Present wage schedules, based on the price of copper, are 15 per cent above those prevailing prior to October 1. This increase coupled with the increase in working forces has brought the mining industry's payrolls to an estimated monthly total of \$3,000,000 at the present rate, as against around \$2,000,000 as of June, 1928.

The figures given do not cover scores of other mining properties producing on a small scale or under development. Latest reports of the state mine inspector's office indicate that these smaller properties employ an additional 2,500 men, with an aggregate payroll of approximately \$375,000 a month. On this basis, there are more than 21,500 men employed in all branches of the mining industry in Arizona at the present time.

Metal production in the state this year also appears to be maintaining materially higher levels than a year ago. Best estimates obtainable from unofficial sources indicate that the present rate of copper production is around 75,000,000 pounds a month, while last year Arizona production averaged 61,356,933 a month. Gold and silver production are reported as showing corresponding increases, while lead output seems to be little changed.

The figures cited aptly illustrate the economic importance of the mining industry in Arizona, which in number of men employed and value of output is the largest in the state. With their large payrolls and great annual expenditures for supplies, the mines have the largest single purchasing power in the state, and the increases shown over last year obviously will be of marked benefit to all producing and distributing industries. The mining industry also pays nearly half of the state's taxes, and is therefore of indirect benefit to every resident.

ARIZONA WEEKLY INDUSTRIAL REVIEW

Patagonia—Gross Mining & Investment Company recently incorporated under laws of Arizona to operate in American Boy Mine property.

Patagonia—Development of mining properties increased in this district recently.

St. Johns—St. Johns Drug Company and Anderson Mercantile Company painted front of store buildings.

McNary—Cady Lumby Corporation established headquarters in this place.

Globe—Finletter-Harvey Mining property located nine miles south of here will start producing ore for shipment soon.

Globe—Martin Theatre installed Vintaphone equipment.

Winslow—Bids will be opened for paving of East Secos and Third streets.

Nogales—New water pump installed and repaired. City and pumpin lines between plant seven miles.

Winslow—The Globe—Martin Theatre installed Vintaphone equipment.

Miami—Copp installed equipment \$2,000.

Safford—Palmer remodeling of Globe—New North Broad Street improvements made to Miami—Iron story on building.

Globe—Bernal stalled new fixture.

Two bridges at creeks near Kino on Miami—Miami—Magn build new hospital.

Globe—Home enlarged and redecorated recently.

Nogales—\$20,000 armory building to be erected near high school gymnasium for home of Company A of Arizona National Guard.

Miami—Miami Valley Bank installed new equipment.

Nogales—\$26,000 improvements will be made to storm and sanitary sewerage system in this city.

Chloride—Monarch Lead Company installing flotation mill.

Yuma—Emporium Store building enlarged and remodeled.

A passenger service to be established soon between Phoenix and northern Arizona cities, according to C. W. Brophy, head of Arizona Flying Service.

Snowflake—Streets to be repaired in this place.

Chandler—Official opening and dedication of new building of Chandler Municipal Airport held recently.

Jerome—"Ladies' Sample Shoppe" opened for business on Main Street.

THE LIVESTOCK SITUATION

Los Angeles, July 18.—The lure of the city, with its apparent opportunities, conveniences and entertainment has always proven to be a serious problem to the farmer and stock men, about as far back as time goes. But it looks as though the modern school system has gone a long way towards solving that problem. It is getting to be an easier matter to keep the young folks on the farm or ranch, because the farm has been made much more attractive, both in a financial way and in more pleasant surroundings.

Credit for the changing condition of affairs must be given, in large measure, to our agricultural colleges and the vocational agricultural departments which now constitute an important part of every high school in agricultural or semi-agricultural districts. Competent instructors, aided by far sighted farmers and stockmen, are now teaching the young folks ways and means of making farming and stockraising interesting and profitable.

The students have the benefit of the very best "book learning" and the opportunity of studying the best flocks and herds of pure bred live stock as well. Many of the students are encouraged to raise a few animals of their own, being financed either directly by their parents or through their local bankers. The start of some very profitable herds has been made by many students as a direct result of foundation animals purchased while high school students. Practical breeds of dairy and beef cattle, swine and sheep are purchased and the youngsters are encouraged in their work to such an extent that many students have a good paying proposition during their school years. Their practical work is a part of the school course. Needless to say, the young fellow who gets the right kind of a start so that he is making good money while still in school will make the best kind of a farmer, because he is engaged in something both interesting and profitable.

Live stock judging contests are held regularly. The element of rivalry between each other and between different schools is encouraged and the school live stock judging team which wins honors at the sectional, state and national contests shares publicity honors with the boys who make the football team, the baseball nine or other school activities. In these contests, as at all other times, the boys are constantly thrown into contact with highly bred stock in a practical way, so that when they become live stock breeders themselves, the best bred stock is raised by them, as a matter of course.

The vocational department of the schools also give practical training in other activities that come in very handy on the farm. They are taught to repair their own automobiles, pumps, radios and farm machinery. They know how to weld a broken axle. They learn the elements of carpenter work so that little odd jobs around the farm can be done by themselves, without the necessity of hiring expensive labor.

With this practical training and the higher education in the regular school course, we are raising a crop of better farmers for this country. Now that the farm home has its own radio, as well as other means of entertainment, automobiles, running water, electric power and the thousand and one other conveniences, there is real attraction in living on the farm. The farm boy of today isn't the "hayseed" of earlier generations. He is well educated, polished and is being trained in work which is profitable, for farming and stock raising from the very basis of our national prosperity.

We're learning to keep the boys and girls on the farm. It is interesting to note that 82 percent of the boys who have graduated from the agricultural departments of the high schools operating under the Smith-Hughes Act have stayed on the farm and are now engaged in farming or stock raising.

SIDELIGHTS

By Marcy B. Darnall
Many novel excuses have been offered by citizens who try to evade jury duty, but an Iowa man recently advanced one which is probably unique. He declared that inasmuch as his wife had been drawn on the jury he could not serve, because no agreement would be possible.

Getting the wrong number on the telephone was particularly unfortunate for George Reed of Pontiac, Mich. He was trying to call up a customer for bottle whiskey and got an enforcement officer instead; also got arrested.

College graduates seeking "white collar" jobs at \$25 or so a week may be interested in this: After a strike, 5,000 St. Louis iron workers returned to work at \$13 a day, with the promise of a raise to \$14 a day next year.

This story is vouched for by F. L. Stoddard, a well-known New York artist: Seeing a sick cat kneel over in the street and in imminent danger of being crushed by a truck, a big dog dashed to the rescue, took the cat in its teeth and carried it to the sidewalk and safely.

SAN CARLOS PROJECT

The San Carlos Irrigation project in Pinal county contains fifty thousand acres for general settlement.

The reservoir formed by the Coolidge dam across the Upper Gila river supplies gravity water for this project. Congress in 1924 authorized the expenditure of five and one-half million dollars for the construction of the dam and the irrigation works connected with it. The dam has a maximum height of 260 feet, a crest length of 560 feet over three domes and two buttresses, and a spillway 150 feet wide at each end. It has storage capacity of approximately 1,200,000 acre-feet, or sufficient water to cover the 100,000 acres to be irrigated to a depth of twelve feet, which is four times the water required for one year's irrigation. The reservoir when full will extend up the Gila and San Carlos rivers for about twenty miles.

The government has determined definitely the land area which will be irrigated by water from Coolidge dam. This is termed "designated land." It is important that the purchaser know whether the land he considers buying is within this designated area.

The land in the project lies at an altitude of 1300 to 1500 feet above sea level. The growing season is about nine months, June, July, August and September are warm during the day. However, the humidity is very low, so that the heat is not oppressive, and there is no cessation of activity on this account. The rainfall, which varies from year to year, is usually less than ten inches per annum. The soil is sandy, silt, easy to handle free from excessive alkali, and heavily productive. Good water for domestic use can be pumped from depths of from 25 to 100 feet.

AVIATION IN THE WEST

Aviation, in the decade since the war, has developed with amazing rapidity from a war weapon to a peace toy—from a toy to a specialized use in transportation—from this specialized use to what? No prophet is needed to foretell at least partially the future of aviation. It is pain to the most unobservant that the age of the air is at hand.

The west probably offers more to aviation than any other section, for here the meteorological, climatic and geographical conditions favor constant flying. The attitude of western people is particularly receptive to aviation activity both in actual flying and in manufacturing.

In addition to favorable weather the west is particularly fortunate in possessing excellent and unlimited facilities for airports. Out of approximately 1,500 airports throughout the United States the states of California, Arizona, Nevada and New Mexico possess 957.

Aviation schools are increasing everywhere, and it is safe to predict that the west is destined to become one of the foremost centers for flight training in the world. In number of licensed pilots in the United States the State of California comes first with 660 or 17% of the total.

Considered from all angles the communities of the West have natural advantages for aviation which give them every reason to progress more rapidly in this growing industry than any other section of our country.

THE "DUDE RANCHES" OF THE WEST

Probably one of the most unique attractions of the West is the "Dude Ranches". A "Dude Ranch" is usually a typical old cattleranch where one may find the friendly hospitality for which the "old west" was famous and where one may do just the things he pleases and nothing else.

If quiet and rest and spacious solitude is desired, here one can be sure of it. The visitor may sun himself on the wide veranda of the ranch house or beside his own private cabin. Or, if he feels so inclined, he may put a lunch in his saddlebags and spend the day alone with Nature—riding and loafing under the truquois sky enjoying to the full the wild and gorgeous mountains, the fertile plains and the desert regions.

Something of the thrill which the explorer experiences is yet to be had in the canyons and caverns almost unknown to white men. For example the recently discovered Carlsbad Caverns with their unearthly beauty have not yet been probed to the uttermost recesses. They are an example of architecture surpassing the greatest of man-made cathedrals. There are pools filled with "carlsbad pearls" which give one the impression of actually standing in Aladdin's cave, and the strange lacy stone curtains, shining pillars, and other formations of stalactites and stalagmites help to make fairyland real.

Perhaps the great distances of the western country constitute its fascination for in that respect it has to offer what cannot be found in the crowded sections of the East. The "Dude Ranches" are indeed spots where much of the real old west may be found.

ABOUT WOMEN
Misses Jean Mark and Fannie Lee are the first two Chinese girls in Canada to graduate in physical education, having received their training in the Margaret Eaton school of Toronto.

Mrs. Ofelia Ellen Keelan of Charleston, S. C., is the first American to win the highest award of the British Academy of Arts in Rome during the Academy's existence of more than 100 years.

Mrs. George R. Van Nance of New York, who began as a salesgirl at \$5 a week, now owns several florists shops, for which she has signed leases amounting to more than \$5,000,000.

Mrs. S. L. Tuthill, 82, of Salisbury, Mills, N. Y., claims an invention whereby she can determine the sex of a chicken which an egg will produce before it is incubated.

Miss Elizabeth Pomerene of Cleveland has received the degree of bachelor and master of arts and doctor of philosophy from Western Reserve University at the age of 21.

Mrs. Mary A. Foulds is still in active charge of the Pennsylvania hotel at Treverton, Pa., which she has operated for more than 50 years.

As Miss Ruth Cragin of Middleborough, Eng., approached the altar to be married to Charles Matthews she was informed that he already had a wife.

BOYS AND GIRLS
Prince Sukhavasti of Siam, a young student at Chestnut Hill Academy, Philadelphia, won the highest scholastic honors for the school year recently closed.

Charles Henry Nordrup, Jr., aged 5, of Limerock, R. I., was declared a 100 per cent physical specimen by a board of physicians.

Beta Balasy, a 7-year-old Hungarian girl, has won fame as a chess player and is hailed as a coming champion.

James Armstrong, 12, of Auburn, Neb., heroically rescued William Rarick, 10, from drowning in the Nemaha river.

Joe Miske, 10, of Milwaukee, is one of the best bowlers in that city and competes successfully with adult devotees of the sport.

Charles Broganzi, 13, killed a 20-foot Anaconda snake in his home in Valencia, Venezuela.

WHAT'S NEW?
Corrosion of steel may be prevented by a coating of silver white metal called cadmium.

Russian scientists have developed a process whereby tannic acid, used in tanning leather, is extracted from spoiled eggs.

No less than 48 useful products are now made from furfural, derived from the hulls of oats.

A new U. S. Army 14-inch gun with a railway mount weighs 365 tons.

WANT A MINE?

The Santa Cruz Batholith of Arizona contains a mine for every purpose, and for every purse. There must be those who would buy a mine if they knew where they could get one. Are you one of those? If so write me specifying the price, terms and other conditions you prefer and learn how near I can come to fitting you out! Anything from a single claim to a big consolidation that would run into figures. Batholithic characteristics are: wide veins, continuous veins, big lodes that run into vast tonnage below, bellies of rich ore, and here, fine tunnel sites with depths of 1200 feet up. My immediate neighborhood has shipped \$2,000,000, this county about \$25,000,000 while within about fifty miles from my house the production has been more than a billion dollars. The richest mineral land in the world.

MINE FOR SALE

Word is being spread around, that this country is so prosperous that it does not know what to do with its money. It has also been rumored that there are brave men who want very encouraging, and this ad is written in the hope that they are true.

As any old timer in this country can tell you, I have been developing a group of claims and am still at it. But the developing of the best mine in the world takes money, and it seems to me that the better the mine the more money it takes to get it to the producing stage. Probably every resident of this country knows that the government requires work on or for every claim, and this results in a great deal of work being scattered around where it counts but slowly toward the betterment of the mine.

In order to cut down my annual annual expenditure, which is fixed by law at \$100 a claim, and if possible to get a few dollars to spend on the rest, I will sell to an operator a group at either end of my ground. You can understand why I do not want to sell out a claim or two in the middle of the group, but in view of my needs you may be sure that you will get a wonderful bargain in anything that you buy from me NOW. It costs money to run this ad, and I will appreciate it if any person who wants to buy a mine will be frank about what he wants. It is too late to say which of my claims is the best, and any one of them might turn out bonanza; personally I believe they will. You can have one claim or two, and if that is not enough, I add any number desired although I would rather sell a small group and keep the rest. But if you have not enough claims to satisfy an operator I have arrangements already made by which I can turn in for a big operation, my neighbors claims with mine. It would pay some one to buy them all for BIG BUSINESS, but they have not waked up.

These claims all have ore; the ore always carries silver, and a little gold; they will get pay for lead, and less copper. The idea of the author-ities is that the lead while good near the surface, will get less while the copper gets more with depth. Shipments have been made from any group I have to sell, and these run from 12 to 250 ounces of silver, from 5 to 60 percent lead and from 2 to 20 percent copper. And there is plenty more of it. I may add for your information, that I have about 200,000 tons of ore in sight on my whole group, that will average about

\$12.00 per ton, and my earnest ambition is to add to that until some capitalist wakes up. Don't be deceived by cow-boy talk; most of them pose in their idle moments as mining "experts," but the really do not know what they are talking about. This country is full of good mines in and adjoining the Santa

Cruz Batholith, and it wont be long till the world knows it.

Come and see me if you want to mine with success.

JOSIAH BOND, Alto, Arizona.

ARIZONA MINE VALUATIONS ARE INCREASED BY \$8,500,000

Tentative valuations on producing mining properties in the state of Arizona for 1929 taxation purposes have been placed at \$281,913,500, or approximately \$8,500,000 greater than the final valuations set for such properties last year, according to a statement issued by the Arizona tax commission. These figures are subject to change when the tax commission sits as the board of tax equalization during the first week in August.

The largest increase in valuations as tentatively fixed is for the United Verde Copper Company at Jerome. An in-

increase of \$3,880,000 has been made over the final valuation of last year, which was \$36,120,000. The next largest increase was for the New Cornelia mines, Calumet and Arizona Mining Company. This figure is \$34,000,000, as compared with \$32,000,000 for last year. The largest decrease was made in the valuation of the Copper Queen Branch, Phelps Dodge Corporation. The property was valued last year at \$32,000,000, and this year at \$30,000,000.

Others figures are as follows: Inspiration Cons. Copper Co. Last Year \$33,500,000, This Year \$35,000,000.
Magna Copper Co. Last Year: \$16,000,000, This Year \$17,000,000.
Nevada Cons. Copper Co. Last Year \$25,000,000, This Year \$26,000,000.
Morenci Branch, Phelps Dodge. Last Year \$22,300,000, This Year \$23,000,000.
Miami Copper Co. Last Year: \$17,500,000, This Year \$18,000,000.
Shattuck Denn Mining Corp. Last Year \$4,750,000, This Year \$5,000,000.
United Verde Extension Mining Co. Last Year \$17,300,000, This Year \$17,500,000.

Yuma—Contract awarded for construction of \$10,000 storage plant for Bomberger Seed Company.
Gila Bend—\$1,000,000 improvements to be made in development of \$35,000 acres land on Gila River near here by Gillespie Land & Irrigation Company.
Tucson—Photo Engraving Company, with capitalization of \$50,000, granted incorporation papers.
Holbrook—J. C. Penney Company to open store here on September 1st.
Kingman—Star Dairy moved to new location east of here and installed new equipment.
King George of England by a remark to one of his nurses recently revealed that he does not take himself too seriously. He said, "Betsy, a king is, after all, just a very ordinary kind of man, but one who has to live in a very extraordinary kind of way that sometimes seems to have little sense to it."
Mrs. Susan Cook of Butler county, Pennsylvania, still takes a lively interest in what is going on, although she is 103. Asked her opinion of the modern flapper, she said: "Girls of 1846 had just as much fun as the girls of 1929."

LEGAL NOTICE

KNOW ALL MEN BY THESE PRESENTS, that we, the undersigned, having associated ourselves together for the purpose of forming a corporation under and by virtue of the laws of Arizona, hereby adopt the following Articles of Incorporation:

ARTICLE I—The name of the corporation shall be "The Cross Mining and Investment Company" and its principal place of business shall be on the property known as the American Boy Mine in Santa Cruz County, Arizona, but other offices may be established and maintained within or outside of Arizona, at such places as the Board of Directors may designate, of where meetings of stockholders and directors may be held.

ARTICLE II—The general nature of the business proposed to be transacted

is to purchase, subscribe for, acquire, own, hold, sell, exchange, assign, transfer, mortgage, pledge or otherwise dispose of shares or voting trust certificates for shares of the capital stock, or any bonds, notes, securities or evidence of indebtedness created by any other corporation, or corporations, organized under the laws of this state or any other state or district or country, nation or government, and also bonds or evidences of indebtedness of the United States or of any state, district, territory, dependency, or country or subdivision or municipality thereof; to issue in exchange therefor shares of the capital stock, bonds, notes or other obligations of the corporation, and while the owner thereof to exercise all the rights, powers and privileges of ownership, including the right to vote on any shares of stock or voting trust certificates so owned; to do any acts and things permitted by law

and designed to protect, preserve, improve or enhance the value of any such bonds, stocks, or other securities or evidences of indebtedness or the property of this corporation; to own, hold, develop, explore and operate any mine, or prospective mine, and to sell, lease, mortgage, or otherwise alien the same; to own and operate in connection therewith smelters and other plants for the reduction and refining of ore, metals, and to sell, lease, mortgage, or otherwise alien the same; to acquire, own, operate, sell, lease mortgage or otherwise alien in connection therewith any and all means and instrumentalities of transportation so far as the same may from time to time be permitted under the statutes of the State of Arizona, to issue bonds, notes, debentures, and other evidences of indebtedness and secure the payment of the same by mortgage, deed of trust or otherwise; and in general to

do and perform such acts and things and transact such business in connection with the foregoing objects, not inconsistent with law, in any part of the world, as the Board of Directors may deem to be the advantage of the corporation.

ARTICLE III—The capital stock of the corporation shall be 800,000 shares without par or face value, each of which said shares shall be equal to every other. All or any portion of the capital stock may be issued in payment for real or personal property, services, or any other right or thing of value, for the uses and purposes of the corporation, and when so issued shall become and be, full-paid, the same as though paid for in cash at the price fixed; and the directors shall be sole judges of the value of any property, right or thing acquired in exchange for capital stock. No shares of capital stock shall be issued until fully paid for and thereafter shall be non-

By ELMO SCOTT WATSON

WAY back in the Seventeenth century to the Cardinal Mazarin was entrusted the task of preparing a young prince for his future career as king of France, that career which was to make Louis Quatorze (Louis XIV) forever famous as the "Sun King" and "Le Grand Monarque." Mazarin found that his royal pupil was not nearly so much interested in the studies which should fit him for his high position as he was in other activities, which later were to make the French court notorious and which were to lead eventually to the downfall of the House of Bourbon.

One of the young prince's favorite diversions was to "play at cards" and the cardinal decided that he might as well take advantage of that interest by introducing an educational element into the pastime. So he ordered a maker of playing cards to devise some cards from which the prince could learn such things as geography and history while he was playing the game. Soon there was delivered to the cardinal two sets of cards, one was a historical set and bore the pictures of famous queens and the stories of their careers. The other was a geographical game, each card representing some country with a short description of that land and illustrated with a symbolic figure, dressed in the native costume.

Among the countries depicted thus were certain parts of North America, two of which, Virginia and Florida, are shown in the illustrations (No. 7 and 8) accompanying this article. Naturally, the symbolic figures of these two are Indian maidens, but it is interesting to note that the "native costume," as shown on these cards printed back in 1664, is not so different perhaps—at least, in one case—from those of today. Take a look at "Florida" above and, except for the bow and arrow, you might almost think that you were looking at the picture of a bathing beauty at Palm Beach, Miami or some other seaside resort!

It is perhaps futile to speculate upon how much the young prince learned from these educational cards and it might be jumping at conclusions too hastily to ascribe to them the awakening of his interest in foreign countries which made him an imperialist and led to France's colonizing experiments in the New world. But the fact remains that "of all the French monarchs of the Seventeenth century Louis XIV was the first and only one to take an active and enduring interest in the great crusade to the northern wilderness. He began his personal reign about 1660 with a genuine display of zeal for the establishment of a colony which would by its rapid growth and prosperity soon crowd the English off the new continent . . .

and this zeal kept on to the end of his reign."

Although these cards of the French king, which are preserved in the museum of the United States Playing Card company in Cincinnati, Ohio, were perhaps the first thus used to inform Europeans about the New world, they were not the only ones. In the same museum is another set which "deals out" some American history to the visitor. It is a geographical card game made in England in 1675. (No. 1 and No. 3 in the illustrations above.) On one of them (No. 1) is given the following quaint description of New England:

New-England by some is Counted a Part of the Great Region Canada. It is bounded with Virginia on the South, where is the Late Conquests of the New-Netherlands, at present Called New-York, with a good City of that Name here is Maryland where is the town of Baltimore and Carolina where is Charles-Towne but the Capital of this government is Boston and other Considerable Towns are New-Plymouth, Bristow, Barnstable &c. The Church government is Presbytery &c. this Country abounds with all sort of Panatikes where they may find Room to Plant in. Especially towards the West It being a Country not well discovered full of Woods & Savage Inhabitants therefore not bounded when their Forces have Strength to advance. Other Plantations belonging to the English toward the North are New-Foundland whose Chief Town is Torbay most Considerable for the Fishing Trade North Wales South Wales, the Isle of Cumberland &c. are great Regions Inhabited to the English but are little inhabited as yet.

In a country "abounding with all sorts of Panatikes" one would naturally expect to find the "blue-noses" frowning upon such frivolous things as playing cards, but the fact is that they were manufactured in this country, even in Puritanical New England. Isiah Thomas, in his "History of Printing in America," mentions James Franklin as a Boston printer and tells how he printed "upon cards" verses that the youthful Benjamin had written about Black Beard, the pirate. Ben himself, afterward, refers to them as "miserable ditties" but at that time they had a large sale.

No less interesting than the historical material to be found on the faces of the playing cards is that found upon the backs of the cards. In the Colonial days it was the custom to use the plain backs of the cards for various things. In the Cincinnati museum are cards with the backs printed and used as cards of admission to entertainments, lectures and classes at the University of Pennsylvania, from 1765 to 1771, and as invitations to teas and assemblies and balls. Some also bear directions for figures of square dances and others various patriotic games. One of the most interesting is that shown in No. 2. It is a silhouette portrait of Joseph Hopkinson by the famous artist, Charles Wilson Peale.

In 1824, when Lafayette came back to visit the country whose independence he had helped to gain, a New England card maker, Jaz H. Ford, issued a set of playing cards in honor of the distinguished Frenchman whose portrait, surrounded by symbolic designs, was printed as the ace of spades, as shown in No. 4.

Among the interesting exhibits in the museum are the playing cards of the Civil war period in which the patriotic motif is strong. Instead of having the usual suit signs of spades, clubs, diamonds and hearts, flags, shields and other patriotic emblems were used. An example of this is No. 6 of the illustration above in which the bewhiskered general is the "king" of whatever suit is designated by the flag up in the corner. The "queen" of the flag suit was the symbolic figure of Columbia. Another card of this same era is shown in No. 5, in which the figure of the Monitor, famous for its victory over the Merrimac, was substituted for one of the conventional suit symbols.

Virginia
Conquerte d'armes et arrosee de nuages, mais peu habitee, s'estend depuis le Cap S. Johns jusqu'à l'horizon le long de la mer du Nord. En suite est l'horizon, fertile, depuis Virginie Jusqu'à la nouvelle France.

Florida
Fertile et de grande estendue, a une longue pointe dans le Sud. Maxican et congne a la Mexique vers l'Occident, et a la Virginie au Nord. Ses peuples sont vaillans et cruels.

Hog Sanitation Is Meeting With Favor

Many Indiana Farmers Saving Eight Pigs Per Sow.

(Prepared by the United States Department of Agriculture.)

Attention to swine sanitation is changing hog production on many farms in Indiana from a losing to a profitable enterprise. A report received by the United States Department of Agriculture from Dr. J. E. Gibson, federal inspector in charge of hog-cholera-control work in Indiana, credits the swine-sanitation system developed by the bureau of animal industry with many practical benefits.

"Our reports," he says, "indicate that heretofore the average number of pigs per sow has been about five and one-half, whereas farmers who are following instructions to swine sanitation are now saving more than eight pigs per sow. Cases almost without number have been found where farmers were nearly ready to quit raising hogs because they were unable to save a sufficient number of their pigs to make the business profitable. Since they have been instructed in swine sanitation and are following the instructions in whole or in part they are able to grow hogs at a profit."

Referring to the extensive use of the system in 11 counties of the state where the project has been introduced, Doctor Gibson adds that, aside from the educational work done on hog-cholera control, nothing has had such a noticeable beneficial effect on hog production.

Pullets and Hens Pay Better if Kept Apart

In order to lay the maximum number of eggs during the winter, pullets that are ready to lay must be well fed during the fall and winter months. They should be well developed and carry a surplus of fat before they are placed in winter quarters. Since these birds are ready for egg production, they should be given feed that will enable them to lay during this season of high prices. Allowing pullets free range to a good laying mash will bring them into production and make them return a profit during the winter.

After they stop laying in the fall, there is a natural tendency for hens in the old laying flock to eat much less mash than they have been eating. It, therefore, is a good plan to increase the grain allowance in order to keep them in good flesh. The hens which are to be used as breeders next spring should be given a vacation this winter so that the hatching eggs they lay will produce strong, healthy chicks.—Illinois College of Agriculture.

Beans as Poultry Feed Do Not Rank Very High

Beans do not seem to rank very high as a poultry feed. Some poultry men use hulled chick beans as a supplement to the regular ration but not as a substitute for the laying mash or scratch grain. Potatoes are not a very desirable poultry feed especially when they are high in price. Cull potatoes are sometimes hulled and mixed with a little bran and fed to the hens to supplement the regular ration. The best way to use cull brans and potatoes is to feed at noon the amount that will be readily eaten by the hens. Keep the laying mash before them so they will eat plenty of egg-making material. Feed the regular scratch grain ration morning and night. The use of the beans and potatoes will reduce the amount of mash the hens will eat but will not cut down mash consumption enough to seriously curtail egg production.

Prevent Diseases

According to the United States Department of Agriculture, no sure remedies are known for contagious abortion in cattle, hog cholera, influenza of hogs, horses, and other animals; tuberculosis of cattle and poultry; distemper of dogs, cats and foxes; heaves of horses; bacillary white diarrhea, fowl cholera, roup or diphtheria, and chicken pox of chickens, and black-head of turkeys. These diseases must be conquered by methods of prevention.

Agricultural Squibs

- Give rhubarb a good mulch to make the stalks tender.
- Sweet clover hay, when properly cured, is very good for dairy cows.
- Shallow hoeing and more frequent irrigation is better for cabbage than deep and thorough cultivation.
- Sweet clover hay, in some cases, has proved almost as good as alfalfa for milk cows. A lot, however, depends on the way it is cured and the time it is cut.
- Frequently some quick growing crop must be substituted on a winter-killed clover or alfalfa field that had been set aside for hog pasture. For this purpose a mixture of oats, peas and rape often gives fine results.
- Sweet clover, red clover and a mixture of oats, peas and vetches have been made into very palatable silage with little difficulty. More trouble, however, has been experienced in making desirable silage from alfalfa.

Points of Difference Between Man and Crow

James Speyer, the philanthropist and financier—he has just given half a million to complete the building fund of the New York museum—was talking at the Manhattan club about summer vacations.

"The strenuous vacation is pleasant to remember," Mr. Speyer said, "but it isn't so pleasant while it is actually going on."

"A young chap was on a walking tour in New England. As he plodded under his heavy ruck-sack along a blazing country road on a terrible August afternoon he met a farm hand. "How far is it to Crocyden Four Corners, friend?" he panted, as he drew his sleeve across his red, wet face.

"Four miles as the crow flies, stranger," said the farm hand.

"But suppose," said the tourist, "that the crows got a blister on each heel, and a 30-pound bundle to carry, and has to walk besides—how far is it then?"

Children's handkerchiefs often look hopeless when they come to the laundry. Wash with good soap, rinse in water blued with Red Cross Ball Blue.—Adv.

Somewhat Mixed

Three stations on the same wave length resulted in the following statements on a radio at Concordia, Kan.: "The Old Testament tells us that baby chicks should detour one mile south of Salina and listen to the word of the prophets. After passing through Leavenworth, turn north at Jericho. A bond issue is being talked of in the Holy city." The radio fan discovered that one broadcaster was a minister, one a man giving condition of the road, and the other a lecturer on poultry.

OLD FOLKS SAY DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. B1, Monticello, Illinois, for free trial bottle.

Panned

Gerald Gould, the eminent London critic, was asked by a publisher the other day what he thought of the latest "best seller" novelist.

Mr. Gould answered thoughtfully: "Many a shining light is only a flash in the pan."

Costly Mistake

Blinks—How can the speed cop get you yesterday?

Jinks—I was watching the road instead of the rear-vision mirror.

College Fraternities

There were in 1927, 1,961 American college fraternity buildings. These included men's, women's, professional, local men's and local women's fraternities; in all 246 societies, with a total membership of 683,844, and with 3,429 active chapters in the United States.

A Silly Handshake

When King Edward VII was prince of Wales and on a visit to Paris he suffered from a carbuncle which forced him to lift high his right elbow when shaking hands. All the courtiers and dandies of his day immediately copied this gesture and some people today still believe they are smart when they hold their arm high in that way.

One night while he was attending

You Know the Type

Not a bad sort of nifty comes from the London Humorist, which speaks of a certain blunt, outspoken man—in fact, one who as a bridge partner calls a spade three spades.—Kansas City Star.

Takes Many to Handle Liner

The crew of a large Atlantic liner numbers about 850 members. Six hundred of this number are in the stewards' department and in the strict sense of the term are not sailors.

Monarch's Vanity

King Henry VIII, who was proud of his own broad shoulders, set the fashion in garments to accentuate this breadth. You will see this indicated in the many portraits of him by Holbein.

Colored Laces Are Combined

By JULIA BOTTOMLEY

Lace of one color combined with lace of another, is fashion's latest interpretation of the beautiful. The featuring of color contrast is an off recurring theme this season in the fabric realm, however, applied to lace, the idea takes on a "something different" aspect.

In developing the lovely gown in the picture the designer allies lustrous old rose all-over rayon lace with lace in a dregs-of-wine shade. The model would be equally as attractive in black and white or in two tones of the same color, such as navy with a lighter blue, dark gray with pale gray, beige with eggshell tint, or many other equally effective combinations.

Many clever things are being done with lace by those who have an eye for the artistic. Insets of lace or of chiffon in contrasting color are extremely decorative and inspire the designer to accomplish interesting trimming effects.

Another elaboration of the lace theme is that of hand-painting it. Sometimes the idea is carried out by tinting in the background, thus accenting the floral patterning or motif of whatever type. It's really worth while to try this, if not for an entire dress at least for a lace capelet to be worn with sleeveless frocks. These are liquid fast-color paints which can

HINTS FOR HOUSEKEEPERS

Eggs are most digestible if cooked at a temperature below the boiling point.

Sixteen-mesh is the best size screen for windows and doors because it not only keeps out flies but also mosquitoes and smaller insects.

A coarse scrubbing brush kept near the door is convenient to clean muddy shoes and better than a knife which may cut or scrape the leather.

To dry a printed silk dress, use turkish towels to absorb moisture and to prevent the color from running. Use three towels; one below the dress, one inside between the front and back, and one above, and roll up until the garment is dry enough to iron.

Some Good Things to Eat

By NELLIE MAXWELL

During hot weather frozen salads and frozen dressing for well chilled salads make a strong appeal.

There is no limit to the way this idea may be developed. A tart lemon sherbet with a tablespoonful of a table-spoonful or two of peanut butter added makes a delicious dressing for a banana or a shredded cabbage salad.

With the salad well chilled and the dressing placed on it just at the time of serving, the result will be satisfactory. The flavors are better blended if the salad is moistened with a little mayonnaise or cream dressing and topped with the icy one.

Frozen Cream Mayonnaise.—Fold one cupful of mayonnaise flavored with lemon juice into a cupful of whipped cream sweetened with one tablespoonful of powdered sugar. Pour into a mold, seal and pack in ice and salt and let set an hour before using.

Simple Fruit Salad.—Use a combi-

nation of pineapple, firm, good flavored apple, a bit of fresh or canned pear, a half dozen or more of minced marshmallows, cover with whipped cream to which a tablespoonful of any good mayonnaise dressing has been added in the proportion of one table-spoonful to a cupful of the whipped cream. Serve all well chilled.

The banana when well ripened is a deep yellow flecked with brown and no sign of green at the tips. Do not be afraid to buy bananas that are quite brown, if firm, for they are best when very ripe. Nuts and bananas supply carbohydrates and proteins, pineapple has a digestive element, apples have always been known to keep the doctor away, so with this combination one may be sure to have a healthful dish. Serve with the following dressing: Take two egg yolks, one-half cupful of sugar, one-half teaspoonful of mustard, two table-spoonfuls each of butter, lemon juice, vinegar, one of olive oil, one teaspoonful of salt, one-fourth teaspoonful of paprika and three-fourths of a cupful of whipped cream. Cook egg yolks, beaten with sugar, butter and other ingredients over water, stirring con-

stantly. Cool, add the cream and pour over the salad.

Summer for the housemother in many homes means just more work and worry. Try to make this summer one long vacation, with the children home from school with planning each to do his share, the mother, too, may have some of the joy of the good old summertime.

Salads, sandwiches, cold drinks may take the place of hearty meals during the warm weather, with the family feeling better for the simple foods. Today every boy and girl is called upon occasionally to prepare a dish for supper on Sunday night, or camping trips and they, if well practiced at home, are happy to share in such entertainment.

To be able to mix a tasty salad, or prepare a rarebit well is an accomplishment of which to be proud. Everybody likes a fruit salad and they are simplest of all to prepare.

(Prepared by the United States Department of Agriculture.)

What do you see from your kitchen as you work? And have you a restful corner near or in your kitchen where you can relax occasionally? There are times almost every day when you may have a few minutes free, not enough to go all the way to another part of the house, but well worth using, if possible, for sitting down and in the homely phrase, "taking the left off one's feet."

Here is a glimpse of a screened porch attached to a farm kitchen near New Market, Md. Following suggestions made by the county home demonstration agent, the porch was arranged with a divan and an easy chair where the intervals between the more active kitchen tasks could be passed restfully. During six months of the year at least, and in Maryland some-

times more, the homemaker can sit out here when preparing the vegetables, or chatting with a morning caller, or pick up her darning bag, or otherwise spend the odd minutes that count up in the course of a day. The outlook into the yard is made attractive by shrubs and flowering plants. It can be seen from the kitchen, too.

Home beautification is one of the home-making activities being carried on by a great many farm women under the stimulus of extension workers of the United States Department of Agriculture and the various states. Suggestions are made for improving the existing surroundings, both out of doors and inside, by simple means such as this porch. They may usually be accomplished by the housewife herself with very little assistance or expense.

Combination Outfit Liked

(Prepared by the United States Department of Agriculture.)

Jane is going to wear one of her sun suits almost all day long while she visits a little friend who has a wonderful back yard with a sand pile in

With the Dress on the Sun Suit Serves for Underwear and Bloomers.

It, and swings and all sorts of other interesting things to play with. However, the automobile ride comes first, and Jane's mother feels that the sun suit, with its open top, is not quite enough protection from the breezes during the ride, even if Jane herself does not in the least mind appearing in public in her sun suit. So a little

matching dress has been designed, made as simply as possible, with the lower part of the sun suit serving as panties. By undoing one button and pulling the dress over her head, Jane is ready for play, and equally quickly, all dressed again to go home.

Little combination outfits like this will appeal to mothers who are obliged to take their children in public conveyances before reaching the beach or park where sun baths are possible, or those who for any other reason wish to be prepared for a quick change in the child's costume. The bureau of home economics of the United States Department of Agriculture has been much interested in designing practical, attractive clothes for little children,

The Sun Suit.

with special attention to easy laundering features and simple construction. Soft cotton prints make charming outfits of this kind.

Cement From Oyster Shells

Quantities of cement for all kinds of building purposes are being manufactured from oyster shells dredged from the waters of San Francisco bay. The shells extend over a large area, the beds ranging from 5 to 50 feet deep. Two big dredges, equipped with Diesel engines which supply electricity for the pumps that suck up the shells and deliver them through 15-inch pipes into dredges, work from three to five miles off shore with crews of ten men each.—Popular Mechanics Magazine.

Much Natural Ice Used

Of the 60,000,000 tons of ice produced and sold in 1928 about 10,000,000 tons were taken from rivers, lakes and reservoirs. Seven per cent of the members of the National Association of Ice Industries deal exclusively in natural ice, 5 per cent sell both manufactured and natural ice, while 88 per cent deal only in manufactured ice.

The Cozy Screened Porch

Outside View of Back Yard as Seen From Screened Porch, Maryland Farm Home.

Peggy's First Party

By ADELAIDE D. HUFF

PEGGY LONGMIRE sped up the two flights of stairs and down the long hall that led to her room. Once inside she flung off her coat and with eager fingers opened the long suit box that she had been carrying under her arm. Almost reverently she picked up the frock that lay inside, a filmy bit of pink tulle and satin.

"It looks darlinger than it did in the store even," she told herself. "Oh, if only he likes it and I don't seem too idiotically dumb. My first evening dress. . . . My first party tomorrow."

That night when Peggy went to bed she could not go to sleep. The endless events of the past few months seemed to go trouncing past her in a continuous procession; the death of her father, Rev. Walter Longmire, her leaving her small home town and coming to Kinston in search of work and finally, her getting a position in the firm of Myndenning and Davis, Real Estate Brokers. And to crown her joy, Jack Davis, the junior partner, had come over to her that first day with outstretched hand.

"I knew your father when he was dean of Littleton Presbyterian college," he said. "He was certainly a prince. I had two years' history under him. That must be twelve or thirteen years ago."

"I can remember Littleton," said Peggy, her face flushed with happiness, "although we left when I was only eight."

That had been the beginning of their friendship. Really the beginning and the ending until the other day when he had casually asked her to this party tomorrow night.

"The DeRossettis are going to have a fling Wednesday evening," he had said, "and they've been kind enough to invite me. They're giving their guests the privilege of asking any partners they choose. I'll be a nice crowd and I believe you'd enjoy it."

When at last the moment arrived the next day for Peggy's escort to call for her she laughed with sheer delight as she went downstairs to meet him.

As they entered the DeRossett home a few minutes later they were greeted by Mrs. DeRossett whose beautifully dressed hair and magnificent evening gown almost threw Peggy into a panic. Suddenly everyone seemed to be greeting Jack, and out of the crowd of strange faces emerged one that Peggy will never forget.

"Mrs. Myndenning, this is my little friend, Miss Longmire," said Jack easily.

"How do you do?" said Mrs. Myndenning coldly, looking at the girl through her lorgnette. "You must be a newcomer. I thought I knew everyone in town. Where do you live?"

Peggy flushed uncomfortably. She knew that society folk did not live on Fourth street in little back bedrooms, but neither she nor her escort had time to answer for a tall, gawky girl came rushing up and put a proprietary hand on Jack's arm.

"Miss Myndenning," introduced Jack stiffly.

"How do you do? I've been looking for you everywhere," she told him, turning her back on Peggy and completely ignoring her.

"Yes," said Mrs. Myndenning, "we both felt that you rather owed Elizabeth first consideration. . . . You know Jack and Elizabeth are very, very close friends," Mrs. Myndenning finished, turning to Peggy.

"I felt that way, too, until recently," Jack explained comfortably. "We were just like a big family together and I hope it will continue to be that way, but—since Peggy and I are going to—be married soon, I rather felt that I owed something to her."

"Engaged?" gasped Mrs. Myndenning, white with rage.

"Come on, mother, do," said Elizabeth irritably. "Why shouldn't he be engaged if he wants to?"

A few minutes later Peggy and Jack had managed to make their escape unnoticed and were speeding away from the scene of gaiety.

"That certainly was a strange first party," laughed Peggy as she slowed down and brought the car to a standstill.

"Peggy, will you forgive me for what I said?" he asked. "It was a little premature, but I meant it, all right."

"Then I'll forgive you if you meant it," laughed Peggy.

And for a long blissful moment they both forgot Peggy's lovely frock that should not have been mused and the party and the hateful Mrs. Myndenning.

"It wasn't a very appropriate place to propose," said Davis after a while, "but I had to do something with that fool woman. She's been trying to—"

"To marry you off to Elizabeth," finished Peggy.

"The worst is she's my partner's wife," said Davis solemnly. "I hope she doesn't stir up trouble. But, say, just won't she make somebody a cat of a mother-in-law!"

"I guess there are lots of mothers who prevent their children from getting married just by their own hatefulness."

"Lots of 'em," agreed Jack joyfully, "but yours isn't one of them."

Shows Benefit of Rest

A man who does heavy manual work and is in good health is usually four pounds heavier on Monday morning after his Sunday rest.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take.

Any drug store has the genuine, prescription product.

PHILLIPS Milk of Magnesia

W. N. U., DENVER, NO. 29-1929.

Cadet Takes Double Obstacle

One of the cadets attending the famous cavalry school at Tor Di Quinto takes a double obstacle with his mount, during the visit to the school by King Victor Emmanuel of Italy.

DIAMOND PICK-UPS

When Bubbles Hargrave gets into the game at St. Paul he bats in the cleanup position. He is the manager.

Gordon Slade, sensational shortstop of the Mission club, is a former star at Oregon Agricultural college.

Day by day Chick Hafey stores up evidence to prove he is the hardest right-handed batter in the National league.

Al Tyson, forced out of the Brooklyn outfield by a broken leg, is now trying his hand at pitching for the Scranton club.

Charley High, sold by Columbus to Minneapolis, hit a home run with the bases full on his first appearance in a Miller uniform.

Jess Doyle, Toronto International league pitcher and former member of the Detroit staff, has been sold to Fort Worth of the Texas league.

Since it was first organized, the National league has had 24 different clubs as members. It had 12 teams at one time and six at another time.

Charles C. Stebbins of Bonaparte, Iowa, sophomore second baseman on the University of Iowa baseball team, has been elected captain for next year.

The Timber league of the Northwest will be the first baseball outfit to test John Heydler's plan of letting a tenth man bat for the pitcher in its games next season.

The Boston Red Sox sold infielder Jerry Standaert to the Mobile club of the Southern league. Standaert was drafted by the Red Sox from the Memphis Chicks.

Major league scouts who have seen Reynald MacDonald pitch for the University of Oregon team consider him the outstanding college ballplayer in the Pacific Northwest.

Philadelphia is enjoying its baseball these days. The Macks and the Phillies, its representatives in the major leagues, are thrilling the fans with flocks of base hits.

Tellis Baumgartner, ace of the Rutherford college pitching staff, has signed a contract with the Cleveland Indians. He lost only four games in four years of collegiate hurling.

Kansas City has the best defense in the American association, allowing its opponents less runs than any other club can boast. The pitching staff probably is the best in the league.

The Pittsburgh Pirates management has announced Coburn Jones, peppery shortstop, has been sent to the Wichita club of the Western league in part payment for Shortstop Sammy Clarke.

Only three big league ball players, Pete Donohue, Luke Sewell and Ted Lyons, have been with the same club throughout their professional careers. All made the grade upon leaving college.

Although Heinie Schuble, Detroit shortstop, was struck in the face by a batted ball in a recent game, he kept on playing. After the game it was discovered a bone in his cheek had been broken.

Ball players complain that they have great difficulty in keeping their eyes on the ball at the Yankee stadium because the smoke from thousands of cigars eddies about in the shafts of sunlight.

"The Waner boys developed their hitting skill when boys in Oklahoma by tossing corn cobs and hitting them with a broom." We guess some of our wilder pitchers must have tossed stones at passing trains.

Coaching Staff at Ohio Now Complete

The varsity football coaching staff of Ohio State university for the next year has been completed, according to Sam Willaman, head coach. The staff will include Swede Oberlander, Don Miller, Charley Seddon, George Hauser, Howard Yerges, and Clarence MacDonald.

Was Willing to Sell Donovan for One Cent

For Sale—"Wild Bill" Donovan, Price—One Cent. The late Bill Donovan, who helped the Detroit Tigers win pennants in the American league in 1907-08-09, was on the block for that trivial sum in his first year of minor league baseball.

In his first game with Waterbury, Donovan walked 10 men, hit a few and let loose several wild pitches. Roger Connor, former baseball star who was managing Waterbury, paced the floor several times after the game and came to the conclusion that one cent was Donovan's worth.

A rival manager placed a penny on the table and was willing to "take a chance" on Donovan. However, Connor's assistant manager begged his boss to hold off the deal several days. Connor agreed.

The deal never came off. Two days later Donovan was the hero of a 14 inning game. With the score 0 to 0 up to the 14th inning, Donovan stepped up to the plate and drove a home run, winning his own game.

Cochet Defeats Menzel

An action photograph of Cochet, the champion of France, who recently defeated Menzel, the German champion.

Record of University of Iowa for Past Season

Twenty-eight victories, twenty-seven defeats and two ties constitute the record which the University of Iowa sports teams made in western competition during the season of 1923-24. The best marks were turned in by the football, baseball and cross-country squads, for they accounted for sixteen victories. The varsity football team turned in three victories against two defeats, while the reserve eleven won three games and lost none. The cross-country squad also had a clean slate with three victories while the baseball team won seven of the Big Ten contests.

Night Football Likely to Be Put on in Rose Bowl

Night football will make its appearance in southern California next fall. Harlan Hall, manager of the Tournament of Roses association announces that flood lights are being installed in the picturesque Rose Bowl, scene of the annual New Year's day East-West game and that three Friday night games had been scheduled. Occidental college will play University of Arizona in the Rose Bowl, September 17; Teachers' College of Santa Barbara, October 4, and University of New Mexico, October 11.

The TRAIL OF '98
A Northland Romance
by Robert W. Service
ILLUSTRATIONS BY IRWIN MYERS

STORY FROM THE START

Athol Meldrum, young Scotsman who tells the story leaves his mother and brother, Garry, to seek his fortune. At San Francisco, practically penniless, he takes a laborer's job, and meets a fellow adventurer who he dubs, the Prodigal. The Prodigal is anxious to join the rush of gold seekers into Alaska, and Meldrum agrees to go with him after he (the Prodigal) has come back from a visit to his wealthy father in the East. Athol, in great need, is befriended by Jim Hubbard ("Salvation Jim"). When the Prodigal returns, the three men join the stampede into the Frozen North. On the boat is a young girl obviously out of place. She is traveling with her grandfather and a hard-looking couple named Winklestein who figure as her uncle and aunt. Athol has an opportunity to befriend her, and she tells him a sad story of her life. She is journeying into Alaska to take care of her grandfather, who is obsessed with the idea of getting rich in Klondike. Her name, she tells him, is Berna. Landing at Skagway, Athol's party at once takes the trail in a snowdrift on the Chilkoot trail, which Berna and her companions had taken, hundreds of lives are lost. Fearful for Berna's safety, Athol hastens to the scene. He finds the old man dead and learns that Berna is pros- trated. Madam Winklestein refuses to let him see the girl, but he leaves a letter for her.

CHAPTER IV—Continued

Our party was well qualified to pass the test of the trail. The Prodigal was full of irrepresible enthusiasm, and always loaded to the muzzle with ideas. Salvation Jim was a mine of foresight and resource, while the Jam-wagon proved himself an insatiable glutton for work. Altogether we fared better than the average party.

We were camped on the narrow neck of water between Lindeman and Bennett, and as hay was two hundred and fifty dollars a ton, the first thing we did was to butcher the ox. The next was to see about building a boat. We thought of whipsawing our own boards, but the timber near us was poor or thinned out, so that in the end we bought lumber, paying for it twenty cents a foot. We were all very unexpert carpenters; however, by watching others, we managed to make a decent looking boat.

The ice was going fast. Strangers were still coming in over the trail with awful tales of its horrors. Bennett was all excitement and seething life. "Thousands of ungalleyed boats and scows were waiting to be launched. Already craft were beginning to come through from Lindeman, rushing down the fierce torrent between the two lakes.

The ice was loose and broken. We were all ready to start in a few days. The mighty camp was in a ferment of excitement. Every one seemed elated beyond words. On, once more, to Eldorado! A great exultation welled up in me, the voice of youth and ambition, the lust to conquer. I would succeed, I would wrest from the vast, lonely, mysterious North some of its treasure. I would be a conqueror.

Silent and abstracted, I looked into the brooding disk of sheeny sky, my eyes dream-troubled. "Then I felt a ghostly hand touch my arm, and with a great start of surprise, I turned. "Berna!"

The girl was wearing a thin black shawl around her shoulders, but in the icy wind blowing from the lake, she trembled like a wand. Her face was pale, waxen, almost spiritual in its expression; and she looked at me with just the most pitifully sweet smile in the world.

"I'm sorry I startled you; but I wanted to thank you for your letter and for your sympathy. You see, I'm all alone now." The voice faltered, but went on bravely. "I've got no one that cares about me any more, and I've been sick, so sick I wonder I lived. I don't know you'd forgotten me, and I knew you, but I've never forgotten you, and I wanted to see you just once more."

She was speaking quite calmly and unemotionally. "Berna!" I cried; "don't say that. Your reproach hurts me so. Indeed I did try to find you, but it's such a vast camp. There are so many thousands of people here. Time and again I inquired, but no one seemed to know. No, Berna, I didn't forget. Many's and many's a night I've lain awake thinking of you, wondering, longing to see you again. What a little white whisp you are! You look as if a breeze would blow you away. You shouldn't be out this night, girl. Put my coat around you, come now."

I wrapped her in it and saw with gladness her shivering cease. In the opal light of the luminous sky her great gray eyes were lustrous. "Berna," I said again, "why did you come in here, why? You should have gone back."

"Gone back," she repeated; "indeed I would have, oh, so gladly. But you don't understand—they wouldn't let me. After they had got all his money

—and they did get it, though they swear he had nothing—they made me come on with them. They said I owed them for his burial, and for the care and attention they gave me when I was sick. They said I must come on with them and work for them. I protested, I struggled. But what's the use? I can't do anything against them any more. I'm weak, and I'm terribly afraid of her."

She shuddered, then a look of fear came into her eyes. I put my hand on her arm and drew her close to me. "This is terrible, Berna. What have you been doing all the time?" "Oh, I've been working, working for them. They've been running a little restaurant and I've waited on table. But we're going down the lake to-morrow, so I thought I would just slip away and say good-by."

"Not good-by," I faltered; "not good-by." Her tone was measured, her eyes closed almost. "Yes, I'm afraid I must say it. When we get down there, it's good-by, good-by. The less you have to do with me, the better."

"What do you mean?" "Well, I mean this. These people are not decent. They're vile. I must go with them; I cannot get away. Go your way and leave me to whatever fate is in store for me."

"Never!" I said harshly. "What do you take me for, Berna?" "My friend, you know, after his death, when I was so sick, I wanted to die. Then I got your letter, and I felt I must see you again for—I thought a lot of you. No man's ever been so kind to me as you have. They've all been—the other sort. I used to think of you a good deal, and I wanted to do some little thing to show you I was really grateful."

"Oh, come, Berna, never mind that." "Yes, I mean it. I just wanted to tell you the things a poor girl thought of you. But now it's all nearly over. We've neither of us got to think of each other any more. . . . and I just wanted to give you this—to remind you sometimes of Berna."

It was a poor little locket and it contained a lock of her silken hair. "It's worth nothing, I know, but just keep it for me."

"Indeed I will, Berna, keep it at all times, and wear it for you. But I can't let you go like this. See here, girl, is there nothing I can do? Berna, Berna, look at me, listen to me! Is there? What can I do? Tell me, tell me, my girl."

She seemed to sway to me gently. Indeed I did not intend it, but somehow she was in my arms. She felt so slight and frail a thing, I feared to hurt her.

Then I felt her bosom heaving, and I knew she was crying. For a little I let her cry, but presently I lifted up the white face that lay on my shoulder. It was wet with tears. Again and again I kissed her. She lay passively in my arms. Never did she try to escape nor hide her face, but seemed to give herself up to me. Her tears were salt upon my lips, yet her own lips were cold, and she did not answer to my kisses.

At last she spoke. Her voice was like a little sigh. "Oh, if it could only be!" "What, Berna? Tell me what?" "If you could only take me away from them, protect me, care for me. Oh, if you could only marry me, make me your wife, I would be the best work my fingers to the bone for you; I would starve and suffer for you, and walk the world barefoot for your sake. Oh, my dear, my dear, pity me!"

It seemed as if a sudden light had

flashed upon my brain, stunning me, bewildering me. I thought of the princess of my dreams. I thought of Garry and of mother. Could I take her to them?

"Berna," I said sternly, "look at me." She obeyed. "Berna, tell me, by all you regard as pure and holy, do you love me?" She was silent and averted her eyes.

"No, Berna," I said, "you don't; you're afraid. It's not the sort of love you've dreamed of. It's not your ideal. It would be gratitude and affection, love of a kind, but never that great dazzling light, that passion that would raise to heaven or drag to hell."

"How do I know? Perhaps that would come in time. I care a great deal for you. I think of you always. I would be a true, devoted wife—"

"Yes, I know, Berna; but you don't love me, love me; see, dear. Listen, Berna! Here's where our difference

Her Tears Were Salt Upon My Lips, Yet Her Own Lips Were Cold.

In race comes in. You would rush blindly into this. You would not consider, test and prove yourself. It's the most serious matter in life to me, something to be looked at from every side, to be weighed and balanced."

As I said this, my conscience was whispering fiercely: "Oh, fool! Coward! Paltering, despicable coward! This girl throws herself on you, on your honor, chivalry, manhood, and you screen yourself behind a barrier of convention."

However, I went on. "You might come to love me in time, but we must wait a while, little girl. Surely that is reasonable! I care for you a great, great deal, but I don't know if I love you in the great way people should love. Can't we wait a little, Berna? I'll look after you, dear; won't that do?"

She disengaged herself from me, sighing woefully. "Yes, I suppose that'll do. Oh, I'll never forgive myself for saying that to you. I shouldn't, but I was so desperate. You don't know what it meant to me. Please forget it, won't you?"

"No, Berna, I'll never forget it. I'll always bless you for having said it. Believe me, dear, it will all come right. I'll watch to one harms you, and love will come to both of us in good time, that love that means life and death, hate and adoration, rap-

ture and pain, the greatest thing in the world. Oh, my dear, my dear, trust me! Let us wait a little longer, just a little longer."

"Yes, that's right, a little longer." Her voice was faint and toneless. She disengaged herself. "Now, good-night; they may have missed me."

Almost before I could realize it she had disappeared amid the tents, leaving me there in the gloom with my heart full of doubt, self-reproach and pain.

Oh, despicable, paltering coward!

CHAPTER V

It was spring when we set sail on the sunlit waters of Lake Bennett. Never had I felt so glad. And indeed it was a vastly merry mob that sailed with us, straining their eyes once more to the Eldorado of their dreams. Yet, under all the mirth and gaiety, you could feel, tense, ruthless and dominant, the spirit of the trail. Klondike, or bust! Once more the slogan rang on bearded lips; once more the gold-lust smoldered in their eyes. The old primal lust resurged.

Of all who had started out with us but a few had got this far. Of these Mervin and Hewson were far in front, victors of the trail, qualified to rank with the Men of the High North, the sordoughs of the Yukon valley. Three days' start ahead were the Winklestains.

I kept a keen lookout for them and every day I hoped we would overtake their scow, for constantly I thought of Berna. Her face, so wistfully tender, haunted me, and over and over in my mind I kept recalling our last meeting.

At times I blamed myself for letting her go so easily, and then again I was thankful that I had not allowed my heart to run away with my head. For I was beginning to wonder if I had not given her my heart, given it easily, willingly and without reserve. And in truth at the idea I felt a strange thrill of joy. The girl seemed to me all that was fair, lovable and sweet.

We were now skimming over Tagish lake; a dead calm, a blazing sun, a seething mist of mosquitoes. We sweltered in the heat; we strained, with blistered hands, at the oars; we cursed and tolled like a thousand waders of that grotesque fleet. We entered the Fifty-mile river; we were in a giant valley; her after tier of benches rose to sentinel mountains of austere grandeur.

The river was our beast of burden now, a tireless, gentle beast. Then one evening as we were sweeping down the placid river, the current suddenly quickened. The banks were sliding past at a strange speed. Swiftly we whirled around a bend, and there we were right on top of the dreadful canyon. Straight ahead was what seemed to be a solid wall of rock. The river looked to have no outlet; but as we drew nearer we saw that there was a narrow chasm in the stony face, and at this the water was roaring and charging with an angry roar.

I was in the bow. All at once I saw directly in front a scow struggling to make the shore. In her there were three people, two women and a man. I saw the man jump out with a rope and try to snub the scow to a tree. Three times he failed, running along the bank and shouting frantically. I saw one of the women jump for the shore. Then at the same instant the rope parted, and the scow, with the remaining woman, went swirling on into the canyon.

All this I saw, and so fascinated was I that I forgot our own peril. I heard a shrill scream of fear; I saw the solitary woman crouch down to the bottom of the scow, burying her face in her hands; I saw the scow rise, hover, and then plunge downward into the angry maw of the canyon.

The river hurried us on helplessly. We were in the canyon now. About midway was a huge basin, like the old crater of a volcano, sloping upward to the pine-fringed skyline. Here was a giant eddy, and here, circling round and round, was the runaway scow. The forsaken woman was still crouching on it.

"Keep clear of that scow," I heard some one shout. "Avoid the eddy." It was almost too late. The ill-fated scow spun round and swooped down on us. Jim and the Jam-wagon gave a desperate strain at the oars. I saw the scow swirling past, just two feet from us. I looked again—then with a wild panic of horror I saw that the crouching figure was that of Berna.

I remember jumping—it must have been five feet—and I landed half in, half out of the water. I remember clinging a moment, then pulling myself aboard. I heard shouts from the others as the current swept them in to the canyon. I remember looking round and cursing because both sweeps had been lost overboard and lastly I remember bending over Berna and shouting to her ear. "All right, I'm with you!"

DENVER BUSINESS DIRECTORY

SPECIAL RUSH SERVICE secured if you mention this paper when writing firms below.

Grund Dry Cleaning

CLEANING DYEING DENVER'S EXPERT DYERS AND LACE CURTAIN CLEANERS Take advantage of our 2-day parcel post service and send your garments, rugs and curtains to a reliable, up-to-date and modern equipped cleaning and dyeing plant. Return parcel post charges paid on orders amounting to \$2.

BOHM-ALLEN JEWELRY CO.

Established 1879 DENVER—SILVERWARE JEWELRY Manufacturing and Repairing 16th and Welton

SAVE \$10 TO \$20 on every saddle or harness. Buy direct from the factory. No middle-man's profits. Send for free catalog—maker to consumer.

DYEING THAT PAYS

THE MODEL CLEANERS AND DYERS Main Office and Plant, 1317 Broadway Denver, Colo. Address all correspondence Dept. D.

AUTO PARTS

PIONEER AUTO WRECKING & METAL CO. Largest auto wrecking house in the West. 2121 West 13th Ave., Denver. Mails 7194. Prompt attention to mail orders.

SNYDER'S Made-Right Saddles and Harness

Direct to Consumer at Wholesale Prices Send for New Catalog No. 23 O. J. SNYDER 1129 Larimer Street Denver, Colo.

INFORMATION DEPARTMENT

Commercial inquiries answered and information gladly furnished without cost. Address any firm above.

COLORADO AGGIE SOW IS NOW WORLD'S LARGEST

Fort Collins, Colo.—How the world's largest sow, Titan Queen, registered Duroc Jersey owned by the Colorado Agricultural College, was built up to her present phenomenal weight of 1,123 pounds in the past eight months is an interesting story as told by R. B. Broad, chief herdsman for the college, who has had personal charge of the task. The huge sow is also the largest Duroc Jersey hog in the world.

Titan Queen was purchased at the International Livestock Exposition in Chicago last December by the Colorado school with the idea of building her to a record weight. She weighed 340 pounds at that time, the same weight she had registered at the National Swine Show in 1927, when she was the largest Duroc sow shown.

In thirty days after Dec. 12, when she was received at the college farm, she added twenty pounds, so that she weighed 560 pounds when shown at the National Western Stock Show in Denver in January.

It was the combined faith of Prof. George E. Morton, head of the animal husbandry department of the college, and Herdsman Broad which resulted in the determination to attempt a world's record for weight.

Titan Queen is a direct descendant of the four principal blood lines of the Duroc breed: Orion (Cherry King, Colonel, Pathfinder and Sensation). These blood lines have produced a long succession of large animals and are well represented in the agricultural college herd. Every world's champion Duroc at the National Swine Shows has carried from one to four of these strains of breeding, according to C. F. Burke, director of the National Duroc Record Association, who has been making the official weights on Titan Queen during recent weeks.

Mr. Broad says that no special treatment was given the sow. She measures nine feet four inches from the tip of her nose to the tip of her tail, eighty-eight inches in circumference around her heart, eighty-four inches around the flank, forty-six inches in height and ten and one-half inches around the smallest part of her hind leg.

The previous largest sow was Lady Jane, owned by John Anderson of Altoona, Ill., a Poland China which weighed 1,080 pounds in 1926.

New Sanatorium Planned

Colorado Springs.—Plans for the St. Francis Sanatorium, which will be erected on a site adjoining St. Francis Hospital, are expected to be completed soon, according to Sister Elizabeth, another superior. The sanatorium, to be built at a cost of \$250,000, will be one of the finest institutions in the country for the treatment of tuberculosis.

Recommend Spanking for Stowaway

St. Louis, Mo.—What Graf Zepplin Stowaway Clarence Terhune needs is a good old-fashioned spanking, according to Probate Judge C. M. Holtcamp. The judge recommended the chastisement while he ordered the one-time famous stowaway to pay \$1,097.67 to his former manager, Frank E. McCambridge, to reimburse McCambridge for money he had advanced to secure contracts for Terhune following his famous stowage.

Jewelers Unable to Duplicate Goa Stone

Goa, a settlement on the West coast of India, has for centuries been the property of the Portuguese, says an article in London Tit-Bits. Shortly after their occupation, the Jesuits appeared and set up a monastery, and it was there that a special sort of "jewel" was made. The Jesuits made these stones, which have come to be known as Goa stones, from various solidified drugs, but we today are totally "in the dark" as to what drugs they were composed of and how they were made.

Each stone was mounted in a silver filigree case and represented fine examples of old workmanship. When the owner of the stone was troubled with indigestion he had only to scrape off a small portion of his stone, and drink it in a glass of water.

Highest Form of Power

The regeneration of a sinner is evidence of power in the highest sphere—moral nature; with the highest prerogative—to change nature; and operating to the highest result—not to create originally, which is great, but to create anew, which is greater.—William Arthur.

Let the Heart Rule

Sincerity is the very foundation stone of true friendship. It is also a human trait that is hard to counterfeit, as the sincere friendly impulse comes from the soul of a man and not from the circulating mind. Think kindly and friendly thoughts. If you have a heart and a soul, why be ashamed of them? Bring them into the shop, the office and your daily life. The hand may be cunning, and the head may contain the brain that can conceive the most brilliant thoughts, but every good and worthy impulse comes from the heart. Strengthen your faith in men; think kindly of them, believe that they are your friends, and in the long run they will be.—Exchange.

And Don't Be Slow About It

If you want to know what's in the soup you must do a little spooning.—Pathfinder Magazine.
